2. Cancellation. BnO 1550.1A.

3. General

a. Reference (s) and other current directives require and publish guidance for the orientation and debriefing of newly joined officers, staff non-commissioned officers, and the indoctrination of troops in the infantry battalion. It is necessary for each individual to be made aware of the mission and the objectives of our role in Vietnam, and of their individual responsibilities as members of the U.S. Armed Forces.

b. Additionally, it is necessary to provide factual information to assist rotating Marines who may be interviewed by news media upon return to CONUS. Limited observation, lack of information or lack of understanding of our role in Vietnam may cause rotating personnel to make thoughtless comments creating erroneous impressions and degrading the excellent record made by Marines in our efforts to defeat the Viet Cong and aid the Vietnamese people. Further, rotating personnel should be advised of what articles of military equipment, souvenirs, or war trophies may be retained.

1. INTRODUCTION

a. Background Information

(1) Developed by Armalite Division of Fairchild Aircraft Corporation for use as a weapon with outstanding versatility with a maximum effective range of 460 meters.

(2) Primary advantage and construction design.

(a) Lightweight. A major contribution to the lightweight is the bolt locking into the barrel, eliminating heavy receivers to support breech pressures.

(b) A Unique Gas System eliminating the operating rod, again saving weight and maintenance.

(c) Straight line construction in that the barrel, bolt, recoil buffer and stock are assembled in a straight line resulting in less muzzle climb.

(d) Versatility in that all weapons are equipped with a selector for semi-automatic or automatic fire. Increased fire power, twice as much ammunition can be carried.

b. The purpose of this class is to teach you the proper methods of care and cleaning.

c. It is a proven fact that if a Marine takes proper care of his rifle, his rifle will take care of him.

a. Cleaning and Lubricating Material

(1) Cleaning rod M11E2 w/handle preferred.

(2) Chamber brush, if not available an M14, M60 or 45 Cal. bore brush will do.

(3) M16E1 Bore Brush.

(4) Brush the face of the bolt, paying particular attention to area behind the rings.

(5) Clean the carrier key with a worn bore brush, then use a pipe cleaner to finish the job.

(6) When dry, place a drop of oil in each hole on the bolt carrier and gas tube. (DEMONSTRATE)

(7) Lubriplate will be used on the bolt cam pin, carrier and carrier key guide rails and the hammer camming surface of the carrier (DEMONSTRATE). NOTE: excessive lubrication oil will not be used. Excessive oil produces carbon and excessive carbon produces a stoppage.

e. Upper Receiver.

(1) Clean the upper receiver of powder fouling with solvent cleaning compound.

(2) Clean gas tube with worn bore brush dipped in bore cleaner.

NOTE: Do not use any abrasive to clean gas tube.

(3) The top of the gas tube can be cleaned by inserting rod and brush in the back of receiver (DEMONSTRATE). The sides and bottom of gas tube can be cleaned from bottom of receiver.

f. Lower Receiver.

(1) Wipe dirt from the trigger mechanism with clean cloth or brush.

(2) If parts are coated with carbon, clean with a small brush and solvent cleaning compound. Drain and dry out with patches. CAUTION: do not disassemble the lower receiver. The lower receiver is made of aluminum to keep the weight light but the pins that hold the automatic sear, the hammer assembly, the trigger and the selector lever all are made of steel. If the lower receiver is disassembled excessively, the pins will eventually enlarge the holes in the receiver. The first thing you know the pins fall out and get lost.

DECLASSIFIED

(3) Lubrication of the lower receiver shall be limited to the selector and pins only. (DEMONSTRATE)

g. Function Check: After cleaning, assemble and function check. Disengage take down pin, open receivers.

(1) Safe - Pull trigger, hammer should not fall.

(2) Semi - Pull trigger, hammer should fall. Hold trigger to the rear, cock, hammer should be held by disconnecter, release trigger, sear should engage hammer.

(3) Auto - Pull trigger, hammer should fall. Hold trigger to rear and recock the hammer. Hammer is now under the auto sear. Still holding the trigger to the rear, push forward on automatic sear. The hammer should fall. Still holding trigger to the rear, recock hammer, release trigger and push forward on automatic sear. Hammer should transfer to the sear engagement. Move selector lever to safe or semi position. Close receivers and engage take down pin. CAUTION: failure to move selector lever to safe or semi position before closing receivers will damage auto sear.

h. Preventive Maintenance.

(1) Daily service. (Regardless of whether fired or not)

(a) Before firing:

1. Retract bolt to assure free movement between bolt carrier and gas tube.
2. Hand function to assure proper functioning. Function check safety.
3. Check magazine for proper posture retention and functioning of bolt catch.
4. Inspect and clean dirty ammo. Dispose of any corroded ammo.

5. Check chamber for signs of dirt and corrosion.

NOTE: correct immediately.

6. Inspect individual cleaning kit for completeness.

Replace those items that are worn or missing.

7. Check extractor for chips or burrs, check extractor spring for tension. If any doubt exists, contact unit armorer immediately.

(a) After firing

1. Clean and properly lubricate. If remaining in rear area, lubricate with PL Special to prevent rust.

2. Pay particular attention to the bore, chamber, bolt and carrier assembly.

1. INTRODUCTION

a. Background Information

(1) Developed by Armalite Division of Fairchild Aircraft Corporation for use as a weapon with outstanding versatility with a maximum effective range of 460 meters.

(2) Primary advantage and construction design.

(a) Lightweight. A major contribution to the lightweight is the bolt locking into the barrel, eliminating heavy receivers to support breech pressures.

(b) A Unique Gas System eliminating the operating rod, again saving weight and maintenance.

(c) Straight line Construction in that the barrel, bolt, recoil buffer and stock are assembled in a straight line resulting in less muzzle climb.

(d) Versatility in that all weapons are equipped with a selector for semi-automatic or automatic fire. Increased fire power, twice as much ^{rate} ammunition can be carried.

- (3) M16E1 Bore Brush
- (4) Compound, cleaning solvent, rifle bore.
- (5) Oil lubricating PL Special.
- (6) Gresse, rifle, Lubriplate.
- (7) Patches, if patches utilized for the M16E1 are not available, cut the larger patches into four equal parts for use.

b. Cleaning the Bore.

(1) When cleaning bore, attach wire brush, dip in solvent. Brush bore from chamber to muzzle using straight through strokes, (NOTE: Do not reverse direction of brush while in bore, push brush all the way through the barrel until it extends beyond the muzzle). Run the brush through the bore several times. Remove brush from cleaning rod, dry out bore by pushing through clean, dry patches. Continue until patches come out clean and dry. (NOTE: If remaining in a rear area, lightly lubricate bore to prevent corrosion and pitting.).

c. Cleaning the Chamber.

- (1) Attach chamber cleaning brush to cleaning rod section.
- (2) Push brush into chamber five or six times then make about 3 or 4, 360 degree rotations.
- (3) Remove brush and dry chamber with cleaning swabs.

d. Cleaning and Lubricating the Bolt Carrier Group.

(1) Remove the bolt carrier group from upper receiver group. Field strip the bolt carrier group. Wash all external surfaces with a patch saturated in solvent cleaning compound.

1. Purpose. To publish instructions for the implementation of subject training as prescribed by references (a) and (b).

2. General.

a. The environment in which operations are conducted in RVN dictates a requirement that the non-artillery small unit leader know the techniques of calling for, and adjusting artillery fires. The employment of fire teams and squads on patrols, ambushes, listening posts and OP's places the small unit leader in the position of the artillery forward observer. It is imperative that these small unit leaders be trained thoroughly prior to assuming this responsibility.

b. Training will consist of two separate programs; one conducted by 11th Marines for selected squad leaders, and a Battalion level program conducted by the Liaison Officer assigned to this Battalion from Battery "B", 1st Bn, 11th Marines.

3. Action.

a. Rifle Company Commanders will ensure that each Officer, NCO, squad leader and selected team leaders attend one of the training periods scheduled below:

- (1) Place: "C" Sector
- (2) Time: 0800H
- (3) Dates: 30-31 August, 2, 4, 6, 8, 9, 11, 12, 14, 15, and 16 September 1967

BATTALION ORDER 5100.2

From: Commanding Officer
To: Distribution List

Subj: Safety Precautions for the Use and Handling of Grenades

Ref: (a) ForO 5101.3
(b) FM 23-30

1. Purpose. To promulgate instructions and safety precautions for the use and handling of grenades.
2. Cancellation. Executive Officer's memorandum of 14 Aug 67.
3. Background

a. Accidents have occurred involving hand grenades which have resulted in the loss of life and serious injury to members of this Command. In almost every case, these accidents were due to a failure to exercise strict and proper safety precautions. In many cases, the failure to exercise necessary safety precautions was due to the fact that personnel had been carrying and handling grenades for a long period of time, had developed a "familiarity" with the weapon and gradually became lax in the exercise of safety precautions.

b. The high incidence of discovery or detonation of M-26 grenades rigged as mines in the Battalion TAOR is cause for concern to all echelons of command. In many instances these grenades are unwittingly supplied to the VC through loss by Marines only to cause friendly casualties at a later time. Only by a program of continuous training, indoctrination, and control at company level and below can the incidence of lost grenades be lessened. Proper respect for the M-26 grenade gained through this program will also lessen the possibility of accidents with this weapon.

4. Individual Safety Precautions in the Handling and Use of Grenades.

a. Under no circumstances will any type of grenade be lifted or suspended by the safety pin pull ring or by the spoon.

TABM

EnO 5100.2

b. Do not pull the safety pin until you are ready to throw the grenade.

c. Do not change the spread of the safety pin at any time to allow easy removal of the pin. The 30 to 40 degree spread is adequate for safe handling and is satisfactory for convenient removal of the safety pin. The safety pin is made of soft metal which does not adapt to frequent spreading and closing. Upon issue and frequently after handling, inspect the safety pin to insure it is flared at the end and firmly held in place.

d. Grenades will not be taped unless found to be defective and then returned to the container.

e. Grenades will be carried in ammunition pouches and/or other suitable containers. Under no circumstances will grenades be hung loosely from cartridge belts, belt suspenders, pack straps or any location where the spoon/striker may be dislodged. The small arms ammo pouch is considered suitable for carrying two grenades strapped to the outside of the pouch as depicted in reference (b).

f. M-26 grenades will not be used to destroy other ordnance such as duds or enemy mines/booby traps except under emergency combat conditions as approved by the company commander.

5. Action

a. Company Commanders will institute control procedures to include a reasonable accountability procedure for grenades issued for routine activities within the TAOR and to ensure that grenades are not issued when the tactical situation does not require it. It is realized that control and accountability are nearly impossible during extended major operations and that strict enforcement is difficult, however, awareness of proper employment & safety precautions should preclude unnecessary friendly casualties during these operations. Strict control of grenades will be enforced in the Battalion CP. Personnel will not have grenades in their possession unless preparing to depart for activities requiring this weapon. Grenades will be turned in according to prescribed Company procedure upon return from activities.

DECLASSIFIED

BnO 5100.2

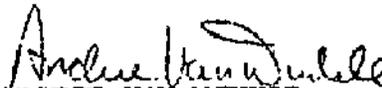

b. Unit leaders, particularly at the squad level, will maintain strict control over all hand grenades within the unit. Special command attention will be exercised to insure that grenades are not lost through carelessness or positioned where they may easily be stolen.

c. Using units will make a 100 percent inspection of all grenades for loose fuzes prior to issue to individuals. Loose fuzes will be tightened (clockwise) by hand.

d. Upon return from patrols, operations or outposts, grenades will be inspected for defects. All grenades will then be turned in, placed in fiber containers or ready boxes. They will not be stored in or around living, work or messing spaces. When not retained on tactical positions or as a part of reaction force ready ammunition, grenades will be stored in ammunition bunkers.

e. Unit leaders and Company Commanders will ensure that this order is published to every member of their unit within 24 hours after receipt of this directive. Newly joined personnel will be instructed in the provisions of this order upon reporting to the unit, as part of the company troop indoctrination program.

f. This order is applicable to all units of this battalion including those units and personnel attached to or under the operational control of this Headquarters.

COMMUNICATIONS IMPROVEMENT MEMORANDUM 5-67

1. RADIO TRANSMISSION SECURITY HAS BEEN BROUGHT UP SEVERAL TIMES AND IS AGAIN THE TOPIC OF A MESSAGE FROM III MAF (171402Z AUG 67). TRANSMISSION SECURITY IS A COMMAND RESPONSIBILITY AND REQUIRES THE ATTENTION OF COMMANDERS AT ALL ECHELONS. SINCE ALL CIRCUITS ARE SUBJECT TO ENEMY MONITORING, THE MARINE OPERATING A RADIO SHOULD OPERATE WITH THE IDEA THAT THE ENEMY IS LISTENING. RECENT REPORTS INDICATE THAT MOST VIOLATIONS OCCUR WHEN "HOT, SPUR OF THE MOMENT" TYPE TRAFFIC IS TRANSMITTED BETWEEN UNIT COMMANDERS AND/OR STAFF PERSONNEL.

2. CRYPTO SYSTEMS AVAILABLE FOR USE BY COMPANY COMMANDERS ARE:

- A. KAC-QX, SHACKLE AND AUTHENTICATION.
- B. KAC-PX, OPERATIONAL CODE. THIS CODE IS USED TO ENCRYPT MESSAGES.
- C. A THREE DAY SUPPLY OF THE TWO ABOVE LISTED CODES CAN BE DRAWN FROM THE BN MESSAGE CENTER AT ANY TIME, DAY OR NIGHT.

3. RELOCATION OF ARVN UNITS WITHIN THE TAOR HAS NECESSITATED CHANGES IN WIRE COMMUNICATIONS. WIRE COMMUNICATIONS TO ARVN UNITS ARE AS FOLLOWS:

TO 51ST ARVN AND 4TH BN, 51ST ARVN. GO THROUGH CEDAR BIRD AND CEDAR BIRD BAILEY.

TO 2D BN, 51ST ARVN AND 59TH ARVN. GO THROUGH CEDAR BIRD AND BLADE.

4. TRAINING RADIO OPERATORS AT THE COMPANY LEVEL IS A CONTINUING PROCESS. THE BN COMMO WILL MAKE INSTRUCTORS AVAILABLE ANY TIME THE COMPANY COMMANDERS DESIRE TO TRAIN PERSONNEL. WHEN POSSIBLE, THE PERSONS UNDERGOING TRAINING SHOULD BE ALLOWED TO WORK WITH THE BN RADIO SECTION FOR ONE WEEK. THIS ALLOWS THEM THE TIME TO BECOME FAMILIAR WITH PROPER MAINTENANCE PROCEDURES AND TO OPERATE ON THE BN TAC NET AND BECOME FAMILIAR WITH PROCEDURE AND PROBLEMS ENCOUNTERED AT THE BN LEVEL.

5. THE RESUPPLY STATUS OF PRC-25 HANDSETS, TAPE AND WHIP ANTENNAS REMAINS CRITICAL. THESE ACCESSORIES MUST BE TREATED WITH AS MUCH CARE AS POSSIBLE BY THE INDIVIDUAL RADIO OPERATOR. THIS IS A USER EDUCATION PROCESS, WHICH IS THE RESPONSIBILITY OF EVERYONE IN A COMMAND CAPACITY. WE WILL HAVE TO LIVE WITH THIS PROBLEM UNTIL IT IS RESOLVED BY A COMBINATION OF THE INTRODUCTION OF BETTER CONSTRUCTED REPLACEMENT ACCESSORIES AND/OR INCREASED QUANTITIES OF CURRENT ITEMS TO MAKE UP FOR COMBAT BREAKAGE AND LOSS.
