TP	HW	112100	Fextret 3 at (XD 852415), detected 2 NVA moving in front of Fox lines at (XD 852416). Individuals ceased moving and crouched down when a flare went off. The area where the movement was seen, was then scanned with a Starlight Scope. At this time the individuals were seen moving into a trench line in defilade. Fired M-79 and 81's into the area of movement. Believed enemy utilized high grass for concealment and trench line for protection.
TP	HW	112130- 112330	Fextret 3 LP at (XD 853415), spotted movement of approximately 2 individuals 40-50 meters in front of thier position at (XD 853414). Individuals seemed to be probing around the outer wire and were attempting to keep concealed. After a short while they disappeared, presumably into one of the trench lines that leads up to Fox 3's outer wire. Another element of Fox 3 spotted 2 individuals in a draw at (XD 855417). The individuals were moving rapidly away in an Easterly direction. At this time Fox 3 LP received 4 incoming small arms rounds. These rounds were not well aimed, and it is speculated that the enemy did not know where the LP was. The FPS-5 Radar Set picked up movement of no more than 3 individuals, approximately 700 meters from the lines. It possibly was the movement picked up by Fox 3 initially.

Upon approaching the above coordinates Golf 2 Actual spotted the patrol from this position. He advised them in the strongest possible terms that they were in the wrong place and that they were in a mine field. He ordered them to hold their positions and start a slow movement back down the Hill the same way they had come up. The patrol leader said he was trying to find a hole in the wire at his position. At this time one of the patrol members detonated an M16 mine, killing two and wounding four men. Golf 2, Golf 1 and Golf 6 Actuals at this time moved to assist the squad with a second squad and a corpsman. Golf 1 moved forward to clear a path for Golf 2 and the squad. He was successful in rapidly clearing a path and marking the mines. Golf 6 began to cut a path through the defense wire to move the casualties into an LZ. At this time two more explosions took place. The second detonation was caused by a smoke grenade being dropped on an uncovered M16 mine. This second explosion caused a third mine to detonate. Eight more men were wounded by these two additional mines. More corpsmen arrived and medevac procedures continued.

Movement at this time appeared to be fairly stationary and indicated a unit was setting in for some type of activity. Fox 3 at this time spotted pre-set trip flares at same grid from KSCB perimeter. Artillery fires were immediately plotted on suspected enemy location and 40mm duster was brought into position. Enemy movement had not changed. The command to fire was given. The enemy at this time kept down. The 40mm Duster ceased fire, due to ricochets on friendly positions. The enemy started to move in a south westerly direction, moving with a small unit 60 meters in front of the main body. Artillery and mortars were brought on all flanks of the movement and the movement became sporadic and disorganized and ceased for a short period. A few minutes later the enemy again moved with the largest element first and a small element behind. Movement was traced to the defilade position at grid 858402. Due to the terrain the radar could no longer pick up movement. Artillery and mortars continued to shift their fire around the area of movement.

The area where movement was seen was then scanned with a starlight scope. At this time individuals were seen moving in a trenchline in defilade. Fired M-79 and 81's into area. Believed enemy utilized high grass for concealment and trench line for protection.
S-3	1stMar	2130	Spot Report DTG 112130 to 112330H Foxtrot 3 at 112130 to 112330H at 853415 Foxtrot 3 LP spotted movement of approximately 2 individuals 40-50 meters in front of their position. Individuals seemed to be probing around the far outer wire and were attempting to keep concealed. After a short while they disappeared, presumably into one of the trenchlines that leads up to Foxtrot 3's outer wire. Another element of Foxtrot 3 spotted 2 individuals in a draw at grid 855417. The individuals were moving rapidly away in an easterly direction. At this time Foxtrot 3 LP received 4 incoming small arms fire. These rounds were not well aimed and were of no danger to the LP. It is believed that the enemy didn't know where the LP was. The PPS-5 radar picked up movement of no more than 3 individuals approximately 700 meters from the lines.
