From: Commanding Officer To: Distribution List

Subj: Antipersonnel mines; employment of

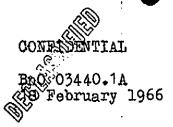

Ref: (a) 0G 3d MarDiv ltr 1546 over Ser. No. 00112-65 dtd 12 October 1965 (NOTAL)

(b) FMFM 6-5

(c) CG 3d MarDiv Msg 260723Z January 1966 (c) (NOTAL)

- 1. Purpose. To promulgate instructions regarding the employment of antipersonnel mines within the battalion TAOR.
- 2. <u>Cancellation</u>. Battalion Order 003440.1 is cancelled this date.
- 3. Background. Reference (a) authorizes the limited use of certain antipersonnel mines within the Third Marines TAOR. Reference (b) contains instructions regarding emplacement of antipersonnel mines and reference (c) contains policy regarding employment of the claymore mine.
- 4. Policy. In consonance with guidance from higher authority, antipersonnel mines may be employed within this battalion's TAOR on approval of this headquarters. Antipersonnel mines will be used in conjunction with other defensive measures to:
- a. Deny the enemy access or approach to friendly positions.
  - b. Canalize enemy movement.
- c. Protect sensitive installations or critical facilities.

CONFIDENTIAL

- e. Impose casualties upon the Viet Cong and to impose upon their operations the threat of mine warfare.
- 5. Concept. The approval for the employment of clayacre mines does not endorse a concept which calls for the development of a "fixed base" or static defense. To the contrary, security is enhanced by frequent relocation of small unit defensive positions and the aggressive conduct of patrols and ambushes to preclude the possibility of pre-planned and rehearsed enemy attacks.
- 6. Employment Regulations. Mines will be employed in accordance with the instructions contained in reference (b) and this order. All safety regulations outlined will be adhered to. In addition, the following instructions apply:
- a. Only the M-18 (Claymore) and the M-16 (Bouncing Betty) mineswill be used.
- b. Prior to emplacing the M-16 (Bouncing Betty) mine, Company Commanders will submit an appropriately classified request, in writing, with a schematic of the proposed minefield enclosed. Approval must be obtained from this headquarters before mines may be employed.
- o. Mines will be emplaced only in areas not frequented by the civilian population.
- d. Mines will be emplaced temporarily and then covered by observation and fire. They will be disarmed and collected upon completion of use.
- o. Nines will be emplaced, disarmed and collected only by those personnel who have completed the mine warfare course conducted by the 3d Engineer Battalion, or an equivalent service school.
- f. When the M-16 (Bouncing Betty) mine is employed, standard mine field marking procedures will be used.
- g. Prior to emplacing the M-18 (Claymore) mine, Company Commanders will provide a 1:50,000 schematic, and coordinates of each weapon emplaced in a permanent or semi-permanent nature to reach this headquarters (S-3)

no later than seventy-two (72) hours prior to emplacement. The schematic will be forwarded by this headquarters via channels, in accordance with reference (c), to reach 3d Marine Division Headquarters not later than forty-eight (48) hours prior to emplacement.

- h. Patrols and ambushes not of a permanent or semipermanent nature do not have to report claymore weapons positions unless emplaced over twenty-four (24) hours in duration.
- Claymore weapons will be disarmed during daylight hours unless attack is imminent.
- j. Claymore mines will not be employed with any manner of uncontrolled trip device.
- k. Claymore mines will only be detonated by electrical means under positive control, however, to preclude spontaneous detonation, during electrical storms the mine will be prepared for non-electrical detonation when the tactical deployment is dangerous to friendly troops (non-electric method to be used as authorized in TM 9-1345-2001.)
- Claymore weapons will be emplaced near established defensive positions and under observation to prevent removal or turning around by the enemy.
- m. Absolute recording and reporting of mines is mandatory. File copies of recorded minefields will be appropriately classified, and retained by the emplacing unit, and by the S-3.
- 7. Action. Company Commanders will insure that the regulations as set forth in this order dealing with the employment of antipersonnel mines are complied with.

#### BATTALION ORDER 06040.1

From: Commanding Officer
To: Distribution List

Subj: Medical Evacuation During Combat Operations (U)

Ref: (a) Div0 06040.1

- 1. Purpose. To promulgate procedures for requesting evacuation of casualties by helicopter from areas in which units are in contact with hostile forces.
- 2. General. The use of the helicopter for evacuation of casualties has vastly decreased the mortality rate of personnel wounded in action. Although the value of rapid evacuation cannot be over-estimated, it must be employed only when tactical considerations warrant. Units <u>must not</u> break contact with the enemy or surrender a tactical advantage for the purpose of conducting a helicopter evacuation. In some instances evacuation is requested for wounds of a minor nature as a result of over-estimating the severity of wounds at the platoon or company level. When this occurs in an area in which friendly troops are in direct contact with hostile forces not only are the supporting fires restricted, thereby giving the hostile forces more freedom of movement, but it permits hostile fire to be concentrated against the evacuation helicopter. Further, the availability of helicopters is limited, excessive use of helicopters for medical evacuation denies their use for tactical employment which could be detrimental to the overall success of an operation.

#### 3. Guidelines.

a. When the need for medical evacuation arises, an officer (in the absence of an afficer, the senior non-commissioned officer present) will assess the tactical situation and on the advice of a Medical Officer or

COMFIDENTIAL

BnQ,@6040.1 Pêbruary 19€6

the senior Hospital Corpsman present, will make the decision as to whether helicopters will be required.

- Request for helicopter evacuation normally should not be submitted until appropriate first aid has been administered and unless all other methods of evacuation have been considered.
- Evacuation of wounded personnel should be made at the earliest possible time consistent with the tactical situation.
- 4. Policy. To permit continuation of the tactical. situation, to prevent undue exposure of helicopters to hostile fire, to insure the maximum number of helicopters are available for tactical missions, and to preclude curtailment of friendly supporting arms fires, casualties in insecure forward areas, in accordance with reference (a), may be held without evacuation for a maximum of:
- a. 3 hours Gunshot and penetrating wounds of the chest, abdomen or head, arterial wounds and compound fractures.
- b. 6 hours Fragmentation wounds, blast wounds, simple fractures and burns of 20% or more of the body area.
- c. 24 hours Walking wounded with soft tissue wounds. minor wounds and fractures.
- Action. Company Commanders will ensure that priority of treatment and evacuation are consistent with the policies contained herein.

#### b. iroblem reus

- (1) Operating stocks of consumable office supplies and stationery are at a low level. Replenishment has not been sufficient to satisfy demands. Requisitions have been submitted for all shortages.
- (2) Seventy upper torse body armer have been rendered unserviceable during the last fifteen days of January, bringing the total unserviceable for the month to one hindred twenty five. This is an indication that bod armer exposed to inclement weather and constant use will become unserviceable in large numbers, in cycles contingent upon time in service. Predicted requirements have been requisitioned.
- (3) Second cohelon repair jarts for the H-14 rifle have not been available in sufficient quantity to effect immediate repairs. Rear sight pinions and windage knobs are two items most critically required. Priority 05 requisitions have been submitted for these shortages.
- (4) Several items of individual eq ipment have been in short supply. Canteen cups, mess equipment, .45 magazines, and 2-14 but well equipment are needed in quantity and requisitions have been submitted for those shortages.
- (5) Items for cleaning of galleys, mossiballs and washing of moss equipment have not been received in sufficient quantities to insure proper sanitation. Requisitions submitted are as follows:

B-3-2 patrol operated in the MUT SOM GA arga on 9 and 10 February with the mission of establishing an observation post in the vicinity of Hill 419 (AT866626). While moving into the area from the east, the patrol found evidence of extensive Vict Cong booby trapping along an E-W trail vicinity AT866626. (See Figure 1.) The booby traps and panjii traps

depict Figure 1 were discovered within a 110 meter section of trail. Till the panjii traps and the booby traps were destroyed but the area, west of the given coordinates was not checked as the patrol. Is aden established the observation post in the vicinity of the mined area.

The following comments were made by the patrol leader;

pertly comouflaged. The patrol leader believes that the Viet Cong had been preparing the area just prior to the arrival of the patrol.

b. The booby traps emplaced by the rocks (see Figure 1) were employed with the following purpose in mind; when an individual fell into the panjii trap he also activated the mine and the fragmentation effect of the rine would be channelized toward the panjii pit thereby causing additional wounds.

c. By placing the mine in the COFF can additional fragmentation would occur. (See Figure 1.a.)

d. The trail markers indicated in Figure 1 were not easily detected when approaching the area from the East but were easily seen when traveling West to East.

e. 'Il the booby traps worn constructed utilizing Viet Cong cylindrical homemade fragmentation mines and hand grenades.

f. Several of the panjil traps were constructed in such a manner as to puncture the leg above the boot. (See Figure 1.b.)

S-2 Comment. It is unusual for the Viet Cong to employ mines so extensively in an area well removed from where friendly patrols normally operate. It is possible that the Viet Cong hoped to discourage friendly troops from proceeding West along the trail by inflicting prohibitive essualties. It is possible that there is a Viot fong supply or base area in the vicinity. It is also possible that the Viet Cong have noted that friendly patrols, possibly Reconghave used the trail before: It has been recommended that a patrol in force be sent into the area to determine if there is any further mining activity and search for possible Viet Cong supply or bivouac areas.
