5. Materials Expended: 4755 lbs. C-4, 200 lbs. TNT, 72-15 lb. shapes, 11-40 lb. shapes, 3-40 lb. cratering charges, 21,670 ft. det. cord.

6. Chronology: See enclosure (1).

7. Enemy Equipment and Facilities Destroyed:

500 lbs. Chi-Com TNT, 600 lbs. unidentified explosive, 60 lbs. plastic explosive, 50 lbs. flake TNT, 40 lbs. Polish dynamite, 300 ft. time fuse, and 150 blasting caps. 17 bunkers (10'x8'), 20 bunkers (6'x4'), 33 bunkers (8'x6'), 10 bunkers (5'x5'), and 22 bunkers (12'x 12'). 220-61mm rounds, 70 chi-coms, 600-40mm AA rounds, 2,800 AK-47 rounds, 280-122mm rounds, 1000-50 cal. rounds, 446-85mm rounds, 5 rifle grenades, and 1-140mm round. 2 trucks and 1 bulldozer and 2 tracked vehicles, 2-122mm guns, 3 AA guns, 4-85mm pack howitzers, 1 sub-machine gun, and 1 SKS. 1 field kitchen, 10 tons rice, and 1 culvert in the road.

8. Engineer Observation: Throughout the whole operation there was a lack of coordination and communications. On FSB Razor as soon as we got the LZ cleared 9th Marines CP started moving in. They tied up my LZ with countless externals of their equipment. At the time they first started coming in my dozer was leveling off the LZ to make it better. Neither the operator nor I knew that all the externals were coming in. He moved his tractor to the nearest convenient place to get out of the way of the first chopper. This happened to be on the far side of the LZ from the rest of the FSB. Before he could move it, the tractor was completely blocked in by externals. We lost 4 hours waiting for Regiment to move their gear so we could move the tractor.

When the battery commander got there he proceeded to complicate the situation. Every time I turned my back he was up on the dozer telling the operator something completely different to what I had just told him. I respectfully informed him to mind his own business and leave my operator alone so he could get some work done. The next day I got 4 new chain saws that I had not ordered and had no use for. I checked around and found that the battery commander had ordered them from Charlie Company saying that I wanted them, but he didn't consult me about it. This problem was solved a few days later when the battery commander was relieved. This incident was typical of what went on when we were with the artillery.

Coordination with 2/9 personnel was better but we had some problems with them.

9. Lessons Learned: Coordination between us and the infantry and artillery is indispensable. The people in the rear learned to disregard messages from anyone but me ordering materials or equipment.

DECLASSIFIED

10. Recommendations: All units work on better coordination between units. Planning was not a factor in this case. We had everything planned before I left but lack of coordination cost us alot of time.

CHRONOLOGY

22 January 1969

Engineers landed with the Battalion CP, moved up on the hill and commenced operations. Used 960 lbs. C-4, 3,500 ft. det. cord, and 14-15 pound shapes. Cleared LZ to receive TD-6. Tractor arrived and started clearing LZ for wheels down landing. Worked 9 agents 12:30 to 19:30. LZ 98% complete and started clearing fields of fire. Other teams turned in a negative report.

23 January 1969

TD-6 would not start so Case 450 sent out. About 1000 TD-6 finally started. They worked together until enough area was cleared to start on gunpits. TD-6 cleared ahead while 450 dug gun pits. Dug 4 pits before night. LZ 100% complete and fields of fire 70% complete. Nine agents from 0700-1930 used 1,780 lbs. C-4, 37-15 lb. shapes, 4-40 lb. shapes, 8,500 ft. det. cord. Both tractors total 10 machine hours. Other teams negative work.

24 January 1969

TD-6 again would not start. 450 finished gunpits, total 6, and built 2 ammo berms, one ration dump, one trash dump and one LZ for regiment. TD-6 started at 1200, dug FDC and exec. pit. Total 17 machine hours. Nine agents worked from 0700-1830 clearing fields of fire. They are 95% complete. Used 970 lbs. C-4, 18-15 lb. shapes, and 5,520 ft. det. cord. Other teams reported negative work. All dozer work complete, L/Cpl. Schloe and EO3 Deshotel have done a fine job for us.

25 January 1969

FSB Razor 100% complete. Nine agents worked from 1000-1200 using 100 lbs. C-4, 3-15 lb. shapes. Hotel 2/9 had released their team to me for the FSB. They are back with Hotel now. All hands have done an outstanding job. Other teams still negative work.

26 January 1969

Cleared fields of fire for 106 section. 4 agents worked from 0900-1300 using 60 lbs. C-4. Other teams reported negative work.

8. Engineer Observations: Throughout Operation Dewey Canyon, engineers were vital to the success of the operation. Landing zones and Fire Support Bases were properly coordinated and built quickly; insuring that fire support, resupply and medevacs would quickly be obtained. One area that continues to be a problem is with the time lost in waiting for a Staff or Officer HST to inspect the sling of either the Case 450 or 580. The building of one Fire Support Base usually includes another Fire Support Base elsewhere after the completion of the first FSB. Time is lost in this phase due to the almost constant lack HST personnel. 3d Engineer Battalion Staff and Officers should be able to inspect the slings of this two valuable pieces of equipment with battle training.

BATTALION BULLETIN 1500

From: Commanding Officer
To: Distribution List

Subj: Monthly Battalion Training Schedule

Ref: (a) Mo 1500.4B

Incl: ✓(1) Training Schedule for All Companies

1. Purpose. To publish the monthly training schedule for the month of April.

2. Action.

a. The enclosed training schedule will be carried out by all units of this command. Company Commanders will insure an acceptable level of training is maintained for personnel under their supervision.

b. Companies will conduct MOS and General Military Subjects Training to the maximum extent consistent with the combat support mission of this Battalion. Due to the fact that a large portion of 3d Engineer Battalion personnel are working in groups smaller than squad size in separate locations, most training will have to be conducted by relatively junior NCO's. Attached Engineer personnel may also be included in training given by the unit they are supporting. Time, location and instructors will be selected by the unit commander.

c. Training conducted will be reported on the weekly summary. The report will include topic, period of instruction and number of personnel present.

d. Training conducted will also be recorded on the individuals' Training Record.

3. Self Cancellation: 1 May 1969

STATUS OF SUPPLY SITUATIONSection I - Supply

1. Overall Supply Situation. The Battalion Supply situation has been improving steadily in the last month. Many of the "hard to get" items are being received at a faster rate by the Battalion. However, there are a few items which remain in demand that the battalion has been unable to obtain (i.e. clothing).

The personnel situation is not as critical as was reported in last month's report. The battalion received a new Supply Chief and assistant this month. The battalion Supply Section is 6 personnel under the T/O and the section has difficulty performing the support functions required. The Supply Section is in need of a Sergeant (E-5) 3051 to fill the billet of Warehouse Chief.

Improvement has been reported in the supply-support to the subordinate units within the battalion and reconciliations have shown a decrease in the percentages of discrepancies reported.

2. Class I. Not Applicable

3. Class II.

Subclassification B

a. Situation. As previously reported, due to the heavy use and high deadline rate, the battalions' mine detectors are still in a critical status. Other items that are critically needed and not previously reported are typewriters and centrifugal pumps.

b. Critical Items.
