PART II

NARRATIVE SUMMARY

Force Logistic Command continued to accomplish its primary mission throughout the month of March 1969. There were no significant occurrences during the month that materially effected the combat readiness of Force Logistic Command.

The most significant event during the reporting period was the receipt of the 3d and 4th Quarter FY 1969 manning levels. These new authorizations were based on Program VI assets and Force Logistic Command proper experienced a reduction of 43 officer and 927 enlisted billets. The general operational readiness of the command will not suffer, provided the present tempo of operations remains constant. There were some inconsistencies in certain areas but remedial action has been requested. The GAO team arrived on 27 March 1969 and will remain with the command for approximately six weeks.
