1st Battalion	2,700\$ VN
2d Battalion	10,850\$ VN
3d Battalion	<u>3,540\$ VN</u>

3. Ground Surveillance. There were no activations recorded during the month of December.

4. Weather. Rainfall during the month was moderate with a total of **11.23** inches of rain. The average high temperature was 77 degrees and the low was 67 degrees. Humidity averaged 82 percent.

5. Terrain

a. The terrain in the 1st Marines' TAO is divided into two primary features, the coastal plains and low mountains. The coastal plains consist of poorly drained flat areas of rice cultivation and dryland farming. Riceland elevations rarely exceed 20 meters and average five meters, in the area east of the low mountains and foothills, west of DA NANG.

b. There are low mountains within three kilometers of the coast, overlooking DA NANG. These low mountains are separated from higher mountain formations to the west by a rolling plain varying in width from three to nine kilometers. Slopes on the low mountains are commonly 30 to 35 percent, becoming more gradual as they merge into the coastal plains. The highest elevation in this group is 364 meters.

c. West of the low mountains across the rolling plain, elevations rise sharply and the terrain is extremely rugged. Steeply-sloped mountains predominate for approximately one third of the area along the entire western portion of the TAOR. The exceptions, other than the coastal plain, are the river valleys. Multi-canopied forest with dense undergrowth is prevalent throughout the mountainous area.

d. Rivers and streams fragment the TAOR, both E-W and N-S. The seven main rivers, the CU DE, VINH DIEN, CAU DO, TUY LOAN, VU GIA, THU BON and YEN are navigable by shallow-draft boats.

e. Located within the TAOR are Routes 1, 4, 538, 539, 540, 541, 542, 543, 544, 545 and 587. All of these routes are elevated and pose no trafficability problems, except during and after heavy monsoon rains, when they are flooded in low spots.

(1) Helicopter support of the 1st Marines continued high during the month of December. During the first part of the month, employment of the Quick Reaction Force (QRF) continued actively in response to intelligence information and also for sensor implants. During the last ten days of the month, however, the QRF was not employed. Exploration into delivery of the CBU-55 was continued. The first operational drop of the CBU-55 from a UH1E was conducted successfully in 3d Battalion, 1st Marines' TAO.

There was a notable drop in support by fixed wing aircraft. This can be attributed to the onset of continuing low clouds which hamper CAS. There also was a drop off in TPQ-10 and Beacon missions due to a higher control of targets by G-2. The first operational testing of the Laser Target Designator System (LTDS) in Vietnam was successfully demonstrated by A4 aircraft under control of 1st Lt M. D. RYAN, FAC from the 1st Marines.

LOGISTICS1. Supply-Logistics

a. The logistics posture of the 1st Marines remained at the same high level as attained in previous months. The Regiment possesses 97% of the Combat Essential Equipment rated by T/E and Special Allowances. 91% of this authorized Combat Essential Equipment is operationally ready. Redistribution of excess equipment between the Regiment and other Division units continued to fill T/E deficiencies and alleviate known excesses. While approval of the review of authorized Special Allowances, submitted in November, was not received, it is anticipated that approval will be forthcoming in the immediate future. When approved, the recommended reductions will further contribute to improvement of the supply/logistics posture of the 1st Marines.

b. Supply point distribution, with Force Logistics Command providing all classes of supply, was utilized throughout the month, except for unit distribution of Classes I, III and V employed for 1st Battalion, 1st Marines located at Hill 37.

c. Command Material Management Inspections conducted by the Division staff during the reporting period assisted greatly in identifying the shortfalls in logistics. Correcting the discrepancies noted will greatly enhance the Regiment's logistical posture.

2. Lines of Communication. An adequate road network in good condition currently exists within the 1st Marines Tactical Area of Responsibility. Unusually favorable weather conditions during the reporting period allowed maximum use of existing roads with little damage from traffic.

Since the Hill 10 Cantonment was turned over to the Vietnamese Government during the reporting period, a reduction in the augmentation required from 1st Motor Transport Battalion was experienced; eighteen (18) M35 2 1/2 Ton Trucks are now required vice the twenty (20) previously required. These trucks are utilized daily in performance of supply/re-supply, troop movements and other housekeeping functions. These vehicles are allocated within the Regiment as follows:
