Tuesday, January 30, 1968
7:50 a.m.

Mr. President:

Herewith Westy reports an extremely successful use of intelligence to identify and attack with B-52's the n&w, recently established senior headquarters west of the DMZ.

(Some of our best analysts suspect Gen. Giap may have taken personal command of this installation.)

Westy believes the attack may "at least delay" the major offensive in Northern I Corps.

W. W. Rostow

MAC 01430

*We must hold this attack with highest possible security.
