Ambassador Le Van Bang

Ambassador Le Van Bang, we know how important normalization is to you and the future of your country. It is a must that your country understands that the POW-MIA issue is very important to this country and its people. We would like to hear from you and your government on how you are helping to resolve this issue. Further, we would like to know if you have ideas yourself. I believe there are missing americans that are alive in Vietnam. So far, there has been a lot of time spent looking for remains, what efforts have been made to locate live POW's? If by locating or returning live POW's, then the process of normalization and healing will truly begin.
