Here is a color copy of my aircraft
67-17-801

It was a Black Widow aircraft from
late 1968 (brand new) until Widows left
country. It was then transferred to
another unit and was later shot down -
entire crew killed. It's one of the
helicopters in the book/movie "BAT 21"

Anyway, they kept these same markings
the whole time in the 101st.

White highlights on 2nd Platoon - Yellow
(Gold) on 1st Platoon

White highlights on skid toe, skid heel cap
outside edge of vertical fin.

Blue diamond on side of tail.

Note the small 101st emblem below
number on tail.

There were several variations over the
year, but this was the way they looked
70-71. Ones that were marked a
little differently, were older ones we

still had from 67-68 or had acquired
from other units. My aircraft was
1st assigned as new aircraft to 101st - so
it has the official markings.
I hope it helps — Bob

1st to 101st - so it has the official markings.

My aircraft was 1st assigned as new aircraft to 101st - so it has the official markings.
