Crude oil production increases annually (1986 – 2000)

1996 - 2000	53.330 million tons
1991 - 1995	29.38 million tons
1986 - 1990	5.22 million tons

Production of Associated gas
1996 - 2000 5.4 billion m³

*Vietsovpetro Welcomes You,
Dear Visitors !*

Vietsovpetro - the first joint venture between Vietnam and the former Soviet Union (now Russian Federation) was founded on 19th June, 1981. This is the biggest enterprise in the field of oil and gas exploration and production on the southern continental shelf of Vietnam, operating in White Tiger and Dragon oilfields. Since 1999, management and development of Big Bear oilfield has also been committed to the joint venture by PetroVietnam. Accumulated oil production from mid- 1986 to end of 2000 came up to 88 million tons. From 1995 to end of 2000, over 5 billion M³ of associated gas were transported ashore to supply DinhCo LPG, BaRia and PhuMy thermal Power plants.

Vietsovpetro's plan for the next five years includes extension of its exploration in other hydrocarbon-prospect structures, maintaining the over-10million-ton- per-year crude oil output.

Vietsovpetro was honored for its remarkable achievements with the noble appellation "Labor Hero", granted by the Vietnamese Government on the occasion of 50 millionth ton of crude oil production.

Vietsovpetro's specialized petroleum port provides safe conditions for entrance of up to 10,000-ton deadweight vessels. Its complex material and logistics base is capable of servicing and catering annual oil production of 13-15 million tons. There are also in Vietsovpetro the Institute for Science Research and Offshore-Structure Design, the Offshore Construction Division, the Drilling and Well-Workover Division, a fleet of specialized vessels for offshore installation and service, the Safety & Environmental Protection Center, and other subsidiaries.

Vietsovpetro is willing to cooperate with other companies and supply such services as petroleum geology, design & construction of offshore petroleum installations and facilities, oil & gas exploration and production drilling, marine transport, sub-sea-structure survey, offshore salvage, fire fighting and environmental protection.

Production Activities

- Crude-oil Production: 54.5 million tons from White Tiger and Dragon fields;
- Gas Production: 5.7 billion m3;
- Construction: 8 Offshore Structures;
- Exploration Drilling: 16 wells (65,000m);
- Production Drilling: 76 wells;

Name of vessel: HOANG SA
Ex. : ISPOLIN
Type of vessel : Crane Vessel
Built in / by : 1984 / Singapore
Flag : VIETNAM
Port of registry : SAIGON
Register class : K ★ 1
Lifting Capacity : 1,200T

Name of vessel: TRUONG SA
Ex. : TITAN - 01
Type of vessel : Crane Transport Vessel
Built in / by : 1984 / Finland
Flag : VIETNAM
Port of registry : SAIGON
Register class : Km ★ L2 1 A2
Lifting Capacity : 600T
