### DECEMBER 1965 SUMMARY PERSONNEL AND ADMINISTRATION

The Battalion's personnel posture continues at an acceptable level in relation to the M Series T/O. The Battalion's chargeable strength as of 31 December 1965. Battalion's chargeable strength as of 31 December 1965. Was 31 Marine Officers and 718 Marine enlisted, together with 1 Naval Officer and 14 Naval enlisted. The 1st Platoon of A Company, this command, was transferred to the 3d Battalion, 4th Marines which rotated as a BLT to Okinawa on 20 December. This transfer explains the sudden drop of 1 Marine Officer and 22 Marine enlisted from the battalion rolls. The 2nd Platoon of A Company, this command, presently on the return leg of the rotation cycle with 2nd Pattalion, 3rd Marines, will be returning ADCON to this battalion in the very near future.

The Battalion lost some 23 Marine enlisted personnel through either rotation to CONUS or by medical evacuation (all of which were non-battle cases). One Marine from (all of which were non-battle cases). One Marine from B Company, 1st Tank Battalion (LCpl John F. ASHMAN 2096207/B Company, 1st Tank Battalion (LCpl John F. ASHMAN 2096207/B Company, 1st Tank Battalion (LCpl John F. ASHMAN 2096207/B Company, 1st Tank Battalion (LCpl John F. ASHMAN 2096207/B Cause of his death was a through and through missile wound caused by a .50 caliber (cupola mounted MG) round in the left side of the chest. LCpl ASHMAN was standing approximately 5 feet in front of the weapon's muzzle on the right frownt fender of the tank at the time of the discharge. The incident is presently being investigated in consonance with current directives from this and higher headquarters.

The Battalion joined 28 enlisted marines as replacements during this reporting period.

As stated previously the Pattalion is presently experiencing an almost critical shortage in the Ol Occupational Field. The shortage of trained clerks (Ol41) has tional Field. The shortage of trained clerks (Ol41) has handicapped our administrative effort. In some cases tank handicapped our administrative effort. In some cases tank handicapped our administrative effort. The some cases tank handicapped our administrative effort. In some cases tank handicapped our administrative effort. In some cases tank handicapped our administrative effort, in some cases tank handicapped our administrative effort, in some cases tank handicapped of personnel reports and related administration continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory, but in some cases only continues to be satisfactory.

The Battalion is still short 17 tank crewmen (1811). This problem has been partially alleviated through the substitution of tank repairmen (2141) in order to make full tank crews. This solution is only possible so long as the Battalion retains its slight overage in the 2100 Occupational Field, and in no instance should this expedient be interpreted as anything but the emergency stop-gap measure it is. Tank crewmen who do not possess a qualified primary MOS of 1811 are not considered desirable. The 17 tank crewmen (1811) are indeed badly needed by this Battalion,

ENCLOSURE (2)

Replacements in the 35 Occupational are needed. The Battalion Motor Transport platoon is short 11 drivers (3531) for their M-54 6 % 6 trucks. This shortage has caused the Battalion to administratively deadline motor vehicles due to the lack of qualified drivers to operate them.

The Battalion has had no replacement of Officers this reporting period, and is presently short 14 Officers. As stated previous this shortage has necessitated some Officers performing the duties normally performed by two or more.

The Battalion has had only one serious breach of discipline this month and it has been referred to a Summary Court Martial.

Morala remains outstanding. Continued improvement of living conditions is in evidence. The Battalion Special Services Officer has organized both Volleyball and Softball games. The R&R trips to Hong Yong, Bangkok, Okinawa, Tokyo, Taipei, and Saigon RVN are well received by all hands. It seems to be the universal wish that the R&R time period of 5 days could be extended to 7 days.

The Battalion promotion board met on 1 December and promoted 16 Marines to Lance Corporal and 5 Marines to Corporal under the provisions of paragraph 7 of MCO 1418.9D. Two Corporals were meritoriously promoted to Sergeant following a meeting of the Division promotion board. Twenty other Corporals were promoted to Sergeant pursuant to MCBul 1430 of December 1965. In addition, the Battalion Commander, LtCol RAPHAEL, effected the two combat promotions (one to LCpl and one to Cpl) authorized by FMFPacO 1430.6.

### COMFINENTIAL

### INTELLIGENCE

Viet Cong activity against tanks was light for the month of December 1965. Several bits of information were uncovered, however, which do have significance for the 3d Tank Battalion.

The RPG-2 which has proven moderately effective against tanks in the past was again encountered on Operation Harvest Moon. Though Tanks were not involved in the operation, seven of these weapons were captured from the Viet Cong units involved, indicating that they are in greater abundance than previously supposed. It must be assumed that in future engagements with the Viet Cong Main Force Battalions defensive measures will have to be taken to insure a minimum of opportunity for V.C. employment of the RPG-2. This weapon will penetrate 6-7 inches of homogeneous steel according to the manual on foreign weapons. (reference Chieu Cu, Tap I). It is suspected, however, that this weapon has accounted for 92 inches of armor penetration on one vehericle in this Bn.

During the month of December 1965 as during previous months the most effective Viet Cong weapon was the land mine. These mines continued to be in the 25-35 pound class; again with the emphasis on shaped charges. The mines again were ineffective in destroying tanks though they continually did enough damage to require extensive maintenance in order that the tanks remain tactically sound.

The Viet Cong continued to avoid contact with tanks indicating the inability of the units involved to destroy the vehicle. On every occassion in which contact was made by tank units with the Viet Cong, the Viet Cong attempted to break contact immediately. In several instances the Viet Cong showed every indication of being capable and desirous of maintaining contact with friendly infantry units. Immediately upon committment of tanks, however, the Viet Cong broke contact in haste.

On 31 December 1965 the battalion S=2 submitted a special intelligence report on the situation in PHONG BAC hamlet, teobrainates (47990706); to the Commanding General, Third Marine Division. In brief the main points of the report were as follows:

- 1. Over twenty youths from this hamlet have been recruited into the Viet Cong army since 1963.
- 2. Although there are no armed Viet Cong staying in the village on a continuing basis, they frequently visit for propaganda and agitation purposes, according to the villagers.
- 3. The village, though overtly supporting the Government of the Republic of Viet Nam, does, in the opinion of HUA VANG district, HOA THO village, and the 3d Tank Battalion, possess an influential National Ideoration Front infrastructure.

CONFIDENTIAL

## CONFIDENTIAL

4. Progress has been made in gaining the support of the people of PHONG BAC.

The official government administrative organization of the hamlet is only moderately successful in functioning as an effective governing body. This topic will be discussed in detail in a forthcoming special intelligence report.

The Viet Gong assassinated a popular force squad leader in PHONG BAC on the 20th of December 1965. It is believed that they departed in the direction of the CAM NE Hamlets at (AT980695). It is also believed that the Viet Gong received aid in locating him from some people in the village. (See Special Intelligence Report 31 December 1965).

CONFIDENTIA

#### TANK COMBAT OPERATIONS

Tank Combat operations during the month of December were composed of the following:

company "A" remains in direct support of the 3d Marines, occupying strong points along the MLR and providing a mobile reserve force for the regiment. The company has two tanks on hill #41 (AT 934664) in support of an infantry company. The tanks working in conjuction with a AN/TPS-21 radar, are used extensively for H&I's fires. Other tanks in the company were also employed in firing H&I's in the TAOR. The 3d platoon, "A" company, attached to the 3d Battalion, 4th Marines, occupies strong points on Highway 1 and the airfield and provided the battalion with a mobile reserve force.

Company "B" remains in direct support of the 9th Marines with one platoon of tanks in support of the 2d Battalion and the remainder in support of the 1st Battalion. This company continues to have the majority of tank offensive actions.

Company "B" participated in numerous search and clear and search and destroy operations and armored patrols. They also provided the 9th Marines with a mobile reserve force and occupied strong points along the MLR. During December, elements of the company had 20 contacts with the V.C. and killed an estimated 22 V.C. (17 Confirmed). They also apprehended 9 VCs and sunk two sampans. The most notable contact occurred in an action in which a section of tanks was employed as a mobile reaction force to aid an infantry squad under heavy attack. An estimated 60 uniformed VC were attacked. In the ensuing fire fight 41 VC were killed with the tanks credited with 13 of the kills.

Company "C", attached to the 4th marines occupied strong points along the MLR in the Chu Lai enclave. The company provides one tank platoon as part of the alert force near the Chu Lai airfield, and participated in beach patrols along thier section of the perimeter.

Company "B" lst tank battalion, attached to the 7th marines supported operations within the TAOR, participating in sweep and clear and search and destroy operations and support of patro. The company conducted beach patrols in the TAOR and provides one platoon for the defense of the Chu Lai Airfield.

CONFIDENTIAL

Encl (4)

### CONFIDENTIAL

### SPECIAL OPERATIONS

Special operations were conducted by H&S Company during the month of December in areas adjacent to the Battalion CP 13 day time patrols and 7 night ambushes were conducted. One sweep and clear operation was conducted over two grid squares south and east of the CP. The battalion provided one infantry platoon on standby for immediate employment in the 3d Marine Division TAOR, during operation Harvest Moon.

CONFIDENTIAL

Enol (5)

#### TRAINING

During the month of December, training was continued to maintain and increase the high state of Combat readiness.

Weekly firing of personal and orew served small arms was conducted, including the M-79 grenade launcher.

Headquarters personnel have received extensive on the job and concurrent training in the erection of field fortications and the construction of bunkers. This was accomplished during improvement of Battalion Headquarters Defenses.

Two, one day instruction periods on the claymore mine web provided to Battalion Headquarters personnel by instructors from the third and seventh engineer Bns.

Individual and tank orew training and drills in the techiniques and fundamentals of indirect and long range direct tank gunnery.

Six squad sized patrols have been organized as immediate stand by reaction forces. Training was conducted in socuting and patrolling with emphasis placed on night patrolling and ambushes.

CONFIDENTIAL

Enol (6)

## CONFIDENTIAL LOGISTICS

### 1. General

- a. The period covered by this report is from 1 to 31 December 1965. During this period the command has continued to perform the normal logistic functions required to support a Tank Battalion (Rein). The overall Logistic Picture has improved and the future seems to be encouraging. There are certain problem areas which still exist however and these are stated below.
- b. The main logistic effort during this period has been an aggressive attempt to procure critically required tank spare parts; analysis and recoganization of supply accounting, warehousing and office procedures; an up-to-date evaluation of anticipated supply requirements (to include a reappraisal of the requisition Objective); and the development of the Battalion Cantonment.

### 2. Supply

- 2. Determination of Supply requirements:
- (1) Determination of supply requirements has demanded the personnal attention of all the special and executive staff and the unit commanders. It has been found that the usage data accumulated during the nontactical years is not realistic. The usage data concerning class II spare parts was, in the most part, unsatisfactory. A detailed analysis of the requisition objective for each spare part was conducted by the cognizant section head and the Bn. Supply Officer. This took time and effort, however a much more regliable and realistic stockage objective of Class II spare parts is now in effect.
- (2) A determination of Supply Requirements caused by the climate and terrain which is peculiar to this area, is a continuous effort. Mosquito Nets, wet Weather Gear, Rust Preventives, and foot powders are among the special items peculiar to this environment.
- (3) A compilation of the combat allowance for T/E items has been completed. The increases which are significant are as follows: (a study is now being conducted to determine a true need for these items).

<u> T<b>H</b>T</u>	<u>c/A</u>	MATI	C/▲
Binoculars	8	Tank M67	ı
M-ll Rifle	18	GP Tent	7
SNG Cal45	4	Helmet MC-2	13
Truck M-38Al	1	Body Armor	6

b. Supply Administration. The administrative procedures for storing, accounting, requisitioning, and documenting of supplies was found to be unreliable and slow to respond to field requirements. The office paper flow was indefinite, not only between desks, but between office and warehousing. Consequently errors in records and stock locator files were on the increase. A complete evaluation of procedures and a reorganization of the supply section has ateviated this and other internal problems.

CONFIDENTIAL

ENCLOSURE (7)

# CONFIDENTIAL

- c. Procurement, Availability, and Distribution of Supply.
- (1) Availability of Class I, III, and V supplies has been excellent. The availability of Class Iv supplies was fair however bunker material, concertina wire, sand bags, and metal stakes are now obtainable.
- (2) The non-availability of Class II spare parts still continues to be the major supply and maintenance problem. Components of the Tank Suspension System have been of great concern to this command since July 1965. In an attempt of anticipate the need, tank sprockets, track, and torsion bars were placed on Priority 12 and 17 requisitions during July and September. It was anticipated that a number of these items would require replacement in October and November. Except for the recent shipment of track, none of the other items have been received. Consequently the over all condition of the tank track and suspension has continued to deteriorate. Tanks which had poor track and suspension in July are now employed in emergency situations only. Good track and suspension which existed in July has now depreciated to a poor condition. To keep up with the growing requirements and the corresponding urgency, additional requistions of higher priority have been submitted. Tracer action on all requisitions has been pursued. Of the 17 sets of track just recently received 9 sets were M-51 Retriever Track. There are no M-51 sprockets available. M-51 sprocket were placed on a priority 02 requisition to faciliate the use of the available M-51 track. Many of the sprockets now being utilized on the M-48 and the M-67 are worn to a degree that they would seriously damage new track if it was used. At this time there are enough sprockets on order to outfit 45 Tanks, this includes a request for 40 sprockets which is in the Red Ball System. III MAF and Division have taken a personnal interest in this problem. Division dispatch 131118Z Dec, to Third FSk and Dispatch 131120Z Dec, to FisG III har requested immediated action on the outstanding sprocket and torsion bar requisitions.
- (3) Small spare parts and items of little weight and cube are beginning to arrive in good time. This is mostely due to the utilization of parcel post. The trend however is that heavy and bulky items such as mentioned in paragraph 2, c, (3) above are not comming in. This is a particular serious trend for this organization in that many of our Supply Requirements are heavy. A 400 pound weight limitation was imposed on the critispak program and this has curtailed our full use of the program also.
- (4) As stated above the lack of supply support of Class II space parts is a significant problem. The over all fill rate of requisitions is improving however. The following is the fill percentages of all requisitions, by priority, since this organization has been in country. Note the increase in fill percentage during December.

e e e e e e e e e e e e e e e e e e e	Pri 02	<u>Pri, 05</u>	<u> Pri 12</u>	<u>  ri 17</u>
Documents Completed Fill Rate % increase in Dec	177	699	1134	319
	62	166	135	40
	36•6%	23•7%	11.9%	12.5%
	14•7%	14•7%	8.6%	9.2%

### 4. Transportation

- a. The overall effectiveness of the Battalion Notor Transport is excellent. Vehicles and equipment are being maintained, however added emphasis is being placed on driver preventive maintenance. The use of motor transport is supervised and co-ordinated at all echelons. The Battalion Road Master is out on the roads at least 4 hours a day.
- b. This Battalion furnished the Division two to four trucks daily. There is no problem in this area.
- c. There have been numerous difficulties encountered at the tracked vehicle river crossings at 035775 and 988708. The ferries at these sites are in constant need of repair and maintenance. To transport a tank they are required to put more pressure into the pontoons. The pontoons can not be kept at this required pressure for any length of time due to the weak ened condition of the equipment. In emergencies it has taken four hours to prepare the ferries for crossing. During actual crossings the motors for the subject ferries have frequently failed. Twice the motors have failed at mid-stream while transporting tanks. Both times the ferry drifted approximately 300 yards and came to rest on the river bank. The Bridge Company 7th Engineers and the Division G-4 are aware of this problem.

### 5. Service

### a. Tank Maintenance

- (1) The non-availability of major Tank components and spare parts still cripples the maintenance effort.
- (2) Crew preventive maintenance and frequent maintenance checks by organizational maintenance personnal have resulted in continued Tank support regardless of the severe lack of supply spare parts.
- (3) On 27Dec B-22 was stuck at 985635. The retrieve operation proved to be normal, and the ground condition in the area is not unusual for Viet Nam. In this case the ground looked to be trafficable. The surface was sandy and moist. The vigitation was sparse. B-22 was on a tactical mission and while traversing this ground the surface gave way. Approximately 2 feet below the surface existed a water table. Due to the hazzardous ground condition which existed about 150 feet around B-22, the other Tanks could not get close enough to retrieve. The H&S metriever was called to the scene and did extract him with the main wench. Tesson learned-the command is procuring one 200 foot cable per tank alt. This will allow accompanying tanks to retrieve from a distance.

b. Cantonment.

CONFIDENTIAL

ENCLOSURE (7)

# CONFIDENT ....

- (1) The cantonment program is progressing very well. All strong backs for billeting, office space, and storage facilities have been received. 70% of these structures are up and in use. The professional manner in which the members of MBM Co, 7th Engineers performed their duties on this project was outstanding.
- (2) The medical Bunker and the Communications Bunker are completed. A 24: X 24: Command Bunker is being constructed now and should be completed within one week.
- c. Sanitation. Frequent inspection by the medical authorities and close semmand attention to preventive medicine and area police has resulted in no sanitation problems.
- d. Food Services. The availability of Class I supplies and the supervised preparation of meals has continued to be one of the prime reason for the high state of morale which exists in the organization.

4.

## CONFIDENTIAL

### COMMAND ALD CONTROL

The 3d Tank Bettelion posture remains unchanged. Of the four gun companies in this reinforced bettelion, two are in the DaNang enclave while two are in the Chu Lai area. Companies "A" and "3", 3rd Tank Bettelion are in the direct support of the 3rd and 9th Marines, respectively, while "B" company, lst Tank 3n, and "C" company 3rd Tank Bettelion remain attached to the 7th Harines and 4th Marines, respectively. Whereas tactical control is retained by the supported infantry, the CO, 3rd Tank Bettelion maintains administrative control and exercises logistic supervision of all subordinate units regardless of their location or support status.

Timely information is passed and close coordination is #f

effected by:

(a) Frequent visits by the Battalian Commander and his staff to companies and to the supported infantry units

(b) Daily telephone and/or radio contact with each company.

(c) Submission of periodic summaries of activities by

each company.

(a) A monthly bettalion command and staff meeting. Ser

For any operations beyond normal daily activity, close linison
is established by this battalion as early as possible is order
to sid in the planning stages, and attempt to influence the
tactical employment of tanks toward maximum effectiveness.

CONFIDENTIAL

Enc1(8)

### COMMUNICATIONS - ELECTRONICS

Reliable communications were maintained through out the month of December to support tactical requirements. Some difficulty was experienced on the Battalion's command net #2, a single side band circuit, when "C" Co.'s long wire antenna became inoperative and a whip, one-quarter wave length antenna was substituted. This resulted in the net control station, which was using a long wire antenna, receiving "C" Co. weak and garbled due to the omni-directional propagation pattern and the vertically polarized radio waves. Reliable communications resumed immediately after "C" Co. repaired their long wire antenna. The Battalion tactical net (FM) was guarded on a continious schedule by "A" Co. and "B" Co. without interruption or down time.

All Communications - Electronic equipment evacuated to FLSG has been repaired in a most expeditious manner.

The Critic-rak program has made available certain Communications-Electronic repair parts that have not been available through the regualr supply system.

The number of MC-2 tank helments deadlined for repair is becoming critical. Insulation on the electrical-leads of the MC-2 tank helment wiring harness, deteriorates rapidly due to heat and body perspiration. Electrical-leads are very difficult to obtain through the supply system. Cable assemblies, FSN 5995-577-8430, (8433), (8434), were requisitioned 1 October 1965, and are still outstanding this date. MK-401 FSN 5995-679-7708, was requisitioned 21 August 1965, on a priority five (5), document number 01133. Two tracer actions have been initiated and the requisition is still outstanding.

The wire gun loop, providing communications to the perimeter defensive bunkers, has been overheaded through out the Command rost area, and EE-8 telephones have been installed on a permanent mount inside each bunker. This arrangement affords protection to the phones and greatly reduces the preventive maintenance problems.

A contact team, consisting of one radio technician from the H&S Communications Platoon is being made available to assist the tank companies.

Several rain leaks were noted in the roof of the underground Comnunications bunker, and a new water proof covering was added to prevent damage to the radio equipment. The services of a Marine Photographer were obtained through the Third Marine Division's photo lab. Several pictures of the Battalion's underground Communications bunker were taken and the negatives are enclosed as a tab to this enclosure.

CONFIDENTIAL

A Public Address System, AN/TTP-1, was set up for the Battalion's Vietnamese interpreter's Civic action broadcasts to the Vietnamese people of Phong Bac hamlet.

Radio operators accompained nine Civic action team patrols during December and reliable short range Communications with the net station were maintained.

ENCLOSURE (9)

CONFIDENTIAL

# CONFIDENTIAL

### MEDICAL AND DENTAL

The routine sick call for the Battalion during December consisted of routine type sicknesses. Colls were most prevelent. Skin rashes and minor stomach disorders were not significant but are worth mention. A total of 373 persons were seen at the Battalion Aid Station.

The civil action program continues in Phong Boc Village. Three visits are made weekly to the school. A total of 747 people were given 1149 treatments. The two most prevelant complaints were skin infection and upper respiratory infections.

The Sampan Fleet is visited twice weekly in conjunction with 1st AmTrac Battalion. A total of 565 persons were given 764 treatments. Most common complaint was skin infections.

CONFIDENTIAL

Enclosure (10)

### CIVIL AFFAIRS

In accordance with 3d Tank Battalion Commanding Officer's desire, the Civic Action program was intensified during December 1965. This included 3 separate Christmas programs for Vietnamese children; aid to the Da Nang orphanage, increased medical aid, and working contact with the Vietnamese on a day to day basis.

In early December the aid station for HOA THO village was completed. It is located at the PHONG BAC school coord(AT998709). The people of the village were delighted with the new building. Its construction brought forth two more volunteer nurses who will be trained in the coming months.

Christmas provided an opportunity for considerable Civic Action. The 3d Tank Battalion combined with 1st Amphibian Tractor Battalion to spread Charistmas cheer to the people of the Sampan Fleet. A Santa Claus complete with sleigh and reindeer was affixed to the top of an amtrac painted white. Then, with 3d Tank Battalion's interpreter, SSgt TRAN VAN THONG, reading an explanation, written by the Battalion's Civic Action Officer, of Santa Claus and what he means to Americans, Santa passed out candy to all the children. Though it is doubtful that the full impact of Santa and his meaning reached the children, a very Merry Christmas was enjoyed by the children as well as the Marines participating.

One day later on the 24 of December 1965 a tank with a Christmas greetings sign to the Vietnamese in their language and with a Santa Claus riding on top visited the PHONG BAC school. The program was complete with Vietnamese music, American Christmas music and a soccer game with the children. Again the Battalion interpreter gave an explanation of Santa Claus to the children who in turn expressed their appreciation with shouts of glee as the jolly fat man in the red suit passed out candy and toys. After all the children had received individual bags of candy and toys, all the adults received soap, toothbrushes, tooth paste, and costume jewelry. This program like the "Sampan Fleet" program brought Christmas not only to the Vietnamese but also to the marines.

The last Christmas program was held at the HOA CAM Training Center's dependent housing area. This program was the same as the one carried out at PHONG BAC School except, jeeps were used in place of the tank. The program was such a success that it rated a five minute thank you speech from the school master of the dependent's school. Again, a more significant Christmas resulted from the unselfish giving of the Marines of Third Tank Battalion to the people of Viet Name.

The 3d Tank Battalion Commanding Officer made a personal visit to the DaNang Orphanage during the holidays and distributed games, toys, sewing kits, buttons, and clothes to the children there. They showed their appreciation by sending the Battalion a Christmas card.

CONFIDENTIAL.

An unfortunate event happened on the night of 22 December 1965 when the squad leader of the PHONG BAC popular force squad was assassinated. The Battalion took immediate action and increased its patrolling in the hamlet. The widow of the squad leader is receiving monthly financial aid, food, and clothing from the battalion. To prevent a similar occurrence in the future a joint action patrol squad consisting of popular forces and Marines is in the planning stages at this time.

The Battalion MEDCAP team treated a total 1302 people, more than doubling its output for November. Several persons were evacuated to the USOM hospital in Da Nang. The team gave over 1800 treatments during the month.

The people of both the Sampan Fleet and HOA THO were receptive to the Marines, though for a period immediately after the squad leader was killed the people exhibited a withdrawl type reaction. Gradually they regained their confidence as increased activity in PHONG BAC by the battalion restored their faith in our ability and intentions.

#### COMMAND CHRONOLOGY

1-31 December 1965

#### Section XII

- 1. Problems encountered and lessons learned by supporting units.
- a. The inherent tank capabilities of firepower, armor protection, mobility, and shock action have not been utilized to their maximum potential. In most instances tanks have been utilized on the FEBA as static pillboxes to reinforce defensive positions.

LESSONS LEARNED - Due to employment of Viet Cong gallantry platoons/
teams, the static positioning of tanks on the FEBA presents a lucrative
target. The mission assigned the tanks could be adequately fulfilled by
organic infantry weapons. FMFM 9-1 is quoted in part as follows: "Tanks
should be employed in mass with the reserve to exploit the situations arising in battle, to counterattack, or to react agressively." It is further stated: "Employing tanks with the counterattack force affords the best
opportunity to utilize the full capabilities of the tank." Primary and
alternate positions should be prepared for tanks along the FEBA, but they
should be assigned positions with the reserve unit and move to positions
on the FEBA when reinforcement is necessary.

b. On 25 December the An Tan bridge was attacked by the Viet Cong. An infantry company was dispatched by truck to reinforce the bridge defense. Tanks were available but were not utilized to escort the trucks to the bridge.

LESSONS LEARNED - Whenever possible tanks should be utilized to lead a mechanized-motorized force when truck mounted infantry move into the battle area. It is a well known enemy tactic to ambush relief forces. Use of tanks as mobile security and fire support for relief forces greatly enhances the chances of effecting reinforcement or relief. The inherent communications capabilities and mobility of tank units provide the Commander with an immediate method of effecting relief.
