~~CONFIDENTIAL~~INTELLIGENCE1. ENEMY ACTIVITY

The enemy's posture and his activity since initiation of the 1969 Post-Tet Offensive has been sapper and sapper supported attacks on Marine FSB's followed by a series of attacks against ARVN, CAP and PF installations. These attacks all occurred in the northern half of the AO relatively close to the DMZ; none of these attacks required the enemy to mass sizeable forces. The enemy is not "laying siege" to the stronger combat positions, but instead he employed his increased sapper capability to spearhead surprise attacks against targets where his chance of success was greater.

In the Eastern AO, elements of the 138th Regt., the 270th Regt., the 126th Naval Sapper Regt. and mortar and rocket units continued to conduct sporadic attacks by fire, mining and minor ground probes.

In Base Area 101 and in the coastal plains, elements of the 7th Front and local force units remained inactive during April although they are capable of attacking Quang Tri in conjunction with enemy forces from the north.

In the northern and western area of operation elements of the 246th Regt., the 31st Regt. and the 84th Rocket/Artillery were known to be operating. Initial interrogation of a PW captured 21 April revealed the 36th Regt./308th Division replaced the 27th Regt. in the Cam Lo Battlefield. The introduction of this new unit in the area accounts for the recent increases in enemy activity north of Route 9. It should be noted that the main enemy effort was against Lines of Communications. Although interdiction of LOC's preceded previous enemy offensives, the enemy this month has not yet developed an offensive posture.

2. MINING INCIDENTS

During the month of April, there was a decrease in the number of mining incidents involving tanks. A total of ten mining incidents occurred which involved one APC and Seven tanks (two of which hit two mines each). The incidents are listed below:

<u>Vehicle</u>	<u>Location</u>	<u>Approximate Size</u>	<u>Damage</u>
F22	YD189734	25-30 pounds	light to suspension

4. WEATHER

The weather conditions during the month of April throughout the 3d Marine Division Area of Operations continued to support tank-infantry operations. The precipitation for April was .55 inches and the mean monthly precipitation was .02 inches. This allowed good trafficability in areas where otherwise tank traffic would be prohibited. The high temperature for the month was 103 degrees while the low was 59 degrees. The high occurred on 15 April. The average temperature was 83 degrees and the average relative humidity was 78 percent.

During the operation Company A had four tanks and one APC hit a total of six mines.

As the month closed the company continued operations with the 2nd ARVN Regiment and commenced recovery of the mined vehicles.

4. COMPANY B (REIN)

Company B continued operations from A2 (Gio Linh) with one reinforced platoon supporting the 2nd ARVN Regiment at that location and a section at Oceanview supporting 3/3 and 1/4. The company continued supporting the 2nd ARVN Regiment at Gio Linh throughout the month. In addition to the commitments at A2, Company B (-) and one ARVN company formed Task Force Bravo to operate as a blocking force for two ARVN Battalions west of A4 (Con Thien). Task Force Bravo was commanded by the Company B Company Commander. The company operated in the area west of A4 through 28 April when they were relieved by Company A on 29 April.
