

DECLASSIFIED

HEADQUARTERS
3rd Engineer Battalion (Rein)
3rd Marine Division (Rein) FMF
c/o FPO San Francisco, California 96602

COMMAND CHRONOLOGY FOR FEBRUARY 1966

Part A; Organization Data (See Tab A to Enclosure (1), TASK ORGANIZATION)

1. Organization. The 3rd Engineer Battalion (Rein) consists of the following units:

- a. 3rd Engineer Battalion (T/O ML378)
- b. Company "C" 1st Engineer Battalion (T/O ML373)
- c. Company "C" 7th Engineer Battalion (T/O M4353)
- d. Company "A" 1st Engineer Battalion (T/O ML373)

2. Location.

a. DA NANG Enclave:

(1) 3rd Engineer Battalion (minus Company "B" and 3rd Platoon of Company "A")

(2) Company "C", 7th Engineer Battalion (Attached)

b. CHU LAI Enclave:

(1) Company "B", 3rd Engineer Battalion

(a) Administrative control of 3rd Engineer Battalion

(b) Operational control of 4th Marines

(2) Company "C", 1st Engineer Battalion

(a) Administrative control of 3rd Engineer Battalion

(b) Operational control of 7th Marines

(3) Company "A", 1st Engineer Battalion

(a) Administrative control of 3rd Engineer Battalion

(b) Operational control of 1st Marines

c. HUE PHU BAI Enclave:

(1) 3rd Platoon, Company "A", 3rd Engineer Battalion

ENCLOSURE (1)

DECLASSIFIED

DECLASSIFIED

(a) Administrative control 3rd Engineer Battalion

(b) Operational control of 2nd Battalion, 1st Marines

3. Period covered by this report: 1 February to 28 February 1966

4. Name/rank of Commanding Officer(s) and staff/principal subordinates including T/O billet assignments (as of 28 February 1966)

<u>T/O Billet</u>	<u>Name</u>
Battalion Commander	LtCol Nicholas J. DENNIS
Battalion Executive Officer	Major Conway J. SMITH
Battalion S-1/Adjutant	2ndLt Norman F. LABOUNTY
Battalion S-2	1stLt Paul I. FAULKENBERRY
Battalion S-3	Major Charles D. WOOD
Battalion S-4	Captain James G. DIXON
Communications Officer	1stLt Edmond J. SMITH Jr.
Heavy Equipment Officer	1stLt Larry R. ANDERSON
Battalion Supply Officer	Captain Richard B. MCLAUGHLIN
H&S Commanding Officer	1stLt Edmond J. SMITH Jr.
Co "A" Commanding Officer	Captain Larry L. O'LAUGHLIN
Co "B" Commanding Officer	Captain Peter E. WESTPHAL
Co "C" Commanding Officer	Captain Donald L. HICKS
Co "A-1" Commanding Officer	Captain David R. HINES
Co "C-1" Commanding Officer	Captain William A. RENNER
Co "C-7" Commanding Officer	Captain Gregory R. ROOT
EngrSuptCo Commanding Officer	Captain Theodore C. WALTON

5. The average monthly strength of the Battalion (Rein) was:

a. DA NANG Enclave	Off: 28	Enl: 750
b. CHU LAI Enclave	Off: 7	Enl: 315
c. HUE PHU BAI Enclave	Off: 1	Enl: 37

DECLASSIFIED

Part B: Summary of Significant Events

1. Personnel.

a. The strength of the battalion was decreased by a total of 25 during the month as follows:

- (1) Gains: 64
- (2) Losses: 91
 - (a) Battle: 8 (includes 1 KIA)
 - (b) Non-battle: 24
 - (c) Administrative: 57

b. Shortages most critical in MOS listed below:

<u>MOS</u>	<u>T/O</u>	<u>O/H</u>	<u>SHORTAGE</u>
1371	670	472	*198

* It should be noted that the T/O of an engineer company totals 128 personnel in MOS 1371. The present shortage more than equates this figure. The battalion capability is hampered by this shortage.

On 1 Feb Sgt R. W. COCHRON (SuptCo) departed on emergency leave.

On 8 Feb 1stLt W. M. BRINK (C-7) was admitted to the hospital.

On 9 Feb Pfc A. L. WILSON (C-3) departed on humanitarian leave to CONUS, Sgt C. E. FIELDS (C-3) departed on emergency leave to CONUS, LCpl D. B. SHOVE (C-3) was WIA while on a minesweep with 3/3, and LCpl C. E. FERRELL (C-3) was WIA while on a search and destroy mission with 1/9.

On 12 Feb Pfc K. H. SWEARINGER (C-3) was WIA while on a minesweep with 3/3, and Sgt S. W. BLAKE ("B"Co) was WIA while participating in Operation "Double Eagle".

On 13 Feb LCpl D. L. SMITH ("B"Co) was KIA while participating in Operation "Double Eagle".

On 16 Feb 1stLt W. M. BRINK (C-7) was transferred as a non-battle casualty. LCpl B. D. SMITH (C-3) was WIA while on a sweep with 3/3. LCpl R. E. FLOWERS (C-3) was WIA while on a sweep with 3/3.

On 17 Feb Pfc D. L. WELLS (SuptCo) departed on emergency leave to CONUS.

On 22 Feb LCpl D. R. JOHNSON (C-3) was WIA while participating in Operation "Double Eagle".

DECLASSIFIED

On 23 Feb Major D. D. CREWS was evacuated as a non-battle casualty. Captain T. C. WALTON assumed command of Support Company.

On 27 Feb 2ndLt J. ARMSTRONG joined our command. He was assigned duty with Company "C", 3rd Engineer Battalion.

There were seven (7) Purple Heart Medals awarded during the month.

During the months of January and February 1966 the battalion initiated recommendations for the following awards: 1 Silver Star Medal; 4 Bronze Star Medals; 8 Purple Heart Medals; 1 Air Medal; 6 Navy Commendation Medals and 2 Letters of Commendation from the Commanding General.

Nine (9) Meritorious Masts were conducted during the month.

The following promotions were made during the month: 3 to SSgt; 1 to Sgt; 3 to Cpl; 10 to LCpl and 2 to Pfc.

2. Administration.

a. The Battalion Promotion Board met on 20 February for Category II promotions.

b. A debriefing was held on 28 February for personnel departing as part of the March rotation draft.

DECLASSIFIED

3. Intelligence.

a. In addition to regular projects such as compiling information on Viet Cong mine warfare, emphasis was placed on the compilation of Engineer Intelligence. Data on bridges on National Route 1 between HUE PHU BAI enclave and CHU LAI enclave was compiled. Each bridge was numbered; the bridge number and coordinates were placed on a 5 X 8 card for indexing. In addition current data on each bridge on National Route #1 is filed on this card and is therefore readily accessible.

b. Several Viet Cong documents on demolitions were received from 3rd Marine Division Intelligence Section. Among these documents were two Viet Cong diaries. The 3rd Engineer Battalion interpreter is translating the documents. The information contained in these diaries will be compared to our own data and the intelligence will be made available to the Division Mine Warfare and Demolitions School. Various bear traps, mines, punji stakes, and other types of Viet Cong passive weapons were collected and delivered to the Division Mine Warfare and Demolitions School.

c. Compiling of data on Viet Cong mine warfare continued to require a major effort of the S-2 section. Reports indicate one hundred and fifty four incidents occurred in the DA NANG enclave during the month (Enclosure 2). This figure is almost double that reported for January. Of the one hundred and fifty-four incidents, eighty-nine were actual detonations. Sixty-five mines or booby traps were destroyed in place or neutralized. The Viet Cong continue to interdict roads in forward areas and on patrol routes. No pattern of emplacement is thus far discernable.

d. During February the battalion was instrumental in initiating a rewards program for information on Viet Cong mines. The program promulgated by 3rd Marine Division included anti-Viet Cong leaflets and a graduated scale of payments for (1) information on location of mines (2) leading Marines to mines, and (3) delivery of Viet Cong mines to Marines. The program was put into effect during the latter part of the month. The only response to date has been one incident in which three Vietnamese boys turned four CHICOM grenades over to the Commanding Officer of Company "A", 3rd Engineer Battalion. A reward of 2100 piasters was paid.

e. Special map requirements were met for three separate operations during the month.

Aerial photos were requested of and received for Route #14 and #1. The photos were requested in connection with maintaining lines of communications (LOC) Studies and for planning future operations. The time between the request and delivery of the Route #14 photos was five days.

f. The S-2 section continued to conduct training for battalion units. Eight separate classes were conducted on security of intelligence information. An intelligence briefing was presented nightly for the battalion officers. The Intelligence Chief conducted a weekly briefing for Staff NCOs. The enlisted men received a briefing every two weeks. Incoming drafts were briefed on what they should expect during their tour, the

DECLASSIFIED

history and customs of the people, and the security of classified information. Outgoing drafts were debriefed to remind members of the draft as to what aspects of their tour could be discussed, and what aspects remained classified.

DECLASSIFIED

4. Training

a. The battalion training program continued to be a combination of on-the-job training and scheduled MOS and GMS training. Weekly training schedules were published, but a large degree of flexibility was built into the scheduled training to prevent interference with operational requirements. One half hour to one hour classes were conducted for all officers and staff non-commissioned officers three evenings per week. Troop indoctrination was continued on an average of one class per week. Copies of Battalion Training Schedules are attached as enclosure (4). A quarterly training bulletin was published in compliance with the Battalion Training SOP. This bulletin established specific MOS and GMS training guidance (enclosure (5)). Training for the most part is conducted outside of working hours. Training is also accomplished at job sites while personnel are waiting for materials or transportation.

b. In compliance with Division Orders 1510.3 and 7000.3A, newly arrived personnel received troop indoctrination lectures on the Monetary Systems in the Republic of Vietnam.

c. Familiarization Firing:

<u>Date</u>	<u>M-14</u>	<u>Pistol</u>
9 Feb	33	5
10 Feb	30	2
11 Feb	<u>17</u>	<u>4</u>
Totals	80	11

d. Two enlisted attended a five-day course on Air Conditioners. This school, sponsored by 1st Marine Air Wing, was conducted by two civilians from the US Army Mobility Command.

e. The Division Mine Warfare and Demolition School, conducted by the battalion, continued to instruct personnel in mines, demolitions and boobytraps. This instruction is conducted by contact instructor teams and by a resident school in the battalion school area. Special instruction is provided as requested, but the three primary courses are:

- (1) Course "A" - Infantry Personnel - US and VC mines, VC boobytraps, mine detection and military explosives. Two day duration.
- (2) Course "B" - Engineer Personnel - US and VC mines, VC boobytraps, mine detection, and military explosives, minefield breaching. Two day duration (After 21 Feb, three days).

DECLASSIFIED

- (3) Course "C" - Personnel other than Infantry or Engineer - US and VC mines, VC boobytraps. One day duration.

The following is a recapitulation of the training conducted by the Mine Warfare and Demolition School during February.

(1) A Contact Instructor Team was deployed to 3d Recon Bn on 20 February where 75 personnel were instructed on the employment of the Claymore Mine.

(2) Formal classes at Mine Warfare and Demolitions School:

<u>UNIT</u>	<u>NO. PERS.</u>	<u>COURSE</u>	<u>DATE</u>

28 Feb	3d Recon Bn	1

g. The Battalion Training was inspected by representatives of the Division G-3. The results of the inspection were "Noteworthy".

DECLASSIFIED

5. Operations.a. General.

(1) During February, the 3d Engineer Battalion remained in general support of the 3d Marine Division. Employment of the Battalion in the Da Nang enclave fell into two categories: combat support and combat service support operations.

(2) Combat support operations consisted of providing mine detection and demolition teams in support of infantry "search and destroy" operations, daily sweeps of MSR's for mines and boobytraps, and engineer support of convoys traveling to PHU BAI and CHU LAI. In the Da Nang encave, combat support was provided to six infantry battalions and the 3d Recon Battalion by companies "A" and "C", 3d Engineer Battalion. V. C. mine incidents data obtained during the month was recorded and is contained in enclosure (2). The combat support provided involved:

(a) 425 deliberate electronic mine detector sweeps of MSR segments. Daily average distance sweep was 18 kilometers.

(b) Support of 40 infantry "search and destroy" operations, including Operations DOUBLE EAGLE I, DOUBLE EAGLE II, and TAUT ~~EAGLE II~~.
Bow

(c) 3011 man days of effort in combat support operations.

(d) 12 incidents of enemy engagement requiring engineer support during deliberate mine sweeps.

(e) Visual sweeps of forward area for mines and boobytraps. Daily average distance was 20 kilometers.

(f) Support of 3 convoys traveling to PHU BAI or TAM KY and return.

(3) Combat service support of the 3d Marine Division fell into three major categories: roads and bridges, fortifications, and general construction. Company "A" and Company "C" were primarily committed to road and bridge construction in the 3d Marines TAOR and the 9th Marines TAOR respectively. Company "C", 7th Engineer Battalion, was committed primarily to cutting and assisting units in erection of MLR bunkers. The Engineer Support Company provided normal vehicle, equipment, and construction support. Cantonment projects were primarily handled by the construction platoon.

b. Combat Support

(1) 1/1 TAOR. Combat engineer support in the 1/1 TAOR was provided by the 3d platoon, Company "A", commanded by 1stLt O. Sieber. The platoon was billeted at the 1/1 C. P. to enhance the support required. An average daily strength of sixteen men were committed in the TAOR throughout the month. Daily the platoon provided visual and deliberate mine detection sweeps of Route 5, south of the float bridge at AT955715 to AT933466 near Hill 41. In addition to the daily requirements for mine sweeps of the MSR, the platoon provided close combat support for the battalion's "search and destroy"

(1)

operations. Mine and boobytrap incidents in the TAOR were limited. There were no mines found or detonated on Route 5 during the month. The most significant incident occurred when a boobytrapped grenade was found on the bridge at AT944693. A trip wire was tied to communication wires paralleling the road. The general practice of the detection team was to check these wires by pulling them out of the rice paddies. Had they not found the grenade first, the grenade would have been detonated, probably causing casualties to the team. It is assumed that the boobytrapped grenade was found during a "search and destroy" operation with B-1/1 on 20 February 1966, at AT944691.

(2) 1/9 TAOR - Combat engineer support in the 1/9 TAOR was provided by the 1st platoon, Company "C", commanded by 1stLt M. J. Chumer. On 18 February 1966, 3/9 assumed responsibility of the TAOR and 1/9 was assigned to Airfield Defense. The 1st Platoon continued providing combat engineer support in the area throughout the month. The platoon was billeted at the infantry battalion C. P. and with forward companies to shorten reaction time on requests for engineer support. An average of 23 men were deployed in support of 1/9 and 3/9 units throughout the month. The platoon was split into 3 - 4 man teams, providing mine detection and demolition support to the infantry units on "search and destroy" operations, or mine sweeps of the routes of communication in the TAOR. The platoon supported 14 operations and conducted 88 deliberate mine detection sweeps in the TAOR.

On 17 February 1966, a mine detection team found a "dummy" mine during a routine sweep. The mine was found with a P-153 mine detector while conducting a deliberate sweep from BTO70716 to BTO72707. The mine contained no explosive, and it was evident that it had been placed to harass the team.

On 27 February 1966, an engineer team found numerous punjii stakes embedded in the roadway south of the M-6 bridge at BTO72700 on Route 13. The punjii stakes were placed in such a manner as to puncture the tires of vehicles traveling the road.

LCpl Charles E. Ferrell, Company "C" was WIA by grenade fragments during "search and destroy" operations with 1/9 on 9 February 1966.

In addition to destruction of numerous rounds and types of U. S. dud ordnance, the platoon either captured or destroyed the following V. C. ordnance or fortifications:

Boobytrapped Grenades	1
Spider holes	5
Tunnels	4
Fighting holes	42
Punjii Pits	8
Bunkers	8
V. C. Ammo Bunkers	2
Gates (Boobytrapped)	4
Fences and Hedgerows	4
CHI COM Shaped Charge	1

(3) 2/9 TAOR - The 2nd Platoon, Company "C", commanded by 2ndLt. R. L. Bently provided combat support in the 2/9 TAOR throughout February. The majority of the platoon was committed with 2/9 on

DECLASSIFIED

Operation DOUBLE EAGLE during the month. An average of 9 engineers remained in the TAOR to conduct daily mine detection sweeps of the 2/9 MSR's from LE PHONG (AT998698) to HA DONG (AT990643) and the lateral road from AT987663 to BTO02662.

There were no significant incidents in the TAOR during February. Engineer teams supporting "search and destroy" operations destroyed the following V. C. ordnance and fortifications in addition to dud U. S. ordnance:

Improvised black-powder mine	1
Caves	12
Tunnels	25
Fences	2
Gates	1
Bunkers	4

(4) 3/3 TAOR - Combat engineer support in the TAOR was provided by the 4th Platoon, Company "C", commanded by 1stLt. J. F. Brennan. The number of engineers supporting combat operations of the battalion averaged about eighteen men daily. Teams of 4 - 6 men were located with units of 3/3 on Hill 22, Hill 55, and AN TRACH (1) (AT98664). The lateral road from YEN NE (1) (AT987663) to LE SON (1) (AT980662) and the access road from Route 5 to Hill 22 were swept for mines daily. In addition the teams accompanied patrols and supported "search and destroy" operations as required in the 3/3 TAOR.

There was a high concentration of boobytraps in the 3/3 TAOR during February. Twenty-five V. C. boobytraps or mines were detected by engineer personnel and disarmed or destroyed before causing casualties. The majority of the boobytraps found were rigged with trip wires.

On 4 February 1966, an engineer team supporting a "search and destroy" operation with K-3/3 discovered an arms cache at BTO54697. The cache was found hidden in a concealed hole of a pagoda. It contained the following ordnance:

Thompson SMG magazine	1
W. P. grenade	1
.45 Cal ammo	97 rds
7.62mm ammo (clips)	395 rds
7.62mm ammo (linked)	100 rds
Carbine magazine w/ammo	8 ea
9mm CHI COM ammo	96 rds
12 gauge shotgun shells	12 rds
M-14 magazines w/ammo	5 ea
BAR magazines w/ammo	3 ea
.30 Cal ammo	5 rds

In addition to the ordnance captured in the above cache, the following V. C. ordnance was detected and destroyed by engineer teams supporting 3/3 operations:

V. C. Mine	1
Boobytrapped grenades	17
Boobytrapped 105 shell	3
V. C. AP mine	1

(3)

DECLASSIFIED

DECLASSIFIED

Boobytrapped 155 shell	1
Boobytrapped 81mm rd	2
Punjii traps	5
Tunnels	25
Fighting holes	6
Caves	10
Trench lines	305 ft
Spider holes	2
U. S. dud ordance	34 items

There were four engineers WIA in the 3/3 TAOR during February while supporting 3/3 operations as follows:

<u>Date</u>	<u>Name</u>	<u>Supported Unit</u>	<u>Location</u>
9Feb66	LCpl D.B. Shove	K-3/3	AT959677
12Feb66	LCpl K.H. Swearingin	K-3/3	AT955629
16Feb66	LCpl R.E. Flowers	K-3/3	AT959671
16Feb66	LCpl B.D. Smith	K-3/3	AT959671

(5) Operation DOUBLE EAGLE - Throughout February, two platoons of Company "C" remained committed on the operation away from the DA NANG enclave. The 3d platoon, commanded by 1stLt T. W. Rodriguez with 22 men were committed the entire month. The second Platoon, commanded by 2ndLt. R. L. Bently, provided 24 men during phase I of the operation which ended about 16 February 1966. On 18 February 1966, fourteen men were redeployed for Phase II of the operation. The platoons provided close combat support for infantry units on "search and destroy" operation.

The following V. C. ordance and fortifications were reported destroyed during the operation:

Caves	18
Tunnels	1
Boobytrapped grenades	1
V. C. Rice storage building	1
Bunker	1
V. C. AP mine	1
Road Block	1
57mm Mortar	1 rd
60mm Mortar	1 rd
81mm Mortor	1 rd
M-14 AP Mine	1
Bangalore Torpedo	1sec

(6) Operation TAUT BOW - Thirteen men from Company "A", commanded by 1stLt J. M. Hennessey were committed on the 3d Recon Bn operation from 7 Feb to 16 Feb 1966. In addition to destroying VC ordance and caves the engineer team cleared three helicopter landing zones in the high jungle areas west of Hill 41 (AT934663) for emergency evacuation and resupply. The team destroyed the following using 375 pounds of explosives:

VC 151 lb shaped charge	1
VC Frag mines	3
AP directional boobytrap	4

(4)

DECLASSIFIED

DECLASSIFIED

Beartraps	4
VC buildings	10
Tunnels	2

(7) Rough Rider Operations. During February three convoys to PHU BAI (2) and TAM KY (1) were supported by engineer convoy support teams. The teams commanded by 1st Lt. D. A. Dematteo provided engineer mine detection, demolitions, and emergence bridge and road repair capabilities.

On 19 February 1966, while supporting the convoy to TAM KY, the lead element of the convoy encountered a rock roadblock across the road at THAN MY (2) (111499). A sweep of the vicinity of the road block with mine detectors was negative. The roadblock was removed and the lead element proceeded. Approximately 75 meters further south piles of rocks had been placed at random in the road. Three of these piles formed a large "V" in the road. This section of road extended 30 meters beyond the first pile of rocks and ended at two large drums of tar standing vertically in the road. The engineer team used P-153 mine detectors to sweep the section and discovered two explosive devices. The first was a 60 mm mortar round wrapped in black waterproof paper and buried vertically in the roadway. The second was wrapped in white opaque waterproof paper. It was about 12" long, 6" wide, and 5" deep. Two wires led out of the block to a grey metal cylinder about 10" long, placed on top of the charge. The two charges were destroyed in place. The convoy proceeded south and returned on 20 February without incident.

On 5 February, during support of a convoy traveling north to PHU BAI, the convoy support team was employed to repair a bridge at BC069012. The existing bridge was impassable and the temporary by pass was blocked by an overturned Vietnamese vehicle. The engineer team repaired the existing bridge by decking it with 3X12 and laying a treadway. The repairs required 1 hour and 15 minutes. The convoy proceeded to PHUBAI and returned on 6 February without further incident. The second convoy to PHU BAI during the month went without incident.

In conjunction with the ROUGH RIDER operations, two aerial reconns were made between DANANG and PHU BAI. Each of the reconns provided visual assurance that the route was open between the enclaves. On 16 February, an engineer recon team, commanded by 1stLt B.M. RANTA, was dispatched south on Route 1 to obtain more detailed and up-to-date engineer intelligence on the road and bridge conditions. The team completed the recon to CHU LAI and was followed by a convoy from DANANG to TAM KY. The recon team returned to DANANG with the convoy on 20 February 1966.

a. Combat Service Support

(a) Route#4- DAI LA Pass (AT940753) to (AT925742), 3.2 Kilometers. Efforts to raise a low section of the road vicinity of AT926742 continued during February. This section had been seriously threatened during the rainy season because of poor drainage surrounding the road. During the month one culvert was installed and over 1000 cubic yards of fill hauled, spread and compacted to raise the road. The 7th Engineer Battalion assumed responsibility for this road during the first half of the month.

DECLASSIFIED

DECLASSIFIED

(b) Route #5 - Major efforts were made in developing this route into a class 60 road. The section of route #5 from AT940713 to AT900773 was worked on during the month. The road was graded, ditched, shaped and widened the entire 8 kilometers. Sixteen culverts with headwalls were installed. Over 4800 cubic yards of fill was hauled and spread on the road to widen it and raise low areas across rice paddies. One class 60 timber bridge was constructed at AT914736. To span the 30 foot gap, it was necessary that a rock crib be installed to support a trestle bent because of the water depth and soft bottom. The bridge was constructed over an existing concrete slab bridge, which facilitated keeping the road open. To shorten the fill haul distances, a number of barrow pits were opened along the road. The indigenous labor force hired by the battalion were extensively employed on this road. They were used to assemble and install culverts, construct headwalls, and construct the timber bridge at AT914736.

(c) C-1/1 Road - Construction of this road began on 11 February 1966 from route #5 at AT908744 south to hill 22 at AT905718. The road is over 4000 meters in length, requiring numerous culverts and construction of one 30 foot timber bridge. By the end of the month, the road had been cut the entire length and was passible to traffic. Nine culverts were installed and one 30 foot span timber bridge AT 906743 was constructed. Initially, the river at this point was crossed using a M4T6 fixed span bridge, installed by 1st Bridge Company. This facilitated crossing the river with equipment until preparations were made to construct the timber bridge. Earth work on the road consisted primarily of "cutting and filling" operations with TD-18 dozers and MRS 100's with scrapers. Over 1000 cubic yards of fill was hauled to fill low areas along the road. Extensive earth moving is still required to widen and raise low areas of the road along its entire length.

(d) Other roads

(1) It was during the first part of February 1966, that III MAF assigned the various engineer type units route responsibility. The 3d Engineer Battalion was assigned responsibility for; all roads south and west of route #5 (including route #5 and #2), all roads south of the SONG CAU DO, and roads south of the M6 bridge on route #13. Normal maintainance was performed on these roads. In addition, plans were made to improve and extend routes #2 and #13, and to construct two lateral roads south of SONG CAU DO.

(2) During the month, three LVT "splash points" access roads were improved or constructed in the DA NANG TAOR. A new splash point was constructed for D-1/3 at AT886827. The project required cutting a new road, improving approaches and installation of a timber treadway at the waters edge. Two other splash points were improved at AT997-707 and BT014717. They required hauling over 1500 cubic yards of fill to repair erosion, ditches and installation of timber treadways at the waters edge.

DECLASSIFIED

(2) Fortifications

(a) Division CP Bunker. Construction of two parking areas below the Division CP Bunker began during January. About 1 February 1966 the project had grown into three areas, a reviewing stand, masonry facing of an embankment, and further development of the drainage system below the bunker. The majority of the excavation work required for two of the parking areas. The third area required cutting and filling operations involving movement of over 2000 cubic yards of fill. Approximately 900 cubic yards was hauled to the site using scrapers and dump trucks. Over 1200 cubic yards of rock was hauled and spread for a sub-base on the parking areas. The parking areas were then surfaced with small crushed rock, rolled and primed with an asphalt cut-back. Construction of the reviewing stand required removal of a large rock weighing over 50 tons. Fifteen holes were drilled at the base of the rock about one foot apart and ten feet deep. Every other hole was loaded with dynamite (a total of 19 pounds). Detonation of the charge broke the rock into small enough pieces that they could be moved. As the rock was cleared, shaping of the slope and construction of the reviewing stand began. Development of the drainage systems below the bunker was accomplished in conjunction with other projects. Over 4000 square feet of rock and masonry work was done on the embankment above the reviewing stand to prevent erosion. In addition, four large masonry catchments or headwalls were completed. By the end of the month the project was well on its way to completion and no anticipated to prevent completion by the deadline date of 9 March 1966.

(b) MLR Bunker Program. This project, assigned to Company "C", 7th Engineer Battalion, consists of cutting and erecting bunkers in four standard sizes. Cutting of bunkers received maximum effort throughout the month. During the month, materials for 47 8X8 bunkers; 15 8X12 bunkers; 8 12X24 bunkers; and 11 20X30 bunkers were cut. A total of 66 bunkers were issued to division units; 47 8X8's, 1 8X12, 10 12X24's and 8 20X30's. As the bunkers were issued, 1-2 engineers would be dispatched to the unit to supervise and assist erection of the bunkers. A recapitulation of the bunker program at the end of February indicated the following totals to date:

<u>SIZE</u>	<u>CUT</u>	<u>ISSUED</u>	<u>O/H(allocated)</u>
8X8	170	116	54
8X12	26	5	21
12X24	68	53	15
20X30	36	32	4
	<u>300</u>	<u>206</u>	<u>94</u>

(c) River Barriers. A need to control boat traffic on rivers in the TAOR continued. During the month, two barriers were constructed. One was constructed on the SONG LA THO near hill 55 at AT973611. The second was constructed across the SONG TUYLOAN just above the float bridge at AT946700.

(3) General Construction. The 3d Engineer Battalion Cantonment Program continued throughout the month. Showers and galleys were constructed for 1st AmTrac Bn, 3d MT Bn, and 3d AT Bn. A galley and eight CP strongbacks were constructed for 2/9 during the period.

The Construction Platoon cut and prefabbed file boxes, desks and shelves for the Division Staff Sections. They also constructed a standard (20'X48') quonset building for the Division S&C Files. In addition, 260 mount out boxes and 32 rifle storage boxes were constructed for 3d Marines, 12th Marines, and 3/9.

A concrete apron in front of the Division CP Bunker was completed during the month. The project required pouring 120 cubic yards of concrete.

6. Communications.

a. The Battalion Command Net continued to provide operational communications with units of Companies "A" and "C" when operating away from the battalion area. The net consisted of one AN/PRC-47 with a modified antenna at the Battalion CP, one AN/MRC-83 with Company "A" and two with Company "C". It was also used at specified times during each day to pass administrative traffic to Company "B", 3rd Engineer Battalion and Company "C", 1st Engineer Battalion, both at CHU LAI. Each of these companies is equipped with an AN/MRC-83. No technical difficulties were encountered in the operation of the net with AN/MRC-83 and AN/PRC-47 radios.

b. Communications has been provided for the 3rd Engineer Battalion Provisional Platoon through use of AN/PRC-10's for internal Communications between squads, and AN/PRC-25 for Communications between the platoon and the battalion. A wire system with sound powered phones serves as another communication system between squads.

c. Convoy communications for 3rd Engineer elements have been provided through the use of AN/PRC-10's. These serve as internal communications for the engineer element. They have also been used to maintain contact with helicopter support on the Division AO Net.

d. The helicopter courier service was utilized for intradivision message traffic.

7. Logistics

a. Supply/Material

(1) Enclosure (6) reflects the battalion supply status at the end of February. Enclosure (7) reflects the status of combat essential end items on requisition.

(2) Replacement issues for all battalion M-274 Mules and M-422 Mites were effected during the last week of the month. This had an immediate positive effect upon the battalion's total operational readiness.

(3) All battalion logistical functions passed the Commanding General's Inspection during the period 8 to 12 February.

(4) Rock supply support from the 7th Engineer Battalion and MCB5 is inadequate to meet the high demands. Local procurement of 1500 cubic meters of crushed rock was completed during the month. The rock was utilized as a subbase for the division command post parking lots. Additionally, 4500 cubic meters were requested through local procurement for use on division TAOR roads.

(5) An aerial tramway was invoiced to the 7th Engineer Battalion on 5 February upon instructions from Division G-4. Little possibility for employment of this system exists within the Division engineer tasks.

(6) The battalion received approximately 500 cubic yards of transit-mix concrete from MCB5 for use in division cantonment shower and galley construction, and communications center quonset hut and concrete drive at the Division CP bunker. The latter two projects required reimbursement of approximately 750 bags of cement and 80 cubic meters of aggregate from division stocks.

(7) Class III, IV and V materials were readily available throughout the month.

(8) Due to the restrictions placed upon in-country procurement of corrugated tin, 2000 sheets of corrugated transite roofing with accessory caps and ties were procured locally to continue selective tent replacement within the battalion.

(9) Logistical support to ADGON units in the Phu Bai and Chu Lai enclaves continued during the month. This included bunkers, repair parts and water supply chemicals, etc:

(10) Development of 30, 60 and 90 day requirements of certain repair parts and consumable/expendable items were initiated during the month. The purpose of this program is to overcome the obstacle of extended lead time in supply requisitioning response and to insure availability of regularly demand items.

DECLASSIFIED

(11) A total of five TD-18A Crawler Tractors modified with angle blades were received during the month, considerably enhancing the earthmoving capability of the battalion. Two 150T46 Mobile Cranes, five M-54 Cargo Trucks, two parts vans (authorized by Division Motor Transport Officer from excess division assets) and two WUF-1160 water purification units were also received during the month.

(12) On 26 February, the use of diesel oil as a dust palliative was restricted by III MAF.

(13) On 28 February, a platoon attached to BLT 2/3 arrived in-country. The equipment accompanying this platoon is indicated on enclosure (8). This provided a greater operational capability to the battalion, particularly the TD-15 Crawler Tractor.

(14) A request for modification of T/E allowances was submitted during the month. Items included to meet present and future operational commitments were:

- (a) 1~~5~~ Crane Truck Mounted
- (b) 1 Mixer Concrete
- (c) 1 Distributor, Bituminous
- (d) 1 Roller Pneumatic
- (e) 1 Sheepfoot Roller
- (f) 1 Scraper Earth Moving H82
- (g) 1 Contact Maintenance Truck
- (h) 22 3000 Gallon Tanks
- (i) 2 6000 lb Rough Terrain Forklifts
- (j) 15 Water Distribution Sets
- (k) 1 Battery Charger
- (l) 1 High Pressure Cleaning Unit
- (m) 2 WUF-1160 Water Purification Units
- (n) 1 Truck Mounted Water Distributor

(15) Enclosures (9) and (10) reflects the February status of Tropical Combat Boots and In-Kind Clothing Issues, respectively.

b. Maintenance

(1) With the arrival of new equipment, the battalion equipment maintenance posture improved considerably. Extended third echelon deadline intervals remained a problem throughout the period. Second echelon deadline status was minimal. TD-15/ TD-18 tractor, M-51 Dump Trucks remained high density deadlined items.

(2) The technical representatives from International Harvester Corporation and Drott Manufacturing Corporation concluded their visit, and departed on 6 February for Okinawa. They were to further their study of the problem associated with the TD-15 tractor at 3rd FSR (a total of six of the tractors authorized this battalion have been evacuated to 3rd FSR).

DECLASSIFIED

DECLASSIFIED

(3) During early February, recommendations were submitted on projected replacement of certain equipment assets during FY-1967. These included fifty percent replacement of TD-15 tractor and one-hundred percent replacement of TD-18 tractors and M-51 Dump Trucks. The high sustained usage is the basic reason for replacement.

(4) The total battalion operational equipment rose to approximately eighty percent for all three enclaves by the end of the month. However, twenty-three items of engineer equipment were only marginally operative and subject to deadline at any time. Two MRC-83's on hand have been code-X. Special arrangements were made for continued use of the items because of the lack of available replacement. Enclosure (11) reflects the operational status of battalion equipment (Da Nang) during February.

(5) The P-153 mine detector was placed in service during the month. Battery life has been found to approach 65 hours, or almost double the period expected. The detector has been found to be a significant improvement over the AN/PRS-3. It is lighter, possesses greater detection capability and has high troop acceptance. However, it is constructed of light weight metal and is subject to damage from rough combat handling. Deadline rates have been relatively low, with an operational status of eighty-five percent or greater being maintained.

(6) Evacuation of three M-51 Dump Trucks and one M-52 tractor occurred during the month (attributed to cracked frames and metal fatigue). This reflects the age of much of the equipment in use.

(7) Modification blower fans for the TD-15 tractor were received and installed in battalion tractors located in RVN during February.

c. Food Services

(1) Approximately 37,679 meals were served during the month of January as follows.

- (a) 10% MCI
- (b) 84% "A" Rations
- (c) 6% "B" Rations

(2) Messhall sanitation, facility and equipment conditions were considered note-worthy during the Commanding General's Inspection.

d. Ordnance

(1) Enclosure (12) denotes expenditures of class V during the month.

(2) Two 50 caliber machine guns were evacuated during the month. This represents the only air defense weapons organic to the battalion.

DECLASSIFIED

e. Facilities

(1) Camp Facilities improvement programs continued throughout the month.

(2) Preliminary plans were made for additional engineer and motor transport maintenance facilities. The location of a prefabricated in-country building for the Utilities Platoon was selected. Earth filling had begun at the proposed site.

(3) Drainage improvement continued with the installation of culverts, a causeway bridge, and road ditches.

f. Medical

(1) A total of 654 treatments were given during the month at the battalion aid station. The incidence of diarrhea increased (attributed to increased dust conditions prevailing with the advent of dry weather). Immunizations totaled 150 for the month. The balance of treatments were for the usual skin infections, abrasions and sprains.

g. Industrial Relations

(1) A total of 102 indigenous personnel were employed by the battalion at the end of the month. These personnel were utilized primarily as laborers on roads and construction projects.

(2) The monthly payroll (utilizing AIK Funds) rose from \$73,095 VN to \$172,166 VN. Ninety-eight additional indigenous personnel are scheduled to be hired.

h. Fiscal

(1) Enclosure (13) depicts the battalion fiscal status as of 31 January 1966.

8. CIVIL AFFAIRS

(a) The Civic Action Program made a number of tangible gains during the month of February. Gratefying results were obtained from the fields of: self-help projects; indegeneous employment, medical assistance, food distribution and foreign claims. These few of the many facets of the Civic Action Program are mentioned to reflect the diversity of the Civic Action Program being conducted by the Commanding Officer of 3rd Engineer Battalion.

(b) The Battalion Medical Team held 16 seperate sick calls for Vietnamese Nationals, in addition to maintaining their schedule of treatments in the battalion area. The Medical Team rendered over 2200 treatments to 1457 residents of five hamlets. These hamlets range all over the TAOR. In every area where engineers have been employed the Medical Team has rendered medical aid.

(c) Until the month of February Civic Action effort by 3rd Engineer Battalion had been largely concentrated in the hamlet of Da Son (AT-965765). With the employment of a provisional platoon from this battalion, the civic action sphere of influence was greatly expanded. An active program is now in effect on a regularly scheduled basis in the hamlet of Da Son (AT-967-765), Da Mon (2) (BT-057729) and Phu Ha (AT-912743).

(d) In the hamlet of Da Son, the second stage of construction on a hamlet dispensary was completed. Members of the Battalion Civic Action Team and hamlet officials worked through proper GVN channels to acquire necessary materials. The residents of the hamlet provided the workmen. The Commanding Officer of 3rd Engineer Battalion has authorized the necessary qualified personnel to supervise and instruct the workers. By the completion of the project, workers from the hamlet will have received training in Masonry, Carpentry, and excavation & Landscaping. Tools peculiar to each phase of the construction have been requisitioned through "CARE". These tools are then presented to the workmen so that they will be equipped to maintain and improve their newly acquired skills.

(e) The self-help program has not been limited to the hamlet of Da Son. In the hamlet of Da Mon (2) (BT-057729), several self-help projects were completed. First a dike and bridge across rice paddies around the hamlet was constructed. The originals were destroyed by the Viet Cong. The second of the self-help projects was a walk way & path around the perimeter of the hamlet. Finally with the aid of members of the provisional platoon in the hamlet, a playground for the children of the hamlet was constructed.

(f) Residents of the hamlet of Phu Ha & members of Company "A" constructed a road and bridge in the hamlet.

DECLASSIFIED

(g) Many times company programs were carried out in addition to Civic Action Programmed on the battalion level. Several instances arose where engineers constructed swings, school desks, and other needed items in hamlets near operating positions.

(h) The Battalion Indigenous Work Force Program has become very effective in suppling the work requirements placed on this battalion. The Indigenous Work Force is now some ninety members strong.

(i) A statistical summary of the months activities is included as Enclosure (1A).

DECLASSIFIED

9. LEGAL

(a) Legal activity during the month of February was less than the preceeding months. Legal assistance was rendered in several instances. Four appointments were made for persons to visit the Division Legal Assistance Section. These were problems of such nature as to require assistance from Lawyer Counsel.

(b) A breakdown of disciplinary action is as follows:

1. Non-Judicial Punishment

<u>Article Violated</u>	<u>Number of Violations</u>
86	3
92	2
89	1

2. Courts Martial

Summary Courts-Martials	0
Special Courts-Martials (Non BGD)	1
Special Courts-Martials (BGD)	0

3. Investigations

5

The following is a list of mines and booby traps detonated or found and destroyed in the Division TADR. All three elements of the Division TADR is listed here. Incidents are in numerical order as they occurred. This report covers the period 1-31 January 1966

1. AT995643--"A" Co. 2/9 sustained (1) WIA while destroying a booby trap 1 Jan 66.
2. AT994643-9th. Mar. patrol destroyed a booby trap. 1 Jan 66.
3. AT994644-9th. Mar. patrol destroyed a booby trap. 1 Jan 66.
4. BT090698-1/9 patrol deton. booby trap, believed to be (2) 105mm rds. 1 KIA 2 Jan 66.
5. AT954691-3/3 patrol member deton. booby trap. 2 Jan 66.
6. BT090640-Tank detonated mine, 1 WIA 3 Jan 66.
7. AT970659-3/3 Mar. patrol deton. booby trapped grenade. 4 Jan 66.
8. AT855664-3rd Recon patrol deton. grenade booby trap. 4 Jan 66.
9. AT955644-2/9 patrol hit by mine, believed to be elect. deton. 4 Jan 66.
10. AT957689-3rd AF truck deton. mine, 1 KIA 2 WIA. 6 Jan 66.
11. AT998638-2/9 patrol detonated booby trap. 7 Jan 66.
12. BT070695-3rd Ingr Bn sweep team found (1) Shu mine. 15 lbs. explos. 7 Jan 66.
13. BT063640-Tank deton. mine, no casualties. 8 Jan 66.
14. BT054657-LVT deton. mine (10 to 15 lbs. of explosive). 8 Jan 66.
15. AT921601-1/1 Marine deton. pressure type mine, 1 KIA. 8 Jan 66.
16. AT959681-3rd Marine patrol found (1) booby trapped grenade. 9 Jan 66.
17. AT957697-3/3 patrol member deton. booby trapped grenade. Grenade was set in a cup and attached to a tree. Trip wire was waist high. 9 Jan 66.
18. AT966644-1/9 patrol deton. booby trapped grenade, 2 KIA. 9 Jan 66.
19. BT061632-1/9 patrol deton. booby trapped grenade. 10 Jan 66.
20. Explosion occurred 65 ft. from entrance to "Take Ten" NCO club in downtown Da Nang. 4 USAF WIA. 11 Jan 66.
21. BT061630-9th. Marines destroyed booby trapped fence. 11 Jan 66.
22. AT957703-1/1 patrol found booby trapped grenade. 11 Jan 66.
23. AT940671-2/1 patrol member deton. booby trapped grenade. 11 Jan 66.
24. BT092642-1/9 patrol member deton. booby trap. 12 Jan 66.
25. AT941649-1/1 Marine found booby trapped 105mm Rd. in culvert. 12 Jan 66.
26. AT928669-1/1 platoon found and destroyed a booby trap. 12 Jan 66.
27. Near Thang Nhat hotel in downtown Da Nang a package was thrown at the fence and exploded. Contained frag. grenade. No casual. 12 Jan 66.
28. AT923673-1/1 Marine found booby trapped grenade. 12 Jan 66.
29. BT092645-1/9 patrol found four grenade booby traps, one was accidentally detonated. 13 Jan 66.
30. AT973652-3/3 found booby trapped 60mm mortar rd. 13 Jan 66.
31. AT992645-9th. Marines found a booby trap. 13 Jan 66.
32. AT932624-3rd Ingr Bn vehicle deton. a mine, 1 WIA. 14 Jan 66.
33. BT058625-9th. Marines found booby trapped gate (grenade). 14 Jan 66.
34. AT932625-M-37 vehicle deton. a mine, 2 WIA. 14 Jan 66.
35. BT058729-1/9 found (2) plastic mines, destroyed in place. 14 Jan 66.
36. AT895835-LVT detonated mine. 14 Jan 66.
37. AT991641-2/9 patrol member deton. booby trapped grenade. 14 Jan 66.
38. AT985635-2/9 patrol deton. booby trapped grenade. 15 Jan 66.
39. AT934623-Tank run over mine app. 40 lbs. explosive, damage to undercarriage of tank. No casualties. 15 Jan 66.
40. BT07785-grenade booby trap found in front of house #15 Long Vinh ng-1 Thuu street (disarmed). 15 Jan 66.

DECLASSIFIED

41. AT901772-1/4 deton. directional type mine, 1 KIA 7 WIA. 15 Jan 66.
42. AT967616-9th. Marines found (1) booby trapped 105 round. 16 Jan 66.
43. AT961833-1/3 found a large mine (Ant Tank). 16 Jan 66.
44. AT961653-3rd Engr Bn sweep team found VG pressure type AP mine 16 Jan 66.
45. BT091643-Tank detonated mine, no damage, no casualties. 17 Jan 66.
46. AT996998-9th. Marines destroyed booby trapped gate. 17 Jan 66.
47. AT867832-3rd. Marines found 20 to 30 lbs. of TNT wrapped in plastic. 17 Jan 66.
48. AT867834-3rd. Marines found boat with catchal charge and AT mine. 17 Jan 66.
49. AT945635-7th. Engr. Bn. crane hit by elec. deton. mine, app. 30 lbs. TNT. 2 KIA. 17 Jan 66.
50. AT963618-3/3 Marine detonated a mine. 18 Jan 66.
51. BT090639-1/9 patrol detonated booby trapped grenade. 18 Jan 66.
52. AT997664-3/3 patrol member detonated booby trap. 19 Jan 66.
53. AT993872-2/1 patrol detonated directional type mine. 19 Jan 66.
54. BT065698-Vietnamese civilian pulling down VG banner detonated a booby trap. 1/9 patrol was watching and received casualties. 22 Jan 66.
55. AT982667-2/12 Marine found and destroyed (2) booby trapped M-26 grenades. 23 Jan 66.
56. AT955664-3rd. Marine patrol found (1) 155mm round buried in trail rigged for electrical detonation. 24 Jan 66.
57. AT887713-1/1 patrol member was hit by elect. deton. mine, 1 WIA. 25 Jan 66.
58. AT893716-1/1 patrol member detonated booby trap, believed to be a 81mm mortar round with a trip wire. 25 Jan 66.
59. AT943697-Anti Tank Bn. vehicle detonated a mine under a bridge. Mine believed to have been detonated by a pull wire. 25 Jan 66.
60. AT999637-2/9 patrol detonated a mine. 25 Jan 66.
61. BT034679-1/9 patrol deton. mine, 81mm round with trip wire. 25 Jan 66.
62. BT050648-9th. Marines found and destroyed mine (4 M-26 grenades). 26 Jan 66.
63. BT050648-1/9 patrol member detonated mine. 25 Jan 66.
64. AT995664-9th. Marines found and destroyed mine (2 M-26 grenades) 26 Jan 66.
65. BT043782-2/9 patrol detonated mine. 26 Jan 66.
66. AT899709-1/1 patrol detonated booby trap mine. Mine was improvised canister loaded with pieces of metal and TNT. It was rigged with a trip wire. 26 Jan 66.
67. BT086697-1/9 patrol detonated mine. 27 Jan 66.
68. AT968688-3/3 patrol detonated grenade mine with trip wire. 28 Jan 66.
69. AT946672-3/3 patrol member detonated a mine. 28 Jan 66.
70. AT955653-3/3 patrol detonated a mine. 29 Jan 66.
71. AT953651-3/3 patrol detonated grenade mine. 29 Jan 66.
72. BT095646-1/9 patrol detonated booby trapped grenade. 29 Jan 66.
73. AT998654-3/3 Marine destroyed mine (81mm mortar rd. with trip wire)
74. BT067680-3rd. Engr. Bn. found wooden SHU type mine with 15 lbs. of explosives and rigged for electrical detonation. 30 Jan 66.
75. BT120634-1/9 patrol detonated mine (105mm artillery rd.). Mine was rigged with a trip wire. 30 Jan 66.
76. AT899692-1/1 patrol tripped a booby trapped grenade. It was a dud and did not explode. 30 Jan 66.
77. AT922670-1/1 patrol detonated a grenade mine. 31 Jan 66.

78. AT922670-1/1 patrol detonated (2) booby traps, 5 WIA. 31 Jan 66.
79. AT957664-3/3 patrol detonated a grenade booby trap. It was a dud and was destroyed in place. 31 Jan 66.
80. AT934672-1/1 patrol detonated a booby trap, 1 WIA. 31 Jan 66.
81. AT922674-1/1 patrol detonated booby trap, 1 KIA 2 IA. 31 Jan 66.
82. AT901701-1/1 patrol detonated booby trap, 2 WIA. 31 Jan 66.
83. AT093652-Tank detonated a mine. Tank had to be towed in. 3 WIA. 31 Jan 66.

CHU LAI TAOR

1. BT461148-1/4 patrol tripped booby trap, 2 WIA. 1 Jan 66.
2. BT463146-1/4 patrol member detonated booby trap. 1 Jan 66.
3. BT460143-4th. Marines found (3) mine Booby traps (60mm rounds with pressure fuse). 1 Jan 66.
4. BT438153-1/4 patrol member detonated a mine (60mm round). 2 Jan 66.
5. BT463140-1/4 found (2) frag grenades booby trapped, wired in a Panji pit. Destroyed in place. 4 Jan 66.
6. BT613009-1/7 patrol detonated booby trap. 4 Jan 66.
7. BT629001-1/7 Marine opened a booby trapped door, 1 WIA. 5 Jan 66.
8. BT440044-2/4 found (1) Anti Personnel mine. 8 Jan 66.
9. BT432039-2/4 found (3) mines. 9 Jan 66.
10. BT432038-2/4 found (4) mines. 9 Jan 66.
11. BT441055-2/4 patrol found (7) 20mm rounds packed with explosives and booby trapped, also (6) booby trapped grenades and (2) pull string type Anti Personnel mines. 10 Jan 66.
12. BT441043-2/4 patrol found (2) booby trapped grenades. 10 Jan 66.
13. BT608001-1/7 Marine found (1) M-79 projectile. 12 Jan 66.
14. BT441099-Popular Forces found booby trapped 57RR rd. 14 Jan 66.
15. BT562004-7th. Marine vehicle detonated booby trapped M-18 Yellow smoke grenade, no casualties. 17 Jan 66.
16. BS579916-7th. Marines found and destroyed booby trapped M-26 grenade attached to propaganda sign. 25 Jan 66.
17. BT610003-1/7 Marine found (2) bullet mines. 21 Jan 66.
18. BT419025-3rd. Recon patrol member detonated mine. 24 Jan 66.
19. BT445057-1/4 destroyed mine consisting of (2) M-26 grenades. 27 Jan 66.
20. BS579991-7th. Marines disarmed M-26 grenade booby trap. 29 Jan 66.
21. BT443033-4th. Marine patrol found (4) Anti personnel mines. 30 Jan 66.
22. BS554994-3/7 patrol detonated grenade mine. 30 Jan 66.

CHU LAI TAOR

1. TD007033-Train derailed by mine, est. 28 lbs. of explosives. 9 Jan 66.
2. YB38117-1st. Marines found (3) dummy mines. 14 Jan 66.
3. TD020026-Train hit (2) contact mines, Engine and four cars derailed. 19 Jan 66.
4. TD011029-Train hit contact mine, engine derailed. 19 Jan 66.
5. YB382081-2/1 vehicle detonated mine. 19 Jan 66.
6. YB323155-2/1 vehicle detonated mine. 24 Jan 66.

From: Commanding Officer
 To: Distribution List

Subj: Safe Conduct Passes

Ref: (a) Force Order 01060.1(U)
 (b) CG, III MAF Disp 090400ZJan66

Encl: (1) Facsimile of Safe Conduct Pass

1. This letter refers to the "Chieu Hoi" program instituted by the Government of Republic of Viet Nam as outlined by References (a) and (b). It contains information as to the procedures to be used when any member of this command comes in contact with a "Returnee," as to the issuance and use of Safe Conduct Passes by Returnees, and disposition of Returnees.
2. Every Viet Cong who comes under control of RVN or allied forces during the period 18 - 31 January 1966, will be treated initially as a "Chieu Hoi" Returnee. A "Returnee" is defined as "a person who voluntarily returns to GVN control after having actively supported the Viet Cong in some form of political or military activity." North Vietnamese soldiers (PAVN) are eligible for Returnee status. The only exception to the above applies to individuals captured during combat operations. If the individual does not possess a Safe Conduct Pass, the circumstances of capture or apprehension become the basis for decision as to whether he will receive Returnee treatment. In this connection, the Government of the Republic of Viet Nam has offered certain inducements to any Viet Cong/North Viet Nam personnel who take advantage of this program to return to Government control. He has also been offered certain rewards for any weapons and/or equipment he brings with him. A Safe Conduct Pass has been designed and distributed. This pass, a copy of which is attached as Enclosure (1) hereto, is to be honored by all Vietnamese agencies and by Allied forces.
3. When a member of this Command is approached by any Vietnamese who produces a Safe Conduct Pass, or who indicates that he is a Returnee (Chieu Hoi), the following action will be taken:
 - a. The Returnee will be searched and guarded.
 - b. A record will be made of the following:
 - (1) Time and location taken into custody.
 - (2) Circumstances surrounding apprehension.
 - (3) Identification of the Returnee (Name, Rank or position, military unit) **ENCLOSURE (3)**
 - (4) Serial number of Safe Conduct Pass (located on reverse side).
 - (5) Description and serial number(s) of any weapons and/or military equipment in possession of the Returnee.

- (6) Statement of extent of knowledge of Returnee.
- (7) Interrogation status, present location, and planned disposition.
- (8) Names, Ranks, and Serial numbers of Apprehending Marines.
- (9) Unit of apprehending Marines

c. Battalion S-2 will be notified immediately by Spot Report, which will include Items (1), (2), (3), (6), (7), and (9) of paragraph 3b, above.

d. The Returnee will be transported to the nearest Marine battalion headquarters by the most expeditious means available for further transportation to the nearest Captive Collection Point. Any weapon and/or equipment in the possession of the Returnee at time of apprehension will be forwarded with the Marines who escort the Returnee to the Collection Point.

e. Food, shelter, and medical attention, if required, will be given to the Returnee.

f. A copy of the record of apprehension, as required in paragraph 3b above will be given to the Captive Collection Point taking custody of the Returnee. A copy will also be forwarded to this Headquarters as soon as possible.

4. Returnees will not be placed with Viet Cong captives and/or Viet Cong suspects, but will be segregated.

5. As set forth in References (a) and (b), it is to be remembered that the individual is a Returnee under the "Chieu-Hoi" program and has been guaranteed certain treatment, inducements, and rewards. The success of this program will depend, in part, upon the treatment received. It therefore cannot be over-emphasized that the Returnee is not to be documented, reported, or treated as a Prisoner of War. He will receive humane and dignified treatment.

6. Commanding Officers will insure that each member of his command is cognizant of the contents of this letter.

MEMORANDUM

From: Commanding Officer
To: Colonel G. W. CARRINGTON (G-2)
Subj: Interrogation of Viet Cong prisoners, in relation to Viet Cong mine activity
Ref: (a) Telecon. Major SMITH 1040 17 January 1966.

1. It is of vital interest to this battalion, that all possible measures be taken to obtain information regarding VC mine warfare techniques.
2. It is requested that the interrogation of Viet Cong prisoners include extensive questioning in relation to mine activity. This may prove particularly rewarding when a VC is captured near the site of a mine incident. It is further believed that VC prisoners may have valuable information on mine warfare, even if they are not engineers or demolitionists.
3. The following essential elements of information are desired:
 - (a) At what time of day are mines generally emplaced?
 - (b) Are specific targets desired-or targets of opportunity?
 - (c) Are attempts made to emplace mines behind enemy (US-RVN) lines?
 - (d) Are mines pre-positioned and armed later, after enemy troops have passed their lead elements?
 - (e) Do the local civilians know that the VC have mined specific places? If they do, is assistance provided?
 - (f) Where are the mines constructed and materials obtained?
 - (g) How are mines transported to employment site? Singularly? In quantity? Are civilians used, including women and children?
 - (h) Where are the VC mine personnel trained?
 - (i) Does the captured VC know of any minefields, or of any indications of laying minefields?
 - (j) Does the prisoner know of existing mines within the immediate area, or anywhere in the TACOR?
4. The answer to any of the questions listed may generate other questions concerning mine activity. This organization is interested in any information which pertains to VC mine warfare. Any new trend or technique discovered may be of value to our mine detection efforts. Further, up-to-date information on VC mine activity disseminated to troops in the field may help reduce mine casualties.

BATTALION BULLETIN 1500

From: Commanding Officer
To: Distribution List

Subj: Battalion Training Schedule

Ref: (a) DivO P3000.1D w/ch #1
(b) DivO 1500.3

Encl: (1) H&S Company Training Schedule
(2) Support Company Training Schedule
(3) "C" Company, 7th Engineers Training Schedule
(4) Officers School
(5) SNCO School
(6) Administration School

1. Purpose. To publish the weekly training schedule for the week of 10-16 January 1966.

2. Action.

a. The enclosed schedule will be followed by applicable sections of the command. Formal training for "A" and "C" Companies are waived during this period.

b. Company Commanders will ensure that a progressive program for troop indoctrination is conducted in accordance with reference (b). At least one briefing will be conducted during the week of a minimum length of fifteen minutes.

c. Companies will conduct MOS and general military subjects training to the maximum extent consistent with combat support missions.

d. Lesson plans will be submitted to S-3 one day prior to scheduled classes.

e. A post-training report will be submitted to the S-3 by 1800 18 January 1966, listing the topic and number of personnel attending troop indoctrination briefings.

ENCLOSURE (8)

On the morning of 27 Jan 1966 an engineer sweep team attached to the 3rd Battalion of the 3rd Marines found a new type of boby trap at coordinates (AT977632). The mine consisted of two M-26 grenades and a piece of split bamboo. The grenades were carefully placed on the ground with the spoons down. Then the bamboo was placed over the grenades and the pins removed. The pressure of the bamboo was sufficient to keep the grenades on the deck. The bamboo held in place by vines. A trip wire made of vines was fastened to the bamboo and stretched across the trail. The sweep team moved a safe distance away from the boby trap and sprung the device. When the trip wire pulled the bamboo from over the grenades the pressure of the spoons was sufficient to toss the grenades into the air. This is the first time a device of this type has been found and reported.

SEE SKETCH BELOW

BAMBOO HELD IN PLACE BY VINES

DECLASSIFIED

HEADQUARTERS
3d Engineer Battalion (Rein)
3d Marine Division (Rein), FMF
c/o FPO San Francisco 96601

4/JGD/111
4400
25 January 1966

From: Commanding Officer
To: Commanding Officer, 3d Force Service Regiment
Via: (1) Commanding General, 3d Marine Division (Rein), FMF
(2) Commanding General, III Marine Amphibious Force

Subj: Combat Essential Equipment, Replenishment of

Encl: (1) Listing of Combat Essential Equipment on requisition

1. This command currently has twenty-five (25) requisitions outstanding for T/E replenishment of combat essential end items. Attrition of these items was caused by three (3) factors:

a. The overage equipment that became code-X after extensive use.

b. The evacuation of equipment from FLSG to 3d FSR for fourth echelon repair.

c. The evacuation of equipment to 3d FSR because the equipment has exceeded the FLSG work time backlog while awaiting repair parts.

2. As a result of the above transactions, a considerably large gap exists between the amount of combat essential equipment that this command is authorized by Table of Equipment and the quantity that is actually on hand. The lack of these items has considerable impact on the operational readiness capabilities of this battalion.

3. Enclosure (1) identifies end item requisitions by document number, advice received, and tracer action under taken. The latter has become of particular concern to this Command, since tracer response has not been received. Twelve (12) of these documents have had at least three (3) separate tracer actions, one (1) has seven (7) tracer actions.

4. In view of the above, it is therefore requested that this Command be advised of the status of each document listed in enclosure (1), that the ETA and TCMD be provided in each case, and that expeditious action be taken due to the critical need for the requested equipment.

N. J. DENNIS

TD-15 Tractor Operators Syllabus

Total Hours - 7.0

The purpose of this course is to familiarize the student with the maintenance and operation of the TD-15 Crawler Tractor with Drott 4 in 1 skid shovel.

- 10 Min Introduction: Introduction of technical representatives, discussion of the problem effecting the TD-15 tractors.
L
- 05 Min Safety: Safety precautions applicable to the TD-15 tractor.
L
- 10 Min Prestarting Responsibilities: Operator prestarting checks on the TD-15 tractor.
L
- 10 Min Starting and Stopping Procedures: Starting procedures, operational checks, stopping procedures and after operation inspection.
L
D
- 20 Min Operating Controls: Functioning and operation of operators controls.
L
D
- 20 Min Capabilities and Limitations: Capabilities and limitations of the TD-15 tractor with Drott 4 in 1 multi-operations of the 4 in 1 attachments. Angledozer operation, forklift operations and hydraulic scraper operations.
- 60 Min Preventive Maintenance and Lubrication: Inspection and lubrication of the TD-15 tractor with 4 in 1 skid shovel, and types of lubricants and lubrication equipment.
L
D
- 45 Min Demonstration of Capabilities of the TD-15 4 in 1 Skid Shovel: Bulldozing, scraper, skid shovel, clam shell, handling of irregular objects, emergency lifting device.
D
- 225 Min Performance of Operational Functions: TD-15 tractor operation and 4 in 1 bucket operation.

3 February 1966

From: Commanding Officer
To: Commanding Officer, 4th Marine Regiment, 3d Marine Division, FMF

Subj: Command Chronology for the month of January 1966

Encl: ✓(1) Command Chronology

1. The subject report for the month of January 1966 is herewith submitted.

H. A. TOMPKINS, JR
Acting Commanding Officer

DECLASSIFIED

DECLASSIFIED

COMMAND CHRONOLOGY

1. Significant Events

- a. On 18 January 1966, the first and 2nd platoons of this company were transferred to "A" Co, 1st Engr Bn. This left this unit with no billet MOS personnel in the 1371 field.
- b. The water points at the 2/4 and old 2/4, C. P. were turned over for operational control of Co "A" 1st Engr Bn on the 18th of January with two M-51 dump trucks, 2-M-37 personnel carriers, 2-M-101 trailers, 2 water distribution sets, two bath units, 1-TD-18 and 1-TD-15 tractor, and 5-M-274 mules.
- c. During the month of January, this unit conducted the Marine Special Mine Warfare and Booby Trap School until 18 January, with approximately 143 students undergoing the two day course of instructions.
- d. During the month of January, this unit participated in three combat support operations and established the water point for "Operation Double Eagle" ^{on} and D plus 1.
- e. A total of 28 strongback tents were constructed up to 18 January by this unit for the 4th Marines.
- f. Approximately 100000 yards of sand was hauled into An Tan for the civilians moved from the An Tan bridge area.
- g. The ADC Command bunker was completed on 4 January.
- h. Completed the ammo bunker for 2/4 old C.P. area on 8 January.
- i. Approaches for the Bridge Company ferry ^{were} ~~was~~ completed on 9 January at An Tan Bridge.
- j. On 9 January, the 2nd platoon began removing and clearing ARVN placed mines at the hill 69 complex for the displacement of 2nd Battalion 4th Marines CP to this area.
- k. On 14 January the 2nd platoon destroyed a cave and tunnel complex at the new 2/4 CP area expending 1800 lbs of TNT, 12-40lb cratering charges, two 40lb shaped charges, 200 lbs of composition C-4 and 3000 ft of detonating cord.
- l. The CP bunker for 1/4 was completed and the remodeling of the ADC's quarters was completed on 17 January .
- m. The site for Service Battalion was completed in the FLSU area on 19 January.

DECLASSIFIED

2. New Developments

a. After 18 January this units main effort has been dump truck and engineer equipment support of the various units in the Chu Lai area, especially "A" Co, 1st Engr Bn. This unit is now operating one water point at the "B" Co CP area.

3. Problem Areas

a. None significant at this time
