

Introduction.

We have realized that powerful army to win in this time would be necessary towards the point of views of: Culture, Social affairs, politics - army's affairs.

Just taking a look at our military organization, we have to realize that a large defect is still existed: that's concerning of politics and Psychological warfare (Psywar).

We all know about it but nobody has found an effective manner to solve the problem although we have had a Directorate of political and Psychological warfare...

This is the plan which has been built up completely but practical background is needed by having training and following.

This plan aims at matching the Army with the present war by 3 ways:

- Servicemen should also be trained as administrative and political cadres.

- Multiplication of Army.
- To pursue a new strategy.

Its form is an organization of agreement (or harmony) which means a small unit comprising 3 military Servicemen for studying, following and encouraging each other.

If this wouldn't have been carried out, it also needed some cadres ranging from squad chief to higher ranged servicemen. who understand the policy to direct their squad members. whenever the military Servicemen understand throughly this means that they realize their role and their duty towards this present war. And the organization of troops are directed to these ways, and it's sure that the victory is not a burning question any more, because we're much better than V.C. on each aspect.

This document is not based on the form

of organization which is very easy to carry on but it aims at its contents and spirit of organization. And it contains many aspects which are surely to create an harmony to bring a progress towards an objective that we have wanted, this means we should have the victorious troops.

But people asked themselves that to create the victorious troops are a paramount element to win the war? we have to answer right away that, it is necessary thing, but not enough at all!. Therefore after the creation of a powerful Army, the strong and effective administration should be mentioned to another opportunity if needed.

Both activities of the Army and the administration should go hands in hands and will reach to an effective and long victory.

At last, to escape from "the trouble Circle" of politics which is caused by this world's situation towards an underdeveloped Country

Such as V.N; we should find a new form of politics, i.e. a appropriate ~~opp~~ policy which does not counter Democracy and also an individual Control is unacceptable.

The spirit of this policy is the unique creation and it's not a light conciliation of some formal brains.

In the future, we shall discuss this new movement. And this is some pages containing the first part of introduction
