

C.O. Jack Johnson 12/99

We came into FSB Bert right behind some APC's which were lined up side by side. They were firing out to the west -

We came in and landed right in front of the road as I recall. We left by turning right and climbing out toward the North.

There was so much ground fire, Artillery and Air strikes going on it was hard to see where anything was. I

remember it was a ring of fire, red tracers going out and green VC tracers coming in that we landed into.

There was a line of VC bodies right along the road that must have come up from the South where the main attack came from. They must have followed the road into the position.

As I remember we brought in mostly 50 Cal, $\frac{1}{2}$ M-16 ammo and hauled out wounded during each trip. I can't remember for sure but I think we made two or three trips in that night.

SECONDARY ATTACK
2330 CONTINUOUS

SMALL ARMS &
RPG
(2330-0311)
