DAN,

How goes it?

Hope everything as good as can be.

I'm writing to find out if

There's any networking with the Association (Rangers) or with any of the other companies on the issue of PTSD. I think if we had a standard to ~~base~~ base the percentage of PTSD compensation it would be beneficial to our members. Say, a Ranger goes into the V.A. blindfolded. He will be pissed off at the ~~the~~ government for it lack of information given him to establish his claim. - Now -

once he learns that he needs an awful lot of documentation and the help of a service officer he'll be on his way.

BUT. I think the Association (of US Rangers) can prepare him for what he is about to encounter. PLUS

We owe it to him and future Rangers

Come on, we're Rangers, I know it takes time but, now is the time to draft a pamphlet to help those of us looking for compensation, it's only a matter of networking. For example - what stressors did Rangers have. I'll tell you, many have that documented and given to Rangers for filing.

IF you got any question answers.
please help. I'm STILL going
Through an appeal. its a mother -

But I believe there's an easier way
for the Wingers coming behind us -
to get compensated for their VALOR —

TAKE Care
