SECTION XII COMMAND CHRONOLOGY 1-31 January 1966 CoB, 3dATBn (Rein)

1. Administration

a. No administrative problems were encountered during the reporting period. All Records of Emergency Data and Serviceman's Group Life Insurance documents were reviewed and brought up to date.

2. Tactical

a. The only tactical problem encountered involved Ontos track sections. Track sections are critical items and have been on requisition since July, 1965. They are reportedly aboard shipping to Vietnam and should arrive here in the near future. Track sections breaking during convoy escort missions render the Ontos ineffective as primary security and additional time and resources are required to repair or replace broken track sections to enable the Ontos to carry out its mission.

3. Supply

a. During the reporting period there were no Priority O2 or Priority O5 requisitions submitted. At the commencement of the reporting period there were 10 Priority O2 and 92 Priority O5 requisitions outstanding. Of these, 3 Priority O2 and 27 Priority O5 requisitions were received.
