### NARRATIVE SUMMARY

- l. The First Amphibian Tractor Battalion remained under the operational control of First Infantry Brigade, Fifth Infantry Division (Mechanized), USA, until 6 April at which time 3d Marine Division assumed operational control (ref: CG, 3d Mar Div Msg DTG 030706Z Apr 69). Responsibility for AO Gray, with the exception of the Cua Viet perimeter security, was assumed by 2nd Battalion (-), 9th Marine Regiment. Passage of operational control allowed the Battalion to tactically stand-down in preparation for the reduction to cadre status by 1 May and included the release of all units under the operational control/direct support of 1st Amphibian Tractor Battalion to the relieving unit. With limited tactical responsibilities and return of all organic units to Camp Kistler, an intensive rehabilitation program of all assets was initiated.
- 2. During the month, Camp Kistler received a total of twelve 122mm rocket rounds. On 12 April, eight rounds of incoming rocket fire from the vicinity of grid YD 283767, causing minor material damage and no casualties. On 19 April, Camp Kistler sustained a four round rocket attack from YD 257747 which resulted in negative material damage and casualties. In both instances, counter-rocket fire was conducted with unknown results.
- 3. There were no mining incidents of tracked vehicles within the AO this month. Navy personnel reported two LCM-8's had been mined while docked at YD 337696. No casualties were reported but both boats sustained major damage.
- 4. There were negative casualties within the Battalion this month.
- 5. Normal patrolling activity was conducted by units of the Battalion throughout AO Gray until 6 April at which time all elements returned to the CP at Camp Kistler. Activity on this date was reduced to routine security patrols to the south of the Cua Viet perimeter for the remainder of the month with no significant activity.
- 6. There were no UFO sightings within the Battalion this month.
- 7. With the phase out of the S-5 section scheduled for 30 April, the functions of the Civil Affairs Officer were reduced. Efforts were continued in assisting the people of the Gio Hai Village in completing the construction of a three room school and visits were made to the villages within the AO where distribution of remaining equipment and school supplies were made. Twenty MedCAPs were conducted to the Cua Viet Resettlement Village and Pho Hoi to assist the villagers during an outbreak of the plague.
- 8. The cantonment maintenance projects this month have been limited because of the emphasis that was placed on the rehabilitation of the LVTs. The electrical system that was installed by MCB-7 and MCB-62 was completed and

put into use this month. Eleventh Engineers completed the bunker complex/artillery position located in the center of the compound.

- 9. As directed by higher authority the Battalion initiated a program of rehabilitation which not only included the major items of equipment but also entailed the review of the associated items listed below:
- a. LVT's. All vehicles have been converted to the LVTE-1 suspension system. A 30 day AMRD has been computed of LVTE-1 arm and spring assemblies, and road wheels and sufficient quantity on hand for stock. All excess assemblies and road wheels are in the process of being shipped to FLC in Danang. The overall deadline of LVT's now stands at 30%, field echelon problems beyond our control continues as the largest obstacle to further improvement. Twenty-four (24) auxiliary generators are still required. This item remains the most critical of our deadline difficulties and prevents the Battalion from obtaining C-1 status.
- b. MOTOR TRANSPORT. Motor Transport is conducting an inventory of all equipment. Administrative deadlining is in effect where practical and a program of evacuating administrative deadlined vehicles to FLSG-B for body work has been instituted.
- c. SUPPLY. All current stock levels have been reviewed and 708 cards updated. All excesses have been reported to Division Supply Officer. A new Master Allowance List for Class II, type II items was published on 11 April, and a new AMRD listing based on C-1 status has been computed and filed. A copy of all present usage data has been made and filed for future reference in the event of an operational commitment. All cutstanding TERO's have been reconciled. A physical inventory of all custodial items has been completed and all signatures are valid.
- d. COMMUNICATIONS. All communications equipment excessive to our current requirements has been boxed and manifested for embarkation. Routine operations and maintenance continues on all communications equipment in use.
- e. <u>EMBARKATION</u>. All Companies and Sections have completed their embarkation preparations and manifesting of equipment.
- 10. Situation briefings were conducted for the following officers: BrigGen FULLER, ADC 3d Marine Division, 25 April. Col GIBSON, CO, First Infantry Brigade, Fifth Infantry Division (Mech), USA 1 and 23 April. LtCol HAYWARD, G-4 Operations and LtCol FOX, CO, 2nd Battalion, 9th Marine Regiment visited Camp KISTLER to coordinate assuming responsibility of 1st Amtrac Battalion AO. On 29 April, LtCol ASHURST, CO, 5th Battalion, 4th Artillery Group, USA, visited Camp KISTLER to discuss past and present artillery procedures and associated problems.
