SECOND ENDORSEMENT on GO, 1stBn, 3d Mar 1tr 3/JJJ/ddh over 3120 ded 18 Apr 1966

Commanding General, 3d Marine Division (Rein) FMF Gommanding General, U. S. Military Assistance From:

To:

Command, Vietnam Commanding General, III Marine Amphibious Force Via:

Operation ORANGE, After Action Report Sub:

Ref: (a) COMUSMACY Directive No 335-8

L. Readdressed and forwarded in accordance with reference (a). Comments concerning recommendations contained in the basic report are set forth below.

- a. Photo reproduction of maps. Photo reproduction of maps is not necessary. Present map supplies are adequate to provide distribution down to squad level upon request.
- Relieving battalion of TAOR security responsibili-The advantages of relieving a battalion of its TAOR security responsibilities when tactically employed beyond an assigned sector are recognised. However, such is most frequently not possible due to the limited availability of forces to meet both defensive and offensive committments. By task organizing an infantry battalion may be divided into two task organizations; an offensive tactical command group headquarters capable of coordinating and controlling supporting arms together with two or more company maneuver elements; and a defensive command headquarters capable of commanding and coordinating companies or elements retained in the defensive sector. Further, by such pre-planned task organizing, each battalion has the capability of providing a combat force on short notice to meet contingency requirements without major redisposition of forces within the TAOR. This concept, practiced in the 3d Marine Division for an extended period of time, makes a maximum number of forces available for offensive action, retains command continuity in the assigned defensive sector, and insures the protection of vital areas. However, it must be recognised that such procedure severely limits the capability of an infantry battalion to conduct sustained offensive operations.

### e. Communications

- (1) Remotes for the AM/PRC-25 are programmed for distribution to Division units during June, 1966.
- (2) The comment concerning mutual interference between AN/PRC-25 radios is the first report of this type difficulty. Locally controlled tests to determine the degree of mutual interference between AN/PRC-25 radios have subsequently been conducted and the results have shown negligible interference. This problem area will continue to be monitored.

L total of 337 artillery missions were fired during the openations of which 67 were observed, 25 were unobserved, 8 were registravious. 11 illumination, 1 direct fire, and 215 H and I. 2,174 4.2 HB and 1,335 105 HE, 547 4.2 WP and 100 105mm WP, 146 4.2 Illum and 18 105mm Illum, and 13 HET 105mm rounds were fired, for a total of 4.7777 UNCLASSIFIED certillery rounds of all calibers and types.

TITALITIE

Air request nets utilized were Tactical Air Request Net, Tactical Air Direction Net, and Landing Zone Control Net. Air was both preplanned and immediate request. Reaction time of fixed wing close support air on strip alert was excellent with one exception, when a 45 minute delay was encountered because a TAC(A) was not immediately available. In this instance, mapalm was requested and the strike was with 250 lb. bombs. Effectiveness of close air support was sometimes limited by the proximity of friendly forces to the target. In general, target areas being prepared for ground assaults by close air support were given effective coverage. Rotary wing aircraft support was generally excellent. Reaction time for Med Evac missions was excellent. There was often an undue delay in the arrival of aircraft called for special and resupply missions.

The following is a re-capitulation of helicopter support used during the operation:

### Sorties

	H-34	<u> </u>
30 Troop Lifts	276	172
LSA Lifts	80	176

2 H34's were used daily for resupply/Med Evac.

4 H34's were used on D+3 and D+4 for resupply/Med Evac.

The following fixed wing air support was used:

Fixed wing cargo sorties (USA Caribou aircraft) - 18

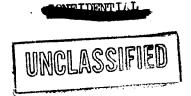

### Fixed wing CAS

	Strikes	#AC Used

Statement Statement (1-1-4-1)		

Quantity of artillery support, both in terms of tubes and ammunition, was sufficient. Artillery fires were used for illumination, preparatory fires for ground assault, harassing and interdiction of known and suspected avenues of approach, assembly areas, harboring sites, and observed fires on enemy troops and installations. Artillery fires were very effective, particularly when used to prepare enemy positions for ground assault. Illumination missions were effective, but in many cases were not fired as promptly as expected. Organic 81mm mortar illumination missions were fired to overcome this time lag.

7. INTELLIGENCE. Though information received from higher echelon concerning the enemy's strength, location, disposition and situation, prior to the operation was sketchy, it was ascertained that the only confirmed unit operating in the objective area was the Q17 Local Force Company, with a strength of 60-70 men vicinity DONG PHUOC(1) (ZC 1653). Unconfirmed units that were believed to be in the area of operations included the 103 Main Force Bn, operating in the vicinity of (ZC 1150), and the H-31 Local Force Company operating in the vicinity of (20 1654); strength also unknown. During the operation the District Chief of HIEU DUC District reported that two companies of the 321st VC Battalion were operating in the vicinity of (ZC 1755) and (ZC 1853). The enemy was found to be well organised and entrenched in heavily fortified positions. Heavy resistance was meet on D+1 in NGOC KINH(1) and (2). The enemy's weapons included small arms, automatic weapons and 60mm mortars. It is believed the majority of the VC withdrew to the mountains to the north and south of the operations area, leaving behind small plt size units to cover their withdrawal. The hamlets provided excellent cover and concealment, were heavily entrenched and had a net work of obstacles consisting of booby traps and barbed wire. The VU GIA river valley runs E-W and was bordered on the north and south by high ground rising to 750 meters on the north and 1000 meters on the south. The mountains were covered with a primary and secondary growth prohibiting rapid movement. Avenues of approach into the area were the VU GIA River Valley from the east and west, the YANG River Valley, which enters . the area from Happy Valley, and numerous draws entering into the area from the high ground on the north and south. The weather during the operation was hot and humid with temperatures up to 1050 during the day to 750 at night with occasional . thunderstorms at night. Psy War Leaflets were dropped in the operation area without much success. This is believed to be because of the fear of American troops by the populace. This was most evident in the outlying hemlets where, even towards the end of the operation, the people still showed fear and concern at American troops in the area.

8. MISSION. 1st Bn, 3d Mar conducts search and destroy operations in the THUONG DUCH TAN area to support the initial installation of CIDG camp, and provides mine clearing and security for USA Special Forces as required.

- 9. CONCEPT OF OPERATION. 1st Bn, 3d Mar(-)(Reinf) conducts helicopter assault of objective area with two rifle companies(reinf) in the assault, one rifle company(reinf) initially in reserve, one 4.2 inch Mortar Battery(-)(reinf), in direct support.
- (1) At L-hour on D-day one rifle company(reinf), with one 81mm Mortar Section attached and accompanied by an Artillery Reconnaissance Team, lands in LZ ALBATROSS; seizes and occupies Objective 1; selects artillery firing position vicinity (ZC 144534); seizes and defends bridge at (ZC 148537).
- (2) Immediately following aerial bombardment, one rifle company (reinf), with an 81mm Mortar Section attached, and an Engineer Squad in direct support, lands in LZ CONDOR at L-hour +1 on D-day; seizes and occupies Objective 2; continues the attack, seizes, occupies and establishes defensive perimeter around Objective 3; conducts mine clearing operations in Objective 3; prepares to support establishment of an operational base to CIDG Camp.
- (3) When Objective 1 is secured, one 4.2 inch Mortar Battery(-) (reinf) lands by helicopter, and provides artillery support in the objective area.
- (4) One rifle company(reinf) is initially held as Battalion Reserve, prepared on order to assume mission of either assault company or to exploit any situation that might develop; at K-hour on D+1 lands in IZ ROC; conducts search and destroy operations on south bank of SONG VU GIA to southwest.
- (5) Operation Overlay (See Annex A to Enclosure (1), Operation Order 303-66).

### 10. EXECUTION.

#### a. Planning.

- (1) 27 Mar: 1st Battalion, 3d Marines received warning order from 3d Marines. The Battalion Staff was alerted, development of intelligence and procurement of maps was initiated.
- (2) At 280240H Mer, 1st Battalion, 3d Marines received Div OpnO 383-66 (Operation ORANGE).
- (3) 28 Mar: Commanding Officer 1st Bn, 3d Marines attended a planning conference conducted by Commanding Officer, 3d Marines. Supporting and attached element commanders were contacted, and an aerial reconnaissance of the objective area was made by the Battalion Commander and the Battalion S-3. The Commanding Officer, 1st Bn, 3d Marines conducted a planning conference attended by Battalion Staff Officers to provide planning guidance for development of plans for Operation Office. Staff estimates were begun. A planning schedule for the Operation Order was published.

- (4) 291600H Mar: A conference was conducted by the Commanding Officer, Third Marines discussing coordinating details. A rough draft of the Operation Order was approved by the Commanding Officer, 3d Mar.
  - (5) 291800H Mar: Final draft of Operation Order was completed.
- (6) The Commanding Officer, Third Marines and the Commanding Officer, 1st Battalion, 3d Marines briefed the Commanding General on the concept of operations at Third Marine Division Headquarters. The plan to accomplish the assigned mission was approved as presented.
- (7) 300800H Mar: Commanding Officer, 1st Battalion, 3d Marines Company Commanders Companies "B" and "D", 1st Battalion, 3d Marines and Company "D", 1st Battalion, 1st Marines conducted an aerial recommaissance of proposed landing zones in the objective area.
- (8) 301000H Mar: Capt HARDIN from 2d Bn, 3d Marines arrived to familiarize himself with positions he was scheduled to occupy for reconstitution of the MLR.
- (9) 301200H Mar: A conference was held by the 1st Bn, 3d Marines S-3 with representatives of the USA Special Forces.
- (10) 301300H Mar: A conference at 3d Marine Air Wing Headquarters to determine air support requirements to support the scheme of maneuver was attended by the Battalion Commander and his Staff.
- (11) 301800H Mar: 1st Battalion, 3d Marines OpnO 303-66 (Operation ORANGE) was published.
- (12) 310830H Mar: A final detailed briefing was conducted by the Battalion Commander and his Staff for company commanders of the battalion and all reinforcing and supporting units.
- (13) C Co, 1st Bn, 4th Mar arrived at 311330 to re-constitute MLR positions vacated by Companies "B" and "D".
- (14) 311500H Mar: Attached units joined the Battalion, Co's "B" and "D" bivoused at 1/3 Cl'.

### b. Operations.

### 010645H - 020700H

(1) 010645H Apr - "D" Company 1st Bn, 1st Marines lifted off from LZ TURKEY, 1st Bn, 3d Mar Cl", landing at LZ ALBATROSS at 010710H April and securing Objective #1 at 010745H.

(2) At 010804H Mpr - Following an air strike preparation of this LE, Co "D", 1st Bn, 3d Mar lended in LE CONDUR, and nowed on Chjective #2 encountering 6-VO, of whom 2 were killed by ground fire, and 4 by air. Lending by HAS Co, 1-3, and W Btry(-), 1st Bn, 12th Mar, proceeded on schedule. "W" Btry announced readiness to fire registration at 010930H.

(3) 011130H - D-1-3 reported establishment of airfield security, and deliberate sweeps for mines were conducted without result.

(4) 011900H - All units established in night defensive positions. All objectives scheduled for D-day had been secured against light enemy resistance. A total of 6 VC were KIA, of whom 4 were KBA, 1 USMC WIA was incurred. There was no enemy contact during the night.

#### 020700H - 030700H

- (1) 020750H Company "B" (reinf) landed following air strike preparation of LZ ROC, encountering light resistance and sporadic small arms fire. Enemy resistance stiffened as Co B advanced on NGCC KINH(2), after having passed through TAM HIEP without enemy contact. (See enclosure (3), Chronology of events, Co "B" major engagement with enemy 2-3 April 1966).
- (2) 020800H The 1st Plat of D-1-1 moved south of the SONG VU GIA to blocking positions at DONG PHUOC(2) (ZC 157530). A search and destroy operation in CHAN SON (ZC 148548) was also conducted by D-1-1(-) after sporadic sniper fire from that village was received by D-1-3 and D-1-1 positions and by AO aircraft in the area.
- (5) 020718H D-1-3 moved the 3d Plt to blocking positions vicinity TINH DONG TAY (ZC 175547), and received sporadic sniper from vicinity (ZC 171548). 1st Plt remained on Hill 200 (ZC 157562); a squad searched the area napalmed on D-day. The CP was located vic (ZC 155555).
- (4) 021437H The remainder of D-1-1 was lifted by helicopter to join the 3d Flt blocking to the south of the SONG VU GIA, vicinity (ZC 157530), and was directed to attack to the northeast and make physical contact with B-1-3. The company encountered 20-30 VC vic. (ZC 169530) and engaged them, resulting in 1 VC KIA, 1 VC WIA, 1 VCS, 1 Springfield Rifle captured.
- (5) 021400H D-1-3 in contact with approximately 10 VC vicinity (ZC 140558) TAI SON hamlet.

CHEMICAL PROPERTY OF THE PROPE

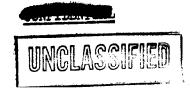

(6) 021456H - CO, 3d Mar called for the reserve Company from 3/3 to be committed to Operation ORANGE, to be landed on the air strip and initially assume security mission for the airfield and then to block DONG PHUOC(1) from the north bank of the SONG VU GIA.

CONFIDENTIAL

- (7) 021641H The 3d Plat of D-1-3 was lifted to LZ ROC to reinforce B  $C_{0}$ .
- (8) 021720H Co I, 3d Bn, 3d Mar landed at the airstrip, established a CP at (2C 161543) and established blocking positions on north bank of the SONG VU GIA. D-1-1 occupied widely separated blocking positions at DONG PHUOC(2), PHUOC LAM, and LAP THUAN, B-1-3 front lines occupied a block at the northern end of LAP THUAN and the 3d Plt of D-1-3 blocked (ZC 204549) to (ZC 208544).
- (9) 021800-030700K Ambushes were conducted by all units to maintain control over the objective area. Patrols from 2d Plat B-1-3 attempted to recover bodies of USMC KIA during attack on NGOC KINH(2), but were repulsed by mortar and MC fire. A helicopter disabled at (ZC 193537) exploded and burned at 030440H, resulting in one USMC KIA and 2 WIA. (See encl (3)).

### 030700H - 040700H

- (1) 030722H Artillery commenced preparatory fires on DONG PHUOC(1).
- (2) 030730H Airlift and airdrop of supplies to Special Forces Camp delayed until situation stabilized.
- (3) 030904H Two additional 105mm howitzers from A-1-11 were inserted.
- (4) 031025H With a platoon of D-1-1 providing LZ security, I-3-3 was heli-lifted to the south bank of the SONG VU GIA vicinity DONG PHUCC(2), completing the movement at 031050H.
- (5) 031130H 2d Plt B-1-3, assisted by 3d Plt D-1-3, attempted to recover bodies of 7 Marines KIA in the sotion of 2 April still lying at the edge of the enemy fortified positions in NGOC KINH(2), but were again repulsed by heavy automatic weapons fire and 60mm mortar fire.
- (6) 031250H After an artillery preparation lasting most of the morning, an air strike was conducted on DONG THUOC at 1250.
- (7) 031320H I-3-3 attacked DONG THUCC(1), meeting no resistance and completing search and destroy operation through the village at 031537H. One ChiCom grenade was captured, a booby trapped gate and 5 tunnels were destroyed, and five VCS were captured.
- (8) 031324H Co "L", 3d Bn, 3d Mar commenced landing in LZ ALBATROSS with the last elements of the Company arriving at 131615H.
- (9) 031512H Air strike conducted on NGOC KINH(2). Artillery prep fires were fired on LAP THUAN.

- (10) 031723H D-1-1 commenced attack on NGOC KINH(2), B-1-3 commenced attack on TAM HIEP.
- (11) 031930H D-1-1 completed attack on NGOC KINH(2) meeting no resistance. TAM HIEP hamlet secured by 3d Plt D-1-3. Bodies of 7 USMC KIA from B-1-3 action of 2 April were recovered and evacuated.
- (12) 032010H I-3-3 engaged undetermined number of VC in DONG PHUOC(1), receiving 3 rifle grenades, MG fire, and 81mm morter fire. Enemy fire was suppressed by intense small arms fire. I-3-3 sustained 10 WIA (evac) of whom 2 DOW, and 6 WIA (non-evac).
- (13) 031800-040700 All units conducted intensive ambush activities. Flare ship illuminated objective area continuously throughout the night. Sporadic sniper fire received by D-1-3 was the only contact from 032010H to 040700H.

#### 040700H - 050700H

- (1) 040710H Arc light mission conducted to NE of the objective area.
- (2) 040743H B-1-3 conducted search and destroy operation in NGOC KINH(1) and LAP THUAN (ZC 180537). D-1-3 conducted search and destroy in TAI SON (ZC 140558) and blocked along the north of the SONG VU GIA. L-3-3 conducted search and destroy along the south bank of the SONG CON. D-1-1 conducted search and destroy in NGOC KINH(2). Scattered contacts occurred between small groups of VC and USMC units. Numerous tunnels, cawes, and fortifications were destroyed and rice caches were located for evacuation. Air strikes were conducted on fortifications vicinity (ZC 109565) at 041315H. Artillery supported L-3-3 search and destroy operations along the south bank of the SONG CON, in the hamlets of HUONG PHUCC BAC(1), (2), and (3).
- (3) 041850H An air strike was conducted on HA NHA(3) to suppress enemy small arms fire, and an air strike on fortifications in DONG PHUOC(1) was conducted at 041935H.
- (4) 041507H 1st Plt, D-1-3 attempted to locate a truck air dropped by accident vicinity (ZC 205565). The patrol was unable to locate the truck prior to darkness and established a platoon base vicinity (ZC 210553). Contact with VC enroute resulted in 5 VC KIA. All units again conducted intensive ambush activities throughout the objective area during hours of darkness.
- (5) 050745H An artillery mission to support an attack by L-3-3 on HOANG PHUOC BAC(2) was fired.
- (6) 050810H B-1-3 commenced heli-lift from IZ southeast of TAM HIEF to vicinity 1/3 CF, completed the lift at 050820H, then moved to the west through I-3-3, and established their CF vicinity (ZC 096564).

- (7) 050822H 1st Plt D-1-3 reached truck accidentally dropped vicinity (ZC 205566). The truck had been stripped of its communications equipment and tires. The platoon detected approximately 15 VC moving to a cave north of their position and called in two air strikes on the cave resulting in a secondary explosion. The platoon remained at the truck awaiting decision on salvage attempt. D-1-7 continued search and destroy in NGOC KINH(2) commencing 050830H and LAP THUAN at 051200H.

  B-1-3 conducted search and destroy in THAN DAI(1) and (2), supported by air strike on enemy fortifications. L-3-3 conducted search and destroy in HOANG PHUOC BAC(1) and (2), with one platoon blocking for B-1-3 operations to the west from (ZC 115555). I-3-3 continued search and destroy operations in DONG PHUOC(2), destroying many tunnels, caves and bunkers.
- (8) 05233CH Two squads from D-1-1 in ambush positions were in contact with VC. One squad engaged a group of 5 VC approaching their position with small arms, and requested illumination. When illumination began another group of 30-40 VC were observed vicinity (ZC 186526). An artillery fire mission was called on this target with excellent target coverage. At the same time another squad in an ambush position nearby sighted 3 armed VC and opened fire on them. H&I missions were fired throughout the remainder of the night in the area where the large group of VC were engaged. All units continued ambush activities throughout the night with no other contacts reported.

#### 060700H - 070700H

- (1) 060705H 1st Plat D-1-3 instructed to destroy truck they had been guarding and return to their CP.
- (2) 060839H A physical search of the area where artillery was called on 30-40 VC by D-1-1 ambush at 052330H revealed blood soaked bandages, articles of uniform clothing, 1 wooden MG training device, documents and medical supplies.
- (3) 060715H A booby trap, believed to have been a 105mm shell rigged with trip wire, was detonated by a member of 2d Plat D-1-3 in TAI SON hamlet, vicinity (2C 143557) resulting in 1 USMC KIA and 1 WIA. One VCS fleeing the area was killed.
- (4) An air drop at the airfield overshot the target, landing in the market place of HA TAN, vicinity (ZC 149537), killing 1 VN civilian and injuring approximately 15.

operations to the east along the south bank of the SONG CON, supported by artillery and air strikes on fortified areas. L-3-3 conducted search and destroy operations to be west along the south tank of the SONG CON. D-1-1 conducted search and destroy operations in the PHUOC LAM/LAN THUAN complex. D-1-3 conducted search and destroy operations in TAI SON (ZC 140559) and in the high ground north of CHAN SAN (ZC 166555). I-3-3 conducted another search and destroy operation in DONG PHUOC(1). Enemy contacts were light; only sporadic sniper fire was encountered. All units established night defensive positions and conducted intensive ambush activities. At 061900H, 5 VC were engaged by D-1-1, and one VC WIA was exptured. At 062100, a squad ambush from I-3-3 engaged a small group of VC vicinity (ZC 167536), two bodies were discovered at daybreak. No weapons were recovered.

#### 070700H - 080700H

- (1) 070720H D-1-3 conducted search and destroy mission TINH DONG TAY/DUC DONG hamlets. I-3-3 blocked with one plat on the south bank of the SONG VU GIA (ZC 173542). D-1-1 conducted search and destroy in foothills south of LAP THUAN.
- (2) 070910H D-1-1 took 7 VC under mortar fire, killing 2 and capturing 2. Combat packs but no weapons were recovered. One prisoner had Geneva Convention Card belonging to member of B-1-3, killed 2 kpr, in his possession. Several VC harboring sites and a possible VC training camp were also discovered. I-3-3 conducted search and destroy operations in HUONG PHUOC BAC(1) and (2). B-1-3 conducted search and destroy operations in THANH DAI(1) and (2), and bagged rice for evacuation from a cache discovered at (ZC 099559). All units conducted night ambush activities with no enemy contact.

### 080700H - 090700H

[20 148548] and PHOUNG BAC(1). D-1-1 conducted search and destroy operations in TAM HIEP, receiving sporadic enemy sniper fire. D-1-3 conducted means and destroy operations in DUC TAY, vicinity (ZC 165546) and CHAN SON(2) vicinity (ZC 165552). L-3-3 conducted search and destroy operations in PHUOC LAM and DONG PHUOC(1), discovering a booby trapped 250 lb. bomb at (ZC 170531) at 081247H. Retraction of L-3-3 from the operation area began at 081512H; lift was completed 081512H. D-1-3 assumed responsibility for defense of HST and "W" Btry. B-1-3 engaged approximately 15 VC with small arms and mortar fire at (ZC 126564) with unknown results. All units conducted night ambush activities. At 082345 D-1-1 received 3 rifle grenades (ZC 190540). Two WIA were sustained. Small arms fire was directed at suspected source of enemy fire. At 090630 D-1-1 received sniper fire from 4-5 VC vicinity (ZC 190549). An artillery mission suppressed the enemy fire.

### 090700H - 100700H

D-1-1 conducted search and destroy operations in LAP THUAN and PHUOC LAM. D-1-3 conducted search and destroy operations in DUC TAY. B-1-3 conducted search and destroy operations in HOANG PHUOC BAC (2), foothills and draws vicinity (ZC 103550). I-3-3 conducted search and destroy operations vicinity (ZC 140520). A Btry(-), 1-11, and their ammo supply were extracted, completing their lift at 091140H. I-3-3 was extracted from area, commencing their lift at 091523H and completing it at 091610H. D-1-1, furnishing IZ security for I-3-3 lift, received 6 rounds 60mm mortar fire while occupying positions at (ZC 164537), sustaining 2 WIA. An artillery mission called on the supported source at (ZC 160527) suppressed the enemy mortar fire. All units conducted ambush activities from night positions without enemy contact.

### 100700H - 110700H

WM Btry commenced lift off at 100725. D-1-1 crossed the SONG VU GIA in small groups in native boats commencing at about 101030H, with D-1-3 furnishing cover. At 101034H, lift of 4.2 mortars was completed, with armo and personnel lifts continuing. At 101056H, D-1-1 was directed to move to vicinity of B-1-3 CP, (ZC 127549). One plat of D-1-1 remained at 1/3 CP as a reserve/security force. D-1-3 remained in position vicinity (ZC 155549), with one Plat providing HST and Howtar Btry security, and one squad on Hill 200 (ZC 156564). At 101200 the lift of the 4.2 Mortar Btry(-) was completed, HST lift continued using fixed wing and helicopters. At 101510H, extraction of B Company commenced, being completed at 101630H, followed by extraction of about 50% of H&S Company and Battalion Command Group. Ambush activity conducted throughout the night resulted in no enemy contact.

### 110700H - 121855H

At 110745H, lift to complete extraction of HST commenced. At 110850H an Army Caribou aircraft participating in this lift crashed on take-off into the SONG VU GIA (2C 160540). No casualties were caused by the crash. At 111045H, the squad from D-1-3 on Hill 200 was extracted. At 111130H extraction of the Howtar Btry commenced. At 111147H and at 111230H, air strikes were conducted in support of Special Forces vicinity (2C 167529). At 111300H, extraction of the Howtar Btry was completed, followed by extraction of D-1-1, D-1-3, and the remainder of H&S Company and the Battalion Command Group. At 111855H, all troops and material had been extracted from the area and Operation ORANGE was declared secured.

Communication capabilities during contacts was very good, but reporting of activities being engaged in by companies was at times incomplete and late, resulting in a lack of knowledge of events as they occurred by the Battalion Command group.

The average initial range of engagements on D-day and D+1 was approximately 50-75 meters. During the remainder of the operation engagements occured at 200-300 meters or more. B-1-3 remained in nearly continuous contact with the enemy on D+1 and D+2. Average length of enemy contacts experienced by other units during the operation was 5 to 15 minutes.

#### 11. RESULTS.

THE PLANE

a. Enemy losses during the operation were as follows: D-day 6 KIA; D+1 15 KIA, 13 WIA, 2 VCC; D+2 - 14 KIA; D+3 - 4 KIA, 5 WIA, D+4 10 KIA, 56 KIA (poss), 1 WIA; D+5 - 8 KIA, 25 KIA (poss), 3 WIA, 1 VCC; D+6 - 4 WIA, 3 VCC. Totals were 50 KIA (BC), 7 KBA (BC), 42 KIA(poss), 38 KBA(poss) 36 WIA, and 6 VCC.

(4) Secondary explosions observed during air strikes and artillery fire missions indicated the destruction of large quantities of enemy ordnance and explosives.

b. Friendly casualties during the operation were as follows: D-day 1 WIA (evac); D+1 - 15 KIA, 50 WIA (evac), 2 WIA (non-evac); D+2 - 2 KIA, 12 WIA (evac), 6 WIA (non-evac); D+3 - 6 WIA (evac); D+6 - 3 WIA (evac); D+7 - 3 WIA (evac); D+8 - 1 WIA (evac). Total assualties - 18 KIA, 79 WIA (evac), 12 WIA (non-evac); grand total 109. Losses also included one M-60 machine gum, one M-79 grande launcher, and seven M-14 rifles.

- c. Engineer units attached to the Battalion destroyed 301 tunnels, bunkers, and fighting holes, 30 barbed wire obstacles, 4 booby traps (ChiCom grenades), one 250 lb. bomb rigged as a mine; and 10 rounds of mixed type ordnance 3,425 lbs of C-4, 110 bangalore torpedoes, and 2 15 lb shaped charges were used.
- d. A total of 468,550 lbs of all classes of supplies were lifted into the operation area, with the unused stock being lifted back to FLSG/ASP-1 on D+10.

- 12. ADMINISTRATIVE MATTERS. Administrative plans were adequate and were adhered to as much as possible.
- Resupply from ASP/FLSG to the ISA was accomplished by helicopter. The additional two companies and two artillery batteries added to the operation increased resupply requirements tremendously. Helicopters could not provide sufficient lift capability to enable the ISA to be constantly maintained at a four day level as required by division administrative plan. It is felt that dump level requirements should have been re-evaluated in light of the extra artillery involved. The feasibility and advisability of utilizing low-level air drop should be further studied. It is felt that this situation lent itself to the use of such air drops which would have eased helicopter requirements considerably. Except for two unfortunate instances, the air drop of supplies to the Army Special Forces Camp worked out very well, and would have worked as well as and easily for the resupply of the LSA. Helicopters were the primary source of resupply to companies and batteries. M-274's were utilized for resupply of one company and artillery battery. Combat loads as prescribed in the Administrative Order were adequate. No problem areas in Class V.
- b. Maintenance was either repaired at the LSA or evacuated to FLSG. No problem areas.

# 1. Treatment of casualties, evacuation and hospitalization.

- (1) Reports received from participating companies indicates that casualty treatment was adequate and a minimum of time lapsed from the time of injury until initial treatment was instituted by attached medical personnel or the BAS.
- coperation, and had the tactical situation permitted, use of the Medical Emergency Evacuation Team would have been utilized. During this period of mass casualties, one HM was faced with twenty casualties within a matter of minutes. A delay in immediate treatment was understandable, though it was in fact quite minimal. All received adequate emergency treatment prior to evacuation.
  - (3) Casualty evacuation was accomplished as follows:
- (a) All serious, critical, and dead US military were evacuated by helicopter to "C" Co., 3d Med Bn and/or Station Hospital, NSA DA NANG.
- (b) Head injuries of a serious nature were evacuated via helicopter directly to Station Hospital, NSA, DA NANG.
- (c) Wounded ARVN troops were evacuated by helicopter to the ARVN Hospital, DA NANG.

- (d) Wounded indigenous persons were evacuated by helicopter to "C" Co, 3d Med Bn and/or Station Hospital, NSA, DA NANG.
- (e) Most minor wounds, heat casualties, and non-battle injuries were held in the Company area and evacuated to the BAS in the field when the tactical situation permitted.
  - Once the companies and the helicopter pilots were aware of the location of the BAS, a large number of the helicopters transporting MED EVACS set down at LZ ALBATROSS instead of arbitrarily going straight to "C" Med or NSA DA NANG. This facilitated maximum use of the BAS in these instances, and precluded many unnecessary MED EVAC runs.
- (4) Casualties received at the BAS were disposed of after treatment as follows:
- (a) Those requiring surgery, hospitalization, x-ray, etc., were evacuated by helicopter to "C" Med and/or NSA, DA NANG.
- (b) Those requiring minor surgery and additional treatment not requiring hospitalization at "C" Med or NSA, DA NANG were evacuated to the parent BAS on routine runs by helicopters.
- (c) Heat casualties and minor injuries not requiring additional treatment or hospitalization were treated at the BAS in the field and returned to duty.
- d. Utilized four M-274's to move gear around LSA and for resupply adequate.

### e. Communications.

ject operation was conducted along a conventional pattern as compared to that of Operation MALLARD. The overall communication situation could be described as being static in that the Battalion Command Post did not displace once established within the objective area. Rifle Companies were employed in general areas of responsibility which created a condition whereby wire could be employed for sufficient periods of time to become an effective means of communications. Radio was the primary means with wire as a supplement. The area of operations lended itself to complete coverage by FM radio communications.

### (2) Radio.

(a) The following radio nets were operated and maintained continuously throughout Operation ORANGE:

### CONFIDENTIAL

(1)	Regimental Command	SSB	Voice
(2)	Regimental TAC	FM	Voice
(3)	Battalion TAC	FM	Voice
(4)	Battalion TACP Local	FM	Voice
(5)	81mm Mortar COF	FM	Voice
(6)	Arty Battery COF	fm	Voice
(7)	Tactical Air Request	USB	Voice
(8)	Tactical Air Direction	UHF	Voice
(9)	Division Aerial Observer	FM	Voice
	Recon Platoon Command	FM	Voice
•	HST Logistics	SS <b>B</b>	Voice
•	Company TAC Nets (5)	FM	Voice

- (b) Difficulties were experienced in the selection of properly separated transmissions sites within the Battalion Command Post. Radio Set AN/PRC-25 overrode and cut out other AN/PRC-25's and FM Equipment, in general, employed in the same area. Maximum use of remote control equipment with FM Radio Equipment other than radio set AN/PRC-25 is mandatory.
- (c) The Battalion TACP local net became overcrowded as it was utilized for controlling all helicopters within the area as well as for requiply requests. During the planning phase of the subject operation it was felt that the TACP local net could be effectively utilized for the above purposes. This opinion was formed based on the experience of Operation MALLARD where the Air Idaison Officer coordinated and controlled all helicopter support and logistical support activities. The experience gained on the subject operation indicates a need for either an administrative net within the battalion or a separate frequency for the control of helicopters being utilized in a specific operation.
- (d) External radio nets utilizing HF equipment became weak and garbled at night between the hours of 1830 and 0600. Corrective action was taken with little success. It is felt that the use of CW would have provided a satisfactory solution to this difficulty.

CONFIDENTIAL

Straight All Mark

(e) Because of transmitting distances involved on external circuits a helilift of two radio set AN/MRC-83 and one AN/MRC-87 into the objective area was executed on D-day. This helilift was excellently accomplished with the use of helicopter CH-46, utilizing its external load capability.

### (3) Wire.

- (a) Wire was employed initially within the Battalion Command Post with long locals to HST and the District Headquarters. As the situation progressed, long locals were extended to Rifle Co's.
- (b) Limited wire tapping as well as shorting and grounding of wire lines was experienced. The results of these activities had a negligable effect on the overall effectiveness of wire communications.

### (4) Message Center and Cryptographic.

- (a) A message center was established for the purpose of processing external command and administrative traffic with higher echelons.
- (b) KAA-60, KAC-138, and KAC-140 were utilized effectively throughout the operation by participating units. The Battalion Message Center controlled the issue and turn in of all Cryptographic Material.

### (5) Maintenance and Supply.

- (a) In the initial stages of the operation difficulty was experienced in maintaining efficient HST communications. Supply requests were being submitted to Shore Party Battalion, and FLSG, however, material was staged at ASP-1. No radio station was established at ASP-1 on the HST logistic net. Land line communication was depended upon for coordination of resupply missions between ASP-1 and FLSG. It is left that a radio station at ASP-1 would have alleviated mush of the confusion which was experienced at this time.
- (b) Battalion communication maintenance was centrally controlled in the objective area throughout this operation. A second echelon shop was established for the purpose of accomplishing simple repairs, PRC-6 alignment and reaharging of battery BB-451, and controlling the evacuation of equipment to the third echelon shop. This system functioned very efficiently and positive control over the accountability of equipment was effected.

### f. Medical Evaluation.

(1) The Medical Officer or the Senior medical personnel attached should be the sole source and final authority as to safety and potability of drinking water in the field.

- (2) A large number of Marines did not have the required materials in their jungle kits. Quite a number had no kits at all. Emphasis should be stressed on immediate action to supply these kits. Company corpsman carry an initial issue of eighteen small battle dressings in their Unit One's. When a mass casualty situation presents its self (such as happened with Bravo Company) the corpsman relies on the use of the battle dressing that is supposed to be in each mans jungle kit.
- (3) A major problem was encountered in medical supply and resupply. Requistions submitted by the BAS in the field were subsequently filled - but the supplies were never received by the BAS. The materials were delivered to Shore Party - but the BAS was not made aware of this until several days later. A check with Shore Party revealed that they had in fact received the supplies, but they refused to turn them over to the BAS (they stated the supplies were to be used to resupply company corpsmen) - thus the BAS operated for several days with minimum supplies. During this period of time, it would have been impossible for the BAS to handle any great number of casualties. An emergency requisition was placed through GySgt DE FABIO, and was received at the BAS within hours. Had it not been for him, the mission and function of the BAS would have been greatly impaired. The senior medical personnel attached is the only man that can be considered qualified to order medical supplies in sufficient quantity. When supplies are ordered at the BAS level, they must be issued to the BAS - NOT to Shore Party or any other persons.
- (4) Disposition of patients at the BAS presented another major problem. At one time the BAS had eleven men fit for duty but could not get them back to their organization. Some suitable solution should be worked out whereby the BAS could be relieved of the responsibility of trying to get these men back to their companies. Also, patients that required additional treatment, but were not serious enough to evacuate to "C" Med, could not get transportation back to their parent BAS. In this instance, after several days waiting to get three men transported back to Hill 55 (BAS-3-3), we had to resort to sending the men to "C" Med in order to assure their continued and necessary treatment. This causes an overload on "C" Med and defeats one of the purposes of the BAS in the field.

### 13. SPECIAL EQUIPMENT AND TECHNIQUES.

- a. Scout dogs were used in conjunction with search and destroy operations, without notable success. It is felt that the dogs performance was adversely affected by extreme heat and large amounts of powder and WP residue in the area.
- b. The 3d Marines Sniper Squad, employed for the first time in search and destroy operations, conclusively proved by an excellent performance their worth and effectiveness in engaging enemy forces at ranges beyond the average capability of infantrymen armed with the M-14.
- c. Smoke and CS were used to good effect in search and destroy operations against tunnels, caves and bunkers.

#### 14. COMMANDER'S ANALYSIS.

The area of operations for ORANGE was such that the confluence of the SONG VU GIA and its tributary, the SONG CON, effectively divided the area into three distinct and separate sectors — two to the north of the VU GIA and one to its south. Because of the location of the air field and the projected Special Forces Camp, control of and therefore operations in each of the sectors was required. Each sector in itself by virtue of its area alone required the presence of at least one rifle company.

Because of the requirement to rapidly open and sweep the airfield, and because the airfield was located to the north of the VU GIA, it was decided that the initial days assault would be conducted there. On D-day two companies landed in and secured that portion of the two northern sectors adjacent to the airfield and the airfield itself. At the same time one company was retained as reserve should the requirement exist.

On D+1, events having progressed as anticipated on D-day, the third, or reserve company, in conjunction with a blocking plateon taken from north of the VU GIA, landed to sweep the sector south of the river. At this point all the available forces of the battalion were employed - there was no reserve immediately available.

As events turned out the forces south of VU GIA met the only organized enemy forces of any strength encountered during the operation. Enemy strength incidentally was considerably larger than had been anticipated, based on available intelligence. The friendly force employed was insufficient to rapidly overcome the enemy resistance and there was no reserve force or sufficient other forces immediately available to block enemy escape from the area.

The following chart aids in understanding the sequence of events:

Date/Time	Event
010700	L-hour, north of VU GIA, D-1-3 and D-1-1 landed.
020700	L-hour, south of VU GIA, B-1-3 landed in north of sector. 1st Plat D-1-1 crossed river in south of sector.
021430	D(-) 1-1 heli-lifted to south of VU GIA, joined their first platoon.
021500	3d Plat D-1-3, heli-lifted south of VU GIA to reinf B-1-3.
021730	I-3-3 joined operation. Lended at airfield, north of VU GIA.
1 03 1030	I-3-3 helicoptered south of WU GIA.
031430	I-3-3 joined operation. Remained north of VU GIA.

As can be seen from the table above, additional forces were moved south of the VU GIA as they became available. They were used in attempt to seal off the area and block enemy escape to the south. Their arrival however was too late to prevent the escape of many of the surviving VC.

In retrospect, expecially from what we now know of the enemy strength and disposition in the area, there were two better solutions to the initial plan of attack.

- (1) Using the three originally available companies, first attack and elemanate the enemy force south of the VU GIA. When this had been accomplished leave one company to hold it and move the remaining two companies to secure the area north of the VU GIA.
- (2) To have commenced the operation with all of the five companies eventually employed, and to have generally followed the original plan with the exception that three companies would have assaulted south of the VU GIA vice the one company and one platoon actually employed.

### 15. RECOMMENDATIONS.

a. That the plan for retraction of a unit by helicopter must include the following known factors: number, capacity and exact ETA of helicopters, and location of HLZ. Any subsequent deviation from this plan will result in bunching of troops in the HLZ or failure to load troops rapidly, both of which increase the hazards of the operation.

CONFIDENTLL

- b. That additional copies of the operation order be made available for issue to units that might join in an operation subsequent to its initiation.
- That in isolated operations, such as this one was, supporting artillery be attached. Although supporting artillery was nominally in direct support during Operation ORANGE, in effect, they may as well have been attached because their logistical support was provided by the HST attached to this battalion.
- d. That a battalion administrative net is essential on an operation of this magnitude.
- That photographic reproductions of the 1:50,000 scale military map of the objective area be used for issue to small unit leaders for whom regular maps are not available.
- f. That AO's be used to the maximum. They proved invaluable for adjusting air and artillery strikes, locating enemy forces and fortifications, and helping to maintain communications with friendly forces dispersed over a wide area.
- g. That whenever possible, battalions conducting offensive operations be relieved completely of responsibility for their assigned TAOR. This would eliminate the present requirement to split the battalion staff, while overburdening it in both areas. It would also enable the battalion to operate with organic, familiar companies rather than with unfamiliar companies from a different battalion.
- h. That the lack of remote capability for the PRC-25 be resolved as soon as possible. Though the PRC-25 has improved the effectiveness of communications, the need to separate PRC-25's from each other because of mutual interference presents a problem at the Battalion CP level when various agencies must work in proximity to each other. On Operation ORANGE, where the Battalion Tac Net was located 100 meters from the Regimental Tac Net to ensure non-interference, land line connected the Reg't Tac Operator with the Operations Center and runners were used to carry messages from one point to the other.
- i. That the use of snipers in search and destroy operations be continued. They are effective against both entrenched and moving VC at greater distances than is the average rifleman.
- j. That the installation of a water point is unnecessary in an area where sufficient local water sources are available. Halizone and iodine tablets adequately solve the water supply problem and reduce the UNCLASSIFIED logistical problem generated by water can resupply.

**3120** 18 April 1966

Record of Events, Company "B" Major Engagement of 2-3 April 1966

O20720H - Landed at (ZC 203553). B-1, 2, and 3. Approximately 020705 B-3 proceeded to NGOC KINH(1) engaging the enemy at 0730 and killing 1 VC while wounding three others. Two USMCwere WIA. B-1 proceeded to the east of NGOC KINH(1) as the reserve platoon. The CP group proceeded in the same direction suffering one WIA from sniper group proceeded in the same direction suffering one WIA from sniper fire at 0745. Women and children were held at the east end of NGOC KINH(1) and were released at 0900. Boats and houses were searched yielding various documents and medicines which were processed and sent by helicopter to Battalion with three USMC WIA.

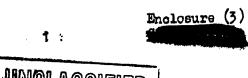

020705H - B-2 departed the IZ and proceeded through TAM HIEP towards NGOC KINH(2). Search and destroy operations were conducted in TAM HIEP with no enemy encountered. B-2 Actual proceeded across 500 meters of open rice paddies to reconnoiter the near edge of NGOC KINH(2) with one squad. When 30-50 meters from the hamlet the squad received heavy automatic weapons fire from VC entrenched behind the wood line with barbed wire and bamboo fence obstacles in front of the position. The two squads waiting in TAM HIEP attempted to envelop NGOC KINH(2) from the opposite flank but sustained heavy casualties from effective sniper fire and heavy automatic weapons fire.

At 0902 B-2 requested assistance. B-3 was directed to proceed immediately to support B-2. B-3 encountered sniper fire and a water obstacle at coordinates (ZC 194545) halting their advance and delaying any assistance for B-2. Hamlets were not prepped initially because of the policy not to prep a hamlet unless hostile fire had been received from it. In both cases, friendly elements were in proximity to enemy positions and artillery fire could not be brought to bear because their '1' exect locations could not be observed from the ground.

020945H - An air strike was requested on NGOC KINH(2) to posmit B-2 to move dead and wounded back and permit employment of supporting arms on NGOC KINH(2). B-2 marked front lines with air panels and the AO delivered smoke rockets as a further identification to strike air oraft.

020945 - B-1 and CP group continued moving southwest of NGOC KINH(1) toward LAP THUAN through rice fields and received sporadic sniper fire.

O21100H - The airstrike delivered on NGOC KINH(2), particularly 20mm strafing runs, stopped enemy fire long enough for B-2 to move its dead and wounded towards TAM HIEP.

Each time the aircraft approached the target, the men of B-2 would move towards TAM HIEP carrying their wounded with them. During and after the air strike this system continued until early evening when all the wounded were moved to TAM HIEP. B-2 recovered two bodies the night of 2 April 1966 and returned with them to TAM HIEP, one squad from D-1-3 assisted.

O21105H - B-2 and Bravo CP group came on line south of B-3. B-3 continued from the western section of NGOC KING(1) towards LAF THUAN. Bravo CP group moved to the high ground at coordinates (ZC 193535) to observe and control.

O21135H - At coordinates (ZC 193543) B-3 came under heavy automatic and small arms fire. B-1 was directed to move to the vicinity of B-3 to assist. B-3 continued to advance by fire and maneuver to coordinates (ZC 190541) with B-3-B moving towards the hedgerow at coordinates (ZC 190538). B-3 as a whole came under a heavy mortar attack as well as the automatic fire. Heavy casualties were inflicted forcing them to withdraw to the east and B-3-B to the month. B-1 provided a base of fire. 4.2's, 81's and 105's were used to quiet the fire coming from in and around LAP THUAN. A defense was set in by B-3 and B-1 at the western end of NGOC KINH(1). Sniper fire and mortars were received until darkness on the CP, B-1 and B-3's positions from LAP THUAN.

Walking wounded and litter cases from B-1 and B-3 were moved to coordinates (ZC 193537) for medical evacuation. The KIA's were not recovered until after darkness due to automatic weapons fire being centered on the locations of the bodies. Two VCS were captured by B-3 during the afternoon engagement 021530H.

Helicopters arrived and evacuated the wounded from coordinates (ZC 193537). Helicopters were drawing a large volume of fire from LAP THUAN. One helicopter was unable to become airborne and was abandoned by the crew.

The remaining men from B-3 returned to the CP and were utilized for the perimeter defense. Very little enemy activity appeared in the evening of 2 April and the morning of 3 April 1966.

O22130H - B-1 moved by the cover of darkness to the CP, carrying the dead and wounded both from their platoon as well as B-3. B-1 was set in on the western flank of B Company. Snipers assigned from 3d Marines were found to be very effective.

030355H - Downed helicopter was destroyed by fire and numerous explosions (cause unknown), 2 men wounded and one man killed. Burns were severe on the wounded. Due to intense flames no one was able to get near the helicopter.

Enclosure (3)

030630H - Body was recovered from the helicopter.

050900H - All remaining wounded and KIA's were evacuated by helicopter.

031100H - 6 men from B-2 and a squad from D-1-3 returned to NGOC KINH(2) to recover bodies. They encountered heavy fire and withdrew to TAM HIEP.

moved east 600 meters and set in a defense. Illumination was provided throughout the night. CP was located (ZC 196537), front lines were (ZC 193537) to (ZC 196537) and (ZC 199536) to (ZC 204538).

031930H - D-1-1 while conducting a search and destroy mission recovered the remaining 7 bodies from NGOC KINH(2).

Enclosure (3)
