PART II
NARRATIVE SUMMARY

During the month of March, new construction or modification of in-progress construction continued to be dominant projects. Command briefings continued on a frequent basis, as indicated in Parts III and IV.

On 15 March 1967, the Regiment underwent a change of command, with Colonel K. H. SHELLY relieving Colonel S. D. LOW as Commanding Officer.

Staff sections and subordinate units are maintaining effective performance under an extremely heavy, and ever-increasing workload. The 3d Force Service Regiment is fulfilling its mission to provide sustained logistical support to all FMF WestPac Forces from Okinawa, while conducting comprehensive internal training programs.

ENCLOSURE (1)

DECLASSIFIED

DECLASSIFIED

PART III
SEQUENTIAL LISTING OF EVENTS

a. Training and Counselling

1-31 Mar 1967:	The following training was conducted within the Data Processing Platoon: eighteen men were trained in SPS programming language, RPG programming language, COBOL programming language and system 360 computer operation; on-the-job machine operators training for six Marines.
1-31 Mar 1967:	Regimental Chaplain conducted 55 counselling sessions for Marines.
1-31 Mar 1967:	Medical personnel of the Regimental Dispensary had training consisting of three lectures on sanitation; three lectures on First Aid; two on Health Records; two on Pharmacy; one lecture on laboratory and X-Ray. The Veneral Disease lecture program has been intensified over the last month's period.
1-31 Mar 1967:	On-the-job training was provided to four Chinese Nationalist Marine Officers under the Military Assistance Program.
1-31 Mar 1967:	19 personnel attended Organic Supply Training/MUMMS, and two personnel attended Projectionist School at Camp Hansen.
2 Mar 1967:	Limited Technical Inspection of Headquarters and Service Battalion Motor Transport conducted with satisfactory results.
3. Mar 1967:	20 personnel completed the Regimental Commercial Forklift School.
3 Mar 1967:	15 personnel completed Regimental Quarter Ton Drivers School.
	24 personnel from III MAF completed the Basic Infantry Weapons Repair Course.
	71 personnel qualified on the Rifle Range.
17 Mar 1967:	16 personnel completed the Regimental Rough Terrain Forklift School.
	92 personnel qualified on the Rifle Range.
18 Mar 1967:	5 personnel from this Command graduated from NCO Leadership School.

ENCLOSURE (1)

DECLASSIFIED

DECLASSIFIED

24 Mar 1967: 19 personnel completed the Regimental Commercial Fork-lift School.

23 personnel completed the 2½ to 5 Ton Drivers School.

17 personnel from III MAF completed the Basic Ammunition Technician Course.

14 personnel from III MAF completed the Basic Infantry Weapons Repair Course.

31 Mar 1967: 18 personnel completed the Regimental Commercial Fork-lift School.

17 personnel completed the Regimental Quarter Ton Drivers School.

64 personnel qualified on the Rifle Range.

b. Command Relations and Visits.

6 Mar 1967: A tour was conducted for Major General TYLER and party.

12 Mar 1967: A Command briefing was conducted for Lieutenant General V. H. KRULAK, USMC, Commanding General, Fleet Marine Force, Pacific.

15 Mar 1967: A tour was conducted for Major General BOUKER and Major General HOCKMUTH.

31 Mar 1967: A tour was conducted for Major General CUSHMAN and Party.

c. Equipment, Maintenance and Construction

1-31 Mar 1967: Various excess IBM machines were shipped as directed by higher authority.

1-31 Mar 1967: Two card punch machines and two verifier machines in excess were shipped to DPP 28, 1st MAW.

3 Mar 1967: A request was made to Commanding Officer, Camp Butler that a special project be submitted for the interconnecting structure within Warehouses 1101, 1102. This is in support of the Automated Materials Handling System (AMHS).

16 Mar 1967: Messrs. J. L. PORTMAN, R. K. GREGORY, J. M. STUMP and W. M. ROGERS, IBM Federal Services Division arrived with Capt. B. TURBEVILLE HQMC Systems Analyst Officer to test and debug approximately 50 programs dealing with the conversion of the supply system to MILSTRIP.

ENCLOSURE (1)

DECLASSIFIED

DECLASSIFIED

17 Mar 1967: A request was made to Commanding Officer, Camp Butler that the urgent minor construction project, modification of maintenance shops, Camp Hansen, be modified to place the project costs within funding limits of CMC.

28 Mar 1967: A letter was submitted to Commanding Officer, Camp Butler recommending five MCON type projects for accomplishment by the incoming Naval Mobile Construction Battalion.

d. Logistics

1-31 Mar 1967: Motor Transport utilization for the period was as follows:

(1) 3dFSR	286,001	Miles
(a) H&SBn	112,784	Miles
(b) MaintBn	81,214	Miles
(c) SupplyBn	92,003	Miles

Motor Transport units continued the daily commitment to KADENA Air Freight, provided neccessary internal and external support, and supported the following:

1Mar67	Unloaded	1 LST	Naha Port
14Mar67	Unloaded	1 LST	Naha Port
21Mar67	Unloaded	1 LST	Naha Port
22Mar67	Unloaded	1 LST	Naha Port
28Mar67	Loaded	1 LST	Naha Port
29Mar67	Loaded	1 CIV Cargo Ship	Naha Port

1-31 Mar 1967: Approximately 1200 pounds of Ecclesiastical material was received during the period for distribution to Chaplains in RVN; approximately 1000 pounds was shipped to RVN.

12 Mar 1967: WO MALONEY was TAD to RVN in connection with supply support problem areas. Topics of discussion were body armor, FM family of radios, and LAW Rockets.

13 Mar 1967: MSgt Corbin attended a conference at FMFPac(Fwd) on coordination responsibilities for staging and loading resupply cargo.

27 Mar 1967: Lt. DIXON, FLSS was TAD to PWC, Yokosuka, Japan in connection with FMFPac Repair/Rebuild Program.

ENCLOSURE (1)

DECLASSIFIED

DECLASSIFIED

e. Budget and Finance

1-31 Mar 1967: Personnel of the WestPac Fiscal Office visited RVN Naval Support Activity, DaNang on Fiscal Matters.

1-31 Mar 1967: During this reporting period, the following funds were accounted for:

PMC	$ 600,000.00

SEQUENTIAL LISTING OF SIGNIFICANT EVENTS

I. FMF ORGANIZATIONS NOT COMMITTED TO COMBAT

a. Personnel - There will be a critical shortage in MOS 1341 within the next 45 days. There is presently a shortage of 44 1345s.

b. Administration - Revised recommended Provisional Table of Organization has been returned from Headquarters, 3d Force Service Regiment for review prior to submission.

c. Intelligence - negative

d. Training

1. Technical training conducted by companies and sections weekly.

2. General Military Subjects Training conducted by Battalion S-3 weekly.

3. Officer and Staff Noncommissioned Officer Leadership Training conducted on 1 March 1967, 1400 - 1630. The program consisted of:

(a) Briefing on current operations of the Battalion by the Battalion Commander.

(b) "LISTENING WITH THE THIRD EAR" by Dr. DARROUGH, 3d FSR psychiatrist.

(c) "INVESTIGATION PROCEDURES, DEFENSE AND PROSECUTION" by Capt STOCK, Camp Butler Legal Officer.

4. Schools Training

(a) Regimental Drivers School

¼ Ton - 14 graduates
5 Ton - 7 graduates

(1) A safe-driving class was conducted on 6, 7 and 8 March for all Licensed Military Vehicle Operators in the Battalion.

(b) Regimental Forklift School

Rough Terrain - 8 graduates
Commercial - 7 graduates

(c) Camp Butler NCO Leadership School - Two graduates

DECLASSIFIED

DECLASSIFIED

(d) Camp Butler Projectionist School - One graduate

(e) Regimental Ordnance School, Basic Infantry Weapons Repair Course

One graduate

5. Education

(a) Marine Corps Institute

Personnel enrolled - 161

(b) United States Armed Forces Institute

Personnel enrolled - 12

(c) University of Maryland - Far East Division

Personnel enrolled - 8

(d) United States Armed Forces General Education Development Test

Completed - 1

(e) Army Extension Courses

Personnel enrolled - 18

(f) Other off-duty education

Personnel enrolled - 9

e. Special Operations - none

f. Command Relations - Negative

g. Equipment

1. Submitted to CMC the phased replacement requirements for Rough Terrain Forklifts for the next 24 months.

2. Invoiced to units in-country five 3000 lb. Rough Terrain Forklifts.

3. Contracted for and obtained the rental of two 6000 lb. and five 4000 lb. Commercial Forklifts. The contract was made for 3 months with option for renewal.

h. Logistics

1. Conducted Fire Inspections of areas assigned this Battalion.

DECLASSIFIED

DECLASSIFIED

2. Processed 41 requests for laundry and dry cleaning of organic property for all on-island units.

3. Received 31 pieces of personnel effects from Baggage Facility for Marines stationed in 3d Force Service Regiment.

4. Submitted initial report of change of assets to Headquarters, 3d Force Service Regiment.

5. Provided tactical vehicles/drivers and certain other items of equipment to Camp Butler Rifle Range Detachment, and the Counter Guerrilla Warfare School.

i. Community relations.

1. Continued support of TOBARU School in Miyogi on Takabanare-shima Island.

j. Communications

1. Radio Section

(a) Performed weekly preventive maintenance on radio equipment and vehicles.

2. Wire Section

(a) Preventive maintenance on equipment accomplished weekly.

3. Message Center

(a) Total messages, incoming and outgoing - 25,022

(b) Total AUTODIN messages, incoming and outgoing - 1,210

(c) Total AUTODIN cards, incoming and outgoing - 201,270

k. Activations/Deactivations/Redesignations -none

NARRATIVE SUMMARY

During the period 1-31 March 1967, Truck Company continued the daily commitment to Kadena Air Freight while accomplishing the following:

a.	1 March 1967 unloaded	1LST	Naha Port
b.	14 March 1967unloaded	1LST	Naha Port
c.	21 March 1967unloaded	1LST	Naha Port
d.	22 March 1967unloaded	1LST	Naha Port
e.	28 March 1967loaded	1LST	Naha Port
f.	29 March 1967loaded	1Civilian Cargo Ship	Naha Port

Truck Company has 75 personnel enrolled in MCI, 8 enrolled in USAFI, 9 enrolled in off-duty education; 66 personnel in Truck Company presently have savings bond allotments. The utilization for the period was:

a. 10,258 man hours
b. 26,810 short tons
c. 4,297 passengers
d. 6,852.1 gallons POL delivered
e. 50,945 miles driven

ENCLOSURE (1)

DECLASSIFIED

DECLASSIFIED

Truck Company drivers were involved in two minor traffic accidents during the period, but the chargeable accident rate for the period was zero.

SEQUENTIAL LISTING OF EVENTS

1. Truck Company is presently under authorized provisional T/O by four (4) enlisted and two (2) lieutenants 3502 to fill the billets of Executive Officer and Operations Officer. With the loss of personnel due to rotation in April a critical shortage is anticipated in Mechanics MOS 3516.

2. The assimilation of the Motor Transport Platoon of Headquarters and Service Company will be effected 1 April 1967 to consolidate all Headquarters and Service Battalion Motor Transport in one organization.

3. There are presently four (4) seventeen year olds assigned to Truck Company and a total of thirty-one (31) Marines with MOS's not rated by T/O.

4. The overall rating of the Limited Technical Inspection of Headquarters and Service Battalion Motor Transport was: Satisfactory with discrepancies. All discrepancies have been corrected.

5. A Truck Company driver was selected as 3d Force Service Regiment Driver of the Month for March 1967, the 2½ ton and above catagory, for the third consecutive month.

6. Truck Company deadline rate down to 10% as of 31 March 1967.

NARRATIVE SUMMARY

Sub Unit #1 and EOD Team carried out routine operations during the period. In addition to Dud calls, escorts and range commitments the Team inerted different types of ordnance and fuses for technical training and to be used for training aids. (EOD has three 2311 enlisted men assigned for familiarization in the EOD field. They participate in all phases of training and work, in an observer capacity, except those functions that are classified)

Ammunition Platoon handled a total of 6056 S/T of ammunition during the month of March. There were six ships "Offloaded" and two ships "Outloaded" at Tengan and White Beach Piers. Most of the Milstrip referral packages were handled twice (set up and out load). The night restorage has been stopped temporarily and used for set up of Milstrip referrals. Restorage has continued during the day light hours in compliance with OP #5.

On 28 March 1967 Colonel SHELLY toured Ammunition Company. He inspected and was briefed on each section of the Company.

Narrative Summary

The Command was visited by Major General TYLER, Quartermaster General, USMC, on 6 March 1967, Colonel KYUNG and Lieutenant Colonel CHUNG of the Republic of Korean Marine Corps on 8 March 1967, Lieutenant General V. H. KRULAK, Commanding General Fleet Marine Force, Pacific on 11 March 1967, Major General B.A. HOCKMUTH, Commanding General 3d Marine Division on 17 March 1967, Brigadier General M.P. RYAN, Assistant Division Commander, 3d Marine Division on 20 March 1967, Captain YOUNG, Chinese Marine Corps and Lieutenant Colonel CHUNG, Vietnam Marine Corps on 23 March 1967, Major General J. G. BOUKER, Commanding General Fleet Marine Force, Pacific (FWD) on 30 March 1967, Major General R.E. CUSHMAN Jr., DC III MAF, Major General J.G. BOUKER, FMFPAC (FWD) and Brigadier General R.G. OWENS Jr. Chief of Staff III MAF on 31 March 1967.

Maintenance Operations for the month of March commenced with 4382 work requests on hand. 6867 work requests were received during the month and 6789 work requests were completed. Five M-36, eight M-37 and two M-43 vehicles were rebuilt during the reporting period. The Battalion is currently working a six-day work week and a seven-day work week as required to accommodate the rotating BLT's. There were 2013 man-hours spent on contact and technical inspections teams during this reporting period.

A shortage of personnel in seven MOS's has increased individual workload in the 01, 21, 28, 35, and 59 occupational fields.

Organic motor transport logged 81,214 miles during the period of this report.

Engineer Maintenance Company has maintained 100% participation in the Savings Bond Program.

PART II

NARRATIVE SUMMARY

1. There was a significant change of officers assigned to Battalion Staff Billets due to the rotation of officers to CONUS and reassignment to RVN. The Commanding Officer of this company also changed.

2. The influx of Motor Transport Drivers, MOS 3531, has done much to relieve the anticipated shortage in this field. However, this input of qualified drivers must continue due to the rotation of drivers to CONUS.

3. The overseas combined federal campaign reached 100% participation this month. It should be pointed out though that with the turnover of personnel, this campaign will have to be a continuing effort to maintain this 100%.

4. All enlisted personnel attended a class on "Individual Responsibilities".

FSR Marines Help Hama-Higa Island

THE LANDING ZONE

"Operation Friendship," would be a good name to call the project Marines of 3rd FSR have undertaken on the island of Hama-Higa.

The over-all project for the Island is the of the rebuilding of the housing area and imporvement of living conditions. The island, located three miles off the coast of Yakena, is visited on week-ends by Marines donating their time to the project.

Once on the island, the group of Marines break down into small working parties. Some of the men may work as carpenters, while others might be masons, fishermen or gardeners. The project was designed so that the Marines and islanders could inter-change ideas and knowledge.

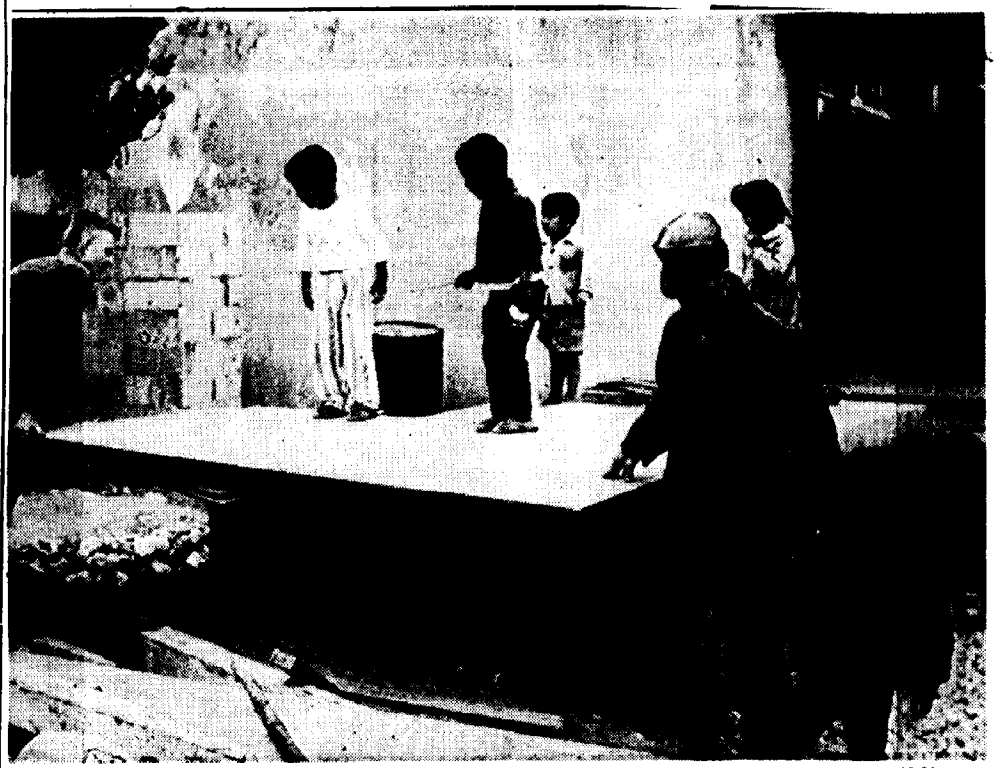
Since the project was started the biggest improvement was the installing of electricity. The mem of the island and the Marines joined together in the installation of a generator, and the stringing of wire throughout the island. The people now enjoy two hours of electrical power each night.

At the present time the work efforts have been slanted towards the building of houses. A series of two room houses are planned for the needy. Once the house is completed the mayor of the community decides who is in the most need.

One service that is especially welcomed by the people of the island is medical aid. Each week-end a corpsman travels with the Marines to the island to give medical aid. Children make up most of the patients with minor bruises and cuts. The corpsman spends the rest of his time giving physicals to the aged, and administering minor fiirst aid.

It isn't all work for the Marines. Sunday is spent playing with the children and visiting with the people. The week-end trips to the island not only benefits the people of the island but also the Marines. It gives them a chance to learn by working with the Islanders.

"Operation Friendship, is working out to be a benefit to both the Marines of 3rd Force Service Regiment, and the people of the island of Hama-Higa.



es of 3rd FSR and children of the island of Hama-Higa work together in the building house. The Marines travel to the island on week-ends on a people-to-people progaam.

PART II

NARRATIVE SUMMARY

On 31 March 1967, Second Lieutenant Guy F. ROWE assumed command as Commanding Officer relieving Captain John M. GREEN, JR. Captain GREEN was transferred to the 3d Marine Air Wing, Marine Corps Air Station, El Toro. During the reporting period this company's average personnel strength was ten Officers and 117 enlisted. Three Officers and six enlisted were joined and two Officers and ten enlisted were transferred. Twenty personnel were TAD, three of which were TAD in connection with emergency leave. Throughout this period the company has been auditing service records. Seventeen personnel received promotions in rank. During this period 93 personnel completed the Physical Readiness Test. Personnel and Barracks Inspections were conducted by the Commanding Officer. A total of 19 hours was spent on General Military Subjects at various dates during this period. Seven men fired for requalification on 31 March 1967, at Camp Hansen. One man successfully completed Regimental Drivers School on 31 March 1967. There are sixty-three personnel of this command enrolled in off-duty education. Four men satisfactorily completed courses in MCI and the University of Maryland. The Motor Transport Section logged over 8,600miles while one major accident occurred on 14 March 1967. Nine Ryukyuan personnel and three U.S. contract employees are working with this command. In connection with the People-to-People Program, we have volunteers assisting the people on the island of Hama-Higa in various community projects. During this period the Electronics Maintenance Shop was visited by Lieutenant General KRULAK, Brigadier General RYAN, Major General TAYLOR, Major General HOCKMUTH, two officers of the Republic of Korea, one from the Chinese Marine Corps and one from the Vietnam Marine Corps.

b. Administration.

(1) During this reporting period this Command has been conducting an audit of service records. Particular emphasis has been placed on checking of Identification Cards, Identification Tags, Immunization certificates, Social Security Cards and Government Drivers Permits.

(2) This Command is credited with having a total of 91 personnel with Bond Allotments in effect for this period.

(3) The following promotions were effected this period: one man to GySgt, one man to SSgt, 14 men to Sgt and one man to Cpl (see attached roster).

(4) There is a shortage of personnel in MOS's 2841, 5931 and 2811.

(5) During this period all personnel of this Command were required to have a chest X-ray completed.

c. Training

(1) Training for this period was completed as follows:

(a) 1-4 March 1967
(1) Personnel Inspection & Drill

(b) 6-11 March 1967
(1) 61 men participated in the Quarterly Physical Readiness Test.

(c) 13-18 March 1967
(1) Instruction in General Military Subjects (8 hours).
(2) Barracks Inspection by Commanding Officer
(3) One hour class on NBC Warfare

DECLASSIFIED

DECLASSIFIED

(d) 20-25 March 1967
(1) A one hour class was held on the following: Individual Responsibility, Career Advisory, Staff NCO Leadership and NCO Leadership.
(2) Instruction in General Military Subjects (4 hours).
(3) Commanding Officer, MCAF, Futema inspected Bks 419

(e) 27-31 March 1967
(1) Barracks Inspection and Drill
(2) 32 men participated in the Quarterly Physical Readiness Test.
(3) Instructions in General Military Subjects (6 hours).

(2) One man attended Regimental Drivers School from 27 March to 31 March 1967.

(3) The following number of men fired the M-14 rifle for qualification at Camp Hansen on the dates indicated.

PART II

NARRATIVE SUMMARY

1. During the month of March 1967, Second Lieutenant R. E. SHEA and seven enlisted Marines went TAD to RVN for the period 9-16 Mar 1967, in connection with an LTI. The Company dropped sixteen enlisted men due to rotation to CONUS and reassigned eleven men to RVN. The Company joined thirty-seven men from CONUS during the month. GySgt John R. KOONTZ, reenlisted for four years. Sgt Charles G. COOK, Sgt H. M. MARTIN each reenlisted for six years and were also promoted to their present rank. Sixteen men fired the M-14 Rifle for requalification at Camp Hansen, Okinawa during the month. Thirty-two men were enrolled in MCI Courses.

2. During the month, 1377 work orders were received, 1780 completed, and 1256 work requests were awaiting parts.

ITEM COMMODITY SPECIALIST UNIT OF FLSS

BACKGROUND

CG, FMFPAC has directed the assignment of commodity specialists in the fields of comm/elect, engineer, motor transport and ordnance to act as commodity managers, operating as part of the Force Logistic Support Section. These commodity specialists shall perform assigned tasks. Upon completion of a 90 day time period a report will be rendered to FMFPAC with a review and analysis of results experienced together with comments and recommendations regarding the retention of these billets on a permanent basis.

DISCUSSION

The mission of the commodity specialists unit and the specific tasks which they will perform are shown below.

MISSION

The Commodity Specialist Unit of FLSS shall have the objective of general technical assistance to supply, maintenance and support functions of 3d FSR. This unit shall: assist in identifying material, monitor quality control, monitor exceptional items and coordinate special programs; by performance of specific assigned tasks.

TASKS

1. Maintenance

a. Quality control monitoring of repaired material transferred into ERC-11 and stored in Rolling Stock.

b. Assist in preventing work stoppages through locating and obtaining needed repair parts or through substitution.

c. Liaison between supply and maintenance functions.

d. Notification to maintenance facilities concerning problem type items which require command attention.

Tab 1

DECLASSIFIED

DECLASSIFIED

2. Supply

a. Monitor assets for substitution of items such as next higher assembly etc., which are not cataloged as substitute.

b. Monitor initial issue program of new items of equipment.

c. Identification of material in rewarehousing program.

d. In-stock surveilance to insure completeness and serviceability of assets.

e, Monitor packing, crating and preservation of items to insure correctness of item identification.

f. Identification and condition coding of retrograde material.

g. Monitor of issues of items with SHC which requires modification/maintenance check prior to issue.

3. Support

a. Effect liaison among support sections and maintenance and supply functions to expedite the return of organic deadlined equipment to service.

RECOMMENDATIONS

a. That CG, FMFPAC approve the mission statement as presented above.

b. That CG, FMFPAC approve the tasks as shown above.

c. That CO, 3d FSR submit a report to CG, FMFPAC not later than 30 June 1967 covering the performance of the commodity specialist unit for the period from the present through 15 June 1967.

BRIEFING ITEM: Progress in Systems Conversion

BACKGROUND The 360 System arrived in Okinawa and installation was completed in December 1966. The delay in the scheduled implementation of the Milstrip Programs resulted in the decision to operate the 360 in 1401 compatibility Mode.

DISCUSSION: Work and training started in January for the conversion. There was also another decision made to use the compatibility Operating System in lieu of the hardware. Testing was accomplished on a limited basis with satisfactory results. It was determined at this time to convert our Balance File, Obligation File and Locator File. A team went to Japan and successfully converted the files. The normal inventory updating process continued on the 1401-B6 and all input transactions were held for updating the converted files on the 360 until return of the team from Japan.

In a detail check of all output from the first live inventory update it was discovered that Balance Records were being clobbered and output transactions duplicated and lost.

Additional IBM System Engineers were called for and arrived to assist in solving this problem. It was thought these problems were overcome and a team departed for Da Nang to assist during FLC's conversion.

This command requested to remain on the 1401-B6 computer to afford

Tab 2

DECLASSIFIED

DECLASSIFIED

maximum debugging time for the Milstrip and Fiscal Programs.

The Federal Service Division programmers will be on Okinawa on or about 15 March 1967 for a period of about 30 days to assist in implementation of the Milstrip Programs.

RECOMMENDATIONS: To insure success of the Milstrip Programs it has been requested that the period of time the Federal Service Division programmers remain in WestPac be extended to include at least one months processing cycle after implementation of the new system.

FPO, San Francisco, 96602

BRIEFING ITEM: Civilian hire and accompanied tour billets.

BACKGROUND:

a. Contracts for packing and crating services as well as mess and scullery services have been in effect since 1 January 1967.

b. Efforts to negotiate a contract for ma erial handling services for this Command are still in progress at Camp Butler. The most recent information received is that there are two more prospective bidders: BAM associates and Omine Sawmill. Negotiations are continuing.

c. The U. S. Civil Service Preservation Packing Specialists GS-11 position has been approved by higher headquarters. On 1 December 1966, recommendations for 12 additional U. S. civilian billets were submitted to your command.

d. During October 1966, your Headquarters forwarded to the Commandant of the Marine Corps a recommendation that certain key billets be redesignated as accompanied tour billets. Ten officers and two enlisted men were designated. The Regimental Commander, the Force Logistics Support Officer, the Supply Support Officer, the Maintenance Support Officer, the Budget/Finance Management Officer, the Officer in Charge DPP, the Battalion Commanders of Supply Battalion and Maintenance Battalion, the Supply Officer Fleet Stock Account, the Supply Chief (MGySgt 3091), the Contracting Officer, and the Storage Chief.

Tab 3

DECLASSIFIED

DECLASSIFIED

The aforementioned billets were approved by Headquarters Marine Corps and this Command was directed to examine and nominate additional 3d FSR billets for accompanied tours. On 24 January 1967, this Command forwarded a letter recommending additional accompanied tour billets. This list identified 35 additional officer billets and 23 additional enlisted billets, bringing the overall total to 70 accompanied tour billets.

DISCUSSION:

a. On 1 March 1967, we received a letter from the Navy Overseas Employment Office (Pacific) at San Francisco which contained 5 applications for the position of Preservation Packing Specialist GS-11. A few days later a single application was received for the same position. These applications have been screened. One primary and one alternate have been selected for the position mentioned.

b. Your Headquarters has recommended to the Commandant of the Marine Corps that accompanied tours be authorized for 45 officers and 25 enlisted billets, a total of 70 billets. Lieutenant Colonel TAUB, the Camp Butler S-1, sits as a member of the Joint Housing Inspection and Control Office (JHICO). He has informed me that no new information is available concerning availability of rental housing and government quarters except Lieutenant Colonel TAUB will discuss housing problems with USARYIS and negotiate assignment of government quarters to Colonel SHELLY.

It is understood that your Headquarters is examining the problem that concurrent travel orders may not be authorized based on a transfer from RVN to Okinawa. This imposes a hardship on persons transferring from RVN for the purpose of entering an accompanied tour.

The status on private rental housing remains the same as when you

DECLASSIFIED

DECLASSIFIED

were briefed on 3 January 1967 by Lieutenant Colonel TAUB. There are 4911 private rental units with an average monthly turnover of 250 and a waiting list of 1200. Preferential assignment will be available for Intra-Theater Transfers for lieutenant colonel and above in the officer ranks, E8's and above in the enlisted ranks and GS-13 and above in the Civil Service. Preferential assignment equates to a 30 to 45 day waiting period. Other personnel may expect a wait 5 to 8 months for housing.

As an additional item, General KRULAK, I would like to address myself to two problem personnel areas: The first will be occupational field shortages and the second concerns limited skill personnel.

This Command is experiencing a dearth of officer personnel which has its effect in areas germane to the command mission. Your staff has been presented with a listing of MOS shortages officer and enlisted within 3d FSR. Recent contact with your Headquarters relative to these matters reveals that on 31 March 1967, we may expect a more healthy picture of 137 officers on board.

Enlisted personnel in OF 13, 21, 28, 30, 31, 33, 35, 40 and 59 continue to be areas of concern. The MOS's mentioned are among those that do not lend themselves well to on-the-job training unless a man possesses a background in a related civilian occupation.

Limited Skill Personnel. At present there are 207 3d FSR personnel in the limited skill personnel category. (1) Sole surviving son (2) Twice/thrice wounded, (3) Basic MOS, (4) Not physically qualified for duty in

DECLASSIFIED

DECLASSIFIED

RVN, (5) Seventeen years of age (6) conscientious objector and (7) member of family in RVN.

RECOMMENDATIONS:

1. That Accompanied Tour Billets be phased in utilizing the RTD of the incumbents as the time phase factor.

2. That continued efforts by higher headquarters be made in securing government quarters.

DECLASSIFIED

DECLASSIFIED

FPO, San Francisco, 96602

7 March 1967

BRIEFING ITEM: Procedures for handling receipts of material

BACKGROUND: The purpose of this briefing is to provide information concerning the handling of receipts of material from all transportation modes to include control of documentation and reporting receipts to higher headquarters. The Officer In Charge of FSAO-4 Team reviewed receiving/reporting procedures utilized by this command specifically, in the following areas:

a. Receipt and Physical Handling Operations at Naha Port and Kadena AFB.

(1) Comment of FSAO: Procedures employed are efficient and material is expediously moved to 3d FSR Shipping and Receiving Areas. Documentation procedures are adequate. Material is turned over or made available immediately to FSAC-1 and other on-Island Units. The Team was satisfied that no excessive delays occured in movement from Ports to consignees. Air Shipments moved within a few hours and docks were entirely cleared after each unloading. Largest shipments were completed within four days.

b. Document Processing Time Within FSAC-1.

(1) Comment of FSAO: Time between arrival at Central Receipts during December, January and February and take up on Inventory Record was twelve (12) days.

(2) The new internal receiving procedures established by FSAC-1 are highly satisfactory and afford tight receipt document control. The ability to receive and distribute incoming material efficiently is improving daily. Prior to implementation of the new system, report of receipts to Receipt Control were normally taking seven to twelve days. This time has been reduced to five days. It is felt that this can be reduced to four days if present trend continues, without risk of stock denials.

c. Methods Used to Report Receipts to Other or Higher Authority.

(1) Comment of FSAO: Procedure used is effective but less timely than if there was a capability within receiving section to report receipt immediately, by utilizing Shipment Unit Consist File, in accordance with MCO P4610.11, MilStamp Procedures.

d. The Major Recommendations Concerning 3d FSR by OIC, FSAO-4 Team are:

(1) Use of Consist List and Advance Air Manifest Messages.

Tab 4

DECLASSIFIED

DECLASSIFIED

(2) Increased screening of material addressed to 3d FSR but marked for direct delivery to another RUC, to preclude Supporting Unit priority requirements from being placed in FSAC-1 Stock.

(3) Increase efforts to process receipts by order of priority.

(4) Re-examination of manpower requirements needed to accelerate take up of high volume items, multipacked.

DISCUSSION: Information keyed to specific area of responsibility and interest is as follows:

a. Shipping and Receiving.

(1) An increased effort is being made to process incoming shipments by priority. Cargo is moved immediately upon receipt at either the port or air terminal. Shipments for FSAC-1 stock are moved to building 1104, REX Area or Camp Hauge or directed by Central Receipts personnel. Receiving personnel at these locations have been instructed to further screen these shipments to make certain that the material is in fact for stock and not for a supported unit. Trans-shipment or on-island RUC material is processed for trans-shipment or delivery to the on-island RUC within the same day the material is received. Cargo or bulk trans-shipments are retained at the port and documented for trans-shipment in place.

(2) Increased use is being made of the Consist List and Advance Air Manifest Messages. Both are useful in determining document numbers, FSN's, TCN and other pertinent data.

b. Storage Company.

(1) During the period of 20-24 February 1967 a review of the receiving/reporting procedures in effect within 3d FSR was conducted by FSAO-4. Prior to the review, a new procedure had been initiated on 15 January, within the receiving, Storage and Document Control functions of the company. In addition, action had been initiated to position additional receiving personnel within the REX Area and the establishment of a receiving capability within Flammable Storage, Camp Hauge. Locator registers were provided the three receiving areas ("H" Area, REX, Hauge) to permit rapid access to location information on site and to minimize the possibility of loss of receipt documentation. Subsequent to the review conducted by FSAO-4 action has been initiated to utilize copies of advance "Consists Lists" within the Receipts Platoon.

(2) On 15 January a new receiving procedure was implemented through the use of a locally designed form, the Standard Warehouse Action Ticket (SWAT). (See enclosure (1)). The SWAT is a four part snap set and was designed to provide (1) tight control of physical receipts and documentation moving through all receiving functions of the company, (2)

DECLASSIFIED

DECLASSIFIED

a means of providing for location consolidation action on placing the item in stock and (3) the ability to monitor the time required to process receipts within the company.

(a) Although the SWAT has created additional administrative effort, in that one must be prepared for each invoice received, it has provided control not possible under previous systems. Through the use of the four part set it has been possible to establish a closely monitored file of receipts held by Document Control pending warehouse location action; a file within each warehouse to indicate receipts action by their receiving personnel in the event research is required; a temporary "Hang" card for each item placed in stock, and the means to automatically purge the warehouse files of SWAT's on which RPR action has been completed and on which research action is not required. In addition, the SWAT is dated as it moves through initial entry into the system, warehouse action and submission of the RPR to the Stock Account. This has provided management personnel with the means to determine timing required and the capability to detect unacceptable delays.

(b) Commensurate with the establishment of the SWAT system, actions were initiated to augment the receiving section within the REX Area. Further, receiving personnel were positioned within Flammable Storage, Camp Hauge. Finally, locator registers were provided to the three receiving sites. This has permitted ready access to location information which must be determined before receipts are released to the appropriate warehouse.

c. Stock Account Receipt Procedures.

(1) Stock Account maintains expected receipt card decks in both FSN and Document Number sequence. As RPR's are received they are matched with the expected receipt card. The receipt card is forwarded to key punch and on into the computer for processing in the next inventory update run. Normally the receipt will be processed in the computer within 48 hours after the RPR was received by Receipts Control. Every attempt is made to process receipts by priority. For items on which PAC, BARSTOW etc., request a report of receipt, the expected receipt card is annotated and the report made when the RPR is received and matched as discussed above.

RECOMMENDATION: This Regiment continue to examine and purify procedures as described above.

ITEM: FMFPAC EQUIPMENT REPAIR/REBUILD PROGRAM

BACKGROUND: The FMFPAC EQUIPMENT REPAIR/REBUILD PROGRAM is designed to conserve ground and aviation FMF assets in the Western Pacific by timely repair/rebuild at a U. S. Military, or civilian contractor facility located in the Western Pacific. Repair/rebuild facilities are located on Okinawa & Japan. Designated Section "M" equipment is repaired at CBC, Port Hueneme, California. Studies conducted for possible expansion of the program into the Philippines and Formosa generally indicated non-availability of either facilities, repair parts or skilled personnel.

The FMFPAC EQUIPMENT REPAIR/REBUILD PROGRAM is directed by the Repair/Rebuild Control Center (R/RCC). It was established within the Force Logistics Support Section in late July 1966 to assist the CO, 3d FSR in directing and monitoring the major logistics support programs for all FMF Units in WestPac.

The R/RCC has the function of providing overall management for each of the major programs and may include all or some combination of the following: negotiation of ISA's, project orders or work request, funding, accounting, scheduling, assignment, liaison and reporting of all items within the program. The R/RCC is organized with the following units: control, planning, operations and liaison.

The R/RCC has made steady progress in organizing the many facets pertinent to the FMFPAC EQUIPMENT REPAIR/REBUILD PROGRAM and considerable attention has been directed toward establishing policies, procedures, methods, quality control, forecasting, scheduling of facilities and equipments and reporting of results. The first monthly report and first quarterly forecast was issued by the R/RCC in early October 1966. The R/RCC is receiving quality control data returned from units receiving repaired/rebuilt equipment, and indications are that the rebuild standards are being met and a high quality product is being provided. This data is provided each applicable facility to aid in its internal quality control program

Tab 5

DECLASSIFIED

DECLASSIFIED

and is also provided to FMFPAC as part of the monthly report from the R/RCC.

DISCUSSION: Rebuild facilities currently performing work under the FMFPAC EQUIPMENT REBUILD PROGRAM are shown below: (CHART #1, ENCLOSURE #1).

FACILITY	EQUIPMENTS
Maintenance Battalion 3d Force Service Regiment	M-36, M-37, M-43
Public Works Center, Yokosuka Japan (Nippon) Aircraft Company Toyo Manienki Company	M-51, M-54, PU-239, PU-296, PU-589, PU-590, 60 KW

The current status of the FMFPAC EQUIPMENT REBUILD PROGRAM is shown below:

a. The M-36 (Truck, Cargo, 2-1/2 Ton) rebuild program is on schedule with an output of five per month. 48 have been completed.

b. The M-37 (Personnel Carrier, 3/4 Ton) and M-43 (Ambulance, 3/4 Ton) were inducted into the FMFPAC EQUIPMENT REBUILD PROGRAM in October 1966 with a planned combined output of five in December and January. The combined output for the remainder of FY67 commencing in February 1967 is 10 per month. The planned overall rebuild ratio will be 9 to 1 (M-37 to M-43). Thirteen M-37's and 5 M-43's have been completed.

c. The M-51 (Truck, Dump, 5 Ton) rebuild program will be terminated with the completion of four vehicles under repair at PWC, Yokosuka. One vehicle was completed in February and the remaining three will be completed by April. All other M-51 vehicles will be disposed of in accordance with CG, FMFPAC msg 180345Z Feb 67. The R/RCC has notified PWC, Yokosuka of termination of this particular rebuild program (3d FSR msg 271149Z Feb 67) and PWC, Yokosuka will dispose of 18 unserviceable vehicles on hand. 3d FSR will dispose of 5 unserviceable vehicles which are presently on hand.

d. The M-54 (Truck, Cargo, 5 Ton) has not advanced toward its planned goals as rapidly as other portions of the FMFPAC EQUIPMENT REBUILD PROGRAM. This particular program initially had difficulties in receipt of sufficient repair parts but except for an occasional

DECLASSIFIED

DECLASSIFIED

lack of a specific repair part this problem no longer exists. Another facet of the difficulites encountered in this program was available space within the contractor's plant. Some relief has been obtained in this regard with the erection of a new building by the contractor. The R/RCC through PWC, Yokosuka is presently reviewing this program with an eye toward improvement of the general situation. Information received by the R/RCC on 7 March indicates that problem areas still exist in effective utilization of available space, internal work flow and record keeping. Since some of the problem areas involve internal management of the contractor firm PWC, Yokosuka cannot direct corrective changes. They will however, work closely with the contractor in an attempt to reach planned goals at the earliest time. The R/RCC will closely monitor their efforts. To date, 21 M-54's have been completed. This rebuild program will terminate with the completion of the 77 unserviceable vehicles now on hand at PWC, Yokosuka at an output rate of 12 per month. Additional unserviceable M-54 vehicles, including 4 unserviceable vehicles on hand at 3d FSR, will be disposed of in accordance with CG, FMFPAC msg 180345Z Feb 67. One unserviceable M-54 on hand at 3d FSR does not meet the criteria for disposal and must be reported requesting disposition instructions.

e. The output of rebuilt generators by PWC, Yokosuka is showing an upward trend toward the planned monthly output of 23. This figure of 23 is total output and consists of 18 designated rebuild generators (PU-239, PU-296, PU-589, PU-590, and 60 KW) plus 5 other type generators (ground or aviation). To date, 76 generators (33 ground and 43 aviation) have been completed.

(CHART #2, ENCLOSURE #2)

The repair of Section "M" equipment is a part of the overall FMFPAC EQUIPMENT REPAIR/REBUILD PROGRAM. Initially, all Section "M" equipment was repaired at PWC, Yokosuka but the increase in the quantity of Section "M" equipment in WestPac and the subsequent increased workload exceeded the capacity at PWC, Yokosuka. This problem is being alleviated by obtaining other facilities such as MCS, Atsugi, Japan; Maintenance Bn, 3d FSR and CBC, Port Hueneme, California which can take designated end items for repair thereby distributing the workload. The R/RCC is working toward the objective of each available facility handling only designated end items of Section "M" equipment to facilitate the repair and return of each item. Verbal information has been received by the R/RCC that MCAS, Iwakuni, Japan may participate in the repair of Section "M" equip-

DECLASSIFIED

DECLASSIFIED

ment. According to this information, MCAS, Iwakuni is presently reviewing it's capacity and capability. The R/RCC will advise CG, FMFPAC of any subsequent events regarding this matter.

Certain end items of Section "M" equipment have been designated by FMFPAC to be known as "FIFTH ECHELON SECTION "M" REHABILITATION PROGRAM". This program will be on a revolving pool basis and will include the end items listed below. Also shown is the repair facility assigned the particular end item and the quantity authorized in the pool.

END ITEM	FACILITY	NUMBER IN POOL
WILLYS-CERLIST VEHICLES	NAS, ATSUGI	*
M-35A1 (Truck, Cargo, 2-1/2 Ton)	PWC, YOKOSUKA	10
M-37B1 (Personnel Carrier, 3/4 Ton)	3d FSR	4
ME-1A (Semi-trailer, Refueler, 5000 gallons)	PWC, YOKOSUKA	3
M-52 (Tractor, Truck, 5 Ton)	CBC, PORT HUENEME	7
M-62 (Wrecker, Truck, Medium, 5 Ton)	CBC, PORT HUENEME	7

(*Exact number to be determined upon completion of repairs to unserviceable vehicles on hand at NAS, Atsugi.)
Disposition instructions for all pool assets have been issued and production output and other details of the program are being worked out with each facility by the R/RCC.

In addition to the FMFPAC EQUIPMENT REBUILD PROGRAM and the Recoverable Items Program (MCO 4400.4D) the R/RCC will also undertake repair and fabrication programs in support of logistics requirement within WestPac. Each program is determined on its own merits and is only used to assist normal Marine Corps support.

Repair facilities are normally U. S. Military activities located in Okinawa or Japan plus, civilian contractor firms in these two locations. Repair facilities are shown on enclosure (3) (CHART #3, ENCLOSURE #3).

DECLASSIFIED

DECLASSIFIED

Repair programs in progress are as follows:

1. Body Armor Repair Program. This program is designed to reclaim the ballistic components of the body armor and by replacing all the cloth, zippers, snaps, etc., contractor furnished, place the armor in a completely serviceable condition for reissue to Marine units in Vietnam.

a. The USMC Style Body Armor Repair Program is progressing satisfactorily. The original contractor, RYUKYU MIE CHEMICAL CO., has repaired approximately 6700 uppers and 3700 lowers. This contractor is now repairing upper torso body armor at a rate of 600 per week. The repair cost is $9.00 each. No lower torso body armor is being repaired by this contractor at the present time but, he still retains this capability. If lower torso body armor is again repaired by this contractor it would reduce the upper torso output. An additional contractor, YOGI SHOKAI, was awarded a contract in mid-February to repair upper torso body armor at a rate of 1000 per week. This production rate is to be acheived by mid-April and at a repair cost of $6.50 each. Production samples have been received and except for minor quality control corrections, the results are satisfactory. An attempt is being made to locate other contractors for the repair of lower torso body armor. A rate of 250 lowers per week has been set as the minimum.

b. The ROK Style Body Armor Repair Program is progressing. The output rate will be 100 per month as requested by III MAF and the estimated repair cost is $7.50 each. A production model from RYUKYU MIE CHEMICAL CO. has been forwarded to Vietnam for approval. Acceptance was given to the production model on 9 March. Steps are underway to award a contract for the ROK Style Program. Four hundred unserviceable pieces have been shipped to 3d FSR. When the program is implemented exchange of unserviceable for serviceable will be made in increments of 100.

2. Material Handling Equipment Repair Program. In January a study was conducted into the feasibility of establishing a repair program for 6000 lbs. rough terrain forklifts and 4000 lbs. commercial forklifts. The recommendation made and approved by FMFPAC on 23 February was to conduct two pilot programs, one at NSD, Yokosuka and one at Maintenance Bn, 3d FSR. These pilot programs will be repair programs with authority to accomplish 5th echelon maintenance, if required. It is estimated that these pilot programs will

DECLASSIFIED

DECLASSIFIED

be accomplished within 60-90 days and upon completion an evaluation will be made of the "pilot". A report will be forwarded to CG, FMFPAC with appropriate comments and recommendations. Disposition instructions to position the "pilot" vehicles have been issued. Each pilot program will consist of two 6000 lbs and two 4000 lbs forklifts being repaired at each location. The two 6000 lbs forklifts at NSD, Yokosuka will be the PETTIBONE model and the 2 at 3d FSR will be the BAKER model. Each of the 4000 lbs forklifts will be from a separate series since there are 19 different series in the population of fifty-eight 4000 lbs commercial forklifts within WestPac.

Fabrication programs in progress are as follows:

a. Axle Assembly and Components for RKF 60, 6000 lbs Rough Terrain Forklift (Baker Model). The initial quantities ordered through SRF, Yokosuka will be recieved by mid-April. In January when the RO were recalculated by FSSC1 the added quantities then required were reviewed to determine if they should be added to the fabrication quantity previously ordered. Except for one type of screw used in the axle assembly no other requirement for fabrication existed. The added quantity for this screw has been ordered.

b. LVT Road Wheels (FSN 2530-654-7622). This program has proceeded to the point where technical allowance within specifications must be approved. On 23 February MCSA, Philadelphia was requested to provide the technical acceptance directly to PWC, Yokosuka (3d FSR 230343Z Feb 67). A total of 500 road wheels will be received upon completion of this program. Delivery time was 150 days from date of order which would mean delivery about mid-April. The time required to obtain technical acceptance must be added.

c. Torque Rods and Ball Assemblies for 5 Ton Vehicles. The requirements of this program will be satisfied through a contract which PWC, Yokosuka had available. Two thousand torque rods were ordered and 1206 have been received. The remainder are being shipped in increments of 102 per week. One thousand ball assemblies were ordered. Five hundred have been received and the remaining 500 have been shipped by PWC, Yokosuka.

The Repair/Rebuild Control Center in association with higher headquarters, major Marine Corps commands in WestPac and with each repair/rebuild facility continuously reviews and analyzes each program. This continuous review has the objective of maintaining a

DECLASSIFIED

DECLASSIFIED

healthy serviceable asset position for each end item within WestPac. Equally important, this review is designed to better utilize manpower and facilities and highlight in advance our more critical needs so that proper attention may be directed toward them.

BRIEFING ITEM: Update on Supply Statistics in support of WestPac Units.

BACKGROUND: During each visit to 3d FSR by the Commanding General, Fleet Marine Force, Pacific, an updated report on supply statistics is furnished.

DISCUSSION: Supply statistics reflecting support of all WestPac units for Class II and IV materiel is shown in enclosures (1) through (6).

Demands for the period November through February reflect a 64 percent increase over the period August through October. This unanticipated increase in demands has resulted in a declining Fill Rate and increased obligations. Furthermore, fund availability has permitted the funding of only obligations in the case of high dollar value items and in many instances where a large quantity was requisitioned of items with a lesser dollar value. The 3d FSR reduced RO's as directed by CG FMFPac msg 242112Z Dec 66. It is considered that the reduced RO, inability to fund RO in recent weeks coupled with the current trend in demands will result in a low fill rate and increasing obligations in forthcoming months.

The CG FMFPac is well aware of the increased demands and has directed actions which should result in decreased demands.

RECOMMENDATION: None.

BRIEFING ITEM: Logistics Early Warning Systems.

BACKGROUND: The CG, FMFPac has directed that all echelons review early warning systems in use to ensure early detection of logistics problems. Further, that materiel needs and any anticipated emerging problem areas be reported early.

DISCUSSION: It is considered that emerging problem areas should be known first by the user. However, all echelons should have a program or system for early determination of problem areas or problem items. although there are no sophisticated computer programs at this level to provide such information, programs are in being which will provide information on problem type items. In addition, nothing can take the place of close liaison with the user or the activity directly supporting the user. In this connection, the following programs are in use at this command:

a. Monthly Popularity Listing of items obligated which have a popular count of 15 or more regardless of total quantity. (Copy furnished CG FMFPac).

b. Obligation print out after every 4 - 6 inventory updates which is reviewed by management for possible forced substitution, ensure items are due and possible upgrading of priorities on dues.

c. Continuous liaison with FLC (to include direct liaison with Stock Account) and 3d FSR Maintenance Battalion.

d. Projection of requirements based on seasonal requirements such Monsoon materiel.

The above programs are directed towards early detection of problem areas. However, it is considered that no system at this echelon can replace timely actions by the using unit.

RECOMMENDATION: None

ITEM: Actions being taken to prevent accumulation of Excess Stocks.

BACKGROUND: The CG FMFPac has continually provided instructions on requirements determination, pyramiding of requisitions, review of RO's and review of outstanding expected receipts. Actions have been directed to all echelons to preclude the accumulation of excess stocks.

DISCUSSION: The requirements submitted by using units effect inventory records at every echelon in the supply system. However, there are actions which can be taken by higher supply echelons to prevent the accumulation of excess stocks. The following actions have been taken and are currently being taken by 3d FSR to prevent the accumulation of excesses:

a. RO's have been recalculated and reduced.

b. Top Management in FSAC1 reviews all RO buys with extended dollar value of $500 or greater.

c. Unit requisitions where quantity/dollar value appears excessive are challenged prior to final processing.

d. Expected receipts continually reviewed for possible cancellation action.

e. Location/Inventory Record Match resulted in identification and inventory adjustment.

f. Obligations recorded are being reviewed and multiple documents for same RUC and FSN are being challenged for validity.

The above actions are directed towards preventing the accumulation of excess RO's at FSAC1 and excess stocks at all echelons in WestPac. However, such actions must start at the user level as indicated by CG FMFPac msgs 242112Z Dec 66 and 032027Z Mar 67.

RECOMMENDATION: None.

DECLASSIFIED

DECLASSIFIED

TOPIC: 3D FSR FISCAL DATA UPDATE

BACKGROUND

Budget formulation and execution within 3d FSR requires the active participation of Battalion CO's in that they submit budget estimates and receive funds; both planning estimate (hard dollars) and operating budget (soft dollars).

DISCUSSION

The various Marine Corps Appropriations and Budget projects for which the Commanding Officer, 3d FSR submits budget estimates and receives funds are as follows:

1. Operation and Maintenance, Marine Corps - Budget Project 11.

The funds budgeted for and received under this appropriation are used for the normal day-to-day expenses of the 3d Force Service Regiment. (Chart #1, enclosure #1)

Approximately 95% of these funds are obligated and expended for Program Code "R", Stock Replenishment. (Chart #2, enclosure #2)

2. Military Personnel, Marine Corps - Budget Project 31.

Funds budgeted for and received under this appropriation are used to reimburse the Army for all on-island subsistence. Included also are funds for units of 9th MAB and the Marine Range Detachment, Camp Fuji. (Chart #3, enclosure #3)

3. Operation and Maintenance, Navy - Budget Project 20.

Funds budgeted for and received under this appropriation are used for stock replenishment of medical and dental supplies issued by the Fleet Stock Account, 3d Force Service Regiment. Fund requirements under

Tab 9

DECLASSIFIED

DECLASSIFIED

this appropriation will decrease since NSA, Danang is in the process of stock build-up for the purpose of providing in-country requirements of medical and dental supplies. Therefore the CO, 3d FSR will receive only those funds required for on-island medical and dental supply requirements. (Chart #4, enclosure #4)

SUMMATION

In addition to the above, the Commanding Officer, 3d Force Service Regiment receives funds for on-island ammunition requirements, spare parts support for new items of equipment introduced into the FMF and funds for 5th echelon repair/rebuild of certain items of Section "M" (aviation) equipment belonging to the 1st Marine Aircraft Wing.

DECLASSIFIED

HEADQUARTERS
Maintenance Battalion
3d Force Service Regiment
Fleet Marine Force, Pacific
FPO, San Francisco, 96602

BRIEFING ITEM: MAINTENANCE Battalion: Mission, Organization, and Functions.

BACKGROUND: The Maintenance mission of 3d FSR has expanded by 246% during the current fiscal year while personnel have increased by only 7%. The attached detailed briefing outline contains statistical analysis of the commodity areas, showing graphically the workload and personnel status in all areas.

DISCUSSION: A problem has developed in the Motor Transport area, primarily because of a shortage of personnel and a lack of adequate shop space. Local action will be taken to partially alleviate the shop space inadequacy, but this is dependent on timely completion of current construction. The Electronics Maintenance area could develop into a problem if that company is not brought up to approved manning level and relocated to a more adequate building. Engineers have a need for additional people, as reflected in a Maintenance Battalion recommended provisional T/O, which was submitted to 3d FSR on 15 February 1967.

RECOMMENDATIONS: That action be taken to provide the necessary personnel with qualified MOS's to fill the authorized billets within Maintenance Battalion.

DECLASSIFIED

DECLASSIFIED

Good morning, General, I am Lieutenant Colonel Miniclier, Commanding Officer of Maintenance Battalion.

This morning I will bring you up-to-date on the status of our maintenance effort, and will discuss in detail the personnel situation in relation to the maintenance effort in each commodity area, with particular emphasis on Motor Transport.

(Chart 1) This is the organizational chart for the Battalion. The top line in each unit block is the Provisional Table of Organization as approved on 10 November 1966; this T/O was based on recommendations submitted during May 1966. The authorized Manning levels are very near the T/O, and are therefore not shown. The next line in each unit block is a Recommended Table of Organization submitted by the Battalion to Regiment on 15 February 1967; these figures are based on the assumption that the request for additional Ryukyuans will not be approved. The figures outside each box, enclosed in parentheses, indicate the recommended T/O if the additional eighty-two Ryukyuan billets are approved. The Battalion total, using Marines only, requires an increase of 23%. The Battalion total, using Marines and civilians, requires a 7% increase in Marines an over-all total increase of 14%. H&S Company has a recommended increase of three in both proposals. Motor Transport Maintenance needs either a recommended 30% increase of 98 Marines or a 5% increase of 15 Marines and 35 civilians. Electronics Maintenance Company has a recommended 9% increase of 14 Marines in both proposals. Ordnance Maintenance Company requires either a recommended 8% increase of 26 Marines, or a 3% increase

DECLASSIFIED

DECLASSIFIED

of 9 Marines and 7 civilians. Engineer Maintenance Company requires either a recommended 48% increase of 116 Marines, or a 15% increase of 37 Marines and 40 civilians. This recommendation for an increase in T/O is based upon current needs, and current trends indicate that the workload will continue to increase so that T/O revisions will have to be made periodically. The on-hand figures are shown on the lower line entry in each block; within the Battalion total shown, there are one hundred and twenty-five (125) non-rated MOS's that are chargeable against the on-board strength of this Battalion. We are utilizing these people to the best of our ability; I must point out however, that they are not fully qualified to assist the companies in fulfilling their missions, and may block the ordering-in of the required MOS's. They fall into the category of "nice to have", only if the properly skilled personnel are not available. The following is furnished as a report of non-rated MOS's chargeable to Maintenance Battalion as of 8 March 1967:

MOS	NUMBER	DESCRIPTION
0300	1	BasicInfman
0311	64	Rifleman
0331	12	MGnr
0341	6	Mortman
0351	17	AtAsltman
0811	10	FABtryMan
1381	1	SPMan
1811	3	TKCman
1833	6	AmTracMan
3261	5	LdryMachOpr
TOTAL	125	

DECLASSIFIED

DECLASSIFIED

(Chart #2) The first commodity area, General Supply, is shown on this chart. There is a slight reduction of workload in February as compared with January, but the overall trend for this Fiscal Year has been a steady increase. As you will note, there has been a rise in completions in February, and all work requests on-hand at the end of the period are under repair; this indicates that we have not reached the maximum capability of either our shops, BPA facilities, or personnel. For comparison, the work request figures for July 1966, the personnel figures for July 1966, and personnel figures for 8 March 1967 are shown. In the past eight months there has been a 337% increase in the workload with no change in personnel strength. We are augmented by thirteen (13) people from Provisional Service Battalion, 9th MAB; if they are included in the present on-hand strength, there is a personnel increase of only 25%. As indicated by the personnel on-hand and the Provisional T/O figures on chart #1, there are no personnel problems in GSM.

(Chart #3) This chart indicates the status of Electronics Maintenance Company. The chart is similar to the last one, except that combat essential items are shown as a solid portion of each column. During February a new high in work requests received was set, but also a new high in completions was obtained which reduced the "on-hand" at the end of the period. There is a reduction of work requests awaiting parts. The difference between the work requests on-hand at the end of the period.and work requests awaiting parts is the number that can be in a "working" status. The difference here is 313, of which 79 are on BPA/

DECLASSIFIED

DECLASSIFIED

ISSA, 103 are under repair, and 131 are awaiting inspection or shop space. This last figure indicates a shortage of shop space and personnel. In regard to shop space, the new electronics building should fulfill our needs. The completion date of November 1966 was slipped to April 1967; it will not be finished on that date, and unless the effort of work on the building is increased, an additional slippage of six months may be expected. As shown by the chart comparison figures, in the past eight months there has been a 257% increase in the workload and a decrease of 19% in personnel. As indicated on chart #1 there is a shortage of about 32 Marines within Electronics Maintenance Company; anticipated losses in April are about 25 Marines. The high completion rate during February was possible only by working extremely long hours, which was possible because the shop building is heated. This pace cannot be maintained for an indefinite time. High out-put is a result of good management, and unfortunately we lose every officer in this company within the next 45 days; as yet there are no replacements on-board. To keep pace with the expanding work load, this company needs to be maintained at its manning level.

(Chart #4) This chart indicates the status of Engineer Maintenance Company. Again we have an increase in work requests received, and, again, a corresponding increase in work completions. There are 207 work requests in a working status: 88 ISSA/BPA, 95 under repair, and 24 awaiting inspection or shop space. The shop shortage will be solved with the erection of certain walls and doors in present buildings,

DECLASSIFIED

DECLASSIFIED

construction of a Butler building, and relocation of the GSM platoon to the Foster area into new construction scheduled for completion about 1 May 1967. As shown by the comparison figures, in the past eight months there has been a 250% increase in workload. There has been an 8% increase in personnel since last July, and if we take into consideration the personnel augmentation of 31 people from Provisional Service Battalion, 9th MAB, the total personnel increase is 26%. If you will note on chart #1, the proposed T/O submitted to Regiment in the Engineer area recommends an increase of either 105 Marines or 26 Marines and 40 civilians. Until action is taken on this proposal, the only thing we can ask your Headquarters to do is to maintain this important area at manning level with qualified MOS's. To maintain their high rate of production, this company works a six day week with extended night hours as the weather has permitted, and a duty section on Sundays. These hours are too long to maintain the level of proficiency of the individuals on a continuing basis.

(Chart #5) This chart covers the Ordnance commodity area. The trend of expanding work load continues, with record inputs and completions being made each month. There are 646 work requests in a working status: 236 BPA/ISSA and 410 under repair. We have no space problem or personnel problems in this area. As shown by the comparative figures, in the past eight months there has been a 380% increase in workload. There has been a 29% increase in personnel since last July and if we take into consideration the augmentation of 16 people from

DECLASSIFIED

Provisional Service Battalion, the total personnel increase is 35%. Chart #1 shows that the company exceeds the T/O by 31 people, but 45 of the non-rated MOS's on-hand are in this company. Our proposed T/O only asks for minor changes in the Ordnance Company, and, again, all we need in this company are the proper MOS's to perform the mission. The high rate of production has been maintained by the reassignment of the PP&P of small arms back to Supply Battalion, and extended hours as required; as an example, the Optics Section has been working a seven-day week with a ten-hour day.

(Chart #6) This chart shows the status of the Motor Transport Maintenance Company. This commodity area shows a slight drop in work requests received in February compared with January. Because this is a problem area, as pointed out in your message, we have up-dated this chart to include the first six days of March. The drop in WR received during February is due to the short month, and a request to FRC-14 to roll-back to the states some 200 engines they held rather than preparing WR for repairs. In addition, during the first few days of March, 113 engines already on WR were nominated for roll-back because they were beyond our work load capabilities. There are 814 work requests in a working status: 54 ISSA/BPA, 150 under repair, 489 awaiting inspection, 101 awaiting shop space and 20 awaiting manpower. The shop space shortage will be partially solved with the relocation of Shop Stores to one of the new Supply Battalion Butler buildings, thereby permitting expansion of the M-37 and 43 rebuild program from one Butler

DECLASSIFIED

building to two. This will release one Butler building for expansion of the power-train rebuild shop. The further expansion of component-rebuild is dependent on the relocation of the Electronics shop to their new building. There still remains a need for two Butler Buildings for paint and body shops; the reclame for SuppFY67 funds for the required Butlers is at HQMC. The comparative figures show that in the past eight months, there has been a 164% increase in workload. There has been an 11% decrease in personnel, and if we take into consideration the augmentation of 34 people from ProvServBn there is a personnel increase of 2%. Chart #1 shows that the Company is about 70 people short. The recommended T/O, as submitted to Regiment, requested an increase of either 98 Marines or 15 Marines and 35 civilians. To solve the "awaiting manpower" problem, we need to have this company brought up to manning level with the proper MOS's.

The following steps are being taken to reduce the problems within Motor Transport:

a. We are nominating for roll-back those items which exceed our repair capability;

b. Action planned to expand our shop space is dependent on construction.

c. We are closely monitoring the introduction of new equipment, which in the next six months should permit roll-back or disposal of large numbers of components;

d. We have submitted a recommended revision to our T/O to Regiment.

e. We have reduced the MTM items on rapid repair by excluding items being rebuilt for in-country float and shelf stocks.

Assistance desired from FMFPac: Provide the required MOS's to bring this company up to the authorized allowance level.

(Chart #7) This chart shows the result of the rebuild programs. The M-36 continues to meet the established quota; the M-37 is one short of the quota of eight, but the M-43 quota was exceeded by one. Barring an unforseen parts shortage and loss of personnel without replacements, these quotas should be maintained. These programs require 27 Marines, or 11% of our on-hand strength in MTM Company to meet production quotas.

(Charts 8 & 9) These two charts are a recapitulation of the Battalion's workload for the first eight months of Fiscal Year 1967; they show an overall increase of 246% in work request received and only a 7% increase in personnel, which includes the 125 non-rated MOS's.

(Charts 10 & 11) These two charts show the increase through Fiscal Year 1966 and the first two quarters of Fiscal Year 1967. FY 67 quarters exceed the parallel quarters in FY 66, and the first two months of the third quarter FY 67 already exceeds the third quarter of FY 66.

The trend of increase workload will continue as long as new units or people are introduced into country.

That concludes my briefing. Are there any questions, sir?
