NARRATIVE SUMMARY

Enclosure (1)

DECLASSIFIED

B. Training

1. Training during February consisted of GMS training as outlined in Part IV Paragraph D.

2. Fourteen (14) men were trained as qualified generator operators upon successful completion of the 3d Engineer Battalion Generator Operators School. Classes will be suspended until such a time as the 3d Engineer Battalion has been relocated at GIA LE.

3. The 3d Marine Division Land Mine Warfare and Demolitions School, conducted by this battalion, continued to instruct both division and non-division personnel in mines, boobytraps, and demolitions. The instruction was conducted by contact teams and by resident courses in the battalion school areas at PHU BAI. The battalion completed building new classrooms at DONG HA while the school's instructors prepared for resumption of classes. The following is a summary of the training conducted by the school during the month of February, 1967.

(a) Formal classes at Land Mine Warfare and Demolitions School:
LMWS (PHU BAI) 186

4. During the month of February the 3d Marine Division Tunnel Teams continued to train.

Enclosure (1)

A. INTELLIGENCE

1. The Intelligence Officer held nightly briefings for the Battalion Commander, Battalion Staff, Company Commanders, and Section Heads. The briefings included reports of mine incidents within the 3d MarDiv TAOR, the current tactical situation, VC/NVA activities and order of battle affecting engineer operations. The Intelligence Clerk gave briefings in the absence of the Intelligence Officer.

2. During the month of February a total of 86 mine/boobytrap incidents were recorded within the 3d MarDiv TAOR. The incidents involved a total of 124 explosive devices. Of that number there were 48 detonations and 78 cases where devices were discovered and destroyed. The most common type device recorded has been ordnance rigged as antipersonnel or antivehicular mines. The rounds vary from 81mm mortar rounds to 105 rounds and several 250 lb. bombs. Most of the rounds are duds fired by U.S. forces and salvaged by the Viet Cong to be used as mine boobytrap devices. The majority of incidents recorded in February occurred in the Operation CHINOOK I and II area.

3. There were two instances of Vietnamese giving information/material to engineer personnel. On 22 February in the vicinity of Route #9 in CAM LO, a Vietnamese youth gave 3d Engineer Bn. S-3 a belt of linked 7.62mm cartridges. The youth was rewarded 60 \$VN. On 27 February a Vietnamese youth in the Montagnard Hamlet near CAM LO found an unfired 60mm mortar round and turned it in to a TD-18 operator clearing an area for cultivation. The youth was rewarded 50 \$VN on the spot.

4. On 25 February a Corpsman, assigned to 3d Engineer Bn. and attached to "A" Company working in CAM LO, purchased a rudimentary type weapon made from scrap metal and capable of firing an M-2 Cal. 30 cartridge. The weapon was shown to the Battalion S-2 that evening and the incident was reported to 15th CIT the following day. On the morning of the 26th the Bn S-2, accompanied by the Corpsman and an interpreter from CAM LO District Headquarters investigated the Vietnamese who sold the weapon. He was found to be Mr. TRAN VIET THAI, a police official working in the Justice Office of Police, QUANG TRI Province. He had obtained the weapon during a National Police shakedown on personal weapons and had given it to his son as a toy. The weapon will be retained by the Corpsman as a souvenir.

Enclosure (1)

sweep/demolitions squad in support of "Operation Prairie II" from 2-6 February. See Part IV A, Paragraph 3. "A" Company engineers led by Corporal DUKE supported 3d Recon Battalion on a cordon and search operation to the south of the DONG HA Combat Base. From 6-9 February, "A" Company engineers led by Sgt EVERHART provided combat support to "G" 2/3. See Part IV, Paragraph 4. "A" Company engineers supported "I" and "L" Companies 3/3 on two sweeps as detailed in Part IV, Paragraphs 5 and 6. Forty-nine engineers from "B", H&S, and Support Companies supported 3/26 in the "Operation CHINOOK" area and sixty-one engineers were based at PHU BAI. Other members of the battalion were deployed at KHE SANH, CAMP CARROLL, and with 3/3 in their CP near the Rock Pile. The most significant projects undertaken by the battalion were the continuation of the improvement of Route #558 south from CAM LO and the construction of several vehicle by-passes and general route improvement along Route #8B from CAM LO east to Route #1. Route #8B has been opened as an alternate route of communication between DONG HA and units located near the CAM LO Bridge. In the event that the bridge were destroyed or flooding conditions made it impassable the newly opened route will enable resupply, reinforcement and a route of egress for troops in the area. Several route reconnaissance parties checked Routes #558, 9, 8B, and 561 to insure that maintenance procedures were being carried out and to gain information on areas in which engineers will be operating in the future. Engineers supporting 3/26 destroyed numerous VC/NVA mines and booby traps as shown in Part IV, Paragraph E. "B" Company moved its headquarters to PHU BAI to better support "Operation CHINOOK" and to prepare the new battalion CP which will be located in the vicinity of GIA LE, north of PHU BAI. The initial phase of the movement consists of a complete topographic survey of the area and site selection for billeting, messing, maintenance, and utilities facilities. Major CORNWALL and a detail from the Drafting and Surveying section moved into the new CP area on 22 February and began the layout of the camp.

Enclosure (1)

C. OPERATIONS

1. General. During February the 3d Engineer Battalion remained in general support of the 3d Marine Division. Company "C", 3d Engineer Battalion remained under the operational control of the 1st Engineer Battalion, 1st Marine Division. Employment of the battalion was in the following two categories: Combat Support and Combat Service Support.

(a) Combat Support operations consisted of providing mine detection and demolition teams in support of infantry operations and daily sweeps of MSR's for mines and boobytraps. Companies "A" and "B" supported 2 infantry battalions. The combat support provided involved:

- (1) A total of 151 deliberate mine sweeps of MSR segments.
- (2) A total of 0 visual sweeps.
- (3) Daily average distance swept was 10,221 meters
- (4) Excluding clearance, 2 incidents required engineer effort during sweeps. See Part II, Paragraph A, Intelligence.
- (5) Ordnance and Fortifications destroyed by combat engineers during February is documented in Part IV, Paragraph E.

2. DONG HA TAOR (COMBAT SUPPORT)

(a) During the month of February no visual sweeps were made.

(b) Deliberate sweeps were made as follows:

(YD 061549-033563)
 (YD 035561-033565)
 (YD 858148-842151)
 (YD 117583-103537)
 (YD 196536-227582)
 (YD 537318-549327)
 (YD 150609-143613)
 (YD 131593-131590)
 (YD 149605-143604)
 (YD 144603-165611)

(c) In addition sweep teams were provided on an on-call basis for sand hauling operations at (YD 222681) and tracked vehicle movements utilizing the bridge by-passes on Route #9.

(d) Combat support of infantry operations was provided by personnel from Companies "A" and "B", Support Company and H&S Company. The 2nd Platoon of "B" Company, led by SSgt CUMMINS supported the 3d Battalion, 4th Marines on a search and destroy operation from 21-26 January. See Part IV A, Paragraph 1. Corporal H. W. WITHERUP led an eleven man engineer element in support of "L" Company, 3/4 from 27-29 January. See Part IV A, Paragraph 2. Lance Corporal L. F. DUNN led an engineer

Enclosure (1)

to their arrival and began the erection of a simulated Vietnamese village which will be one of the training aids employed in the course. Mount-out boxes were constructed for 3/4 and the 3d Engineer Battalion in preparation for their upcoming moves to the PHU BAI area. A number of mess tables were constructed for the 4th Marines Mess Hall and six towers were prefabbed for use at Camp Carroll. Signs offering rewards to Vietnamese who will show Allied Forces the location of VC/NVA mines were painted by construction platoon and a 106mm recoilless rifle platform was constructed for 3/4. In the PHU BAI TAOR construction was completed on an addition to the MARS Station, three grease racks were constructed for "A" Med, and a culvert was repaired. Two six holer heads were built for 2/9. At the 3/26 CP mess tables and decks for the COC were completed. The engineer detachment at KHE SANH constructed strongbacks and constructed a shop for the Seabees. The end of the month saw the 3d Engineer Battalion assisting the Air Force by demolishing two towers at the DONG HA Combat Base.

(d) Utilities. The 3d Engineer Battalion Utilities Platoon continued to supply division units with raw and potable water. 3 water points were under the operational control of the 1st Marine Division in DA NANG and 5 were operational in the PHU BAI and DONG HA TAOR's. Totals for the month at DONG HA and PHU BAI are as follows:

Potable	1,592,236 gal.
Raw	<u>883,250 gal.</u>
Total	2,475,486 gal.

(e) Drafting and Surveying. The Drafting and Surveying section continued to support division units with a survey, layout, and drafting capability. The most noteworthy project completed by the draftsmen and surveyors during February was the site planning for the new 3d Engineer Battalion CP in the GIA LE area.

Enclosure (1)

3. Combat Service Support

(a) Roads and Bridges

The majority of work done in this category was on Route #558 from (YD 118564) to (YD 120538). The road was resurfaced, widened, and drainage, including culverts, was improved. Work was begun on Routes #8B and 561. The former was subjected to routine repair and by-pass construction while the latter's holes were filled, culverts installed, and regular maintenance was performed.

Construction of an access road from Route #9 to L3/3 was completed. Road and bridge signs were installed from DONG HA to Camp Carroll.

Complementing road repair a number of bridges were repaired and others constructed along Routes #1,9,8B,558 and the MOC DUC Road south of CAM LO at (YD 205542). At (YD 298565) a class 60 M4T6 98' long was put in and aluminum floating footbridges were set in at (YD 205542) and (YD 157406). A timber trestle class 28W, 50 foot bridge was constructed at (YD 102538) on Route #558. Bridge 9/14 on Route #9 at (YD 008465) was re-decked after a number of transverse stiffeners were repaired making it a 130 foot class 15 structure. Barricades for the CAM LO bridge were installed at (YD 148605).

On several occasions during the month engineer recon teams proceeded along various segments of Routes #9, 558, 8B, and 561. The mission of these reconnaissance teams was to check on future engineer projects, make estimates of repair work necessary, and to insure that proper maintenance was being carried out.

(b) Field Fortifications. During February the work done on field fortifications consisted of the continued improvement of defensive positions and perimeter wire at the 3d Engineer Battalion CP. In the 3/26 CP, in the "Operation CHINOOK" area, bunkers were constructed and sand bag walls were constructed to protect the water supply and shower units. At KHE SANH the rehabilitation of the existing field fortifications was begun and at CAM LO (YD 149604) men of "B" Company and the Heavy Equipment Platoon completed clearing fields of fire for the tank and infantry units in the area. Engineer assistance was also provided to 3/26 in the form of advice and estimates on the construction of new perimeter wire and the materials necessary to complete the job.

(c) General Construction. Work was continued on rewiring the 3d MarDiv CP (Fwd) and provisions were made to allow the COB to operate in situations where electricity for the remainder of the compound might not be available. Within the DONG HA Combat Base a new air terminal building was begun near the airfield, engineers from "A" Company and Construction Platoon worked on this project. The staff of the 3d MarDiv LMWS arrived in DONG HA and began preparations of the class room buildings which had been built prior

Enclosure (1)

D. COMMUNICATIONS

1. Communications to the DA NANG and PHU BAI areas were interrupted occasionally due to equipment failures. These failures have been corrected.
2. Hot lines were installed to 3/26 and 3d Recon for area defense purposes.
3. Established FLSU on the battalion control net for area defense purposes.
4. Area defense drills were conducted and an emergency communications plan prepared.
5. Additional equipment and personnel were provided for the "B" Company deployment to PHU BAI to establish the new CP.
6. Installed a local line to the construction platoon.
7. Received the AN/GRM-55 (Go - No Go) test equipment for the Radio Sets AN/PRC-25.

Enclosure (1)

E. NARRATIVE SUMMARY - LOGISTICS

1. 3d Engineer Battalion continued to carry out logistic operations from the DA NANG and DONG HA combat bases with limited support being provided to Battalion elements operating in the vicinity of the PHU BAI combat base being provided by FLSG-A/3dServBn. Concurrently the Battalion (-) at DONG HA equipped and detached one reinforced engineer platoon for rotational deployment and joined another in early February and readied a third for detachment in early March.
2. Plans for moving elements of H&S and Support Companies from DA NANG to DONG HA were suspended on 7 February by order of the Commanding General, III MAF, pending a review of engineer requirements in the DA NANG TAOR and reconciliation of differences between 1st and 3d Division positions regarding composition and command of the DA NANG detachment. After a meeting in PHU BAI with the 3d Division G-4 on 8 February, plans were confirmed for establishing the Battalion Headquarters and supporting elements in the vicinity of PHU BAI. Development of a cantonment there was inaugurated as the Battalion Executive Officer and surveyors moved to PHU BAI on 20 February to obtain a topographical survey and a layout of the proposed facilities.
3. Logistic control of the Battalion (-) at DONG HA was strengthened by the displacement of organic supply from DA NANG, completed on 20 February, and the transfer of the S-4 Officer from DA NANG On 26 February. The Battalion Supply Officer established an informal satellite account to support Battalion elements remaining in DA NANG, and deactivated the subsidiary informal account formerly supporting the Battalion (-) in DONG HA. An S-4 (Rear) office was left in DA NANG to provide essential staff coordination there.
4. The Battalion maintenance posture improved in February as the total deadline dropped from 111 items on 31 January to 82 on 28 February. However, 70 of these items are held by FLC/1stFSR for third echelon or higher repairs, pointing up again the continuing deficiencies in field maintenance support. and availability of replacement end items.
5. There was no change in overall supply posture as about 18% of all FY 66 and 67 requisitions remained outstanding. The number of outstanding requisitions over 60 days old increased by almost 400. On the brighter side, though, the number of priorities O2 and O5 requisitions filled during February was more than double the number filled in January.
6. Placement of demands for construction and utilities materials was very heavy because of the processing of Division work orders. Since 13 January 1967 requisitions for five major work orders have been submitted, totalling 447 documents and \$2 million (estimated).

Enclosure (1)

DECLASSIFIED

7. In the area of services, the Battalion fed a total of 73,707 meals from two messhalls; purified and issued a total of 3,398,051 gallons of fresh water and 1,145,750 gallons of raw water (for showers and dust suppression) for 3d Division units in all TAOR's; provided electric power for major command elements in the DONG HA combat base; and provided maintenance services to Division Command Posts in DA NANG and DONG HA.

8. A complete and detailed analysis of logistic operations during February is provided in the attached Logistics Summary Report.

DECLASSIFIED

F. CIVIL AFFAIRS

1. On 8 February the Civil Affairs Officer and 3 members of the survey section accompanied the I Corps Senior Refugee Advisor and the Commander of the QUANG TRI Province Refugee Advisory Team to the Refugee Hamlet at the mouth of the CUA VIET River. The purpose of the visit was to begin a topographical survey of the area surrounding the hamlet in order to establish the feasibility of an extensive drainage system throughout the hamlet. The drainage system will compliment a proposed retaining wall along the 2,300 ft. waterfront of the hamlet, and will be designed to maintain dry footing within the hamlet during the monsoon season. The self-help project will be supported by USAID.

2. On 15 February the Battalion Civil Affairs Officer, Battalion Surgeon, and two Corpsmen accompanied the Commander of the QUANG TRI Province Refugee Advisory Team to the Refugee Hamlet at the mouth of the CUA VIET River. Also attending were an Army medic, a Corpsman from the LARC Division and the crew of the Light Amphibious Resupply Craft utilized to get to the area. In the MEDCAP that was held, 3d Engineer personnel treated 178 Vietnamese; 46 men; 29 women, and 103 children. The entire group treated more than 400. The completion of a topographical survey scheduled for the trip had to be canceled due to adverse weather conditions.

3. On the afternoon of 19 February the Medical Staff of the 3d Engineer Battalion initiated a MEDCAP in the Village of CAM THAI, CAM LO District. The first operation was coordinated with the Village Assistant Chief, Mr. XANG, who was present to help maintain order. Four Corpsmen and the Battalion Surgeon treated a total of 155 persons; 26 women, 31 men, 98 children. During the operation 250 copies of the JUSPAO PSYOPS newspaper, #12, were distributed to patients after they were treated and to onlookers. At the termination of the MEDCAP 300 bars of soap were given to Mr. XANG for distribution to the villagers.

4. On 23 February a MEDCAP was held in the Hamlet of CAM LO, CAM THAI Village. After first coordinating with Mr. GHE, the Village Chief, and Mr. XANG, his assistant, the team treated a total of 101 people.

5. English classes in CAM LO were interrupted during the TET recess lasting from 3-20 February. The Engineer-Teachers, LCpl's HEDGER and HENDERSON attended a pre-TET party at the school. Class resumed on the 20th and were well-attended and received.

6. Coordination has been initiated with the public school administration in DONG HA to commence English classes in the high school. Over 200 students attend the school and from all indications are eager to learn English.

7. Plans were drawn up on two structures to be constructed on the site of the QUANG TRI saw mill by the 3d Engineer Drafting Section. The plans include a bill of materials for the project supported by USAID. The structures will house Vietnamese operating the mill and learning the lumber trade.

Enclosure (1)

DECLASSIFIED

8. The Construction Platoon Commander, 2dLt Michael STEVENS accompanied G-5 personnel to the Hamlet of DOC KINH on 23 February. The visit was to give an estimate for repair requirements of the hamlet school. The masonry structures requires a roof and purlins, along with repair to gables and rafters.

9. On 17 February the Civil Affairs Officer and personnel from the Battalion Utilities Section went to the DONG HA Dispensary to estimate work required in repair of the dispensary electrical system. Several of the rooms are without lights and a rewiring is in order. Vietnamese fixtures will be used to insure local repair capability.

10. From 24-28 February a TD-18 worked in the vicinity of the Montagnard Hamlet in CAM LO clearing areas for cultivation. Thus far an area of more than an acre has been cleared.

11. On the evening of 18 February the Civil Affairs Officer delivered a Personal Response lecture to personnel joined within the last quarter. A total of 75 attended the lecture concerning the History of Viet Nam.

PART III

SEQUENTIAL LISTING OF SIGNIFICANT EVENTS

DECLASSIFIED

A. SEQUENTIAL LISTING OF SIGNIFICANT EVENTS

- 1Feb67: A debriefing of all personnel departing RVN during the month of February 1967 was conducted.
2dLt N. F. LA BOUNTY 090048/0130 departed for CONUS.
2dLt F. P. BACA 095827/0130 assumed duties as Battalion Adjutant.
- 2Feb67: Cpl H. W. WITHERUP Jr., 2103381/1371, USMC bitten by a Bamboo Viper.
LCpl W.M. MILLER was WIA while participating in an operation against hostile forces.
- 5Feb67: LCpl K. L. GWYN 2198859/1371 USMC, WIA.
- 6Feb67: Sgt F. R. SANDERS 1933120/1371 USMC, WIA.
- 7Feb67: WO D. J. YEZLIERSKI rotated to CONUS.
- 8Feb67: Sgt A. LIME 1631802/1371 reduced to Cpl NJP Art. 15.
- 9Feb67: Sgt F. R. SANDERS 1933120/1371 USMC, and LCpl W. M. MILLER 2179559/1371 USMC, MEDEVAC
- 10Feb67: LCpl J. M. BURNETT 2111802/1371 WIA, twice/thrice wounded report submitted.
- 12Feb67: Joined Maj. G. B. CORNWALL assigned duties as Bn Executive Officer on 17Feb67.
- 13Feb67: Pfc M. GALDORISI, 2170660/1371 departed on 15 day emergency leave to CONUS.
- 14Feb67: LCpl J. M. BURNETT 2211802/1371 MEDEVAC to Yokuska.
Joined 2ndLt R. P. ARCHBOLD 094512/3501
- 16Feb67: Maj J. A. SHEARMAN Jr., 055002/1302 departed for CONUS.
- 17Feb67: Change of Command Ceremony LtCol J. H. REID Jr. relieved LtCol G. M. PEARCE Jr. as CO.
- 20Feb67: Joined 2dLt M. J. STEVENS 095091/3501 and 2dLt D. W. COPELAND 094621/3501.
- 22Feb67: LCpl Larry E. FOWLER 2228679/1371 USMC KIA from an enemy explosive device. LCpl F. W. HIGGINS 2238891/1371 USMC, WIA.

Enclosure (1)

DECLASSIFIED

- 23Feb67: Promoted MGySgt C. F. TYLER to his present rank.
- 25Feb67: Battalion Enlisted Promotion Board met and recommended personnel for promotion to Cpl and LCpl.
Joined 1stLt T. J. TONTZ 091630/1302 USMC and 2dLt M. R. SKINNER 097898/1302 USMC.
LCpl M. G. HAYES 2185000/1371 USMC and LCpl W. D. HILL 21331809/1371 USMC were WIA by shrapnel from an enemy explosive device.
Provided reinforced Engineer Platoon to 2/3.
- 27Feb67: LCpl B. J. O'DONNELL 2141377/1413, Pfc A. C. TELLO 2274386/1413, Pfc P. B. NICHOLS 2209020/1413, Pfc F. A. BOURNE Jr. 2179646/1413, and LCpl R. G. SKINNER 2154119/1413 were WIA when a vehicle they were in struck an enemy mine.
- 28Feb67: A debriefing of all personnel departing RVN during the month of March 1967 was conducted.
R&R quotas were utilized by this Command as follows: Okinawa 3; Hong Kong 10; Bangkok 3; Taipei 9; Hawaii 10; Kuala Lumpur 3; Singapore 5; Manila 4.
Non-Judicial punishments awarded during the month of February are as follows: Violation of UCMJ, Art 134 - 1; Violation of UCMJ, Art 92 - 5.

DECLASSIFIED

DECLASSIFIED

B. SEQUENTIAL INTELLIGENCE REPORTS for period 1-28 February 1967

- 1Feb67: Operation Prairie II commenced at 0001.
- 2Feb67: VC attacked HOI MIT bridge at AU 844955 70% damage.
- 3Feb67: RR bridge blown and rendered unusable at AU 844956. Appeared to be blown by demolitions.
- 5Feb67: 15th CIT source reports 6 VC camped near RR bridge at YD 273577 from 042100 to 050100 February. Leader carried map and binoculars. Reconned the bridge at YD 275577, Route #1. G-2 comment C-3: VC to attack bridges prior to TET.
- 6Feb67: AO reports 15 foot hole blown in bridge spanning rice paddy vicinity YD 614311. Req. engr. work to build bypass, bridge not passable. Also 3 ft. hole blown in bridge YD 604311; bridge appears passable.
THUA THIEN CAC relayed PHU LOC report unk. unit strength 300 arrived with 82mm, M6, AW loc YD 9201; man to attack bridge and sabotage Rte #1. G-2 cmt: F-3 pos. 804th Bn.
- 7Feb67: AO reports bridge blown AU 833997 and AU 843957.
- 11Feb67: Quang Tri report from TRIEU PHONG Sub Sector VC will attack bridges at YD 337549 and YD 354548. G-2 unrated.
- 13Feb67: CG 3d MarDiv msg of 130500Z Feb 67 referred to VC using explosives disguised as cigarettes. The tobacco is used as a fuse, black powder as the igniter, and a mixture of potassium chlorate and red phosphorus as the main charge. Detonation can occur without the igniter with heat, shock, and friction. The pack wrapper is thicker paper than familiar brands, and no markings are used. Similar devices have been disguised as packages of "ARA" cigarettes and "ZIPPO" lighters.
- 14Feb67: 3d MarDiv relayed COMUSMACV Spot report of 11 Feb.-VC Chemical Hand Grenade. 21st ARVN Div reports locally mfgd. bursting chemical hand grenade with white phosphorus filler in galvanized sheet metal canister; soldered seams. Fuse well inside top separates filler from booster/initiator. Booster explosive is loose inside fuse well; appears mixt of pitch and und. explosive. Homemade VC initiator; percussion with black powder fuse delay, homemade blasting cap attached with adhesive tape; dip-painted, appears like green plastic. Identified by round filler cap on bottom; may ignite spontaneously if punctured or if plug is removed; burned filler highly explosive. Should not be tampered with.

Enclosure (1)

DECLASSIFIED

DECLASSIFIED

- 9Feb67: An FLSU generator contact team visited the Battalion (-) at DONG HA.
- 10Feb67: The S-4 Officer arrived at DONG HA from DA NANG for the normal semi-monthly visit. One bath unit was shipped by air from DA NANG to PHU BAI.
- 13Feb67: The S-4 Officer returned to DA NANG.
- 15Feb67: The Commanding General, 1st Marine Division, indicated non-concurrence with plans to relocate elements of the Detachment 3d Engineer Battalion. This action, coupled with the desire of the Commanding General, 3d Marine Division, to effect the relocation, emphasizes the fact that engineer requirements in support of both Divisions exceed the capability of organic engineer units.
- 16Feb67: The S-4 Officer departed for DONG HA for a change of command.
- 17Feb67: Change of Command. LtCol J. H. REID Jr, relieved LtCol G. M. PEARCE. A reassessment of the move to PHU BAI was held for LtCol REID's benefit. Meanwhile, the Commanding General, III MAF, suspended any further drawdown of Battalion elements from the DA NANG TAOR pending further review and decision.
- 18Feb67: The S-4 Officer returned to DA NANG.
- 19Feb67: All pending requests for amphibious lifts for the Detachment 3d Engineer Battalion from DA NANG were cancelled.
- 20Feb67: Surveyors and Company Headquarters of Company "B" departed with the Battalion Executive Officer from DONG HA to begin the layout of the new Battalion cantonment at PHU BAI. Consolidation of the formal and informal accounts of RUC 13400 was completed at DONG HA. Deactivation of RUC 13403, formerly supporting the Battalion(-) at DONG HA was begun. Battalion elements at DA NANG received their support from a satellite of organic supply, operating under Company "C" RUC 13405. The S-4 Officer paid a staff visit to FLC/1stFSR to discuss second echelon maintenance support for ordnance equipment in use at DA NANG and the status of new equipment introduction. The latter continues to look pessimistic.
- 25Feb67: The S-4 Officer arrived in DONG HA to remain on a permanent basis with the Battalion (-).

C. S-3 SEQUENTIAL LISTING OF SIGNIFICANT EVENTS

- 1Feb67: Completed construction of an access road from Route #9 to 3/3 area at Rock Pile.
- 2Feb67: Continued construction of 3d Engineer Battalion Land Mine Warfare and Demolitions School at DONG HA.
- 3Feb67: Road recon on Route #9 and 558. Surveyors plotted a re-settlement village for Base Coordinator.
- 4Feb67: Trench line and bunkers constructed for Battalion CP (Fwd). Road and bridge recon of Route #8B (YD 225629-130590).
- 5Feb67: Recon of Route #9 to BA LONG, from BA LONG to CA LU, and Route #9 from CA LU to DONG HA. Buildings completed for Mine Warfare School.
Received Div WO #4548 to construct Division Command Post Buildings at PHU BAI.
- 6Feb67: Cleared fields of fire at CAM LO Bridge (YD 149605).
Received Div WO #4547 to enlarge Commanding General's Mess at PHU BAI.
- 7Feb67: Constructed floating foot bridge at BA LONG (YD 157406)
- 9Feb67: Road and bridge signs installed along Route #9 from DONG HA to Camp Carroll.
Surveyors performed site layout of air terminal building at DONG HA.
- 10Feb67: Received Div WO to construct messhall furniture for 4th Marines messhall.
Conducted bridge recon on Route #9 from CA LU to (YD 944424).
Repair work performed on Route #8B.
- 11Feb67: Received Div WO #4562 to construct (26) wind shield covers.
- 12Feb67: Constructed 24 tables & 64 stools for 4th Marines messhall.
Received Div WO #4566 to deck #14 bridge on Route #9.
- 13Feb67: Commenced decking bridge #14 on Route #9.
- 15Feb67: Constructed light vehicle bridge and one floating footbridge at (YD 205542)

Enclosure (1)

DECLASSIFIED

DECLASSIFIED

- 18Feb67: Constructed MAT6 bridge on Route #1 (YD 298565).
- 19Feb67: Received Div WO #4574 to construct a portable device to transport refuse for 3/3.
- 20Feb67: Constructed strongbacks at KHE SANH and a shop for Seabees there. 21 mount-out boxes built for 3/4.
- 22Feb67: Installed deck on bridge on Route #558 (YD 102537).
- 24Feb67: Engineers conducted deliberate sweep (YD 061549-033563) and (YD 240630-240715). One fragmentation grenade blown in place.
- 25Feb67: 49 engineers in close combat support of 3/26. One Punji Pit destroyed (YD 598352)
Received Div WO #4589 to enlarge & repair helicopter pad on Rock Pile.
- 27Feb67: Road maintenance continued on Route #558. Forms for concrete slab constructed for 3d Shore Party Bn.
106 platform built for 3/4.
- 28Feb67: Emergency power wiring laid for Div CP (Fwd).
Hauled & spread rock for by-pass at CAM LO.

D. SEQUENTIAL LISTING - LOGISTICS

- 1Feb67: Detachment 3d Engineer Battalion commenced submission of requests for amphibious lift to DONG HA. Organic supply ceased operations at DA NANG except for walk-through requisitions submitted on a fill-or-kill basis. Division Supply Officer effected diversion of all RUC 13400 transactions from DA NANG to DONG HA.
- 3Feb67: S-4 paid staff visit to Division Embarkation Officer regarding the movement of Detachment 3d Engineer Battalion. Priorities for movement of the Detachment were established.
- 4Feb67: Detachment 3d Engineer Battalion commenced LUMBERJACK operation in support of 1st Marine Division. This project consists of delivering bunker materials to the Air Delivery Platoon and packaging them for air drop.
- 5Feb67: One LCU with organic supplies arrived at DONG HA from DA NANG. The load consisted of Land Mine Warfare School materials, supplies for Company "A", and lumber.
- 6Feb67: 1st and 3d Division Industrial Relations Officers paid a staff visit to the S-4 Officer to discuss ceilings for employment of local national civilians and LNC payment in the DA NANG TAOR. Equipping of the reinforced engineer platoon assigned to rotation with BLT 2/3 was commenced.
- 7Feb67: S-4 Officer paid staff visit to G-3 (Maintenance), FLC/1stFSR, to discuss selective interchange of repair parts for a tow grader. This was followed by a letter request which was approved by FLC/1stFSR. The grader was subsequently restored to an operational status as a result. S-4 Officer commenced screening of LNC employees to determine how many desired to relocate with the Battalion at PHU BAI. 21 subsequently indicated their desire to do so with their families. All amphibious lift requests for DONG HA were suspended pending a meeting with the Division G-4 to discuss the future command post location of the Battalion and the status of the Detachment at DA NANG.
- 8Feb67: The Battalion Commander met with the Division G-4 to discuss relocation of Battalion elements. Removal of elements from the DA NANG TAOR was held in abeyance pending the concurrence of the Commanding General, 1st Marine Division, and approval of the Commanding General, III MAF.

HEADQUARTERS
 3rd Engineer Battalion
 3rd Marine Division (Rein), FMF
 PPO San Francisco 96602

L/ENG/feb
 4000
 26 Feb 1967

From: Commanding Officer
 To: Commanding General, 3rd Marine Division (Rein), FMF (SGI-4)
 Subj: Logistics Summary Report as of 26 February 1967
 Ref: (a) DivO 4000.6

Encl: (1) Supply Status Report
 (2) Equipment Status Report
 (3) Critical Items (Major and Items)
 (4) Critical Items (required by CG)
 (5) Deadline Status
 (6) Status of Motor Transport Equipment
 (7) Status of Communication-Electronics Equipment
 (8) Status of Ordnance Equipment
 (9) Status of Engineer Equipment
 (10) Status of General Supply Items

1. SUPPLY SITUATION.

a. On 31 January 1967 the Detachment 3rd Engineer Battalion was directed to commence immediate preparation for displacement of elements of H & S and Support Companies to DONG HA from DANANG. Accordingly, the Division Supply Officer was requested to transfer all FLC/PSP transactions for RUC 13400 from DANANG to DONG HA. This was done, and from 1 to 20 February RUC 13400 conducted no business whatsoever.

(1) On 4 February an amphibious lift was requested for all accounts and supplies held by the Battalion Supply Officer. On 6 February the Division Embarkation Officer was directed to cease movement of all supplies, equipment, and materials of the Detachment pending a meeting with the C-4 on 8 February to discuss unit locations.

(2) On 9 February permission was obtained on an urgent basis to displace Battalion Supply (RUC 13400) to DONG HA as originally planned. There was no need to reppen this RUC in DANANG because the Supply Officer could exercise no useful function there and it was too late to re-direct FLC/PSP support from DONG HA to DANANG. As a result, the entire Battalion was deprived of roughly 70% of its organic supply support for 21 days awaiting amphibious lift which did not materialize.

2. CLASS II AND IVa. General

(1) Class II Type 1

(a) A total of 57 major end items are on requisition against authorized allowances. A total of 82 items are on deadline. The total authorized density of all types either on requisition or on deadline is 418; thus equipment capability for these items is 67%, an improvement of 10% since 31 January. A more comprehensive picture of allowances, non-availability, and operational capability may be seen in enclosure (2). Enclosure (1) further shows that 15 major end items on requisition were received in February, while 11 others were placed on requisition.

for the following items were cancelled
in 1st quarter FY 68:

ITEM	QTY	AUTHORITY
Compressor 125	1	CMC msg 032019Z Feb 67
Floodlight trailer	3	3rd FSR msg 231752Z Jan 67 CMC msg 081736Z Feb 67 CMC msg 281422Z Dec 66

(2) Class II Type 2 and Class IV

(a) The situation remained normal for Class II, except construction materials, and Class IV supplies. There were no problem areas.

(b) Requisitioning of construction materials against Division work orders has been very heavy. Requisitions are being prepared for the Commanding General's Mess and the Division Command Post under Division Work Orders 4547 and 4548, respectively. Requisitions have been submitted for about \$1 million in operating stocks of construction materials, under Division work Order 4491, and another 90-day stock is being requisitioned against Division work Order 4576. This has imposed a heavy administrative burden on the Supply Officer.

b. Critical Items

(1) Critical end items on requisition are shown in enclosure (3).

(2) Critical items required by CG, 3rd MarDiv msgs 191355Z Jan 67 and 260225Z Feb 67 to be reported are shown in enclosure (4). Comments on items shown as critical follow.

(3) Movement of the formal and informal accounts was completed on 20 February. However, during the interim about two semi-trailer loads of supplies were delivered to RUC 13400 from FLC/FSR in DANANG which had been released for shipment just prior to shifting the RUC to DONG HA. These supplies are still in DANANG and have not been picked up on the informal account. Consequently, the records of this organization cannot be brought up to date, nor can tracing of all priority O2 requisitions be resumed, until these supplies are taken in custody by RUC 13400 either in DONG HA or PHU BAI.

(4) Since 31 January all supply support for the Detachment in DANANG has been provided through the Company "C" RUC 13405 and has been limited to walk-through, fill-or-kill requisitions. Since these documents had to be submitted without establishment of valid usage data, the Division Supply Officer prohibited further supply action of this type after 23 February and directed the establishment of an organic informal account for the Detachment, an action for which this organization lacks the means. Consequently, about 1/3 of the Battalion is presently without adequate supply support. The critical deficiency is the Stock Record Card, which apparently is not available in-country.

(5) Effective supply management from the Battalion level has been further complicated by the operation of RUC 13403 at DONG HA in support of the Battalion (-). This RUC was, in effect, a satellite of Battalion Supply, but not responsive to the control of the Supply Officer. This arrangement lasted from mid-October 1966 to 20 February 1967, when the relocation of RUC 13400 at DONG HA was completed.

(6) As a final element of confusion, this organization can look forward to an annual physical inventory, a quarterly reconciliation of obligations, the introduction of MILSTEL, and another relocation of RUC 13400--all occurring at a time when the Supply Officer is hard pressed merely to restore normal administration.

b. The following is a synopsis of supply performance during February. The basis for this synopsis is contained in enclosure (1). Data for RUC's 13400 and 13403 have been merged.

(1) 505 requisitions were filled during February, 95 fewer than in January. This figure, however, is misleading because of the un-posted receipts held at DANANG. It is gratifying to note that the number of priorities O2 and O5 requisitions filled in February (124) is up substantially from January (56).

(2) The number of outstanding requisitions in February (5661) is up 106 over January, though 167 fewer (601) were submitted. The number of requisitions over 60 days old is up 391 from January's 3827 to a new total of 4218, which is about 24% of the total FY 66 and 67 requisitions submitted. This means that a large block of December requisitions remain unfilled, at least for record purposes; some of the materials may be on hand at DANANG.

(a) Body armor upper: A recommendation has been submitted to provide a "per individual" allowance for this organization inasmuch as on-board strength exceeds manning level.

(b) Individual clothing: Quantities shown reflect requirements to bring individuals up to minimum clothing allowance and replace unserviceable items. In this regard, jungle utilities and boots were not required to be reported as critical items; however, in view of the shortages of standard items and the high rate of replacement caused by the nature of engineer activities, the shortages of jungle wear must also be considered critical.

(c) Individual equipment: Figures shown do not reflect total assets within the Battalion. The next report will show adjusted figures. Shortages reflect requirements for both initial issue and replacement as they are known at this time:

(d) Battery 6TW: This item is used in 95 organic end items.

(e) F-153 Mine Detector: This item will remain critical until a special allowance and a maintenance float allowance are established.

(f) Generator 60 KW: This is no longer a critical item for this organization, although only two are carried on the formal account. Five other 60 KW generators have been assigned to this organization by the Division Engineer but cannot be picked up on the formal account until the owning organization can be determined.

3. MAINTENANCE SITUATION.

a. Requests for action by Division Motor Transport Officer

(1) CG WFFac msg 100345Z Feb 67 provides disposition instructions for 5-ton vehicles. It provides authority for cannibalization and local disposal of M51 dump trucks as replacements become available. 7th Engineer Battalion has been issued 32 multi-fuel dump trucks by 1st FSR; therefore, the replacements are available within III MAF and 1st FSR can commence cannibalization of unserviceable M51's. Special action is requested to effect such cannibalization as necessary to repair this organization's assets held by 1st FSR/FLSG-A/FLSU-1. Such action is necessary because the multi-fuel replacements for this organization have not been released by CMC and apparently are still held by MCSC, Barstow.

(2) WFFacO 11240,3 establishes certain forms which are to be used in conjunction with weekly preventive maintenance of vehicles and trailers. In view of the very limited and marginal duplicating facilities existing in most Division units, it is requested that these forms with their accompanying instructions be printed by the Division Reproduction Section and distributed by the Division Motor Transport Officer on request.

b. General comments regarding maintenance programs

(1) Confusion has been created by MGO 10010.27A and DivO 10010.1A as to the manner of reporting modifications, in that reporting procedures are not clear in cases where a Mechanized Modification Reporting Card is not provided with the modification materials. MGO 10010.27A clearly points out the distinction between modification kits and other modification materials not contained in kits; however, this distinction is lost in DivO 10010.1A. The distinction is important because it determines the degree of control placed on the issue of the items involved. There is also a further distinction to be made in this regard, that being in the obtaining of modification materials on the one hand and the reporting of the completed modification on the other. These should be construed as two separate procedures. A modification not involving materials subject to a high degree of control should be handled on a decentralized basis without Division-level management. Reporting of these modifications in accordance with the Modification Instruction should suffice for Division control. It is felt that the Division Modification Control Center should be primarily concerned with the management of modifications which involve immediate deadlining of equipment not modified or which require kits upon which special handling controls are imposed. It is recommended that DivO 10010.1A be revised to reflect the above considerations.

(2) It is recommended that ForO 4000.3 be revised to conform to MGO 4442.3 in regard to direct exchange component repair. Separate correspondence to this effect has been initiated by this organization. It is noted that FLC/1stFSR is already complying with the latter directive.

(3) FMFPacO 4710.2 establishes a 30-day policy for evacuation of equipment by FLC/1stFSR agencies when repair parts are not available. This policy permits agencies such as FLSU-1 and FL30-A/3rdServBn to clear out equipment they cannot repair, in effect establishing a holding area further to the rear. However, no such policy exists at the organizational level. There are no provisions in any directive specifically governing the evacuation of an item solely for lack of second echelon parts. It is recommended that the evacuation policy laid down in FMFPacO 4710.2 be extended to the organizational level if repair parts cannot be obtained within a reasonable period.

c. The deadline situation showed improvement in February, with 29 fewer items out of service. 12 out of 82 items are deadlined at second echelon, the remainder being at third. The performance of the direct exchange component repair program was unsatisfactory for this organization in February, since the 45 items back-ordered in January were still not available. Special attention is recommended to solving repair parts shortages within 1st FSR agencies inasmuch as this remains the critical maintenance deficiency. See enclosure (5).

4. MAJOR ITEMS OF EQUIPMENT STATUS. See enclosures (6) through (10).

5. SERVICES

a. Food services. This Battalion operates two messhalls. A breakdown of meals served is shown below:

	<u>DONG HA</u>	<u>DANANG</u>
Total meals served	38,801	34,906
Total "A" rations served	25,505	25,223
Total "B" rations served	13,296	9,683
Average No. for Breakfast	330	170
Average No. for Dinner	429	469
Average No. for Supper	487	607

b. Medical services. The situation remained normal with no significant problem areas.

c. General engineering. As reported in daily summaries and other operational reports.

d. Water supply. Total production by TAGR is shown below. DONG HA figures include BHE SANH and CAMP CARROLL.

	<u>RAW</u>	<u>POTABLE</u>
DONG HA	142,600 gal	544,686 gal
PHU BAI	740,650 gal	1,047,550 gal
DA NANG	262,500 gal	1,805,815 gal

6. TRANSPORTATION

a. 1st Marine Division transportation support to Detachment, 3rd Engineer Battalion, continued to be outstanding.

b. Amphibious lifts were not utilized in February.

7. MISCELLANEOUS

a. Request for action: MCO 8370.13 governs the introduction of the M16B1 rifle and associated equipment. This organization is scheduled for issue with the second increment commencing on 30 June 1967, whereas the infantry units supported by engineer personnel are scheduled for the first increment. It is recommended that the rifle be issued to this organization concurrent with infantry units. This will simplify ammunition supply by eliminating the need for 7.62 ammunition.

b. Consideration is recommended for restoring a service organization to Division control. The following factors are submitted in justification:

(1) This organization is presently exercising certain functions formerly the responsibility of the Division Service Battalion, for which the Battalion is not staffed or organized. Maintenance of operating stocks of construction materials, operation of additional water points, routine maintenance support of Division cantonments, servicing of electrical distribution systems and generators, and providing organic supply support to Battalion elements task organized to infantry units for operation which do not fall in the purview of the engineer T/O and T/E.

(2) The absence of a Division service organization imposes an additional burden on all Division units because of the resulting increase in staff management formerly exercised by the Service Battalion.

(3) The Division lacks the organic materials handling capability formerly provided by the Service Battalion.

(4) The Division Commander's ability to influence the logistic situation is limited because external service support does not provide the same flexibility afforded by an organization responsive to his policies.

c. DivO 5210.1A prescribes records for engineer equipment and engine generators. It is noted that TM 4700-15/1 is omitted as reference. It is further noted that the DD-1150 is prescribed as the only requisition which may be used in engineer equipment maintenance. FMFPacO P4700.1E indicates that the DD-1150 or its equivalent will be used, a more flexible policy which would eliminate any possible conflict with DivO P4400.22B (SOP - Supply).

d. This organization would like to see certain change incorporated into DivO P11240.16 (SOP - Motor Transport), as follows.

(1) Paragraph 203 establishes a minimum 60-hour training period prior to licensing of vehicle operators. It is extremely difficult for an organization whose assets are 100% committed to operations and whose key personnel are urgently required on the job for the success of the mission to take five days off for the conduct of a driver school, even though the training itself is absolutely necessary. The ideal answer is the establishment of a Division of MAF level school with its own special allowance of personnel and equipment. Short of that, some relief could be provided by authorizing certain aspects of driver training to be conducted incident to operational commitments. Such training could include ^{Coastal} driving, field driving, field expedients, and the unit's normal PM program.

(2) Subparagraph 301c states that all a Battalion's organic vehicles will be on call to the Division Motor Transport Officer. It is felt while this is necessary in urgent situations, the SOP should recognize the fact that the organic vehicular equipment of some units is intended by T/O, T/E, and the tactical mission for internal use and is not adequate for external support. The 3rd Engineer Battalion is only one of these organizations.

(3) Paragraph 606 deals with modifications to motor transport equipment, yet makes no reference either to MCO 10010.27E or DivO 10010.1A, both of which are the principal directives for effecting modification to equipment. It is felt that this correlation should be included in the Division SOP for Motor Transport.

(4) Paragraph 610 provides for Division level inspection of motor vehicles. It prescribes the exact manner in which a vehicle will be prepared for this inspection. It is recommended that the SOP take some note of the fact that most command inspections must of necessity be working-type inspections; hence, very few, if any, operational vehicles will be available for a formal garrison-type inspection.

J. H. REID, JR.
