MESSAGE FROM THE GENERAL DIRECTOR

TRÍCH LỜI CỦA TỔNG GIÁM ĐỐC

“Construction may carry a high price tag,

yet that does not guarantee timely delivery of the project. Professional management brings the necessary balance to ensure that work is completed on time, done right, and delivered at the right price. The client's need for the facility to become operational and available for use on schedule is paramount. At the same time, the client must be confident that the level of quality being delivered will avoid problems down the road. Through effective project management and construction management, Delta Equipment & Construction Company delivers quality projects that meet these client needs. ”

Mr. Alfonso L. DeMatteis
Chairman & General Director

Construction Management and Consultant Services

Delta leads off your construction project team as the owners' representative, providing years of knowledge and experience in value engineering, construction methods and materials, approvals from the necessary authorities and a long history of sound working relationships with subcontractors of all trades.

Delta performs construction management services with sensitivity to budget constraints and strict organizational principles of all documentation. We control all work and monitor quality in compliance with the project schedule and quality specifications.

Review and Advise on Contracts

We comment on contracts between contractors and suppliers, advise on separate direct contracts, ensure designers have met contract obligations, monitor importation of goods and materials and verify service contracts with all authorized utility providers.

Quality Assurance Measures

We plan and implement an inspection system, review and advise on all contract documents, monitor work to ensure compliance with construction drawings and specification, review and approve materials and advise on contractual obligations with all subcontractors.

Programming

We review and comment on construction schedule to ensure the critical path is identified and milestones are set, monitor progress of work, advise on change orders and review lead times for the supply of long delivery components.

Administration

We coordinate successful completion, arrange progress meeting minutes, issue site instructions for any variations to the project, review and comment on any time/cost claims, monitor the monthly financial status of project and prepare and issue the final account and agree settlement.

Commissioning

We coordinate commissioning of the building services, undertake practical completion inspection, issue commencement of maintenance warranty period and obtain all maintenance close out documents for easy reference after turn over.

Quality Assurance, Quality Control & Safety Compliance

Delta Equipment and Construction Company is the premiere candidate to ensure quality & safety in every aspect of every project. With complete knowledge of international code compliance issues in diversified industries and vast experience with methods and materials available in Viet Nam, Delta can guarantee client satisfaction from ground-breaking to project completion.

Purpose

The objective of the Quality Assurance Team is to institute a standard and uniform Quality Surveillance Program for their construction sites. The Team assures that the Contractor uses proper tools and equipment, as well as qualified personnel and appropriate procedures, to produce quality work & safety compliance as required in contract documents.

Quality Assurance at Classroom B-1, Da Nang University, Da Nang

West Lake International Tower, Hanoi
Tháp cao ốc quốc tế Hồ Tây, Hà Nội

Hanoi National University's 5-story Dormitory
Ký túc xá 5 tầng - Đại học Quốc Gia Hà Nội

Program

The Program is a tool for reasonable assurance that:

- The work criteria is being followed.
- Specifications are being met.
- Normal good construction practices are in effect.
- The required level of documentation is being maintained.

Work

The Work determines satisfaction of the Contractor's obligations by random sampling.

Inspection & Test Procedures

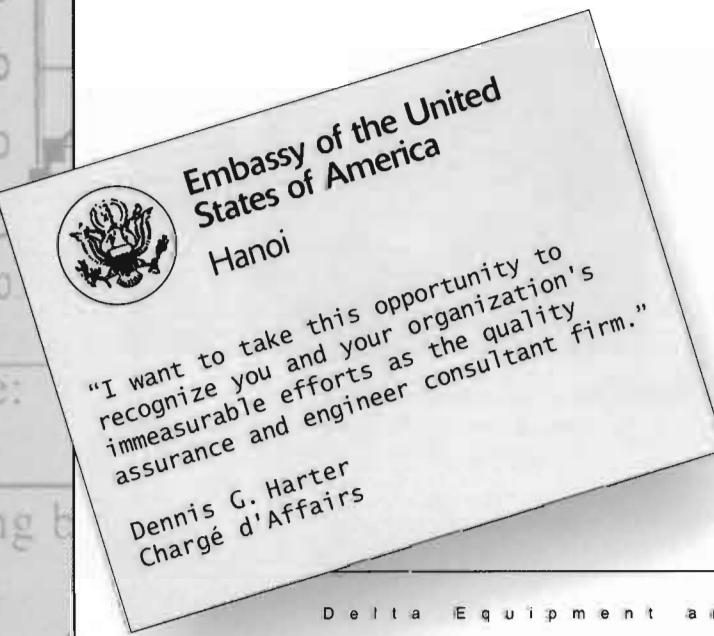

Certain critical operations require specific inspection instead of random sampling, such as:

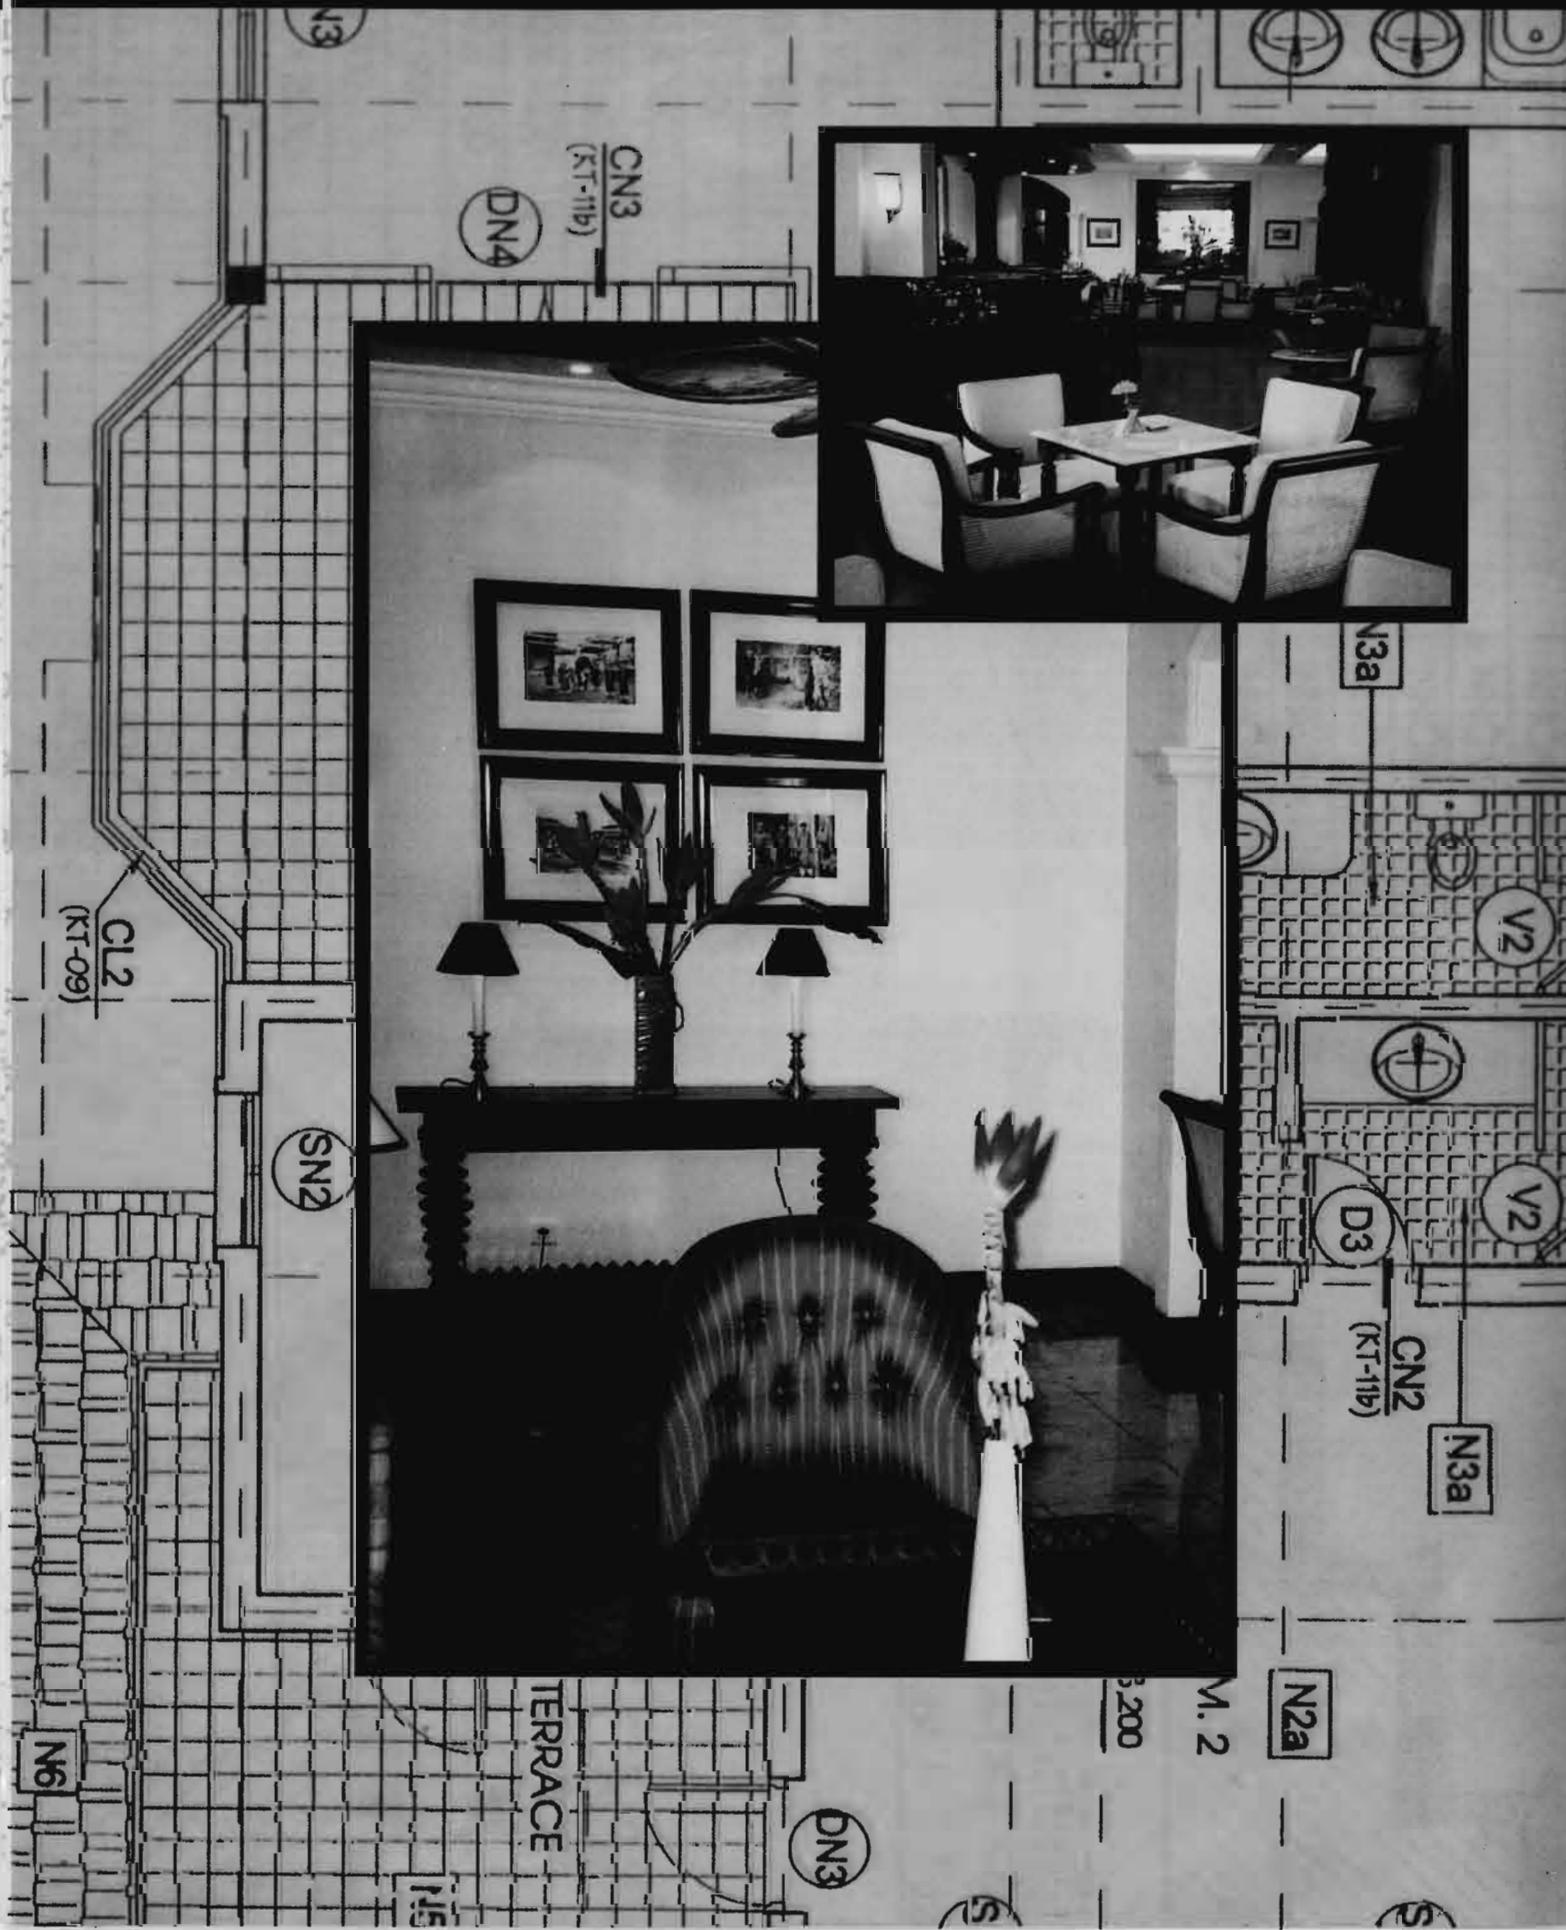

- Soil compaction
- Concrete inspection
- Material specification inspection of each trade
- Equipment alignment
- Hydro Testing
- Site cleanliness and safety
- Punch list completion and warranty assurance

Renovation & Interior Fit-Out

Delta performs interior fit-out work with sensitivity to architectural features and details. Delta's resources of local and international standard materials and furniture provide clients with a vast range of products to serve diversified requirements and to achieve the desired enhancement. Renovation work is carried out in a systematic, disciplined manner to minimize interruption of a client's daily operation. A minimal, temporary inconvenience which results in a permanent improvement.

Delta's Design-Build Services provides our clients with a turn key operation from the initial architectural schematic design to the finished building product.

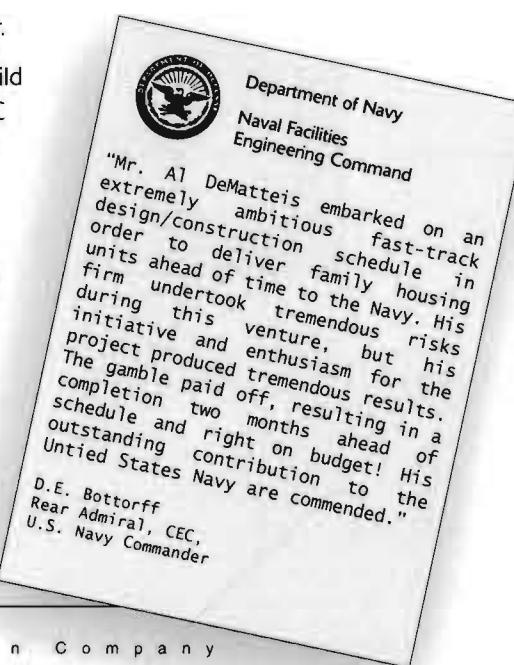

Delta has a team of architects and engineers with a strong working relationship and with the necessary skilled trades to ensure a quality project.

Delta's Board of Management has a long history with the Design-Build concept in America. In Vietnam we have over seven years experience.

Ten Reasons why owners benefit from Design-Build

- Single source of responsibility.
- Guaranteed maximum cost (GMP).
- Ability of Owner to stop after preliminary design work has been completed.
- Valuable input and coordination from both contractor and design team from beginning to the end of project.
- Reduced time to complete the project; use of fast-track program.
- Owner can get money back if project is built under the estimated cost.
- Economical procedure to handle change orders.
- Reduced number of claims.
- Minimum frustration and aggravation for the Owner.
- Comprehensive design-build contract document in AGC 400 contract that protects Owner and Contractor.

A "Preliminary Design-Build Agreement" between Owner and Contractor allows the Owner to terminate the design-build concept if not satisfied.

Delta Equipment and Construction Company is the Executive Agent and Distributor of STAR Building Systems and ASTRON Steel Pre-Engineered Buildings - an American Corporation - in Vietnam. STAR and ASTRON Buildings are high quality products with various spans satisfying all your requirements.

Delta Equipment and Construction Company is not only the Supplier & Distributor, but also provides premium service of erecting STAR and ASTRON Buildings with our own staff and equipment.

ACROW PANEL BRIDGES

CÀU LẮP GHÉP ACROW

DECC The Executive Agent & Distributor which provides exclusive services with every ACROW Panel Bridge

- nearly 40 years of panel bridging experience
- full engineering design (licensed PE on staff)
- creative, cost-effective solutions
- construction engineering advice
- on-site engineer when requested

ACROW Panel Bridges are:

- fully inspected
- of steel construction and hot-dipped galvanized to minimize weathering
- economical whether permanently or temporarily installed
- quick and easy to erect with minimum labor
- adaptable and versatile
- modular components are durable, and 100% reusable
- usually delivered from stock
- either lifted or roll into place
- available for purchase or rental

Why material testing is necessary

Remedial construction as a consequence of improper Quality Assurance and Quality Control costs precious time and considerable expense. Maintenance and repair and or refurbishment as a repercussion of low quality standards is a costly exercise to be avoided.

Who needs an independent testing laboratory?

Owners/Investors, Engineering Consultants, General Contractors, Road Builders, Concrete & Aggregate Suppliers

Delta's Lab offers specialist in the following test

1. Soil
2. Aggregates
3. Asphalt
4. Concrete
5. Steel
6. Pile Integrity
7. Masonry and Masonry Products
8. Weigh-In-Motion
9. Geotechnical Soil Investigation
