January 3, 1995

Dear Bill,

Thanks for agreeing to talk with me about my Dad's case. The past few months have been difficult, frustrating and relatively fruitless. I appreciate your taking time to read the reports and advise me of any leads or suggestions. Attached are copies of my most recent correspondence from JTF-FA. Plans are still set for my trip to Vietnam late this month.

Johnnie Webb at CILHI said we should have had results from the DNA test by the first of the year; I will call CILHI tonight to check the status. I understand that the bone samples will be sent to Rockville, MD for matching against the blood samples from my grandmother and aunt.

I received the attached response regarding the military order of battle yesterday. His case was allegedly scheduled during the last Lao JFA, but Air Force Casualty never received any results. I assume the case was never scheduled, or that they never got to it. I have been unable to get a response to my request to visit the Life Sciences Equipment Lab. If they agree to it, I will go immediately.

I am really looking forward to hearing your thoughts. Thanks again for your time and help, Bill.

Best Regards,

Colleen C. Shine
