FPO San Francisco, California 96602

COMMAND CHRONOLOGY FOR MAY 1966

Part A: Organization Data

Part B: Summary of Significant Events

ENCLOSURE (1)

Part A: Organization Data

1. Organization. The 3rd Engineer Battalion is organized in accordance with T/O 141378.

2. Location

- a. DA NANG TAOR. 3d Engineer Battalion (less Company "B").
- b. PHU BAI TAOR. Company "B" (-) (Rein), 3rd Engineer Battalion.
 - (1) OPCON ADCON of 3rd Engineer Battalion
 - (2) One Platoon ADCON, 1st Marine Division
- 3. Period Covered by this report: 1 May to 31 May 1966
- 4. Name/rank of Commanding Officer(s) and staff/principal subordinates including T/O billet assignments (as of 31 May 1966)

T/O Billet

Battalion Commander Battalion Executive Officer Battalion S-1/Adjutant Battalion S-2 Battalion S-3 Battalion S-4 Communications Officer Heavy Equipment Officer Battalion Supply Officer Utilities Officer Motor Transport Officer Battalion Surgeon Battalion Chaplin H&S Commanding Officer Engr Supt Co Commanding Officer Co "A" Commanding Officer Co "B" Commanding Officer Co "C" Commanding Officer, Acting

1stLt Edmond J. SMITH Jr. 2dLt Clarence L. GUTHRIE Jr. CWO-2 Paul A. DEAN 2dLt James R. WYATT Captain Bernard OZOLINS Lt Alfred R. FRANKEL LOdr Thomas A. KENNY

1stLt Edmond J. SMITH Jr. Major Dwayne D. CREWS

Captain Larry L. O'LAUGHLIN

1stLt John M. HENNESSY Captain Gregory R. ROOT

- 5. The average monthly strength of the Battalion was:
 - a. DA NANG TAOR: Off 28 Enl: 735
 - b. PHU BAI TAOR: Off 4 Ents 143

Name LtCol Nicholas J. DENNIS

Maj Conway J. SMITH

2dLt Norman F. LABOUNTY

Major Charles D. WOOD Captain James G. DIXON

1stLt Paul I. FAULKENBERKY

Enclosure (1)

Part B: Summary of Significant Events

1. Personnel

- a. The strength of the battalion was decreased by a total of 127 during the month as follows:
 - (1) Gains: 73 (3 MC Off; 1 Navy Enl)
 - (2) Losses: 200
 - (a) Battle: 9 (4 Enl KIA; 4 Enl WIA; 1 Enl MIA)
 - (b) Non-Battle: 5
- (c) Administrative: 184 (Co "C" 7th Engineer Battalion returned to ADCON/OPCON 7th Engineer Battalion, one platoon of Company "B" transferred ADCON 1st Marine Division).
 - b. A shortage of personnel exists in the following ranks:
 - 4, Captains; 4, WOs; 3, 1stSgts.
- On 1 May 2dLt G. H. WALLS and LCpl J. L. ISRAEL departed on emergency leave to CONUS. LCpl W. K. CABANA was WIA as result of mine on Operation GEORGIA.
- On 2 May Sgt J. J. FOSTER, LCpl J. T. R. CRUM and LCpl G. D. GILBERT were WIA as a result of an Anti-Personnel mine while on Operation GEORGIA.
- On 3 May LCpl P. G. MCGREW and Pfc W. M. EATON Jr. were WIA while on a mine sweep during Operation GEORGIA. Pvt T. W. HUGLEY was WIA while on a "search and destroy" mission during Operation GEORGIA.
- On 4 May 2dLt L. G. ELDER and Pfc D. D. MILLS were WIA while clearing an ARVN minefield with 2/9. LCpl W. C. JOHNSON and Pfc D. R. HUDGINS were WIA while on a mine sweep with 1/9. Pvt J. E. CYLER departed on emergency leave to CONUS.
- On 6 May Sgt J. S. DODSON was reported as MIA after completing a roadsweep with 2/4. MSgt C. F. TYLER departed on emergency leave to CONUS. Joined 2nd Lt R. L. STUTTS, assigned duty as a Platoon Leader in Company "A".
- On 9 May LCpl G. C. LAGRECO departed on PCS orders in connection with emergency leave.
- On 10 May 1stLts K. L. WILSON, R. L. BENTLEY, and R. L. STUTTS were promoted to present rank.
- On 13 May SSgt O. F. LEROY was WIA when vehicle he was driving at worksite ran over an unknown explosive device. Sgt H. J. HARTEIS departed on PCS orders in connection with emergency leave.

On 14 May SSgt F. H. PETTITT was WIA while on a "search and destroy" operation with Co "B" 1/4 (Fwd).

On 16 May GySgt J. R. WYATT was promoted to 1stSgt.

On 17 May ICpl F. I. BRANCH was KIA and Cpl D. C. CHRISTOPHER and LCpl C. L. KUNKEL were WIA as result of a mortar attack while in defensive positions, with 1/4.

On 19 May Cpl E. K. CHUNG was presented the Bronze Star Medal with Combat "V" by the Commanding General, 3rd Marine Division for heroic action against the Viet Cong.

On 20 May Capt B. OZOLINS joined, assigned duty as Motor Transport Officer. LCpl D. KNARIAN and LCpl L. S. ROBBINS were KIA as result of a mortar attack while in 1/4 defensive positions.

On 22 May Cpl Z. FISSEL and LCpl D. O. PHILLIPS were meritoriously promoted to their present rank.

On 23 May one platoon of engineers consisting of 1 Off and 44 Enl were transferred to ADCON 1st Marine Division.

On 25 May LCpl C. W. RUST Jr. was WIA as result of an unknown explosive device while on a minesweep with 1/9.

On 26 May Change of Command ceremonies were held. Major Conway J. SMITH relieved LtCol Nicholas J. DENNIS, who is rotating to CONUS on 1 June (encl (2)).

On 27 May LtCol N. J. DENNIS departed on TAD to Okinawa. 1stSgt E. A. CLARK and 1stSgt J. R. WYATT were promoted to 2ndLt (Temporary).

On 28 May 2dLt J. H. ARMSTRONG, Sgt G. M. PHILLIPS, Pfc W. A. ROSSAMANDO, Pfc W. M. EATON Jr. and Pfc L. C. WHITE were WIA when PC they were riding detonated an unknown explosive device.

On 29 May Sgt W. P. JAKUBOWSKI and LCpl G. Z. DROZ were WIA during VC ambush of a roadsweep in 2/4 TAOR. SSgt H. BOLLTON departed on emergency leave to CONUS.

On 30 May Company "C" 7th Engineer Battalion returned to ADCON and OPCON of the 7th Engineer Battalion.

On 31 May Sgt C. E. ROBINSON was WIA as result of a mortar attack while on a "search and destroy" operation with 3/9.

The following awards were made during the month: 1, Bronze Star Medal; 17, Purple Heart Medals; 59, Meritorious Masts; 3, Letters of Appreciation.

The following recommendations for awards were submitted during the month: 2, Silver Star Medals; 1, Bronze Star Medal; 1, Navy Commendation Medal; 3, Letters of Appreciation.

The following promotions were effected: 3, to 1stLt; 2, to 2dLt; 2, to 1stSgt; 1, to Cpl; 1, to LCpl; 5, to Pfc.

2. Administration

- a. The Battalion Promotion Board met on 22 May to consider meritorious promotions.
- b. A debriefing was held on 31 May 1966 for all personnel departing in the June Rotation Draft.
 - c. The Battalion published the following orders during the month:

 BnBul 6200-Heat Casualties; Prevention, Diagnosis, and First Aid of

3. Intelligence

- a. The S-2 officer conducted the usual nightly intelligence briefings for the battalion staff and company commanders. On a weekly and bi-weekly basis the S-2 chief conducted briefings for the Staff NCO'S. Periodic briefings were given to troops on company level by units commanders, and classes were given on such subjects as security procedures, clearances, local customs, and monetary exchange.
- b. Future operations in the next few months will require several photo reconnaissance missions. These missions were flown between the dates of 30 April and 10 May, and covered the North-South Routes 1, 10, 5 and 13, and the lateral routes 14 and 40. The photos were received promptly and photo interpreters from III MAF did an outstanding job producing clear and accurate overlays of the routes. Data collected from the photographs included breaks in the road, road blocks, road washouts, and of greatest importance, accurate reports on the condition of bridges. In addition, a trail leading south from Hill 55 (AT967616) to Route 14 (AT968584) was photographed. It appears that this trail can be improved to provide another MSR southward. The information gathered will be useful in determining engineer requirements for anticipated tactical developments.
- c. Battalion security was increased due to civil unrest in DA NANG (14 27 May), the occurrence of two communist celebrations (19 and 22 May), and the dark phase of the moon. Watch and security procedures were stepped up following numerous reports of VC troop movements and build-ups.
- d. The S-2 section continued its analysis of Viet Cong mine incidents and techniques (See Enclosure (3), Mine and Boobytraps Incident Report).
- e. Information was collected on VC tunnel activities. The newly established and trained tunnel team from 3d Engineer Battalion, was deployed on Operation GEORGIA in support of 3d Battalion, 9th Marines (See paragraph 5.b (12) Operations). Their support extended from 27 April to 9 May and information gained contributed much to the knowledge of VC tunnel warfare (See tunnel team; report of, KLW:rws over 5213 dtd 11 May 1966). An additional report of tunnel activities was received on 20 May 1966 (See tunnel team; report of, KLW:rws dtd 17 May 1966).
- f. The recent incidents in the DA NANG TAOR indicate that personnel in the 3d Marine Division are better prepared to cope with mines and boobytraps. This may be due to experience and to training received at the Demolitions School. The S-2 section instructs on mine and boobytrap incidents and patterns to the Course "D" students. See paragraph 4, Training, for information concerning Division Mine Warfare and Demolitions School.

4. Training

- a. Emphasis continued on training personnel within the battalion. MOS training was conducted primarily on the job but certain specialized skills received more formal training. CMS training was conducted for the most part outside of working hours or at job sites while waiting for transportation or materials. Officers and staff non-commissioned officers received instruction of one-half hour to one hour three evenings each week. Battalion Training Schedules are attached as Enclosure (4).
- b. In compliance with DIVISION ORDER 1510.3 and 7000.3A, newly-arrived personnel received troop indoctrination and lectures on the monetary systems in the Republic of VIETNAM. In addition, lectures were conducted weekly at company level on current events and on topics of troop indoctrination.
- c. On 27 May 1966, Sergeant J. V. ERYDGES departed for Vietnamese Language School at Fort BUCKNER, OKINAWA.
- d. The Division Mine Warfare and Demolitions School, conducted by the battalion, continued to instruct both division and non-division personnel in mines, demolitions, and boobytraps. (See Enclosure (5) for new additions to the training facilities.) This instruction was conducted by contact instructor teams and by resident courses in the battalion school area. The following is a recapitulation of the training conducted by Mine Warfare and Demolitions School during May:
- (1) A Contact Instructor Team was deployed to 3d Shore Party Battalion on 20 May 1966 where it instructed sixty (60) personnel in VC mines and boobytraps, and the use of the P-153 mine detector. This instruction was of six (6) hours duration.
 - (2) Formal classes at the Mine Warfare and Demolitions School:

e. A Division Field Fortification School was begun during the latter part of May. This school is designed primarily to teach supervisors the correct uses of wire obstacles and the correct methods of constructing various emplacements and bunkers. See photographs of Enclosure (6). The following classes were conducted:

UNIT	PI	RSONNEL	DATE
3d Engineer Battalion		23	29 May 1966
12th Marines		<u>15</u>	30 May 1966
	TATOT	38	

- f. The Generator Operators School trained one operator from H&S Company 2/3 on 12 May 1966, six personnel from 3d MT Battalion on 18 May 1966, one man from FLSG "A" 22 28 May 1966, and six from 1st AMTRACK Battalion on 26 May 1966.
- g. The tunnel teams continued to train during May and were utilized on Operation GEORGIA and in the 2/3 TAOR (See Operations, para 5).

5. Operations

- a. General. During May, the 3d Engineer Battalion (Reinforced) remained in general support of the 3d Marine Division. On 30 May, however, Company "C" 7th Engineer Battalion, commanded by 2dLt W. KELLY, returned to Administrative and Operational Control of 7th Engineer Battalion. Employment of the battalion was in the following three categories: combat support, combat service support, and provisional rifle unit operations.
- (1) Combat support operations consisted of providing mine detection and demolitions teams in support of infantry "search and destroy" operations, daily sweeps of MSR's for mines and boobytraps, and engineer support of convoys traveling to and from PHU BAI. In the DA NANG TAOR, combat support was provided to eight infantry battalions (including 3/9 at AN HOA) by Companies "A", and "C" and in the PHU BAI TAOR to four infantry battalions by Company "B". VC mine incidents data, obtained during the month, was recorded by the S-2 and is contained in enclosure (2). The combat support provided involved:
- (a) A total of 473 deliberate electronic mine detector sweeps of MSR segments. Daily average distance swept was 22.8 Kilometers.
- (b) A total of 139 visual sweeps. Daily average distance was 4.5 Kilometers.
- (c) Excluding minefield clearance, 11 incidents that required engineer effort during deliberate sweeps. See paragraph 3, Intelligence.
- (d) Total ordnance destroyed by combat engineers is recorded in enclosure (7).
 - (e) Support of over 24 infantry "search and destroy" operations.
 - (f) Support of one convoy, Operation ROUGHRIDER North, to PHU BAL
- (g) Support of Operation GEORGIA (See subparagraph (12)), Operation CHEROKEE (See subparagraph (13)), and Operation WAYNE (See subparagraph (14)).
- (2) Combat service support of the 3d Marine Division was in four categories; roads and bridges, fortifications, general construction, and utilities. Companies "A", "B", and "C", assisted by Engineer Support Company, were committed to road construction in the 3d Marines TAOR, 4th Marines TAOR, and 9th Marines TAOR. Company "C", 7th Engineer Battalion, was primarily employed in cutting MIR Bunkers and assisting units in the erection of bunkers. Most general construction projects were accomplished by Engineer Support Company and one platoon of Company "C", 7th Engineer Battalion. Water points and shower units were under the operation of Engineer Support Company.
- (3) A provisional unit was employed as part of a provisional infantry platoon in the Marble Mountain area pacification program. This unit consisted of a SNCO acting as platoon leader, seventeen combat engineers, and one corpsman. The platoon was located near the hamlet of XOM DA ME, west of the Marble Mountain Air Facility.

b. Combat Support

- (1) 1/1 TAOR. Combat engineer support in the 1/1 TAOR was provided by 1st Platoon, Company "B", commanded by 1stLt R. S. VANSICKLE. A four-man sweep team was billeted at the 1/1 CP in order to better perform its MSR sweep mission. Daily the MSR (YD809164-819183) to National Route #1 was swept deliberately using electronic detectors. No mines or evidence of mining activity was found. One officer and sixteen combat engineers returned at 1000 on 1 May from Operation VIRGINIA. Two engineers accompanied Company "B", 3d Antitank Battalion on operations in the TAOR, 15-17 May. One officer and fifteen engineers supported the battalion on "search and destroy" operation on 29 May. For Operations CHEROKEE and WAYNE, see subparagraphs (13) and (14) below.
- (2) 2/1 TAOR. General combat engineer support was provided by Company "B". A two-man engineer team daily conducted deliberate sweeps from (YD855101) to (YD862124), 1-25 May. No mine incidents occurred during May. Ten engineers provided support on a "search and destroy" operation with Company "H" on 2 and 3 May, and four engineers supported Company "H" 4-7 May. During 14 and 15 May, two engineers supported Company "H" and seven Company "F" on "search and destroy" operations. When 2/1 moved to CO BI-THANH TAN area for operations, 26-31 May, 2dLt R. K. CULLERS and sixteen combat engineers were attached for close combat support. An additional eight engineers were assigned to support Force Recon in CO BI-THANH TAN area on 31 May.
- (3) 3/1 TAOR. Company "C" provided general support to 3/1 beginning on 31 May. Four engineers swept two lateral roads, (AT987663-967664) and (AT992684-975685), which led to Route 1C. Five other engineers were billeted in the battalion CP to provide close combat support.
- (4) 1/3 TAOR. Combat engineers support was provided in the 1/3 TAOR by the 2d Platoon, Company "A", commanded by 2dLt G. H. WALLS, Jr. This platoon was used in a general support role and was billeted in the 3d Engineer Battalion CP. Mine sweeps were conducted as requested. Four men conducted a deliberate sweep of Route 33 (AT920793-945787) on 1 May, of Route 2 (AT871761-868753) on 4 May, of grid square (AT9081) and Route 33 (AT899821-831850) on 5 May and two engineers assisted two men from 7th Engineer Battalion sweep Route 33 (AT931795-917793) on 19 and 20 May. Four other engineers provided combat support on a "search and destroy" operation 11-20 May. And two engineers gave demolition support on 29 May.
- (5) 2/3 TAOR. Combat engineer support in the 2/3 TAOR was provided by 1st Platoon, Company "A", commanded by 2dLt W. B. ST JOHN, Jr. (1-6 May) and 1stLt R. L. STUTTS (7-31 May). The platoon had nine men billeted at Hill 41 and twelve at SIERRA to enhance its support capability. Eighteen of these engineers daily conducted both visual and deliberate mine detection sweeps of Route 5, south of the float bridge at (AT946998) to (AT944663), and branch roads (AT943688-936687) and (AT944663-9345667). On 8 May a sweep team located under a bridge at (AT944672) a buried C-ration can with comm wire and an 81mm illumination round nose assembly attached. An engineer sweep team on 19 May discovered and removed a boobytrapped M-26 grenade on top of an alter in Pagoda in vicinity of (AT945673); the grenade was attached by a fishing line to a

C-ration can which contained scrap paper. An M274A1, mechanical mule, was damaged and its occupants WIA by a detonation adjacent to the bridge at (AT944676); investigation by engineers revealed a crater ten feet wide and three feet deep with communications wire leading from the sandbags of the bridge wingwalls to a freshly cleared area near the village of PHUOC NINH (1). Eight other engineers, not assigned to sweep teams, provided close combat support for an Operation "County Fair" on 8 and 9 May. Two engineer officers and six enlisted with security provided by Company "F" conducted a road reconnaissance of Route 5 south of Hill 41 on 12 May. Eight engineers supported a "search and destroy" operation on 13 and 14 May. A tunnel team composed of one officer, 1stLt K. WILSON, and seven combat engineers provided support to COUNTY FAIR operation 14-16 May. Seven engineers provided close combat support on "search and destroy" operations 27-31 May, while six officers supported a COUNTY FAIR operation. On 30 May four engineers were deployed on "search and destroy" operations with Company "G".

- (6) 1/4 TAOR. Combat engineer support to 1/4 was provided by 2d Platoon, Company "B", commanded by SSgt F. L. MIGLORINI, 1-21 May, and by 3d Platoon, commanded by 2dLt R. K. CULLERS, 22-25 May. The platoon strength averaged twenty-six until 17 May when one KIA and two WIA occurred during a VC mortar attack on 1/4. This platoon also provided support to Company "C", 3d Tank Battalion, which operated in the 1/4 TAOR. For operation CHEROKEE, see subparagraph 13 below.
- (7) 2/4 TAOR. First Platoon, Company "C", commanded by 2dLt K. J. KIRIACOPOULOS began supporting 2/4 on 6 May. This platoon, which was billeted at the 2/4 CP, had an average strength of sixteen combat engineers. Throughout the month an average of seven engineers were employed conducting deliberate sweeps of the MSR from (BT069661) to (BT067661) to (BT072707) and the haul road (BT072703) to (BT074700). During the last of the month, sweeps were conducted from (BT072707) to (BT079698) on the coastal road. On 6 May a sweep team discovered and destroyed a foottrap, 1'x1'x3' vicinity of (Br067682) with dummy wires leading from it. At about 1740 on 22 May in the vicinity of (BT070694), a controlled mine was detonated prematurely in front of a 6x6 truck, but caused no injuries; it was estimated from the size of the crater, three feet deep and five feet wide, that the charge was about thirty pounds of explosive. A sweep team and its security were ambushed at 0845 near (BT079698), on 29 May; two engineers were WIA and one security WIA; five VC of the estimated fourteen in the ambush were KIA, confirmed by body count. Combat support was provided on a "search and destroy" operation by eight engineers on 6 May; during this operation they destroyed a 3'x3'x8' tunnel, a 2'x2'x3' punji trap, and a 10'x5' gate from which a secondary explosion occurred. On 24 May three engineers supported K-3/4 and three others Company "G" during "scarch and destroy" operations.
- (8) 3/4 TAOR. Company "B" provided general support to 3/4 during May. Two engineers conducted a visual sweep (YD938079-938077) on 22 May and found at (YD938077) a thirty-pound charge of TNI between the rails and canouflaged by stones. This charge was connected by wires to a one pound charge and a pressure-electric firing device was fabricated of bamboo and wire terminals

and connected to five flashlight batteries; electric blasting caps were in each charge. Using a rope, the charges were removed. On 27 May a two-man team conducted a visual sweep from (YD893086) to (YD873124). Four engineers provided combat support to 3/4 15-17 May and two 18-19 May. On 18 May, the two engineers located and destroyed in place one 155mm round rigged as a pressure-activated mine.

(9) 1/9 TAOR. Combat support was provided to 1/9 by the 4th Platoon, Company "C", commanded by 2dLt J. R. ARMSTRONG. The platoon was billeted on Hills 55 and 22 to provide better and more responsive compat support. A daily average of fifteen engineers conducted deliberate mine sweeps and nine engineers supported letter companies. The mine sweeps were conducted throughout the month on the lateral roads from Route 1C at (AT987663) to AN TRACH (1) (AT973661) and (AT989644) to Hill 55 (AT983623) and of the lateral road from Route 5 (AT943663) south of Hill 22 to (AT964664). On 1 May 1966 the sweep team from Hill 22 located one M-18 smoke grenade under a full sandbag on the surface of the road (AT945663). A 3d ATBn M-37 detonated a mine at (AT983624), near the base of Hill 55, at 0955 on 11 May 1966; a three foot deep crater resulted with no visible wires or schrapnel, but a part of the communications wire normally along the road was missing in that area. On 12 May 1966, a sweep team member tripped an unknown explosive device in the Hill borrow pit (All 981622); no WIA resulted. At 1430 on 13 May, a 3d Engineer Battalion M422 detonated an explosive device in the Hill 55 borrow pit (AT981622); one VIA resulted. An engineer sweep team on 16 May 1966 located at (BT000631), and destroyed a SCHU box mine which had a pressure firing device and approximately twenty pounds of TNT. At 1030 on 17 May 1966, an M-35 detonated a mine near BIC BAC (AT985630); no schrapnel and no wires were found in the crater that was three feet deep and six feet wide. On 19 May 1966, a sweep team detected, located, and destroyed one 81mm mortar round rigged as a mine (AT985634). In the vicinity of (AT984625) on 25 May 1966, a sweep team composed of 3d Engineer Battalion and 3d Shore Party Battalion personnel detected a suspected mine. A member of 3d Shore Patry Battalion began probing; the mine detonated resulting in one KIA from 3d Shore Party Battalion and one engineer WIA. At 1155 from 26 May 1966, a 3d Engineer Battalion M-37 detonated a mine vicinity of (AT983637) the resulting crater was eight feet deep. Five personnel from 3d Engineer Battalion were WIA and three WIA's from 3d Shore Party Battalion. On 30 May 1966 a mine sweep team got a reading on a mine detector indicating a possible 105mm round buried in the road at (AT983629); the engineer blew it as a suspected mine. In combat support on 2 May, a two-man demolitions team with Company "C" destroyed two boobytrapped M-26 grenades at (AT977672) adjacent to punji traps and one booby trapped 105mm round at (AT970682). A two-man demolitions team supporting Company "D" on 3 May 1966 destroyed an L-shaped cave (AT955657), U-shape cave (AT947608), one punji trap and 105mm dud (AT945601), and punji traps (AT946618) and (AT947612). This same team on 4 May 1966 destroyed two tunnels, three L-shape caves, and on 5 May two punji traps and two tunnels. Also on 5 May 1966 one engineer officer and ten combat engineers accompanied Company "B" to the ARVN minefield at (AT983581); they fired three M1E1, projected line charges causing sixteen secondary explosions. This team, led by Captain L. L. O'LAUGHLIN was the first to fire the M1E1's under combat conditions. A two-man demo team with Company "D" on 10 May 1966 destroyed one 10'x12' tunnel (AT977628) and a booby trapped 81mm round (AT977629). Eight combat engineers supporting

Company "A" and "B" on "search and destroy" operations 10-12 May. Two teams of four engineers each supported Companies. "B" and "D" on "search and destroy" operations, 13-14 May 1966 and a five-man demolitions team accompanied Company "B" on "search and destroy" operations on 15 May. Two four-man demo teams supported Companies "A" and "B" on 17 May 1966 for "search and destroy" operations. On 20 May 1966 a four-man team was deployed with Company "A", another four engineers with Company "B", and two with Company "D". A demo team from Hill 22 on 21 May 1966 located and destroyed two foot traps at (M'956668). On 24 May 1966 a four-man demolitions team accompanied Company "B" on "search and destroy" operations and two engineers were with Company "B" demolitions team at Hill 55 destroyed one 105mm dud and nineteen captured VC 60mm mortar rounds. This TAOR had the most mine activity of all those in the DA WANG area. See enclosure (6) for dud ordnance destroyed by engineer teams.

(10) 2/9 TAOR. Combat engineer support in the 2/9 TAOR was provided by the 2d Flatoon, Company "C", commanded by 2dLt L. G. ELDER (1-4 May 1966) and GySgt W. C. SCHICK (5-31 May 1966). Average daily strengths for support to rifle companies varied from five to nineteen engineers, but averaged thirteen. Engineers employed on mine sweeps of 2/9 MSR and tactical roads varied from nine to twenty-five, but averaged fifteen engineers. The platoon was billeted at the 2/9 CP and with forward companies to reduce reaction time for combat support and to reduce time for sweeping and clearing the roads. Deliberate sweeps were conducted daily of Route 1C from (AT999699) to VICH NAM (AT994663) and at the lateral road from BICH NAM (AT994663) through PHONG LUC (1) (BT012635) to National Route #1 (BT031644). No mines as evidence of mining was found on Route 10 during the month. However, on 17 May 1966 along the lateral road, a 3d Engineer Battalion H-51 dump truck detonated at (BT002634) a SCHU-type box mine which had contained about twenty pounds of TNI; a three foot crater resulted. At 0915 on 19 May, an M48A1 detonated a mine at (BT022638); the charge was estimated to be in excess of twenty-five pounds of TMI; a four-foot deep and six-foot wide crater resulted with no visible fragments or wires. On 20 May in vicinity of (BT008633), the sweep team and security came underheavy small amus fire. Following the above attack the sweep team, using a P-153 mine detector, discovered a fifteen pound VC shape charge at (BT002634). The charge, which was buried twelve inches below the middle of the roads surface, was electrically primed; the wires were traced to a battery. The engineers destroyed the charge in place. A sweep team located on 25 May and destroyed two CHI COM grenades near BICH NAM (BT000634). In combat support role, one officer and eight engineers were airlifted 3 May to PHONG THU (1) (AT983582) to clear an ARVN minefield and destroying untended ordnance; one engineer was WIA. On the second day of this operation four engineer WIA's occurred. During 8-12 May, one officer and five combat engineers accompanied Company "F" to PHONG THU (1) to finish clearing the ARVN minefield. During the retraction from the area on 12-13 May the engineers conducted a road recommaissance of Route 10 from Route 14 northward to BICH NAM. On 19 May, a demolitions team with Company "F" destroyed at (AT991636) one boobytrapped 81mm mortar and five caves.

(11) 3/9 TAOR. Combat engineer support in the 3/9 TAOR was provided by 1st Platoon, Company "C" commanded by 2dLt K. J. KIRIACOPOULOS (1-10 May) and by 3d Platoon, Company "C", commanded by 1stLt D. A. DE MATTEO (11-31 May).

ENCLOSURE (/)

During 1-6 May six engineers daily conducted deliberate mine sweeps. Close combat support was provided during Operation GEORGIA (See subparagraph 12 below). During the period 11-31 May, one officer and twenty-two engineers provided engineer support in the AN HOA area to 3/9. This support consisted of mine sweeps on tactical roads, as requested, and demolitions support when requested.

- (12) Operation GEORGIA. This operation which had begun during April continued to receive the engineer support of Company "C" (-), commanded by Capt D. L. HICKS. This command included 2d Platoon, commanded by 2dLt K. J. KIRIACOPOULOS, 3d Platoon, commanded by 1stLt D. A. DE MATTEO, and a seven-man tunnel team, commanded by 2dLt K. L. WILSON. Total engineer personnel were four officers and fifty enlisted. The support provided, consisted of mine sweeps of tactical roads, demolitions, tunnel destruction, and a road reconnaissance along the railroad leading eastward from AN HOA. Three engineers were WIA on 2 June and two others on 3 June. The operation ended on 9 June.
- (13) Operation CHEROKEE. Three officers and seventy-two englisted from Company "B" provided combat engineer support to battalions of the 4th Marines during operation CHEROKEE, 5-7 May.
- (14) Operation WAYNE. Four officers and fifty-three enlisted from Company "B" provided combat engineer support to the 4th Marines 10-12 May for operation WAYNE.
- (15) Operation ROUGHRIDER. During May only one ROUGHRIDER was conducted. Engineers on the convoy of 9 May were prepared to make mine sweeps, repair decking to bridges, and install a standard military bridge should the need arise. The convoy to PHU BAI and return was without incident.
- (16) Miscellaneous Combat Support. On 18 May, two combat engineers assisted 7th Engineer Battation in conducting a sweep for mines and demolitions on the DA NANG river bridge, (BTO40762). During 27-28 May, two combat engineers using P-153 mine detectors assisted 1st Marine Air Wing BOD personnel in locating ordnance in the LAAM Battalion area. This sweep was in the impact area, suspected of being hit by 120mm mortar rounds. On 31 May, Company "C" began providing support to 3/1. Four engineers conducted two deliberate sweeps, (AT987663-967664) and (AT992684) and (AT992684-975685), and five others provided close combat support.
- c. Combat Service Support. Four categories of combat service support were provided. These were: (1) Roads and Bridges, (2) Field Fortifications, (3) General Construction, and (4) Utilities.

(1) Roads and Bridges

(a) Route 1C, (AT700999) to (AT994663), 4.5 miles. Improvement of Route 1C was continued by Company "C" with most of the effort concentrated on that part between HA DONG (AT943989) and BICH NAN (AT994663). A total of 720 cubic yards of fill was hauled, spread, and compacted during May. Marines expended 381 manhours on this project.

- (b) PHONG LUC Road (2/9·MSR), (AT994663) to (BT032643), 2.6 miles. Company "C", with the assistance of Engineer Support Company and seven dump trucks from 7th Engineer Battalion, had the responsibility of constructing a pioneer road to laterally connect Route 1C and National Route #1 and to serve as 2/9 LSR. This project consisted of hauling fill to widen an existing trail, in places hardly more than a foot path, and raising the road level about eighteen inches above the rice paddies. See enclosure (8) for photographs of this road. The purpose of this pioneer project was to open the road as soon as possible and in the future, fully develop it. The entire road was opened to traffic on 21 May. The project, which began on 3 May, required 9385 cubic yards of fill, 3492 Marine manhours, 1876 motor transport hours, and 772 engineer equipment hours.
- (c) Route 13, (BT071700) to (BT066654), to (BT075656), 3.5 miles. Company "C" continued to improve Route 13 during May. The road was completed to the battalion CP on 9 May, then improvement continued south on the MSR. On 20 May the road had been improved as far south as (BT067646). This project included hauling and spreading fill to widen the bed of an abandoned railroad to a 16-foot roadway, installing culverts and headwalls, and improving drainage. During May the project required 3339 cubic yards of fill and rock, 2182 manhows by Marines, 647 hours of motor transport, and 368 hours of engineer equipment.
- (d) Route 5, (AT899774) to (AT943663), 8.5 miles. Company "A" continued to improve Route 5 during May. Most of the bridges south of the float bridge were rehabilitated by repairing curbs, improving approaches, and adding wingwalls to the abutments. Bridge #10 (AT944676) was rebuilt on 21 May after being damaged by a mine detonation under the abutment on 20 May. Following this, all abutments were re-faced closing off gaps, etc, where mines or explosives could be placed. In addition the road was graded from the float bridge to Hill 41. Marines expended 1417 manhours during the month on the road.
- (e) A-1/3 Access Road, (AT860736-871732), 0.9 miles. Company "A" with assistance of Engineer Support Company constructed a pioneer road to a platoon outpost at A-1/3. This project required cutting through a heavily wooded area, cutting from hills to fill two deep draws, and installing seven culverts in the two draws. Marine manhours used were 613; motor transport hours were 50 hours and 123 engineer equipment hours.
- (f) Route 4A, (AT908744) to (AT897717) to (AT905718), 2.6 miles. Company "A" improved the road which had been damaged during heavy rainfalls early in May. Headwalls were rebuilt, culverts extended, a few culverts added, and the drainage bordering the road was improved. The ditches were pulled and the road was graded, developing a good crown. This improvement required 1673 manhours by Marines, and 486 manhours by indigenous labor.
- (g) Miscellaneous. The treadway on the SONG CAU DO bridge (AT998706) was replaced by Company "C" requiring 40 manhours. Company "B" removed an old bridge at (YD673278) and replaced it with a new Class 60 bridge. This project required 208 manhours. A railroad crossing for the Marine Access Road was built by Company "B" at (YD900128). Company "B" also improved the 1/1

14

e latura.

Access Road by hauling fill and by grading the road. Company "A" graded and improved a road (AT945699-919704) leading to H-2/3 and a "New Life" hamlet. Following the construction of this road, Company "A" cleared and graded land for a "New Life" hamlet.

(2) Field Fortifications

(a) MLR Bunker Program. 3d Engineer Battalion's cognizance over the MLR Bunker Program was terminated on 30 May with the transfer of Company "C" 7th Engineer Battalion to its present organization. Prior to this transfer, materials were cut for sixteen 8x8 and one 12x24 bunker. A total of 138 bunkers were issued to division units during the month; seventy-nine 8x8, thirty-eight 8x12, and twenty-one 12x24. The recapitulation for the entire program as conducted by the 3d Engineer Battalion from 15 Nov 1965 to 30 May 1966 is as follows:

SIZE	CUT	ISSUED	DALANCE ON HAND
8x8	303	265	3 8
8 x 12	140	107	33
12x24	155	124	31
20x30	<u>36</u>	_35	_1
Totals	634	531	103

All of the bunkers on hand as well as obligations for additional bunkers were passed to 7th Engineer Battalion for continuation of the program. Personnel of the 3d Engineer Battalion will continue to assist infantry units in the actual construction of the present bunkers when personnel are available from combat support duties.

- (b) 3d Medical Battalion Fortifications. Beginning on 23 May a project to improve the fortifications at 3d Medical Battalion was initiated The project consists of installing a 12x24 command post bunker, fifteen 8x8 perimeter bunkers, 4000 feet of highwire entanglement, a special security fence along 1500 feet of the perimeter adjacent to Route 3, and constructing blast walls to protect operating rooms and the intensive care ward. A total of 442 manhours by Marines and 939 indigenous manhours were expended on the project during the month.
- (c) Salvage of Fortification Materials. Recovery of concertina, barbed wire, and metal stakes from abandoned positions continued throughout the month. Working parties of indigenous personnel with Marine supervision were employed on this project. During the month the following materials were salvaged for re-use:

316 rolls of concertina 50,400 feet of barbed wire 759 stakes

(d) Miscellaneous Fortifications. Fields of fire were cleared for units of 2/3, and a fortified outpost for 1st Force Recon Battalion were conducted in miscellaneous fortification projects during the period. See paragraph 4, Training, for information concerning the Division Field Fortification School begun by 3d Engineer Battalion.

ENCLOSURE (/)

- (3) General Construction. Continued development and expansion of facilities in the Division Command Post took place during the month. The separate projects were combined into a "special project" and were performed by a task-organized unit of personnel from the Construction Platoon, Equipment Platoon, Utilities Platoon, and Company "C", 7th Engineer Battalion. In addition to this major effort, work was completed on the 3d Engineer Battalion Utilities Building and construction was continued on facilities at PMU BAI. Numerous minor projects were completed in the battalion construction shop with the assistance of locally-hired indigneous personnel.
- (a) <u>Division Command Post Facilities</u>. Site preparation for a complex of 24 SNCO quarters was completed on 6 May 1966. Construction of the strongbacks for the GP tents was underway on 7 May, while improvements were being made to the access road and drainage structures (See Exposure 1, encl (9)). At the end of the period, all quarters had been completed except for screening. Two shower/washroom buildings were also erected and were completed except for utilities tie-in. Manhours for this project during May were: USMC 3810 and 600 indigenous

The 32x80 Office Building was completed and the building occupied on 5 May 1966. The unique design of the building proved to be highly satisfactory, providing 5 large offices (16'x32') with no intermediate supports within the individual offices. The building is well ventilated and has covered walkways in front and back (See Exposure 2, enclosure (9)). Work remained on drainage structures in front and in rear of the building. A total of 1100 manhours were devoted to the project.

The Senior Officer's Billeting Area was completed on 10 May. Construction during the month in this area consisted entirely of building walks and retaining walls. This work was performed by indigenous personnel with Marine supervision. Manhours during May were: 600 USMC, 1400 Indigenous.

Rock facing on fill slopes continued to require a large effort of the indigenous laborers assigned to the project. The rock-and-cement treatment is necessary to prevent erosion of the steep fill slopes on the many sidehill construction sites. Total manhours devoted to this work were: USEC 2600, Indigenous 6500.

Quonset hut construction for administrative spaces continued throughout the month. A complex of seven huts, all with tropical modifications, was completed during the period 4-23 May (See Exposures 3 and 4, enclosure (9)). The tropical design, although it requires about twice the effort of normal construction, provides excellent ventilation and light for administrative spaces. Partitions were installed as required. The total number of quonsets for administrative use in the immediate vicinity of the Command Bunker is now twelve. Four additional are planned for construction during June. A total of 7800 manhours were expended on this project during May.

Two quonset huts were constructed to house division reproduction and photographic facilities (See Exposure 5, enclosure (9)). These structures required concrete decks, tropical modification, extensive interior partitioning,

and special requirements for utilities. At the end of the period, the structures were complete and awaited tie-in of water service. During May, 2500 manhours were spent on the project.

- (b) <u>Battalion Utilities Building</u>. During the period 6-17 May, an "in-country" building 19'x130' was constructed to house the 3d Engineer Battalion Utilities Platoon in the battalion industrial area. The project involved 1050 manhours.
- (c) Construction at PHU BAI. Construction of quarters for the Commanding Officer or Commanding General at PHU BAI progressed according to the availability of materials and manpower during the period. At the end of the month the basic structure was completed and lacked only utilities work and interior trim. The project required 925 manhours and was considered 70% complete.

Assistance to MCB-7 in preparing sites for additional cantonment work at PMU BAI was performed during the period. Heavy equipment was used to level extensive areas of uneven ground. 300 manhours were required on this work.

Additional assistance to the cantonment construction program at PHU BAI consisted of providing personnel for building construction on an "as available" basis. 325 manhours of effort were contributed during the month.

(d) <u>Miscellaneous Construction</u>. Small projects accomplished during May included furniture construction for division staff sections, replacement of insect-damaged timbers in the Division CP Bunker, fabrication of water tower for 3d AT Battalion, improvement of facilities at the Mine Warefare School, and construction of huts for quarters for officers of 3d Engineer Battalion (See Exposure 6, enclosure (9)).

(4) Utilities

(a) The 3d Engineer Battalion Utilities Platoon continued to supply division units with potable and raw water. Thirteen water points were operated during the month, eight in the DA NANG and five at PHU BAI. On 30 May, one of the larger water points (SONG CAU DO River) was turned over to the 7th Engineer Battalion. Totals for May are as follows:

Potable Water 2,916,340 gallons Raw Water 1,704,760 gallons 4,621,100 gallons

d. Infantry Role. The 3d Engineer Battalion remained committed to the defense and pacification of the Marble Mountain Air Facilities Area. The battalion provided a platoon headquarters and one rifle equad; the platoon was commanded by GySgt R. E. TAYLOR (1-25 May) and SSgt R. A. PAINTER (26-31 May). The platoon, which was under OPCON of 3/3, had the responsibility of controlling by active patrolling and perimeter defense positions grid square (BT0573) and the village of XOM DA ME (BT055728). Additionally, the corpsman for the platoon conducted an active MEDCAP program (See paragraph 8, Civil Affairs).

6. Communications

- a. The Battalion Command Net continued to provide operational communications with units of Companies "A" and "C" while operating away from the Battalion area. The net consisted of one AN/PRC-47 with a modified antenna and one AN/PRC-25 at the Battalion CP, one AN/MRC-83 with 2d Platoon Company "C" and one PRC-25 with Company "A". In addition, one AN/MRC-83 and PRC-47 are used to maintain radio contact with Company "B", 3d Engineer Battalion at PHU BAI. No technical difficulties were encountered in the DA NANG enclave, but the radio equipment at PHU BAI is not in good condition and at present is unreliable. Contact with PHU BAI is maintained by telephone through radio relay.
- b. Communications have been provided for the 3d Engineer Battalion Provisional Platoon through the use of AN/PRC-10's for internal communications between squads, and AN/PRC-25 for communications between the platoon and the Battalion. A wire system with sound powered phones served as another communications system between squads. See paragraph 5.d, Operations.
- c. The helicopter courier service continued to be used daily for intradivision message traffic.
- d. Two AN/MRC-83's were received during May. This permits rotation of vehicles assigned to the companies increasing operational capacity and providing greater flexibility. Five MRC-83's are now in the Battalion with another at Company "B" at PHU BAI.
- e. The following equipment was invoiced to Company "C", 7th Engineer Battalion at their detachment from 3d Engineer Battalion:
 - (1) 3 AN/PRC-10'B
 - (2) 1 RC-292
 - (3) 2 AN/PRC-6's
 - 4) 4 EE8
 - (5) 1 AN/MRC-83

7. Logistics

a. Supply Material

- (1) Enclosure (10), Analysis of Outstanding Documents, reflects the battalion's supply posture at the end of May. Enclosure (11), End Items on Requisition, depicts the status of combat essential end items on requisition as replacement for previously evacuated equipment.
- (2) Class I availability, primarily "A" rations, was adversely effected by the civil unrest that occurred 14 to 27 May. Class II availability continued to be adversely effected by extended requisitioning lead time and sluggish supply system responsiveness throughout the month. Class III and IV availability was good. With the exception of concertina wire and five foot stakes, Class IV availability was good.
- (3) Enclosure (12), Class V Expenditures, denotes the expenditures of Class V during May. Availability was excellent.
- (4) On 30 May 1966, Company "C", 7th Engineer Battalion, which has been attached to 3d Engineer Battalion for the past nine years, was detached and returned to control of its parent unit. Commencing 21 May 1966 custody of equipment assets prescribed in tables of equipment and distribution applicable to Company "C" were physically transferred to the 7th Engineer Battalion. At a planning conference attended by the Division Engineer Officer, Commanding Officer 3d Engineer Battalion, and Commanding Officer 7th Engineer Battalion, on 14 May, it was unanimously agreed that the 3d Engineer Battalion would be kept at T/E strength where possible. As a result a considerable number of T/E deficiencies were in effect passed to 7th Engineer Battalion. Enclosure (11), End Items on Requisition, reflects those deficiencies still remaining. Enclosure (13), Analysis of Equipment Transferred to 7th Engineer Battalion, denotes the combat essential equipment posture of "C-7", at the time of transfer. Enclosure (14), Property Transferred to "C-7", contains a complete listing of the items of T/E equipment transferred. The net result of the transfer was a considerable reduction of end item assets organically available to the battalion commander.
- (5) Nine quonset huts were procured during the month from 30th MCR, with the aid of the division engineer, for erection within division headquarters cantonment area. In conjunction with this project twenty-five yards of transit mix concrete was obtained from MCB 10 due to the lack of an organic concrete mixing capability.
- (6) Two special construction material procurement trips were made to Okinawa during the month in order to support the Headquarters Battalion construction projects.
- (7) Enclosure (15), CO 3d Engineer Battalion Memorandum on P-153 Mine Detectors, discusses a battery resupply problem inherent in the new P-153 mine detectors, and the action taken at this level. This typifies the resourcefulness and improvisations necessary to continue operation in many other areas in

order to overcome supply shortages.

b. Maintenance

- (1) Concurrent with the transfer of "C-7" equipment (with T/E deficiencies and deadlined items (see enclosure (13)) the operational readiness of the battalion increased to a residual capability of eighty-four (84) per cent. Enclosure (16), Operational Equipment Status Chart, portrays the operational status for the DA NANG TAOR during the month.
- (2) Throughout May, the P-153 mine detectors continued to be subject to extended deadline at the third echelon maintenance level.
- (3) The direct exchange program conducted by FLSG for certain motor transport equipment components was subject to decreased effectiveness during the month. Thirteen outstanding direct exchange "TERO's" existed at the end of the month.

c. Food Services

- (1) Approximately 30,445 meals were served during May and consisted of the following rations:
 - (a) 73% "A" Rations 68
 - (b) 27% "B" Rations 15
 - (c) Additionally 3,160 MCI's were consumed.
- (2) Higher than normal consumption of "B" rations occurred during the month due to civil unrest rendering off-loading of "A" ration supplies impossible. Fresh vegetable items that are purchased by FLSG in-country were continually available (lettuce, cabbage, radishes, celery, tomatoes).

d. Facilities

- (1) Completion of the following battalion improvement projects occurred during the month.
 - (a) Utilities Shop
 - (b) Enlisted Club Expansion
 - , (c) Rock wall and planter entrance-way to the battalion area.
 - (d) Officers Shower
- (e) Reclamation of ground and basic development of the battalion parade ground.
 - (2) Work effort continued in the development of water drainage with

ENCLOSURE (1)

headwall construction, drainage ditch installations and grounds improvement. Grass seed is being extensively sewn in an effort to control erosion.

(3) The battalion water system (primary distribution) was completed and the water approved as potable by the division preventive medicine section.

e. Industrial Relations

(1) A total of 196 indigenous personnel were being employed on 31 May 1966. The civil unrest had little effect upon the employee attendance during the month. AIK payroll for the month was approximately 490,000 piasters.

f. Medical

- (1) The battalion aid station treated 722 men during the month.
- (2) A total of 374 immunizations were given.
- (3) The predominent afflictions were respiratory infections; diamea and gastroentitis.

g. Fiscal

(1) Enclosure (17) depicts the battalion fiscal status as of 30 April 1966.

. L 169

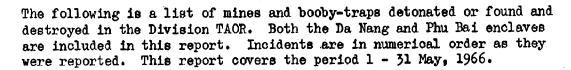

8. Civil Affairs

- a. During the period 14-27 May the city of DA NANG suffered civil unrest caused by Buddhist struggle forces. The unrest caused restriction of military traffic as will as indigenous traffic. The industrial relations program also suffered during this period. Roughly 25 percent of the Vietnamese Nationals working in the battalion were prevented from getting to work.
- b. The 3d Engineer Battalion civic action program was conducted primarily in the hamlets of DA SON, PHU BAI, and LA CHAU (1), and preliminary actions were directed to the DUONG SON area. Medical aid was resumed in the hamlet of DA SON. In addition, medical aid was administered in LA CHAU (1), PHU BAI, and XON DA ME. In spite of the fact that the DA SON dispensary was closed for a period of time, over 1400 treatments were administered, the majority from the dispensary. On the last of the month, dental treatment was made available to the DA SON area. On a weekly basis, dentists will treat patients at the dispensary. This program met with great success on its first day.
- c. On 12 Way the civil affairs officers met with officals at Military Security Service and at the Industrials Relations Office in DA NANG. The procedures for obtaining security clearances for indigenous employees were reviewed. With administrative help and guidance from the Industrial Relations Office, clearances can be obtained within three weeks of request. Clearances were obtained for five additional workers this month. Within the indigenous work force fifty-five employees advanced in pay scale as skilled laborers; masons, mechanics, carpenters, electricians, welders, and clerks.
- d. In PHU HA, this month there was an influx of refuges families moving into the hamlet. A total of 1100 pounds of wheat was distributed to these families through the hamlet chief. The wheat served as a buffer and augmented the hamlet's supply of food in the face of new established residents. In addition, 3 H-51 dump truck loads of scrap wood was delivered to PHU HA to be used as construction material.
- e. In the 9th Marines TAOR, plans were discussed to enter a joint civic action projects. The 3d Engineers civil affairs officer coordinated with the 9th Marines Civil Affairs Officer and adopted 2 projects to be started early in June. Near DUANG SON (1) a culvert will be installed on a bridge bypass road alleviating the stoppage of water from rice paddies. A further project will include construction of chalk boards to be used in schools being constructed in the 2/9 area.

9. Legal

legal activity during May continued at a favorable level. This was the second consecutive month in which there were neither a Summary or a Special Courts-Martial. A statistical breakdown of legal activity is:

(a) (b)	Article 15 Punishment (Battalion Level)	5
	Investigations	1
(c)	Letters of Indebtedness	Ò
(d)	Legal Assistance	4

DA NANG ENCLAVE

1.	AT963654	1st Bn, 9th Marines, reported the detonation of an unknown type mine believed to be have been a 81 or 105mm round.
		(5/1).
2.	ат964699	3d Bn, 3d Marines, destroyed a M-26 grenade mine. (5/1).
3•	АТ949682	3d Bn, 3d Marines, destroyed a 60mm round rigged as a mine. (5/1).
4.	вт095656	3d Bn, 9th Marines, destroyed a home-made mine. (5/1).
5•	АТ899707	2d Bn, 3d Marines, destroyed a booby-trapped gate. It is believed that the explosive was of a C-4 type. (5/1).
6.	AT955683	2d Bn, 4th Marines, detonated an unknown type device. It was apparently an electrical detonation. (5/1).
7•	AT955775	lst Bn, 3d Marines, reported that a VN working in a rice paddy detonated an unknown type mine. (5/1).
8.	вто33629	2d Bn, 9th Marines, destroyed a 105mm round rigged as a mine. (5-2).
9•	AT9758-	1st Bn, 9th Marines, on a clearing operation, destroyed two
	АТ98 58	60mm rounds, one CHICOM grenade, one 40mm round, one M-25,
		one 81mm round, and two unknown charges, all rigged as
		mines. $(5/2)$.
10.	BT007622	2d Bn, 9th Marines, detonated a unknown type device. (5-2).
11.		2d Bn, 9th Marines, detonated a booby-trapped grenade. (5/2).
12.	AT955683	2d Bn, 3d Marines, detonated a 20mm round rigged as a mine. (5/3).

12.	YD537268	1st Bn, 4th Marines detonated an unknown type mine. (5/19).
13.	YD938077	3d Engr Bn sweep team found 30 pounds of TNT between rails of rail line. TNT was covered with rocks. (5/22).
14.	ZD017026	3d Bn, 4th Marines, destroyed 40 pounds of TNT on rail road track. (5/23).
15.	YD804135	3d Bn, 4th Marines, destroyed an unknown type mine. (5/25).
16.	YC861984	3d Recon Bn detonated a booby-trap. (5/27).
17.	YD515308	3d Tank Bn reported detonation of a mine by a tank. The mine was estimated to be approximately 50 to 70 pounds of TNT. (5/31).

of TNT. (5/31).

3D ENGINEER BATTALION TRAINING SCHEDULES

MAY 1966

Enclosure (4)

HEADQUARTERS 3d Engineer Battalion (Rein) 3d Marine Division (Rein), FMF FPO, San Francisco, California 96602

BnBul 1500 3/RRT/jar 1 May 1966

BATTALION BULLETIN 1500

From: Commanding Officer
To: Distribution List

Subj: Battalion Training Schedule

Ref:

- a) DivO P3000.1d
- (b) Div0 1500.3
- (c) Bn0 1500.4

Encl:

- (1) HES Company Training Schedule
- (2) Support Company Training Schedule
- (3) "A" Company Training Schedule
 (4) "C" Company Training Schedule
- (5) "C" Company, 7th Engineers Training Schedule
- (6) Officers School
- (7) SNCO School
- (8) Administration School
- 1. Purpose. To publish the weekly training schedule for the week of 1 to 7 May 1966.

2. Action

- a. The enclosed schedule will be followed by applicable sections of this command.
- b. Companies will conduct MOS and General Military Subjects Training to the maximum extent with combat support missions.
- c. Lesson plans will be submitted to the S-3 one day prior to the scheduled classes.
- d. Training conducted daily will be reported on the Daily Summary. Training conducted after submission of the Daily Summary will be reported by telephone to the Bn S-3 prior to 2030 daily. In addition, a post training report will be submitted to the Bn S-3, by 1800 9 May 1966. The above reports will include topic, period of instruction and number of personnel attending.

DECLASSIFIED

y. Special Instructions. During this training period, special emphasis will be placed on precaution against heat exhaustion and sun stroke. This is particularly important since the battalion heat cases are beginning to increase as the summer temperatures climb. Such instructions will include, but are not limited to, individual protection and preventative measures to be taken by individual marines together with procedures for rendering assistance to those who may become heat victims.

4. Self-Cancellation. 10 May 1966

C. D. WOOD

By direction

BATTALION BULLETIN 1500

From: Commanding Officer To: Distribution List

Subj: Battalion Training Schedule

Ref:

- (a) DivO P3000.1D
- (b) Div0 1500.3
- (c) BnO 1500.4

Encls

- (1) H&S Company Training Schedule
- (2) Support Company Training Schedule
- (3) "A" Company Training Schedule
- (4) "C" Company Training Schedule
- (5) "C" Company, 7th Engineers Training Schedule
- (6) Officers School
- (7) SMCO School
- (8) Administration School
- 1. Purpose. To publish the wackly training schedule for the wack of 8 to 12 May 1966.

2. Action

- a. The enclosed schedule will be followed by applicable sections of this command.
- b. Companies will conduct MOS and General Military Subjects Training to the maximum extent consistent with combat support missions.
- c. Lessons plans for all classes will be submitted to the Sep one day prior to the scheduled classes.
- Training conducted daily will be reported on the Daily Summary Training conducted after submission of the Daily Summary will be reported by telephone to the Bn S-3 prior to 2030 daily. The above report will include topic, period of instruction and number of personnel attending. Units not required to submit the Daily Summary Report will report training by 2030 daily.

DECLASSIFIED

Special. During this training week, commanding officers will inspect field fortifications of their units. Field fortifications instruction will then be instituted, followed by practical application. The inspection should serve as a basis for pointing out common errors and how to correct them. The use of "tangle-foot" wire obstacles should be taught. Proper support for concerting wire to prevent its collapse, and prevention of over-stretching the coils are points to note in this instruction. Fortifications around stationary equipment such as 3000-gallon water tanks and water purinfication equipment, should be stressed. Location and construction of alternate fighting holes and weapons emplacements will be emphasized.

15. Self-Cancellation. 16 May 1966.

C. D. WOOD

- 1. Purpose. To publish the weekly training schedule for the week of 15 to 21 May 1966.

20 Action

- $a_{\rm o}$. The enclosed schedule will be followed by applicable sections of this sommand.
- b. Companies will conduct MOS and General Military Subjects Training to the maximum extent consistent with combat support missions.
- c. Lesson plans for all classes will be submitted to the S-3 one day prior to the scheduled classes.
- d. Training conducted daily will be reported on the Daily Summary. Training conducted after submission of the Daily Summary will be reported by telephone to the Battalion S-3 prior to 2030 daily. The above report will include topic, period of instruction and number of personnel attending. Units not required to submit the Daily Summary Report will report training by 2030 daily.

DECLASSIFIED

Special. With the "dark-of-the-moon" condition approaching, unit leaders at all levels should emphasize the need for increased vigilance. Special instruction should be conducted to insure that each man understands the "rules of engagement", challenging procedures, etc. The use of the password should be used as a last resort in order to prevent compromise of it. Lights should never be shined toward a friendly position; not only does this illuminate the position, but it destroys the night vision of the occupants.

4. Self-Cancollation. 22 May 1966

> BnBul 1500 3/RRT/mwd 20 May 1966

BATTALION BULLETIN 1500

From: Commanding Officer To: Distribution List

Subj: Battalion Training Schedule

Rof:

- (a) Div0 P3000.1D
- (b) Divo 1500.3
- (c) Bn0 1500.4

Encl.

- (1) IES Company Training Schedule
- (2) Support Company Training Schedule
- (3) "A" Company Training Schedule
- (4) "C" Company Training Schedule
- (5) "C" Company, 7th Engineers Training Schedule
- (6) Officers School
- (7) SNCO School
- (8) Administration School
- 1. Purpose. To publish the weekly training schedule for the week of 22 to 28 May 1966.

2. Action

- a. The enclosed schedule will be followed by applicable sections of this command.
- b. Companies will conduct NOS and General Military Subjects
 Training to the maximum extent consistent with combat support missions.
- c. Lesson plans for all classes will be submitted to the Sad one day prior to the scheduled classes.
- d. Training conducted daily will be reported on the Daily Summary. Training conducted after submission of the Daily Summary will be reported by telephone to the Battalion 5.3 prior to 2030 daily. The above report will include topic, period of instruction and number of personnel attending. Units not required to submit the Daily Summary Report will report training by 2030 daily.

5. Special. The care and cleaning of personal weapons, e.g. The Meid rifte and the .45 Cal. Fictol, is of immediate importance to the individual Marine. His weapon must be cleaned to operate efficiently. This cannot be evercaphasized, especially in a combat zone. Articles of uniform clothing and equipment are for the most part scarce, due to the build-up of the Marine Corps. In many instances personnel could mend the clothing rather than survey them. Small tears and holes that are mendable do not constitute an unserviceble condition. Daily polishing will lengthen the life of combat boots to a great extent, as well as improve the appearance of Marines of this command. This week special emphasis will be placed on training and inspection of the proper care and cleaning of individual weapons and maintenance of items of uniform, and equipment.

A. Self-Cancellation. 29 May 1966.

C. D. WOOD

MERCHANDUM

From: Commanding Officer

To: A sistant Chief of Staff, G-4

Subj: 1-153 Mine Detectors, Expedient Replacement Batteries for

Ref: (a) Co 3d Engr Bn msg 121545Z May 66 (C)

1. Problem

has been inadequate since the placement in use of the detector Mine P-153, has been inadequate since the placement in use of the detectors in January 1966. Requisitions have been submitted under all priorities, the most recent being a priority 02 submitted in early April. Upon negative response to the latter, reference (a) requested urgent attention and courier delivery of a quantity of thirty (30) immediately. Three (3) detectors are currently deadlined for lack of batteries.

- b. Since no response has occurred to reference (a), and with increased VC mane activity it became necessary to explore the expedient replacement with substitute latteries. Delineating factors controlling selection of replacement items were:
 - (1) Length of BA 1389 - - 5 1/8"
 - (2) Diameter of BA 1389 - - - 5/8"
 - (3) Voltage of the BA 1389 - - - 10.8 to 7.5
- (a) Due to transistorized nature of the P-153 detector, the voltage output of the replacement item can not exceed that of the original battery. Excessive voltage will destroy the transistors. This was confirmed with 2nd Lt SCJURNER, FESG Comm/Elect Maintenance Officer.

2. Discussion

- a. Two possible alternatives were found feasible for further analysis.
- (1) Substitution with two (2) BA 1318U batteries in conjunction with a three (3) inch metal plug 1/2 inch in diameter.

ENCLOSURE (15)

- (a) The BA 1318U is a standard battery to the Radiac Set, IN-174/1D. It is a proximately 1 inch long and has a diameter of 5/8 inch. It is a Mecury battery as is the BA 1369, and produces 5.2 volts.
- (b) The two (2) BA 1318U batteries will produce 10.4 volts, well within the range of the original battery. The three inch plug is necessary to fill the void in the battery case caused by the smaller size BA 1318U. A solid metal ri id rod was selected, three unches in length, one half inch in diameter. The source of the plug was a one half inch drift pin.
 - (c) The BA 1318U batteries are readily available.
- (2) The second alternative utilized one BA 13180 battery and two BA 58 (renlight) batteries. The combined voltage of the three batteries was 8.2 volts. The total length equals approximately five inches. The batteries are readily available.

3. Solution

- a. The substitution with two BA 1318U batteries and the three inch metal plug is favored due to the following factors:
 - (1) Voltage output is more near that of the orginal battery.
- (2) The use life of the BA 1318U is expected to far exceed that of the BA 58 (monlight) battery. (The total use life of the favored solution is estimated to be thirty hours or one half that of the original battery).
- (3) The three inch plugs can be expeditiously manufactured from organic resources.
- (4) The BA 13180 batteries and plug can be easily carried in the detector ease, provide certain contact when installed and impose no logistical problems at this time.
 - (5) No modification or adaptation to the P-153 is necessary.

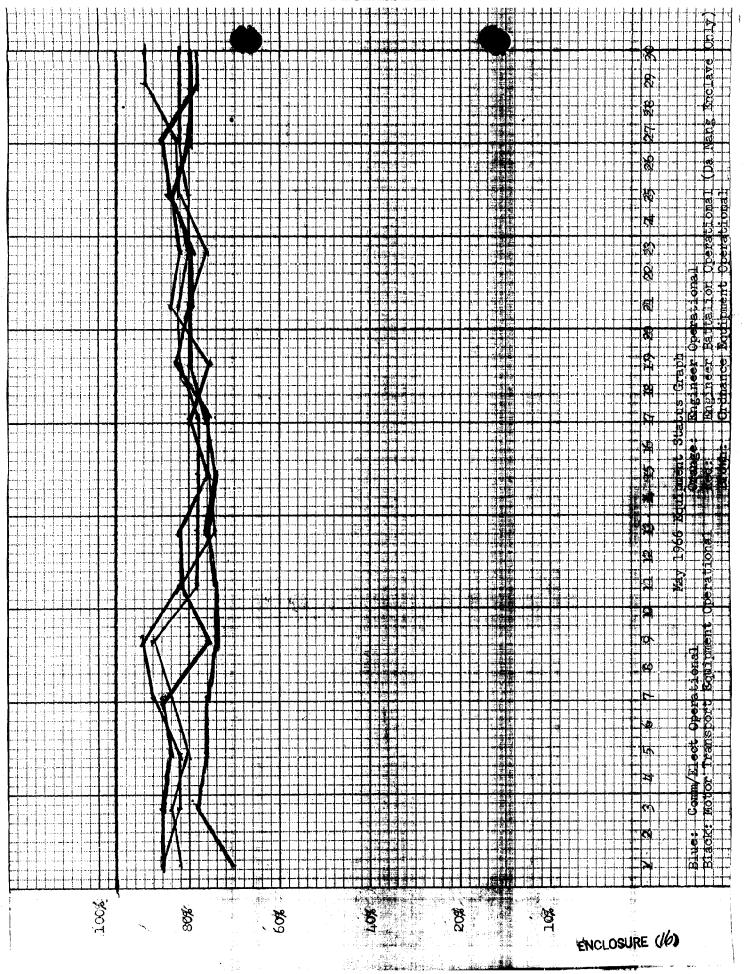

4. Action

- a. This organization is emplementing the favored solution immediately. Orift pins are being cut to the appropriate length and buffed to remove rust and foreign matter.
- b. Twenty BA 1318U batteries are on hand. A requisition is being submitted for an additional 140 batteries which will provide a 30 day backup. Since the BA 1318U is a component to an end item common to most division units, (Total of 176 IE-174/ID authorized to a Marine Division) expedient supply sources are readily available.

c. Distribution to the using units will be effected as expeditiously as possible with simultaneous instruction on installation.

N. J. DENNIS
