PART II

NARRATIVE SUMMARY

During the month of January the basic mission of the Third Marines remained unaltered even though the disposition of forces was realigned, the forces available increased, and the area of operations expanded. As a result of the realignment of forces with the attendant probability of increased enemy activity, the number of patrols in the Third Marines area of operations was increased in order to gain intimate knowledge of the newly occupied areas and to screen and cover the terrain between the outposts and fixed installations and along the main routes of approach into the expanded area of operations. At the close of January, after the relocated units had become familiar with the area in and around their new positions, the Regiment commenced a series of battalion (-) operations with the intent of keeping one battalion on search and destroy missions, on an alternating basis, at all times in order to keep enemy units from massing for an attack on fixed positions.

At the end of December Third Marines forces and direct support artillery were aligned in the following manner. The Regimental Headquarters was located at Camp J. J. CARROLL. The Second Battalion, Third Marines Headquarters and Companies E and H were located in defensive positions at Camp CARROLL. Company F was located in defensive positions at the KHE GIA Bridge, and Company G was under the operational control of the Third Battalion, Fourth Marines. The Third Battalion, Third Marines Headquarters and Companies I, K, and M were located in a "tight" defensive position 2000-3000 meters north of THON SON LAM. Company L was located in defensive positions at the base of the "ROCKPILE". Direct support artillery was controlled by the First Battalion, Twelfth Marines and essentially included two batteries (Battery A and C) situated at Camp CARROLL. The total forces at the disposal of the Third Marines were seven infantry companies and two artillery batteries. The total area of operations of the Third Marines comprised 79 square miles.

Just prior to the beginning of the new year the 3d Marine Division and Division Forward were confronted with the task of repositioning US Forces in the two northern provinces to relieve Vietnamese Army units who were to redeploy in support of the Revolutionary Development Program. Division Forward, in command of Operation PRAIRIE, was ordered to relieve ARVN units at D-5, CA LU, and BA LONG Outposts, in addition to maintaining forces in already occupied areas. The forces available to Division Forward were three Marine infantry battalions and three Regional Forces Companies for positioning at the three outposts - D-5, CA LU, and BA LONG - to operate on a cooperation/coordination basis with the Marine units to be located at those positions. The Third Marines recommended that Regiment retain its two infantry battalions in their already assigned areas and occupy the outposts at D-5, CA LU and BA LONG in addition. Together with the Regional Forces Companies, Third Marines units would relieve the ARVN forces at the three outposts. Furthermore, the Regiment recommended that the primary position of the Third Battalion be moved from the "tight" defensive position to the north of THON SON LAM to an operating base to the south of THON SON LAM astride Route 9 so that the battalion could better maneuver

SECRET

within its own area of operations, while providing an operating and/or reaction force for the entire PRAIRIE and KHE SANH area.

The plan was approved and repositioning commenced immediately. On 30 December 1966, Company K, Third Battalion, Third Marines and the 123d Regional Forces Company, moving by truck convoy with supplies, began to relieve ARVN units at CA LU Outpost. Relief was completed on 31 December 1966. As the Third Battalion was unable to physically support CA LU from positions north of THON SON LAM and the CAM LO River and because of the great distance separating Company K from its parent organization with the attendant logistical support problems, the Third Marines assumed operational control of Company K. Operational control of Company K and responsibility for the CA LU area of operations was later given to the Third Battalion after it had displaced to new positions south of THON SON LAM. After the displacement of troops to CA LU, supplies initially were helilifted in to provide a ten day dump level for the committed units. Initial operations at the CA LU Outpost emphasized patrol activity to gain a detailed knowledge of the surrounding area.

On 31 December Company E, Second Battalion, Third Marines and the 122d Regional Forces Company relieved ARVN forces at D-5 Outpost and took responsibility for operations in the CUA Valley. Tactical and logistic support for D-5 proved a far easier task than for CA LU. Support could be moved either directly overland from Camp CARROLL or down Route 558 from CAM LO. It was necessary first, however, to open and repair Route 558 prior to the movement of troops to D-5. The road has continually required engineer support to keep it open and trafficable. The logistic support of D-5, as of CA LU, was predicated on a buildup of supplies to support operations in the event of an inability to resupply because of inclement weather or other influencing conditions or events. Operations in the D-5 area, as at CA LU, commenced with patrol activities to get a "feel" for the local area. Differing slightly from the units at CA LU, Company E had previously operated in the D-5 area on an operation in conjunction with ARVN units located there, thus aiding their activities during the initial operations.

On 31 December 1966 Company G, Second Battalion, Third Marines returned to the operational control of its parent organization from the Third Battalion Fourth Marines. Company G was alerted for the move to BA LONG. On 12 January 1967 after a prolonged period of inclement weather, the advance party of Company G and supplies were lifted by helicopter to BA LONG. On 13 January the remainder of the Company was lifted in along with Battery W, First Battalion, Thirteenth Marines, which was to provide direct support artillery for the area. Battery W was placed under the operational control of the First Battalion, Twelfth Marines. Because of the inability of the Second Battalion, Third Marines to support Company G easily, the operational control of the company passed to the Third Marines, with Major W. H. FORNEY assigned as Senior Officer Present (SOP) BA LONG, on 13 January. On the same day responsibility for the BA LONG area of operations was assumed even though due to weather the ARVN units required an additional two weeks to complete the movement of their supplies and troops from the

Enclosure (1)
SECRET

SECRET

area. In addition, the same period of time was also required to complete the movement of the 526th Regional Forces Company to BA LONG to operate with the Marines in that area. As the BA LONG Outpost is accessible only by helicopter, the logistical buildup required most of the month to attain the required ten day back log of supplies, due to the inability of helicopters to fly during inclement weather. Operations at BA LONG, as at the other two newly acquired outposts, involved an initial phase of heavy patrol activity in order to gain detailed knowledge of the new area.

On 12 January the Third Battalion, Third Marines began its movement to new positions to the south. In a two stage displacement the Battalion moved from a "tight" defensive position to the north of THON SON LAM and the CAM LO River to an operating base to the south of THON SON LAM astride Route 9. On the first day Command Group A and Companies M and H&S moved by foot across the CAM LO River to the new position. During this move an enemy mortar attack fell on the positions which had just been vacated by Company M. (This mortar attack will be covered in detail further on in the Narrative Summary). On 13 January Command Group B and Company I displaced by helicopter to the new positions. After a suitable defensive position had been established by the Third Battalion, Battery B, First Battalion, Fortieth Artillery (USA), with 105mm (SP) howitzers, displaced to the new position on 14 January, to provide direct support artillery for the Third Battalion. Battery B (USA) was assigned to the operational control of the First Battalion, Twelfth Marines. Tanks, ontos, and dual 40mm guns (SP) were also moved to the new position.

Initially the Third Battalion had difficulty communicating with Regiment; however, wire was laid to establish trunk lines between the Third Battalion and the Regimental Command Post. Subsequently, this communications network was replaced by erecting a radio relay link on the "ROCKPILE". The new position of the Third Battalion, astride Route 9, provided easy access for vehicular traffic. Previously the Battalion had been cut off from vehicular access by the CAM LO River, which necessitated helicopter resupply. Now the battalion could be resupplied by truck convoy, and communication/coordination between commanders was made less difficult. This new location permitted the establishment of a water point with hot showers and the feeding of "A" rations. This battalion had been without such luxuries for nearly three months.

On 15 January, Battery B (USA) displaced four guns from the Third Battalion position to a point to the west in order to bring direct fire to bear on the western slopes of the "RAZORBACK", demonstrating the operational mobility of the Third Battalion supporting arms.

The battalion was now in a position to support CA LU with forces and with its own direct support artillery. On 16 January the battalion assumed operational control of Company K and responsibility for the CA LU area of operations. The battalion was also prepared to commit a command group and up to two companies for operations at any of the outposts in the Third Marines area of operations or anywhere in the PRAIRIE/KHE SANH area.

Enclosure (1)
SECRET

SECRET

The alignment of the Third Marines infantry and direct support artillery forces was now as follows: Third Marines - Headquarters at Camp CARROLL, SOP BA LONG, Company G and 526th RF Company at BA LONG Outpost; Second Battalion, Third Marines - Headquarters and Company H at Camp CARROLL, Company F at the KHE GIA Bridge, Company E and 122d RF Company at D-5; Third Battalion, Third Marines - Headquarters and Companies I and M at an operating base south of THON SON LAM, Company L at the base of the "ROCKPILE", Company K and 123d RF Company at CA LU; First Battalion, Twelfth Marines - Headquarters and Batteries B and C at Camp CARROLL, Battery B, First Battalion, Fourtieth Artillery (USA) with the Third Battalion, Third Marines, Battery W, First Battalion, Thirteenth Marines with SOP BA LONG at the BA LONG Outpost. The new alignment represented an increase from seven infantry companies and two 105mm batteries to eight infantry companies, three RF companies, three 105mm batteries, and one 4.2 inch battery. The area of operations was expanded from 79 square miles to 217 square miles. The number of fixed installations was increased from four (Camp CARROLL, KHE GIA Bridge, 3/3 primary position, and "ROCKPILE") to seven (Camp CARROLL, KHE GIA Bridge, D-5, BA LONG, new 3/3 primary position, "ROCKPILE", and CA LU).

The weather at the beginning of January followed patterns similar to December - cold and wet with poor visibility. Although the weather did not limit operations, it made them more difficult. In some cases the commencement date or the scheme of maneuver of an operation had to be altered because of inclement weather or poor visibility.

Enemy activity during the month of January consisted of isolated, unrelated mortar attacks on friendly positions and small units actions. There were sixteen enemy mortar attacks on friendly units in the PRAIRIE area, two on 3/3, with an average of thirty-five 81/82mm mortar rounds falling in each. There was a sharp increase in the number of small unit contacts during the month, particularly in the CUA Valley. Mine and booby trap incidents also increased. There was, however, no contact with, or even sightings of, major enemy units by Third Marines forces. In addition, in every reported incident throughout the area of operations, the enemy either broke contact upon making it, or withdrew to avoid it.

The concept of operations within the Third Marines area of operations had substantially changed as a result of the repositioning of forces, although the basic mission had not. With additional forces, but an expanded area, the tactical thinking had to change. The Third Battalion moved from a "tight" defensive position to an operating base in order to permit large scale operations; however, the primary impetus for action still evolved upon small units. Patrols were employed both to gain knowledge of the newly acquired areas and to cover and screen areas between fixed installations and along main routes of approach into the area of operations. Company and platoon patrol bases augmented local security to carry out these objectives, particularly to cover the main threats to the THON SON LAM and Camp CARROLL areas. During the last week of January battalion (-) sized operations were conducted, employing first one and then the other battalion in the "field". During this entire period the improvement of defenses at fixed installations continued.

Enclosure (1)
SECRET

SECRET

As a result of the greater number of fixed installations and their wide dispersion, the logistic concept called for resupply by surface means to as great an extent as possible. BA LONG is still accessible only by helicopter and must be resupplied in that manner. CA LU and D-5 are now accessible by road and are being resupplied by surface means, though it was necessary to resupply CA LU by air initially. The Third Battalion's new position is also accessible by road and is resupplied by convoy. A ford was opened across the CAM LO River so that Company L could be resupplied in the same manner, provided the river was not swollen by monsoon rains. Although shortages in certain items existed at times during January, they were by the end of the month essentially rectified; and stock levels were brought up to ten days of supply. Engineer efforts during January were primarily in support of the logistic concept of operations. Route 558 and Route 9 were opened to D-5 and CA LU respectively, and continued efforts were directed toward keeping these roads open and trafficable during the monsoon season.

Major operations conducted during the month of January were as follows. Immediately upon the termination of New Year Truce on 2 January the Third Marines conducted extensive countermortar exercises. Countermortar fire plans were plotted, and tested for speed of reaction and accuracy. Fires were plotted on known and suspected enemy mortar sites. Extensive H&I's were fired, particularly during the predawn and predusk periods, to offset enemy attacks. It had been noted that every enemy mortar attack on Third Battalion, Third Marines Command Post during the preceeding two months had occurred between the hours of 1700 and 1900, thus the emphasis on the predusk H&I's. Patrolling activities were increased during the countermortar exercises, and platoon patrol bases were established.

Plans for the insertion of a two platoon patrol base on DONG HA Mountain to the north of Camp CARROLL across the CAM LO River were delayed, as inclement weather prevented both the helicopter insertion and attempts to walk in across the swollen river, early in the month. On 13 January, the weather cleared enough to allow the lifting of one platoon from Company H, Second Battalion, Third Marines onto the mountain. The platoon was maintained there by helicopter resupply, being withdrawn on 24 January.

On 11 January at 1613H, the enemy attacked Third Battalion, Third Marines positions with mortar fire. Approximately fifty rounds of 81/82mm mortar fire fell during a twenty minute period; however, resulting damage was minimal. Countermortar fire was returned within two minutes. Fire was directed on observed and suspected enemy mortar positions. Company L, located at the base of the "ROCKPILE," and its platoon patrol base on the "RAZORBACK" were hit by small arms fire from that ridgeline during the mortar attack; artillery was fired in support of that company as well. All enemy fire was suppressed by 1635H, and escape routes were fired upon by artillery. A total of 524 artillery rounds were expended in countermortar fire, H&I's, and grid square saturation, during and following the enemy mortar attack.

On 12 January at 1223H enemy mortars again hit the Third Battalion, Third Marines positions, falling in the vicinity of the recently vacated

SECRET

Company M positions. Company M had displaced that morning to the Third Battalion's new position south of THON SON LAM. The eighty-seven rounds of 81/82mm mortar fire fell primarily on unmanned positions. Within six minutes after the commencement of the attack, countermortar fire was delivered on enemy escape routes. A total of 160 artillery rounds was fired in support of the Third Battalion during and after the enemy mortar attack.

These two attacks differed noticeably from previous attacks in the time of occurrence (prior to 1700), perhaps as a result of predusk H&I's. It should also be noted that friendly casualties were minimal. The second attack, which did not appear to have been premeditated, was completely fruitless. The enemy did not even bother to observe his fires; otherwise it might have been noted that the Company M position was deserted. The quick response of countermortar fire resulted in the termination of enemy fires more quickly than on previous occasions, and damage was limited. An analysis of these two attacks confirmed the value of previously conducted countermortar exercises.

On 21 January Company F, Second Battalion, Third Marines passed to the operational control of the Third Battalion, Fourth Marines as the company moved to DONH HA for the defense of that area in support of an operation elsewhere. On 22 January, Third Battalion, Fourth Marines began an operation to the north and east of DONG HA Mountain. On 24 January, Division Forward decided to move the operating area somewhat to the south, but still north and east of DONG HA Mountain, and to place the operation under the control of the Second Battalion, Third Marines. On 25 January, all elements of the Third Battalion, Fourth Marines involved in the operation, except Company M, returned to DONG HA. Company F returned to the Second Battalion, and Battery B, First Battalion, Twelfth Marines moved from DONG HA to positions north of Camp CARROLL on Route 9 to support the operation on the following day.

On 26 January at 0750H the Second Battalion, Third Marines commenced the operation, as lead elements were helilifted into an artillery-prepped landing zone. Employing Company M, Third Battalion, Fourth Marines, which had remained in the area from its previous operation, as a blocking force to the east, Command Group A and Companies F and H, Second Battalion, Third Marines, with Company M, Third Battalion, Third Marines attached, commenced a two phase search and destroy operation beginning in an area north of DONH HA Mountain and moving east. Company L, Third Battalion, Fourth Marines was moved to reinforce Camp CARROLL and also came under the operational control of Second Battalion.

On 27 January, as a result of increased enemy activity to the west in the vicinity of KHE SANH (two recon patrols had been heavily engaged in that area in less than a week), the operation was terminated and all units concerned were directed to move to their respective Command Posts and return to the operational control of their parent units. Because of difficult terrain encountered by the Second Battalion's operating force, that unit's required movement was not completed until 0330H on 28 January. In conjunction

Enclosure (1)
SECRET

SECRET

with the increased enemy activity to the west, the Third Marines Regimental Command Group A and the Third Battalion, Third Marines were prepared for a possible move to KHE SANH; however no requirement developed for employment of forces in that area.

Since the time when the QUANG TRI River Valley from CA LU to BA LONG, or the BA LONG Valley as it is sometimes known, was included in the Third Marines area of operations, an operation had been planned in that area. After the termination of the Second Battalion operation on 27 January the necessary forces were available, and on 29 January at 0505 Command Group A and Company I, Third Battalion, Third Marines commenced movement to CA LU to link up with Company K for the proposed operation. Battery B, First Battalion, Fortieth Artillery (SP) (USA) followed in trace to provide direct support artillery from CA LU. With Company G from BA LONG in a blocking position to the east, the Third Battalion (-) and one platoon of the 123d Regional Forces Company from CA LU commenced a sweep, at first light, of the populated area on the northern side of the QUANG TRI River to the east of CA LU. During the course of the operation one NVA, seven VC, and assorted weapons and supplies were captured, and two enemy were killed. Several innocent civilians were also detained for interrogation by the Fifteenth Counterintelligence Team. The operation terminated at 1625H, and respective units moved back to their Command Posts.

On 30 January at 1830H, Company K captured another VC in the CA LU area. The captive stated that he would lead the company to a recently hidden arms cache. On 31 January Company K (-) with a squad of RF's, conducted another sweep of the village area on the northern bank of the QUANG TRI River, with four guns from Battery B, (SP) (USA) again displacing to CA LU. Although the arms cache was not located, two additional VC were captured. The sweep terminated at noon, with the units returning to their respective Command Posts.

During the month of January, Company E, Second Battalion, Third Marines and the 122d Regional Forces Company conducted operations in the CUA Valley, in the vicinity of D-5, directed toward the pacification of that area. In addition to normal patrolling activities, several company sweeps and road clearing operations were conducted. All activity was coordinated with the village chief and National Police in the area through the Fifteenth Counterintelligence Sub-Team working out of D-5. Frequent contact resulted throughout the month on a small unit level. In addition to captured weapons and supplies, the enemy casualty figures were: sixteen confirmed kills, seven probable kills, three confirmed wounded, one VC and two Civil Defendants captured, and numerous civilians detained for interrogation.

In addition to tactical operations, a County Fair (3-21) was conducted in the DOC KINH Refugee Hamlet near D-5, on 7 January. After the area had been cordoned off by Company E and the 122d Regional Forces Company, the people were gathered at a centrally located collection point, while their houses were searched. The people were then processed for proper identification by Vietnamese officials. During the identification screening, the Regimental Surgeon treated approximately 238 people for physical ailments.

Enclosure (1)
SECRET

SECRET

The people were then gathered at a central point to hear propaganda tapes by an Audio/Visual Team from the 244th Psychological Operations Company (USA). Then speeches were given by a rallier and the District Chief from CAM LO, stressing the themes of hardship under VC leadership and prosperity under government leadership. Also songs were sung by members of the Vietnamese Information Service Team from CAM LO. On the preceeding day rice and cloth were distributed to each family and during the County Fair clothing was distributed to the children by District officials. In addition to the intelligence information which was gathered, the most significant fact was that the County Fair was run almost entirely by the local Vietnamese. The operation was well received by the people, who have been encouraged by most of the Vietnamese government and Marine activities and operations in the area.

Generally speaking, the people in the valley have become more cooperative since Marines have moved into the area; however, a "wait and see" attitude is still prevalent. The VC have experienced a great deal of difficulty, on the other hand. As reported in a letter from a VC political cadre member to his superiors, the VC are experiencing trouble finding civilian support and supplies. The Marines in the area have made it difficult for them to move and to hide supplies and weapons. In addition their men are subjected to constant harassment and contact by supporting arms fire and patrol activities. The VC have fallen into a state of disarray, and the pacification of the area proceeds.

In addition to the Civil Affairs Program in the CUA Valley a program was recently begun at the CAM LO District Dispensary by the Regimental Surgeon. Although the facilities are good, there is a shortage of trained personnel. Third Marines medical personnel have undertaken a treatment and training program in the area, and for the month of January, 114 people have been treated. The training of personnel to take over from the Marines has not as yet passed beyond the planning stages.

Self-help is also being provided to Montagnard refugees from CAM LO. They are being given work to clear areas around Marine installations and along main supply routes and are to be paid in Bulgar wheat and cooking oil by USAID. Not only will this work enable the Montagnard refugees to become more self-supporting, but it also aids in strengthening the defenses of Marine installations and in making road traffic safer due to reduced ambush possibility.

Psychological Operations, in addition to those in support of the County Fair, were predicated on two points of emphasis. First, leaflets directed at the NVA were distributed by hand on trails throughout the Third Marines operating area. Secondly, newspapers were passed out through the CAM LO District Headquarters to the people of the area. These newspapers are published by the Vietnamese government and JUSPAO in Saigon and present the government viewpoint toward the war effort in an attempt to overcome the effects of VC propaganda. Increased efforts in both fields will be made during the TET period in support of the TET Psychological Operations Campaign.

Enclosure (1)
SECRET

SECRET

Toward the end of January, after several sniping incidents at vehicles moving along Route 9 and Route 558, Third Marines activated a motorized counter-sniper patrol. Employing snipers from Headquarters Company, the patrol covered the area along Route 9 between Camp CARROLL and DONG HA and on Route 558 between CAM LO and D-5, keeping the Regiment informed of its position at all times.

January marked the termination of Operation PRAIRIE I, and PRAIRIE II commenced on 1 February. In the offing for February is the displacement of the Regimental Headquarters to DONG HA in conjunction with plans for the Third Marines to assume operational control of all the infantry units in the PRAIRIE area upon the movement of the Fourth Marines Command Post to the THU BAI area. The beginning of February will also mark the commencement of the TET Season. Indications are that enemy activity before and after the holidays will probably increase. The end of the monsoon season appeared in sight during the last days of January as the overcast broke for several days and the sun appeared. Two battalion-sized operations were conducted at the end of the month in conjunction with the improved weather conditions. This prospective change in the weather and the fact that newly positioned units have become familiar with their areas will certainly mark the beginning of an increase in the number and size of operations after the TET Holiday.

B. Significant Operations Conducted.

(1) 010001H - 010700H Jan, 3d Marines operations during the New Year Truce period were conducted using maximum recon patrols and ambushes.
Ref: CO, Third Marines 301140Z Dec66

(2) 020900H - 050900H Jan, 3d Marines conducted extensive counter-mortar operations in AO to perfect countermortar reaction and fire plans to prevent enemy mortar attacks. Extensive artillery H&I's and fires on known and suspected mortar positions were combined with aggressive patrolling activities within the AO. Emphasis was placed upon predusk and predawn countermortar fires.

Ref: CO, Third Marines 011030Z Jan67

(3) 070215H - 080900H Jan, E/2/3 and RF 122 conducted County Fair 3-21 in the DOC KINH Refugee Hamlet in the CUA Valley. 2200 people were processed by Vietnamese officials for proper identification. 238 people were treated by the Regimental Surgeon. Propaganda was disseminated in the form of tapes, talks by a CHIEU HOI, and a speech by the District Chief from CAM LO. The County Fair was well received by the people, and additional intelligence information to assist in the pacification of the CUA Valley was gathered.

Third Marines SitRep #330 071800H Jan67 & #347 112400H Jan67

(4) 111613H Jan, 3/3 CP and Co M received estimated 50 rounds of 81/82mm mortar fire. 1/3/3 CP and 2/3/3 PFB (XD 967564) received small arms fire. Within two (2) minutes artillery responded with countermortar fire on the primary enemy mortar position in the vicinity of (XD 963582) and on the position from which enemy small arms fire was originating at (XD 963568), as well as on other suspected enemy positions. Enemy fire was suppressed by 1635H, and escape routes were fired upon thereafter. A total of 521 artillery rounds were expended in accordance with countermortar fire plan and grid square saturation by the artillery units located at Camp J. J. CARROLL.

(5) 120900H - 131215H Jan, G/2/3, W/1/13 and 526th RF Company moved to BA LONG to relieve ARVN units in the area for participation in the Revolutionary Development Program, assumed responsibility for BA LONG AO, and chopped to 3d Marines.

Ref: Third Marines Frag O 1-67

(6) 121000H - 131750H 3/3 moved their battalion CP and Companies I and M to positions to the south of THON SON LAM in a two stage displacement. Positions were set up in the vicinity of (XD 982544) in conjunction with Battery B, 1st Bn, 40th Arty USA, tanks, and ontos, thus allowing 3/3 to better support units within its AO.

Enclosure (1)
SECRET

SECRET

(7) 121223H enemy mortar fire fell on position vacated by M/3/3 several hours before -- 87 81/82mm rounds. Within six (6) minutes artillery and 81mm countermortar fire was delivered on six (6) separate targets. At 1230H, the enemy fire ceased after a total of 160 artillery rounds were fired in suppression. The enemy had apparently not noted 3/3's displacement, which resulted in their firing on a vacated position.

(8) 130900H - 241329H Jan, H/2/3 platoon (reinf) maintained a FFB on DONG HA Mountain and conducted extensive reconnaissance patrols in the area, thus denying the enemy a potential mortar position against Camp CARROLL. This FFB was inserted, extracted, and resupplied by heli-copter. The platoon was extracted prior to the originally planned time, in order to participate in another operation.

CO, Third Marines 220451Z Jan67

(9) 260758H - 280330H Jan, 2/3 conducted a battalion sized operation to the north and east of DONG HA Mountain. Employing M/3/4 as a blocking force to the east (YD 135616) to (YD 135646), Command Group A and Companies F and H, 2d Bn, 3d Marines with Co M, 3d Bn, 3d Marines attached, lifted into an artillery-prepped landing zone at (YD 070651) and commenced search and destroy operation in operating area. On 27 January, as a result of enemy activity elsewhere in the PHUENH area, the operation was terminated, and participating units commenced movement to their respective CPs. By early morning on 28 January all units involved had returned to their own areas and chopped to their parent units.

Ref: Third Marines Frag 0 4-67
Third MarDiv (Fwd) Frag 0 3-67

(10) 290200H - 291850H Jan, 3/3 employing Command Group A and Companies I and K conducted a search and destroy operation in the QUANG TRI River Valley east of CA LU, with G/2/3 in blocking position further to the east in the river valley. Moving into position at night, the operation commenced at first light, with 3/3 elements and one platoon of the Regional Forces Company at CA LU searching the villages on the northern side of the river. Action terminated at 291625H and units commenced movement to their respective CP's. Results of the operation were 2 enemy KHA (conf), 1 FW (MVA), 7 FW (VC), and assorted enemy weapons and supplies.

Ref: Third Marines Frag 0 5-67

(11) 310400H - 311130H Jan, Company K/3/3 (-) (Reinf) with a squad of RF conducted a search operation in the QUANG TRI River Valley in response to intelligence information obtained from a FW (VC) on 30 Jan. Subject stated he would lead them to a weapons cache. Area searched with negative results; however, two (2) FW (VC) were picked up during the search. Results of the operation were 2 FW (VC).

(12) During the month of January, E/2/3 and the 122d RF Company conducted operations in the CUA Valley in the vicinity of D-5. In addition to normal patrolling activities, several company sweeps, a County Fair, and road clearing operations were conducted in conjunction with the pacification of the CUA Valley. Frequent contact resulted throughout the month. Results of these activities, in terms of enemy casualties, were: 16 KIA (conf), 7 KIA (prob), 3 WIA, 1 PW (VC), 2 Civil Defendants, and numerous detainees.

Ref: CO, Third Marines 031000Z Jan67

(13) During the month of January, 3d Marines conducted the defense of the Marine Corps Army supporting arms complex at Camp J. J. CARROLL. Enemy activity in the area continues to be negligible; however, efforts were made to strengthen the defensive posture of the camp. Electronic surveillance equipment was employed, reaction forces and counterattack forces for the northern and southern end of the perimeter were organized, and countermortar exercises were conducted. In addition improvement of defensive positions continued within each unit's defensive sector.

C. Casualties Inflicted on the Enemy.

(1) At 051600H, H/2/3 patrol apprehended 5 VN females in the vicinity of (YD 098512). Two of the females are identified to known VC and were detained. The detainees were transported to G-2 for further interrogation. Results: 2 Civil Defendants.

(2) On 6 January, 31 March (Fwd) G-2 classified two previously held suspects (suspects were detained in December) as PW (K).

(3) At 080215H, a H/3 OP (ID 060555) observed 3 trip mines set off near their position. Four enemy were observed and fired on by the OP. Two of the enemy were observed falling before contact was broken. Results: 2 enemy KIA (prob).

(4) At 090745H, H/2/3 patrol received 12 rounds of small arms fire from unknown number of enemy at (ID 139529). The patrol returned fire and searched the area finding 1 VC KIA (conf).

(5) At 091155H, H/2/3 patrol observed 3 enemy at (YD 120517). Patrol fired and observed 1 enemy fall. Search of the area revealed 1 enemy helmet and blood stains indicating 1 enemy KIA (prob).

(6) At 100045H, H/3/3 FO observed 3 enemy at (XD 966578). Arty mission fired. 1 round was observed to hit within 10 meters of the enemy. Results: 3 enemy KIA (prob).

(7) At 101835H, H/3/3 patrol received small arms fire from 3 enemy at (XD 967567). Patrol and ONTOS returned fire. 100mm round was observed hitting in enemy position. Search of area revealed 1 enemy KIA (conf).

(8) At 101645H, H/2/3 patrol observed 4 enemy at (YD 102449). Patrol fired at enemy resulting in 1 enemy KIA (prob).

(9) At 111125H, H/2/3 patrol encountered 2 enemy at (ID 109502). Enemy was taken under fire resulting in 2 enemy KIA (conf).

(10) At 121300H, H/3/3 platoon captured 1 VC armed with automatic weapon in hamlet at (YD 099444). The PW was forwarded to G-2 for further interrogation.

(11) At 121500H, H/2/3 patrol located 2 graves at (YD 103498) which contained 2 enemy KIA (conf). Delete 1 KIA (prob).

(12) At 131230H, H/2/3 platoon received 50-80 rounds of small arms fire from estimated 4-6 VC. Arty mission fired resulting in 3 enemy KIA (prob).

(13) At 131420H, H/2/3 patrol discovered 2 graves (YD 120510) which contained 2 enemy KIA (conf).

Enclosure (1)
SECRET

SECRET

(14) At 131420Z, 3/2/3 received small arms fire from unknown enemy at (YD 120518). Platoon returned fire and observed 2 enemy fall. Results: 2 enemy KIA (prob).

(15) At 131645H, 3/2/3 patrol located 1 grave at (YD 120527) containing 1 enemy KIA (conf).

(16) At 131815H, 3/2/3 patrol observed 1 KIA at (YD 120529). Patrol took the enemy under fire and conducted search of the area. Blood stains were located indicating 1 enemy KIA.

(17) At 131910H, 3/2/3 patrol observed 1 VC at (YD 105494). Patrol fired wounding the VC, who fled into tree line. Results: 1 enemy KIA.

(18) At 200930H, 3/2/3 located 2 graves at (YD 121510). The graves contained 2 male bodies badly mutilated by shrapnel. Results: 2 enemy KIA (conf).

(19) At 031130H, 3/2/3 patrol apprehended 2 VN males (YD 081501) for interrogation. During the interrogation, one of the males attempted to escape. When the VN ignored the guards orders to halt and warning shots, he was killed by the patrol. Results: 1 enemy KIA (conf) and 1 detainee.

(20) At 021400H, 3/2/3 apprehended 1 female with approximately \$37.00 in NVC. The detainee was forwarded to 15th TID at CMV HQ.

(21) At 281735H, 3/2/3 observed 4 enemy at (YD 053577). Small fire mission called with excellent target coverage. Results: 4 enemy KIA (prob).

(22) At 290900H, 3/3/3 made contact with 3 enemy. Results: 2 NVA KIA (conf) and 1 PW (NVA).

(23) At 291035H, 3/3/3 captured 5 PW at (YD 040433). Results: 5 PW (VC).

(24) At 291055H, 3/3/3 apprehended 1 wounded VC at (YD 120530). The PW was not released.

(25) At 291230H, 3/3/3 observed 2 enemy at (YD 030447). Patrol pursued and captured 2 enemy. Results: 2 PW (VC).

(26) At 291620H, 3/2/3 patrol observed 1 enemy at (YD 110506). 3d Marines Scout-Sniper with patrol fired at enemy. Search of area resulted in 1 enemy KIA.

(27) At 291845H, 3/2/3 located 2 graves at (YD 120512). One grave contained body of male with shrapnel wounds. The other grave contained cremated remains. Results: 2 enemy KIA (conf).

Enclosure (1)
SECRET

SECRET

(28) At 300930H, 1/2/3 patrol point was observed 4 enemy at (YD 121503). Patrol fired and killed 1 enemy. A search of the area resulted in evidence of another enemy KIA (prob). Result: 1 enemy KIA (conf) and 1 enemy KIA (prob).

(29) At 301350H, 1/2/3 patrol apprehended 1 male vicinity (YD 128526) attempting to flee from patrol. Subject was turned over to CIT at R.5 in the CIA Valley.

(30) At 301830H, 1/3/3 apprehended 1 VC at (YD 025455). VC transported to IIT.

(31) At 310700H, 1/3/3 (-) apprehended 2 VC and 2 VCS during search in vicinity (YD 046433). 2 VC transported to IIT and 2 VCS were released as innocent civilians.

(32) At 311528H, 1/2/3 patrol made contact with 4 VC at (YD 128513). Contact resulted in 2 VC KIA (conf).

(33) At 311630H, 1/2/3 patrol apprehended 3 male and 1 female at (YD 127513) moving from New Life Hamlet and acting suspicious. Detainees were sent to 1/2/3 for interrogation and later released as innocent civilians.

Enemy casualties for the month of January:

19 KIA (conf); 16 KIA (prob); 3 WIA; 1 PW (NVA); 14 PW (VC);
2 Civil Defendants.

Total enemy casualties for Operation HOAIRDM: 14

134 KIA (conf); 61 KIA (prob); 7 WIA; 2 PW (NVA); 14 PW (VC);
2 Civil Defendants

SECRET

D. Casualties Sustained.(1) Hostile

(a) At 044730H, 3/3 (XD 983582) had a 81mm short round land in another gun position resulting in 2 USMC KIA.

(b) At 111610H, 3/3 CP and M/3/3 CP received approximately 50 rounds of 81mm mortar fire resulting in 5 USMC KIA.

(c) At 121110H, M/2/3 patrol sweeping village (XD 115504) detonated booby trap resulting in 1 USMC KIA.

(d) At 260830H, M/3/3 patrol received 1 incoming grenade at (XD 982528) resulting in 1 USMC KIA.

(e) At 300915H, M/2/3 patrol tripped booby trapped M-21 grenade at (XD 103503) resulting in 2 USMC KIA.

(f) At 301805H, M/3/3 PVB (XD 967564) received heavy fire from estimated 5 enemy automatic weapons resulting in 9 USMC KIA.

Final hostile casualties for the month of January were:

KIA - 0; MIA - 20; POW - 0

Total friendly casualties for Operation PRAXIS I:

KIA - 40; MIA - 196; POW - 2; MIA - 0

(2) Non-hostile

Total non-hostile casualties for January - 0

Enclosure (1)
SECRET

SECRET

E. New Techniques Employed.

(1) 3d Marines Snipers, after a recent evaluation of mission and activities, have been employed with increased emphasis.

(a) Snipers were employed in nighttime positions in areas of recent VC activity in an attempt to detect and deter VC nighttime movement. Differing from previous activities, these nighttime ambushes were activated for the specific purpose of employing snipers with Infantry units acting in a subordinate role providing security.

(b) As a result of enemy sniper activity along Routes 9 and 558, a mobile sniper patrol was activated to patrol these roads in an attempt to catch enemy snipers by surprise.

(c) As of the end of January utilization of these new techniques is too recent to assess their value accurately.

(2) On 29 January scout dogs from the 1st Military Police Battalion were employed for the first time in the 3d Marines area of operations. Although no significant events occurred relating to their employment, further utilization is envisioned.

(3) Nighttime Artillery Displacement

(a) On 22 January, 1/31 resupplied Battery B, 1/40 (USA) at night. The battery had been firing in support of an engaged recon patrol and was critically low in ammunition. This was the first nighttime resupply convoy in the 3d Marines AO.

(b) On 26 January, two (2) 175mm guns from 2/94 (USA) displaced from Camp CARROLL to 3/3's position south of THON SON IAM to fire in support of an engaged recon patrol. This was the first nighttime displacement for these guns in Vietnam.

(4) See Supporting Documents: Lessons Learned; 3/RRB/lws over 3480 dtd 31Jan67.

SECRET

G. Equipment

In addition to the regular organic equipment the below listed special items were used during the month of January. In each case an objective evaluation was made of the equipment and its capabilities in view of the operational commitment.

(1) A total of five tent stoves, M1941, Model 251, USA were employed during the January period in Headquarters Company. These stoves were standard Marine Corps issue items complete with fuel oil generators for regulating heat. In the extremely damp, cold weather, they proved to be a valuable asset. In January a total of 15 stoves were received for 3d Marines and OPOON Battalions in addition to the ones already provided in December.

(2) On 8 January, an additional 3 Otters were employed by 3d Bn, 3d Marines in their AO. This makes a total of 6 Otters which are employed in the 3d Marines AO. These machines have been used by 3/2 actively during this period. The deadline rate is about 70% when using the Otter in rough, rocky terrain, but during the later part of the month, this was reduced to less than 20% when repair parts were limited in from DA MAF.

Ref: CG, Third MarDiv (FWS) 190050Z Jan67

(3) On 18 January, the new CH-53A Marine Corps helicopter attempted to externally lift a 3 1/2 ton M37 truck belonging to A/1/13, to the BA Long outpost. During flight the vehicle commenced swinging to such an extent that the aircraft was endangered and it was necessary to jettison the load before it was delivered to the destination, resulting in one vehicle loss.

(4) On 29 January, 3 rubber boats were received by 3d Bn, 3d Marines for use in crossing the CAM LO and GUNG TAI rivers. Qualified personnel were available in this unit to utilize these boats. Prior to this time, local boats were used to cross swollen rivers and streams.

Ref: CG, Third MarDiv 220837Z Jan67

(5) Seventeen M-700 scout-sniper rifles, 7.62mm were received by Headquarters Company for use with the Scout Sniper Platoon. These rifles have been administratively deadlined by MCO 4400.324 until repair parts and technical instructions are available for support of the rifle. The rifles were received on 30 January.

Ref: CG, Third MarDiv 260929Z Jan67

SECRET

SECRET

H. Logistics

(1) General

(a) A greater demand for logistic support was created during the last two days of December and early January by the repositioning of companies in outpost positions. Greater flexibility for resupply of units was attained by repositioning two companies and the command group of 3d Battalion, 3d Marines along Route 9. Work projects were started on roads to the Mook Pillar, OUA Valley and CA 10, in order to allow for resupply by vehicles. The only permanent outpost not capable of being resupplied by vehicle is DA 10NG. Various selected outposts of platoon size and smaller are supported by helicopter on an as needed basis.

(b) Message from the reports were handled in a routine manner during the month. On the 27th of January 1967, a Division Comptroller contact team contacted Headquarters and Service Company, 2d Battalion, 3d Marines and 3d Battalion, 3d Marines Supply Officers on the subject of job order numbers and requisitions.

(2) Supply

(a) The overall supply situation in January remained good. Significant shortages still exist in consumable supplies and certain items of 782 gear and individual clothing. Cleaning gear, light bulbs, and blank forms were in short supply.

(b) Individual clothing, in particular: jungle trousers and jungle boots, were in short supply during most of the month, but the situation is improving daily. Individual equipment, e.g. body armor, upper torso; canteen cups and covers; and field mess knives, forks, and spoons were reported as short items in OPCON battalions.

(c) Sandbags, concertina wire, and stakes were in short supply during the month due to the rough weather and the inability of bringing supplies in by LCU to DMG HA. Concentrated effort on improvement of positions also contributed to a shortage of Class IV supplies in the area. See Supporting Documents for an article concerning the number of sandbags used in country.

(d) Due to the weather conditions, gasoline and diesel oil supplies were also in short supply. Rough water at the entrance to the CAM 10 river has prevented the normal resupply from arriving in DMG HA, resulting in the rationing of bulk fuel for about a week during the period.

(e) A complete inventory of warehouses was held by Headquarters Company and OPCON battalions. Excesses were reported to Division in accordance with CG 311223Z Dec66. In addition, requisitions were cancelled or recomputed and the money value reported. Headquarters

SECRET

Company reported \$2,415.05 saved by recomputing requisitioning objectives and \$853.68 saved by cancelling requisitions.

(3) Movement

(a) Tactical and administrative troop and logistic moves were accomplished by the use of helicopters and trucks during the month. In addition, plans are ready for the movement of Command Group "A" by air, as needed. The entire Headquarters Company is preparing to move administratively to BONG HA during February 1967.

(b) During the period 12-14 January 1967, G Company, 2d Battalion 3d Marines, and whiskey battery, 1st Battalion, 13th Marines were helilinked to BONG HA. In addition, 237,068 lbs of supplies were helilinked to BONG HA. The movement was accomplished in 3 phases. Phase I lifted 5 DOA Class V and 5 DOS Class I and III plus the advance party. Phase II consisted of the troop movement, and Phase III consisted of the dump/level building of 10 DOS Class I and III and 7 DOA, plus Basic Allowance, Class V. Class II and IV supplies are requisitioned via BONG HA as needed. Logistic planning calls for maintaining stock level at Phase III level in the case of inclement weather, which would prevent resupply by helicopter.

(c) K Company, 3d Battalion, 3d Marines was resupplied by a 26 truck convoy on 15 January. After completion of this resupply, all resupply of CA LU was administered by 3d Battalion, 3d Marines.

(d) A night tactical movement of 3 companies and a command group from CAM LO TO Camp J. J. CARROLL and 3d Battalion, 3d Marines Command Post was accomplished by truck convoy on 27-28 January 1967. The convoy staged two serials of trucks in CAM LO. H Company moved out with serial 1 at about 272200H Jan 1967, and F Company and M Company plus the command group returned at 280300H Jan 1967, with serial 2.

(e) On 29 January, I Company and a command group of 3d Battalion, 3d Marines, were tactically moved by truck convoy from their Command Post to CA LU for an operation. The group was moved back to the Command Post on 30 January 1967, at the completion of the operation.

(4) Cantonment and Camp Facilities

(a) Water consumption for Camp J. J. CARROLL varied from 24,430 gallons to 8,930 gallons per day. This month the average was exceptionally low due to the cold, damp weather conditions. Hot showers were available throughout the month during the hours of 1500-1630 and 1730-1830 daily.

(b) On 5 January 1967, a strongback was erected in the 3d Marines area for use as a Camp Medical Facility. This was the second hardback erected for a Marine Corps unit at Camp CARROLL. During January, lights were installed in all troop living tents in the Headquarters Company, 3d Marines area. Tactical wire, bunkers, and sandbag walls around the living tents were continually improved.

SECRET

(c) In Camp CARROLL, sand sidewalks were constructed around the Post Office and Exchange Facilities, thus helping to eliminate walking in the mud in the area. Powder canisters were placed in the outdoor stage area for troop seating at entertainment functions.

(d) Elsewhere in the 3d Marines area, a water point and shower were established in the 3d Battalion, 3d Marines Command Post area. This eliminated the necessity of transporting water from the Camp CARROLL Water Point to 3/3's position.

(e) Cement platforms and screened-in pot sheds were requested for messhall and maintenance areas in Camp CARROLL. Plans were reconfirmed for the erection of hardbacks for messing areas and tent decks for the living spaces.

(5) Engineers

(a) On 1 January 1967, the 11th Engineer Battalion was assigned the responsibility for roads and engineers projects at Camp CARROLL. Warrant Officer R. J. JOHNSON was assigned by the 11th Engineers as Officer in Charge of the projects. An engineer platoon with heavy equipment and dump trucks was assigned to the hill on 7 January 1967.

(b) The roads located near Headquarters Company, 3d Marines, 2d Battalion, 3d Marines, main Camp access road, and trash dump roads have been improved during the month. In addition, the trash pits were covered and two new pits were dug by the Engineers.

(c) In January, 3d Engineers completed 2 bridges on Route 9 near 3d Battalion, 3d Marines Command Post, making possible easy access to CA LU by truck convoy. In addition, the road to L Company, 3d Battalion, 3d Marines position was improved by 3d Engineers.

(d) Bridges and by-passes were pioneered on Route 558 by the 3d Engineers during the month. The 11th Engineers have now taken over the responsibility for improvement of this road.

(6) Motor Transport

During the period, one mighty mite, $\frac{1}{2}$ ton, M-422A1 and trailer were helilifted to BA LONG. One M-422A1 was evacuated to FLSU for repair. The Motor Transport Section of Headquarters Company continued to perform in an outstanding manner, in spite of adverse weather and operating conditions.

(7) Transportation

Housekeeping trucks were coordinated by 9th Motor Transport Battalion in DONG HA. Routine truck requests were submitted directly by using units. Tactical moves have been coordinated through this organization. Army and Marine Artillery units at Camp CARROLL have continued to provide emergency transportation for Marine units.

SECRET

(8) Ordnance

(a) On 9 January, 3d Marine Division (FWD) Ordnance representatives inspected ammunition storage areas and records of the 2d Battalion, 3d Marines. A contact team from FLSU DONG HA inspected the 106RR's of 2d Battalion, 3d Marines during January for modifications made on the weapons as directed by CG, 3dMarDiv msg 060725Z Jan 1967 (C). Commanding Officer, 3d Marines msg 10330Z Jan 1967 (C) answered that OPCON battalions had complied.

(b) During January a staff study was made to determine the average deadline rates of crew-served weapons in OPCON battalions. A breakdown is given below. These averages were computed by dividing the number of days weapons were deadlineed in FLSU or FLSG by the total number of days in the reporting period. The reporting period covered for 3d Battalion, 3d Marines was from 1 November 1966, to 19 January 1967, and for 2d Battalion, 3d Marines was from 1 September 1966, to 21 January 1967.

<u>NOMENCLATURE</u>	<u>T/E</u>	<u>AVERAGE DEADLINE RATE</u>	
		<u>WEAPON/DAY</u>	
		2/3	3/3
81mm Mortar	8	1.88	2.80
60mm Mortar	12	0.43	1.41
3.5" Rocket Launcher	32	1.25	1.20
M-60 Machine Gun	35	0.31	0.55
106RR	8	1.06	1.05

(9) Medical

The hypochlorination of water trailers and cans was again accomplished during the month. In addition, new water cans with lids were placed in service in Headquarters Company, 3d Marines. A Camp Aid Station was constructed and placed in operation as described in paragraph H(3) above. This made it possible to treat patients with minor illnesses at Camp CARROLL without evacuating them to the rear.

(10) Local National Civilian Labor

On 30 January 1967, 100 Montagnards were employed, on a continuing basis, for clearing brush along route 9 in the 3d Marines Area of Operations. This organization furnished their transportation to and from selected work sites. They are paid with food commodities by the CAM LO District Chief in cooperation with the RVN Government and USAID. A similar arrangement for cutting brush along Route 558 was made with local people from the refugee village in the CUA Valley.

SECRET

I. Civil AffairsNarrative Summary

During the month of January, the Civil Affairs Program of the 3d Marines was initiated and it has already begun to show visible progress. Definitive areas of responsibility were assigned to each unit in the 3d Marines area of operations and the units were required to survey their assigned areas, meet with the local officials, and begin to formulate definite plans for Civic Action in their areas. Requisitions for MEDCAP and Civic Action supplies have been received from each unit and have been forwarded to higher echelon for completion. Plans are to continue from this point into a well organized Civil Affairs Program in the 3d Marines area of operations.

7 January 1967: A COUNTY FAIR (3-21) was conducted in the DOC KINH Refugee Hamlet near D-5. After the area had been cordoned off by Company E and the 122d Regional Forces Company, the people were gathered at a centrally located collection point while their houses were searched. The people were then processed for proper identification by Vietnamese officials. During the screening, the Regimental Surgeon treated approximately 238 people for physical ailments. The people were then gathered at a central point to hear propaganda tapes played by an Audio/Visual Team from the 244th Psychological Operations Company (USA). Speeches were then given by a Rallyer and the District Chief from CAM LO stressing the themes of hardship under VC leadership and prosperity under government leadership. Songs were also sung by members of the Vietnamese Information Service Team from CAM LO. On the preceding day rice and cloth were distributed and during the COUNTY FAIR clothing was distributed to the children. In addition to intelligence information which was gathered, the most significant fact was that the COUNTY FAIR was run almost entirely by the local Vietnamese. The operation was well received by the people, who have been encouraged by most of our activities and operations in the area.

15 January 1967: A Solatium payment was made to victims of an explosion of an artillery round in THON RO Hamlet (XD 992441), CAM PHU Village on 7 January. The payment was made in kind, as the people expressed the desire to be paid in rice rather than Piastres, to avoid the inconvenience of their having to go all the way to CAM LO to purchase the rice.

15 January 1967: Seventy-two (72) refugees from CA LO (YD 014454) were transported to CAM LO District Headquarters (YD 128594). The refugees came from the BA LONG Valley area and wanted to escape Viet Cong control and influence.

24 January 1967: A MEDCAP program was begun at the CAM LO District Dispensary by the Regimental Surgeon and Corpsmen. The dispensary is large and has good facilities, however, it has been without a much needed Doctor and adequately trained medical personnel for quite some time. The Doctor and Corpsmen now treat patients in the dispensary three (3) days a week, and to date, 114 people have received treatments. The Doctor hopes to begin a training program for medical personnel within the District soon.

SECRET

27 January 1967: A meeting was held at the 3d Marines CP for all the Civil Affairs and Medical Representatives in the 3d Marines area of operations. The purpose of the meeting was to plan and coordinate the Civic Action Program in the area. Prior to the meeting, each unit conducted a survey of its assigned area and contacted the local officials. At present each unit is continuing its survey of its area, making liaison with local officials, implementing a MEDCAP program and determining the necessary Civic Action Projects. Plans were also made for a luncheon on 3 February in connection with the initiation of the CA Program and the Vietnamese "TET" Celebration. It is to be sponsored by the 3d Marines, and Hamlet, Village, and District officials in the area will be invited, along with representatives from each U.S. Military unit in the 3d Marines area of operations.

29 January 1967: Arrangements were made with the CAN LO District Chief for 100 Montagnard Refugees from HUNG PHU I (YD 113580) to begin cutting grass and brush along Route 9 on 30 January 1967. The same arrangements were also made for 100 Vietnamese Refugees from the CUA Valley to begin cutting grass along Route 558 on the same date. The workers will be paid in kind with Bulgar wheat and cooking oil provided by USAID. It is hoped that this project will enable the refugees to be more self-supporting and will make Routes 9 and 558 much safer for travel by eliminating many likely areas for ambush.

J. Administration(1) Awards

(a) The following recommendations for awards were submitted during this period:

- 2 Silver Star Medals
- 4 Bronze Star Medals
- 1 Navy Commendation Medal
- 1 Secretary of the Navy Commendation for Achievement
- 6 CG 3dMarDiv Certificate of Commendation

(b) The following awards were presented to members of this regiment during the reporting period:

- 1 Silver Star Medal
- 1 Bronze Star Medals
- 1 Gold Star in lieu of a second Bronze Star Medal
- 1 Navy Commendation Medal
- 37 Purple Heart Medals
- 17 Vietnamese Crosses of Gallantry
- 3 Meritorious Masts

(2) Promotions: One promotion to Lieutenant Commander was effected by the Chief of Naval Personnel; one promotion to First Lieutenant, one promotion to First Sergeant, and one promotion to Gunnery Sergeant were effected by the Commandant of the Marine Corps. There were two Marines promoted to Sergeant, one hundred fifty-seven promoted to Corporal, one hundred and twenty-two promotions to Lance Corporal, and twenty-four Marines promoted to Private First Class.

(3) Legal Matters: Fourteen "Office Hours" were conducted during this period. In addition, two General Courts-Martial are pending; three Special Courts-Martial were completed and two Special Courts-Martial are pending, and one Summary Court was completed.

(4) Special Services:

(a) Musical instruments were purchased and a band is currently being formed. The band will "tour" throughout the 3d Marines area of operations playing for units on outpost as well as those in the major positions.

(b) Movies were also shown to the personnel of Headquarters Company at Camp CARROLL on a scheduled basis.

(5) Liberty: There was no liberty authorized in the DONG HA - Camp CARROLL area during this period.

Enclosure (1)
SECRET

SECRET

K. Personnel

(1) Gains: During this period twenty-five Marine Officers, one hundred and fifty Marine Enlisted, and five Navy Enlisted replacements were received.

(2) Losses: The 3d Marines sustained eighty casualties during the period. Twenty were hostile casualties and sixty were non-hostile. All of the hostile casualties were wounded in action. The multitude non-hostile casualties were personnel hospitalized in excess of twenty-four hours. The circumstances surrounding the non-hostile casualties were examined and, where appropriate, investigations were conducted. Administrative losses were six Marine Officers, one hundred and forty-four Marine Enlisted, and nine Navy Enlisted.

(3) Emergency Leaves/Humanitarian Transfers. One Marine Officer was ordered to CONUS by PCS in connection with emergency leave. One Marine Enlisted was ordered TAD to CONUS in connection with emergency leave. There were no humanitarian transfers during this period.

(4) Administrative Discharges. None.

(5) R&R TAD Trips. R&R trips were afforded to two hundred and fifty-nine members of this regiment. R&R trips were to Hong Kong, Manila, Bangkok, Kuala Lumpur, Okinawa, Taipei, Singapore, Tokyo and Hawaii. In addition, forty-eight R&R trips (in country) to China Beach were afforded to members of the regiment.

L. Intelligence

1. There were no reports of large enemy forces moving within the Third Marines area of operations. Significant enemy ground actions consisted of increased enemy sniper activities along Route 9 and two mortar attacks made against the 3d Battalion, 3d Marines position three kilometers North of THON SON LAM (XD989596). An estimated 137 rounds of 81/82mm mortar fire were received during the two attacks. No ground assaults were made in conjunction with the mortaring. Other incidents of significance were the increase of isolated enemy mortar attacks on friendly positions located in the PRAIRIE area of operations. An average of 35 enemy 81/82mm mortar rounds was received for a total of 16 attacks. The tempo of enemy activity in the D-5 area (CUA Valley) (YD094514) increased significantly during the month of January, consisting of small unit contacts, sniper activities, and employment of mines on Route 558. The contacts, however sporadic, represent a sharp increase over recent reporting periods. No enemy activity of significance was reported for the CA LU area; however, a one-day operation which was conducted during the latter part of January, resulted in 2 NVA KIA, the capture of 8 VC, and the discovery of a weapons cache (13 weapons captured to include Chinese rifles, French MAS-36, U.S. Thompson SMG, a French MAT-49 SMG, and S/A ammunition).

In every incident throughout the AO in which contact was made with the enemy, reports indicate that the enemy withdrew avoiding direct contact. The enemy's actions in this area continue to indicate screening and reconnaissance effort and the ability, when opportune, to launch harassing and probing actions against our positions.

The overall total of incidents for the month of January increased by 65% over the preceeding month. With the exception of enemy mortar/artillery incidents which decreased by 25%, all types of incidents indicated a sharp increase. Enemy incidents consisted mainly of small arms, Booby traps/mines, and small scale unit contacts.

TOTAL Incidents	62	46	76

*Includes incidents of lights being observed and fired on and 1 sighting of two groups of pack elephants with attendants.

(2) The enemy situation at the end of the month is marked by sporadic ambushes, sniping, and booby traps/mines incidents. The enemy has the capability of attacking in division plus strength by repositioning forces; the enemy further has the capability to attack singularly or simultaneously on any positions at Camp CARROLL, THON SON LAM, CUA Valley, (D-5), CA LU, and BA LONG. Past experience indicates that the enemy favors and will conduct direct attacks against friendly forces when odds appear in his favor.

For documentation of the summarized data see 3d Marines Intsums for the Month of January.

SECRET

SECRET

M. Communications

1. General. The month of January found this regiment shifting from a "tight", closed-in defense posture to an extended employment of companies in assigned outpost positions. The westernmost battalion (3/3) moved from an area normally inaccessible by surface transportation during the monsoon season into an area in which it could be resupplied by surface means and also have better control over its companies. These changes allowed the Regimental Commander greater flexibility and reaction in the employment of his units.

a. The dispositions of forces mentioned above posed definite communication problems. The wide dispersion of units, coupled with adverse weather conditions challenged the communication facilities to a maximum extent.

(1) The new position of 3/3 does not afford a line-of-sight transmission necessary to establish a communication link utilizing radio-relay equipment, AN/TRC 27B.

(a) Initially four wire lines were laid from Regiment to 3/3. This proved unfeasible in that the land lines were constantly being torn out by friendly vehicles, exploding rounds, or being cut indiscriminately by persons unknown.

(b) Ultimately a radio-relay shot was established from Regiment to the top of the "ROCKPILE". This shot was wrapped over to another shot from the "ROCKPILE" to the battalion position. Thus, five sets (one for back-up on the "ROCKPILE") are being used where normally two sets would suffice. This employment is not desirable, but, due to the location of the battalion command post, is necessary.

(2) The establishment of a Regimental Command representative in the BA LONG area has taxed the available equipment. Careful preventive maintenance and utilization of equipment does not dictate augmentation at this time.

(3) The high humidity prevalent during the monsoon season has had a definite effect upon the electrical equipment. The use of waterproof materials, electric lights, and desiccant bags has proved reasonably effective in countering the deleterious effects of moisture.

2. Camp Power. Due to the primary camp power being inoperable, the bulk of electrical power requirements are being met by the camp back-up power, Generator, PU-239. During peak hours, this 20 kW generator often overheats due to the heavy load placed upon it. The performance of this generator is marginal under the circumstances and its continual use requires constant attention and careful maintenance.

SECRET

3. Chronology

1-11 January - Normal operations with scheduled PMs and minor repair of gear.

12 January - Discontinued Crowd to Swain radio relay due to Swain changing CP location. Conventional methods could not be used to continue radio relay due to lack of line-of-sight.

13 January - Swain landline common user laid from Crowd to Swain CP. Established security and convey net on M-807, to reduce overload on Regimental TAC Net #1.

14 January - Swain S-3 and Swain FSCC landlines laid from Crowd to Swain CP. Nestor circuit established with Punjab and Sharpshooter from 142300H until 151000H to backup downed teletype circuit; no traffic was handled.

17 January - Regimental TACP frequency changed to M-537 by telecon with Division (Fwd) CEO's office (MSGT BURKE). Frequency assigned by Change #4 to COI not suitable for aircraft radio equipment.

18 January - Supplied BA LONG with Regimental Comm team to support operations; have capability for FM, HF, and wire communications, also technicians to service gear.

20 January - Policed all lines outside Hq.

21 January - Completed overheading of wire lines. All landlines are inside Camp CARROLL's perimeter defense wire. 60 KW trailer mounted generator down; main bearings ordered on priority 02, Doc. No. 12235.

22 January - Established radio relay communication between Crowd and Swain by means of a relay site on the "ROCKPILE".

23 January - Invoiced one SB-22 Switchboard to SOP/MAF Representative KHE SANH. Activated Nestor circuit to pass immediate message, cancelling previous Frag Order. Message sent to Payable, and had to be encoded to pass to Starboard Zulu.

25 January - Hot Line put in from Crowd COC to Crowd 6.

26 January - Established relay at Artillery Village to support radio communications for 2/3's operation. 261600H, relay secured.

27 January - Obtained one 3 KW, 115V, 400 CFS, Gas operated generator from 2/94 (USA) on temporary loan, for backup of our PU-346.
Ref: CO, Third Marines 301232Z Jan67

27 January - Policed wire land lines previously layed from Crowd to Swain CP.

Enclosure (1)
SECRET

SECRET

28 January - Effected liaison with 4th Marines for future move of Headquarters Company, 3d Marines to DONG HA. Wire pulled up between Crowd and Swain was repaired and made serviceable.

29 January - Two TRC-27B's and one telephone invoiced to 1/3 for rotation.

30 January - Message sent to CO, 3d Marine Division stating this Hq unable to support HF/UHF communications because of insufficient supply of monoblocks.

Ref: CO, Third Marines 300120Z Jan67

31 January - The message center handled a total of 1516 messages. There were 1204 incoming and 312 outgoing messages for the month of January.

Enclosure (1)
SECRET

SECRET

N. Weather

During the month of January, the northeast monsoon developed to its fullest extent. The entire month was characterized by generally poor overall weather. The sun was visible from Camp CARROLL on a total of four days. The other days, typical, "crachin" weather prevailed, i. e., drizzle, low visibility, complete cloud cover, and 10 to 15 knot winds. The temperature ranged from 65° to 72° F, and the average humidity was 88%. Total rainfall for the month of January was 5.9 inches.

The weather adversely affected friendly operations, aerial Photo Recon, Medevac, resupply, and patrol extraction missions. On the ground, high water levels in streams and rivers coupled with soft muddy earth hindered the movement by foot and vehicles.

Enclosure (1)
SECRET

O. Fire Support(1) Significant Events.

(a) All Countermortar Plans are operational, and drills were held throughout the AO.

(b) Grid square saturation continued throughout the month with unknown results.

(c) On 14 January, B/1/40, USA, displaced from DONH HA to the vicinity of (XD 983542) in support of the 3d Marines, and came under the OPCON of 1st Bn, 12th Marines.

(d) On 13 January, W/1/13 was chopped to OPCON of 1/12, and W/1/13 displaced from DONH HA to BA LONG in support of the BA LONG AO.

(e) On 15 January, B/1/40, USA, displaced 4 guns to the vicinity of (XD 975537) in order to bring fire to bear on the western slopes of the "RAZORBACK".

(f) On 22 January, B/1/40, USA, fired in support of a surrounded recon unit. 1/12 resupplied Battery B by organizing a night supply convoy to their positions. This convoy enabled Battery B to continue to fire until the recon unit was extracted.

(g) On 25 January, B/1/12 displaced from DONG HA to the vicinity of (YD 064575) to support a battalion size operation northwest of CAM LO.

(h) After dark, on 26 January, two 175mm guns from 2/94, USA, made the first night displacement for that type weapon in Vietnam. The guns moved to the vicinity of (XD 983543) in support of a recon unit that was in contact with the enemy west of KHE SANH.

(i) On 27 January, A/1/12 displaced from Camp CARROLL to DONG HA to await rotation with the SLF. B/1/12 displaced from (YD 064575) to the artillery complex at Camp CARROLL.

(j) On 29 January, B/1/40, USA, displaced from (XD 983542) to a position at CA LU to support 3/3 during an operation in the BA LONG Valley. C/1/12 displaced from Camp CARROLL to occupy positions vacated by B/1/40, USA. Both units displaced to their original positions on the evening of 29 January.

P. Air Support

a. Elements of the 1st Marine Aircraft Wing provided fixed and rotary wing aircraft in support of medical evacuation, aerial reconnaissance, administration, and high altitude radar bombing, during the month of January.

b. Air support provided during January 1967 is summarized as follows:

	MED EVACS	ADMIN	LOGISTIC	PROOF LIFTS (Admin)	RECON
Hq Co, 3d Marines	2	5	10	13	4
2d Bn, 3d Marines	10	1	6	7	1
3d Bn, 3d Marines	7	...	7	6	8
Total	19	6	23	26	13

The Regimental WOPF also controlled one (1) medical evacuation mission for the 3d Engineer Bn in the AO.

c. During January 1967, the Regimental Tactical Air Control Party controlled approximately 1000 aircraft missions within the AO. These aircraft missions were flown either in support of the Regimental Headquarters and subordinate battalions, or were overflying the AO enroute to other destinations. During peak periods of activity, over 60 flights were controlled within a nine hour period.

d. High altitude radar bombing controlled by Marine ASRAT within the AO is summarized as follows:

1. Total number of targets requested	1653
2. Total number of targets hit	492
3. Total ordnance expended (Tons)	619

e. Although generally poor weather prevailed during the month, aircraft response time and cooperation was excellent. Low ceilings prevented support by close air support fixed wing aircraft.

R. Psychological Operations.

(1) From 010001H to 072400H Jan67, 3000 Psychological Warfare leaflets were hand distributed in the 3d Bn, 3d Marines area bounded by GS (XD 9760), (YD 0060), (XD 9755), and (YD 0055). The theme of the leaflets were CHIEU HOI and NVA Hardship.

(2) From 010001H to 072400H Jan67, 6500 Psychological Warfare leaflets were hand distributed in the 2d Bn, 3d Marines area bounded by GS (YD 0257), (YD 0856), (YD 0452), and (YD 0853). The theme of the leaflets were CHIEU HOI and NVA Hardship.

(3) From 070215H to 080900H Jan67, Psychological Warfare presentations were held in conjunction with COUNTY FAIR 3-21, conducted in the village of DOG KINH (YD 099525) by E/2/3. Audio/Visual Team, 244th PsyOps Co, USA played pre-recorded tapes. The District Chief addressed the villagers on the importance of supporting the Government. Ralliers addressed the villagers on the hardships of being connected with the VC and the happiness and good treatment upon rallying to the GVN. A Vietnamese Information Service Team gave presentations and sang songs for the people.

(4) From 080001H to 142400H Jan67, 200 leaflets were hand distributed in the old 3/3 GP area centered in GS (XD 9859). The theme of the leaflets were CHIEU HOI and NVA Hardship.

(5) From 080001H to 142400H Jan67, 3850 leaflets were hand distributed in the area bounded by GS (YD 0357), (YD 0255), (YD 0452), (YD 0752), (YD 0657), (YD 0854), (YD 0855). The theme of the leaflets were CHIEU HOI and NVA Hardships.

(6) On 13 January 1967, a Psychological Warfare leaflet drop was conducted by aircraft in the area bounded by GS (XD 8863), (XD 8860), (XD 9562), and (XD 9560). 100,000 NVA Hardship leaflets were dropped.

(7) From 150001H to 212400H Jan67, 1100 leaflets were hand distributed in the 2/3 AO in GS (YD 0355), (YD 0354), (YD 0555), (YD 0554), (YD 0452), (YD 0453), (YD 0652), and (YD 0653). The theme of the leaflets were CHIEU HOI and NVA Hardships.

(8) From 220001H to 282400H, 1100 leaflets were hand distributed in the 2/3 AO in GS (YD 0355), (YD 0553), (YD 0452), (YD 0652), (YD 0359), (YD 0554), (YD 0453), and (YD 0653). The theme of the leaflets were CHIEU HOI and NVA Hardships.

(9) On 28 January 3000 newspapers, printed by GVN and JUSPAO in SAIGON, were distributed in CAM LO District, providing the people with information and news about Vietnamese and Free World activities in Vietnam.

6. Training

(1) Objective. To maintain and improve the high state of combat efficiency of the Regiment, training was conducted on a formal school and individual basis.

(2) Highlights.

5 January - SPS-6 Radar School was conducted at Headquarters Company, 3d Marines, Camp CARROLL, RVN. On 15 January, 4 Marines graduated from this school.

9 January - The Regimental Chaplain presented two lectures on "The Religions of Vietnam". 103 members of Headquarters Company attended.

9 January - One officer attended RPS Custodian School conducted in Japan.

15 January - One enlisted man attended Audio-Visual Equipment Operators School conducted on Okinawa.

Ref: CG, Third MarDiv 040027Z Jan67

16 January - Twenty members of the Regimental Sniper Platoon and Headquarters Company conducted familiarization firing of their individual weapons at the Camp CARROLL Rifle Range.

16 January - Two Staff NCO's attended PsyOps Training and Orientation Course conducted in DA NANG, RVN, by the 244th PsyOps Company, USA.

21 January - Twelve members of the Regimental Sniper Platoon and Headquarters Company conducted familiarization firing of individual weapons at the Camp CARROLL Rifle Range.

22 January - Fifteen members of the Headquarters Company Security Platoon conducted familiarization firing of individual weapons at the Camp CARROLL Rifle Range.

23 January - One officer attended Crypto/Communication Security School conducted in Japan.

24 January - Twenty members of Headquarters Company conducted familiarization firing of individual weapons at the Camp CARROLL Rifle Range.

24 January - The Regimental Chaplain presented a lecture on "The Religions of Vietnam". 46 members of Headquarters Company attended.

Ref: CG, Third MarDiv 040027Z Jan67

25 January - Twenty members of the Regimental Sniper Platoon and Headquarters Company conducted familiarization firing of individual weapons at the Camp CARROLL Rifle Range. 51

26 January - Two Staff NCO's attended PsyOps Training and Orientation Course conducted in DA NANG, RVN, by the 244th PsyOps Company, USA.

DECLASSIFIED

HEADQUARTERS
3d Marines
3d Marine Division (Reinf) FMF
FPO San Francisco 96602

RegtO 3435.1A
3/RRB/ju
19 January 1967

REGIMENTAL ORDER 3435.1A

From: Commanding Officer
To: Distribution List

Subj: Countermeasures Against Mines and Booby Traps

Ref: (a) DivO P3120.3B
(b) DivO 3435.1B
(c) RegtO 3120.1B
(d) CG 3d MarDiv 23115K Jun66

Encls: (1) Mine Warfare DO'S and DON'T'S
(2) Format for reporting Mine/Booby Trap Incidents

1. Purpose. To promulgate instructions for the employment of specific countermeasures to reduce the number of casualties inflicted by mines and booby traps.

2. Cancellation. RegtO 3435.1

3. Scope. This order implements the provisions of reference (a) for this regiment. It amplifies reference (b) and directs action to make this information available to the Marine engaged in countermining warfare in the field.

4. Definitions. The following terms will be used to identify types of devices for mine incidents reports.

a. Mine: An anti-personnel or anti-vehicular explosive device rigged with a pressure, pressure release, pull, tension release, or electrical type fuze, with the exception of ordnance and grenades as defined below.

b. Booby Trap: A concealed explosive device or explosive charge having its firing mechanism so placed that it is detonated when an unsuspecting person disturbs an apparently harmless object, or performs a presumably safe act. A booby trap has at least two important components: the explosive device or charge, and the apparently harmless object, either of which could be some form of ordnance. The explosive device itself may be booby trapped by a modification of its normal

ENCLOSURE (1)

DECLASSIFIED

RegtO 3435.1A
19 January 1967

firing chain. For example, a 105mm round may be rigged in such a manner so as to explode when a village gate is opened. The combination of the gate (a seemingly harmless object) and the 105mm round constitutes a booby trap. Another example: an apparent dud 105mm round is discovered in an area that has been shelled, rigged with a pull-type firing device, the round will detonate when disturbed. The combination of the round (a seemingly harmless object) and the hidden firing device constitutes a booby trap. When a booby trap is reported, both the object and the explosive device should be specified.

c. Grenades: Any manufactured hand grenade (U.S., foreign, or local) which has been displaced in any manner as a casualty producing explosive device, but has not had its delay fuze removed in favor of another type. A grenade maintains its identity as such as long as it retains its delay type fuze. Once that fuze is replaced with a different type, the ordnance should no longer be classified as a grenade. For example, it becomes the component of a booby trap but retains its identity as a grenade. If the spoon and delay fuze assembly are removed, a pressure type detonator installed, and the resulting device buried in the ground, it becomes simply a mine.

d. Ordnance: Any type of mortar, artillery, or serial ordnance which has been modified by the addition of a pressure, pressure release, pull, tension release, or electrical type fuze, in order to function as an anti-personnel or anti-vehicular explosive device. The ordnance, when rigged with one of the firing devices, may be employed as either a mine (e.g., an 81mm round buried alongside a trail and rigged with a pressure type detonator) or as a booby trap (e.g., an 81mm round rigged to detonate when a gate is opened). In either case, these rounds of ordnance were not functioning in the manner for which they were designed.

e. Unknown: Any type of explosive device that is detonated or destroyed to the extent that there is no material or information remaining from which the type of device can be determined.

f. Other: Any booby trap unsupported by explosive devices, i.e., punji traps, bear traps, etc.

5. Background

a. This regiment continues to sustain many casualties from the detonation of mines and booby traps. To reduce these casualties, the application of approved techniques of countermining warfare, both active and passive, must be continually stressed by commanders at all levels.

b. The development of measures to reduce the number of casualties inflicted by mines and booby traps requires a sustained effort by units making contact with these devices. Personnel involved in the reporting

RegtO 3435.1A
19 January 1967

and analysis of VC mine warfare and the development of countermine warfare training programs must make continuing efforts to develop effective countermeasures and conduct training that will enable the Marine in the field to best combat this enemy tactic.

c. The total effort of the countermine warfare program within this regiment continues to be aimed at providing the individual involved in these type contacts with all available training, information, equipment, and support which will enable him to avoid becoming a casualty from these devices.

6. Action

a. Commanding Officers will:

(1) Insure that all officers and non-commissioned officers are instructed in the required action set forth herein, by reference (b), and Section VIII of reference (a).

(2) Insure that all personnel involved in operations in areas where mines and booby traps are employed are properly instructed in countermine warfare. In this regard:

(a) Make maximum effort to ensure attendance by all personnel at Third Engineer Battalion Mine Warfare School.

(b) Conduct local training lectures and demonstrations weekly utilizing NCOs familiar with the local situation, and Third Engineer Battalion Mine Warfare School Contact Teams.

(c) Maintain current rosters of the state of training of personnel in countermine warfare.

(d) Conduct frequent inspections to insure that individuals at every level are aware of and are employing all approved countermine warfare procedures and techniques.

(3) Direct unit leaders operating outside of secure camp or billeting areas to maintain a minimum interval of 15 meters between personnel at all times.

(4) Initiate a program to determine the specific act or omission leading to each casualty inflicted by a mine or booby trap. The ultimate aim of this program will be to derive better procedures, techniques, and training programs toward the reduction of mine and booby trap casualties.

(5) Insure that distribution of enclosure (1) is made down to squad leader level.

ENCLOSURE (1)

DECLASSIFIED

RegtO 3435.1A
19 January 1967

b. Officers and SNCOs will:

(1) When the senior Marine in the area or location, enforce the action required by references (a) and (b) and this order, regardless of organization.

(2) Relieve on the scene any individual junior to them in rank who is in violation of these instructions. If the individual is from an organization other than that of the relieving senior, the circumstances of the relief will be reported to this headquarters and to the Commanding Officer of the individual concerned.

c. Individuals will:

(1) Familiarize themselves with the contents of enclosure (1) prior to entering areas in which mines and booby traps may be employed.

(2) Submit through proper channels the discovery of new or improved techniques and procedures for improving methods of countering enemy mines and booby traps.

7. Reports

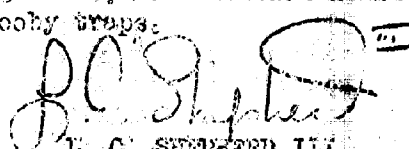

a. In each case in which a mine or booby trap is discovered or detonated, a spot report will be submitted in accordance with reference (c). If casualties are sustained, a statement of the distance of each casualty from the device will be included.

b. SITREPS will include a separate paragraph to report the information required by reference (d).

c. A Mine/Booby Trap Report (enclosure (2)) shall be submitted to this headquarters within three days of each incident that occurs. Copies of enclosure (2) will be reproduced locally.

8. Dissemination. Commanders are directed to insure dissemination of the contents of this order to each individual in this regiment.

9. Recommendations. Addressees are encouraged to solicit and submit any recommendations, on a continuing basis, for additional and improved methods of countering enemy mines and booby traps.

L. C. SHERMAN III
By direction

RegtO 3435.1A
19 January 1967MINE WARFARE DO'S AND DON'TSDO'S

1. Keep a minimum of 15 meters distance between Marines whenever you're out of a secure camp area.
2. Use tracked vehicles - tanks, LVTs, or Ontos - not only to check out roads for mines, but also in advance of infantry to set off Anti-Personnel mines. If no tracked vehicles are available, cattle driven through a suspected paddy or field will serve the same purpose.
3. Keep a safe distance - at least 100 meters - from tracked vehicles.
4. Use supporting arms - artillery, 90mm tank fire (especially canister), flame tanks - to uncover or explode mine fields.
5. Know everything it's possible to know about VC mines. The indoctrination lecture you sleep through could cost you, or your buddy, your lives.
6. Heavily patrol and ambush roads susceptible to VC mining.
7. Employ tank searchlights and sniper teams along roads susceptible to VC mining.
8. Be particularly cautious in opening gates, or using an "easy" break in a hedgerow that by-passes a gate. Know that areas around temples and shrines are also favorite VC mining grounds.
9. Remember, if you're in a position of leadership, that you're responsible for the safety of your men. Make them spread out - keeping at least 15 meters between men.
10. Keep your flak-jacket (if you're wearing one) zipped and buttoned. An unbuttoned flak-jacket will not protect you as it should from a mine exploded to your front.
11. Destroy every cell of a used battery. An undestroyed battery can provide the VC with the basic, indispensable ingredient for a controlled mine.

Enclosure (1)

ENCLOSURE (1)

DECLASSIFIED

RegtO 3435:1A
19 January 1967

DON'TS

1. Don't bunch up anytime, under any conditions. Why make it easy for the VC?
 2. Don't ride in, or on tracked vehicles. A VC mine will make little impression on a tracked vehicle - the impression it makes on you could be a scar which you might someday show your grandchildren.
 3. Don't drive vehicles in the tracks of vehicles made hours or days before when you can possibly avoid it by using another route.
 4. Don't let the VC fool you. Recently a Marine on a sweep operation picked up and opened a suitcase which exploded, causing three casualties. Treat all objects as "suspicious" and give them wide berth until an engineer has inspected them to make sure they're not booby trapped.
 5. Don't get fooled into chasing a couple of VC that might well have drawn attention to themselves, then bugged out in a direction that would lead you into a minefield.
 6. Don't rush willy-nilly to the aid of mine casualties. The VC nearly always employ more than one mine in an area to take advantage of our tendency to move immediately to give aid. The minimum number of men to give aid should move in to aid the wounded, using the same route the wounded man took into the mined area. If you move carelessly you are liable to detonate a mine yourself, and end up killing the man you were trying to help, and possible others as well.
 7. Don't forget that the VC have studied you carefully for the purpose of making you a casualty. For instance, a shade tree in an open area is frequently mined - the VC know you'll rest there if you're given the chance. The same approach applies to small rises in the ground surrounding a paddy. The VC know we prefer the higher ground, and will frequently emplace their mines there rather than in the paddy.
 8. Don't fall into patterns of movement on patrols. Vary your routes just as many times as the terrain allows. Walking through a paddy and getting your feet wet is far less painful than taking the only trail in the area that may be mined. Beware the obvious routes into or out of an area.
 9. Don't forget that one of the best mine detectors ever created are your own eyes. Watch the movements of local Vietnamese. They know where the mines are, and avoid mined trails or areas. Watch for and know the trail markers VC use to warn their own people that the trail is mined.
- REMEMBER: No VC mine has your name on it. Every VC mine is marked "to whom it may concern," and mines concern every one of us. A moment's carelessness on your part may be regretted for the rest of your life. Be alert-stay alive.

HEADQUARTERS
3d Marines
3d Marine Division (Rein), FMF
APO San Francisco, 96602

3/RRB/lwg
3480
31 January 1967

From: Commanding Officer
To: Commanding General, 3d Marine Division (Rein), FMF (Attn: G-3)

Subj: Lessons Learned, January 1967

Ref: (a) CO 3dMarDiv 271438Z Apr66

1. In accordance with reference (a), the below listed lessons learned are submitted.

a. Item: Preparation and Utilization of Demolition Kits for Infantry Squads during Patrols and Operations

Discussion: Experience has demonstrated that a continual requirement exists for the rifle squad to have the capability of destroying enemy caves, fortified emplacements, booby traps, duds, etc. Frequently, the squad is forced to simply mark an enemy emplacement or booby trap, and call for assistance in destroying it. This causes a double effort to be made, as well as failing to immediately deny the enemy use of the particular emplacement, booby trap, etc. The problem contains two aspects:

(1) Insuring that each squad is provided with the necessary demolition materials to cope with any situation.

(2) Insuring that personnel in the squad, or a portion thereof, are fully trained in the proper use of demolitions, and that they are capable of destroying subject emplacements, caves, booby traps, etc.

In SitReps, it is frequently stated that a friendly squad has destroyed an enemy cave or booby trap with an M-26 grenade. This indicates that the squad did not possess the capability of properly destroying the enemy items, for it is well known that an M-26 will not destroy a cave, and the use of an M-26 in destroying a booby trap or unknown explosive device is both extremely dangerous and generally unsuccessful.

Recommendations:

(1) That an all-purpose demolition kit composed of the following items be authorized for an infantry squad.

ENCLOSURE (1)

DECLASSIFIED

Subj: Lessons learned, January 1967

- (a) 8 blocks (2½ lbs each) of Composition A
- (b) One pair of blasting cap crimpers
- (c) 10-15' timed fuze
- (d) 5-7 M1 fuze igniters
- (e) 10 M7 non-electrical blasting caps with protective container
- (f) 20-30' detonating cord

(2) That components of subject demolition kits be carried in a protective demolition bag. A haversack or carrying bag for C-4 (with one of the blocks of C-4 removed to make space for other components of kit) will suffice for this purpose.

(3) That a minimum of four men per squad, in addition the squad leader, be properly and adequately trained in the use of demolitions and the proper techniques for employment of demolitions in destroying enemy fortifications, booby traps, mines, etc.

b. Item: Switchboard Operations

Discussion: Several adverse effects associated with switchboard operations have been noted in Vietnam, during monsoon season. One of the most common and more troublesome of these problems is "cross-talk". This results when the wire conductors connected to the terminals in the rear of the switchboard become moist or wet, thus allowing transmission current to cross channels through the moisture around the terminals. When a switchboard is established in a more forward area, the tactical situation requires the location of the equipment to be underground or at least completely sandbagged. This situation adds to the moisture problem which in turn increases "cross-talk".

Recommendation: That, in addition to normal and continuous preventive maintenance, the back cover of the switchboard be removed and all terminals be exposed to a strong light, e.g. a 500 watt searchlight (type ADRIK), in order to dry moisture and eliminate "cross talk".

c. Item: Waterproof Container for Guard Mail

Discussion: Units in Vietnam are often widely dispersed; yet the requirement for the delivery of guard mail on a daily basis continues, regardless of the distance. During the monsoon season, paper type guard mail containers are often exposed to the weather and have proved to be quite unsatisfactory.

Recommendation: That plastic or canvas type containers be utilized for guard mail deliveries to protect the contents during inclement weather. Furthermore, such containers could be employed during dry, dusty periods to prevent the accumulation of dust on the documents.

Subj: Lessons Learned, January 1967

d. Item: Axle Stud Nuts on M422A1 "Mighty Mite"

Discussion: During muddy, wet weather, such as the monsoon season, the undercarriages of motor vehicles become caked with mud and other soggy debris. Because of this "messy" situation, many drivers, if not properly supervised, are reluctant to crawl underneath the vehicle to properly service it - lubrication, tightening of screws and bolts, etc. This is a potentially hazardous condition, particularly in the case of the M422A1. With this vehicle, the nuts that hold the propeller shafts to the studs on the front and rear axle shafts have a tendency to loosen easily and come off if not checked and retightened regularly, especially when the vehicles are subjected to frequent operation over rough terrain. If the nuts are not retightened, the holes in the propeller shafts become enlarged, as a result of excessive play between the sides of the holes and the studs. Because of this excessive play, the studs are subjected to constant abuse and are eventually broken loose from the axle shaft, possibly resulting in the complete loss of both the propeller shaft and the axle shaft.

Recommendation: That, through constant and careful supervision by supervisory personnel, the undercarriages of vehicles be properly maintained, particularly during the monsoon season and that, in the case of the M422A1, the above mentioned axle stud nuts be checked, and retightened when necessary, at least twice a week.

e. Item: Water Buffaloes

Discussion: The employment of vehicles to make water runs ties up many vehicles which might be employed elsewhere were they not required for water runs. If an attachment were placed on the rear of each water buffalo, so that buffaloes might be hitched in tandem, it would require fewer vehicles and less time to make water runs. The vehicles that are now used to tow water buffaloes are capable of pulling at least two full buffaloes without damage to either the full buffaloes or the vehicle. Such action would decrease the time required to refill water buffaloes, the number of prime movers required for water runs, and the amount of fuel expended for water runs.

Recommendation: That attachments be placed on the rear of each water buffalo so that water buffaloes may be towed in tandem.

f. Item: Power for Night Lighting Devices on Artillery and Mortar Aiming Posts

Discussion: Night lighting devices for artillery and mortar aiming posts normally require BA-30s for power. The new remote AN/GRA-39, which is used with the AN/PRC-25, requires twelve (12) of these batteries for operation, thus causing a shortage of BA-30s. However it has been found that any single cell battery, supplying only a minimal amount of power, will operate the night lighting devices. The single cell unit of the BA-386 which is used in the AN/PRC-25, still possesses enough power

Subj: Lessons Learned, January 1967

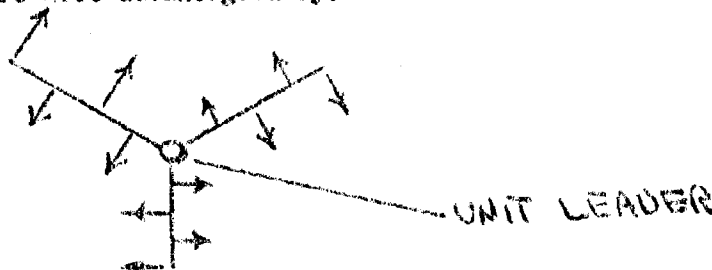

to operate night lighting devices even after it is no longer capable of supplying power to the AN/PRC-25.

Recommendation: That the expended single cell unit of the BA-386 be retained and employed as a substitute power source in lieu of BA-30s, for night lighting devices in artillery and mortar aiming posts.

g. Night Nighttime Positions

Discussion: Aggressive offensive action, including vigorous pursuit of the enemy, requires speed of maneuver, maximum utilization of available time, and economy of force. Because of the dense foliage which predominates much of the terrain in Vietnam, the speed and ease with which units can deploy into a nighttime defensive perimeter is often hindered, thus limiting the execution of effective offensive action. In certain instances it is more advisable to consider deploying for nighttime positions in ambush fashion rather than in perimeter form.

An example of an ambush which also fulfills the function of a nighttime defensive position is the "Yankee Formation" or "Y" ambush. Such a position employs three legs running out from a central point with a strong point at the end of each leg. Each of the legs is capable of firing in either direction and is capable of supporting the other two legs. Such a deployment is accomplished by having alternate individuals within each leg cover sectors to the left or right of the long axis of the leg. The center of the "Y", where the three legs join, is the control point and the position of the unit leader. From such a position he can control or maneuver his unit most advantageously.

This formation is highly effective as an ambush and as a defense against directional attack from any angle. Such a formation can be easily altered to conform to the terrain requirements and can be utilized by any small sized unit. Furthermore, its triangular concept is easily adaptable to Marine T/O.

The primary advantage of such a formation is that in heavy foliage units may deploy in it far more easily than in a perimeter defense. Each leg is given a general direction of deployment and need only be tied in at the center; consequently there is no problem of shifting lines or

DECLASSIFIED

Subj: Lessons learned, January 1967

clearing additional lines of communication to the center of a perimeter. Also there is less movement involved in deploying in such a manner.

Recommendation: That small unit leaders be trained for night-time defensive positions in ambush fashion, particularly in the "Yankee Formation", in lieu of a defensive perimeter, in areas where the foliage is dense and/or when time allowed for setting-in is limited.

425 Million Sandbags Used

S&S Washington Bureau
 WASHINGTON — The Vietnam war is a long way from being over, but the Defense Supply Agency is doing its best to put it in the bag—the sandbag that is—to protect men and equipment.

More than 425 million sandbags have been bought by DSA for the Army, Navy, Air Force and Marine Corps in Vietnam.

According to DSA, the bags, if placed end to end would circle the earth more than five times and looking ahead to its monthly issues of more than 12 million

sandbags the U.S. could reach the moon on sandbags by June, 1968.

DSA also reports that the annual demand has now leveled off to some 146 million sandbags at a cost of about \$40.4 million. For the statistically minded, DSA adds that some 4.4 million tons of sand will be needed to fill them up.

Another interesting sidelight into the magnitude of the supply effort for Vietnam is seen in the amount of photographic supplies — chiefly for aerial reconnaissance film—that is used by the

Air Force and the Navy. In the last 12 months, the supply agency supplied 141 million feet of film, or enough to make almost 13,000 feature length motion picture films.

In the war on Vietnamese bugs, DSA has also gone all-out. In the last 12 months the supply agency bought about 15 million units of insect repellent and insecticides. This will increase during the next six months to 19 million units for an annual cost of about \$18 million. This is enough to supply a "bug bomb" to every household in the U.S.

NARRATIVE REPORT

29 Jan 1967

1. Arrangements were made with the CAM IO District Chief for 100 Montagnard Refugees from HUNG PHU I (YD113580) to begin cutting grass and brush along Rte. 9 on 30 January 1967. The same arrangements were made for 100 Vietnamese Refugees from the CUA Valley to begin cutting grass along Rte. 558 on the same date. The workers will be paid in kind with Bulgar wheat and cooking oil provided by USAID. It is hoped that this project will enable the refugees to be more self-supporting and will make Routes 9 and 558 much safer to travel on by eliminating many likely areas for ambush.
2. On 27 January, a meeting was held at the 3d Marines CP for all the Civil Affairs and Medical Representatives in the 3d Marines Area of Operations. (Reference: Narrative Summary of 22 Jan 1967) The purpose of the meeting was to plan and coordinate the Civic Action Program in our area. All the units were represented at each meeting and prior to the meeting, each unit had conducted a survey of its assigned area and had contacted the local officials in that area. Many interesting and informative points were discussed concerning each unit's initial observation of its area. Captain JAMES from 3d Marine Division G-5 was present to comment on the availability of Civic Action materials and how to go about getting them. At present each unit is continuing its survey of its area, making liaison with local officials, getting a MEDCAP Program started, and finding out what Civic Action Projects are needed in the area.
3. A MEDCAP Program was begun at the CAM IO District Dispensary by the Regimental Surgeon and Corpsmen. The dispensary is large and has good facilities, however, it has been without a much needed Doctor and adequately trained medical personnel for quite some time. The doctor and Corpsmen now treat patients in the Dispensary three days a week. The doctor also hopes to begin a training program for medical personnel within the District soon.
4. A luncheon will be hosted by Commanding Officer, 3d Marines at 1200 on 3 Feb 1967, at CAM IO District Headquarters, just prior to the Vietnamese "Tet" celebration and as an initial effort to get our Civic Action Program off to a good start. The 3d Marines are sponsoring the function and are inviting the Hamlet, Village, and District Officials within the assigned Area of Operations and a limited number of representatives from each unit participating in the Civic Action Program. Gifts will be distributed to the District and Village Chiefs, and at the conclusion of the luncheon, limited quantities of soap and salt will be made available to the Village Chiefs for distribution to the members of their villages.
5. On 6 Feb 1967, also in connection with TET, a visit will be made by 3d Marines representatives to two hospitals in DONG HA and QUANG TRI. At this time, comfort kits will be distributed to the PF, RF and ARVN patients.
6. 11th Engineer Battalion and 3d Battalion 3d Marines have negative reports to submit for this period.

Weekly Civil Affairs Report

1. Based upon the new assignments of areas of responsibilities by the 3d Marine Civil Affairs Officer, an informal visit with the District Chief, CAM 10 District, Hamlet Chiefs, HUNG PHU I and HUNG PHU II, was conducted on 26 January 1967. During the visits, a survey was conducted to determine what projects were needed for each hamlet. As a result of this survey, the following projects are visualized for accomplishment in the near future.

a. Water supply is limited in both hamlets. It has been determined that a minimum of five wells are needed to meet sanitation and agricultural requirements.

b. At present no hamlet agricultural program is in existence. To provide sufficient food staple, seed will be required according to each hamlets needs. The hamlet of HUNG PHU II has requested assistance in the form of a bulldozer for clearing of overgrown rice paddies.

c. A sanitation program is needed in both hamlets. Neither has heads and the hamlet of HUNG PHU I needs guidance in policing of hamlet area.

2. Medcap visits will be initiated for the hamlet of HUNG PHU II during the first week of February. The visits will be conducted twice weekly in conjunction with the visits to HUNG PHU I.

Narrative Report

22 Jan 1967

During this reporting period, a letter was prepared and sent out by this Headquarters assigning each major unit within the 3d Marines area of operations a specific Civil Affairs area of responsibilities. The letter also announced a planning and coordination meeting for 1000 27 Jan 1967, and requested that the Civil Affairs representative and medical representative from each unit be present at this meeting. Prior to this meeting, reconnaissance of assigned areas and liaison with local officials should be made, and unit representatives should come to the meeting prepared to discuss topics to include but not limited to:

- a. Proposed MEDCAP locations in assigned area.
- b. Frequency of MEDCAP visits.
- c. Recommended Civic Action Projects based on initial survey.

A copy of this letter has been forwarded to Division G-5 (fwd).

2d Bn, 3d Marines and 1st Bn, 12th Marines performed the MEDCAP listed on page one. The latter reports a noted increase in the number of dysentery and upper respiratory infection cases recently in HUNG PHU I (YD 113580), probably due to the newly arrived refugees from the CA IU area.

3d Bn, 3d Marines has a negative report to submit for this period.

Narrative Report

15 Jan 1967

On 12 Jan, the Regimental Civil Affairs Officer accompanied 2d Bn, 3d Marines Commanding Officer on a visit to CAM 10 District Headquarters to discuss possibilities and projects for Civic Action in CAM HUNG, CAM NGHIA, and CAM CHINH Villages with the District Chief and Sub-Sector Advisor. As a result, a detailed plan for Civic Action in these areas has been submitted to Commanding Officer, 3d Marines from Commanding Officer, 2d Bn, 3d Marines. As soon as a complete plan for 3d Marines is formulated, copies of it will be forwarded to Division and MAF G-5.

On 15 Jan, a Solutium payment was made to victims of an explosion of an Artillery round in THAN RO Hamlet (YD 992441), CAM PHU Village on 7 Jan. The payment was made in kind, as the people expressed the desire to be paid in rice rather than piasters, to avoid the inconvenience of them having to go all the way to CAM 10 to purchase rice.

2d and 3d Bns, 3d Marines have negative reports for this period.

DECLASSIFIED

NARRATIVE REPORT

8 January 1967

On the morning of 7 January 1967, Echo Company, 2d Battalion, 3d Marines conducted a modified county fair operation in the hamlet of DOG KINH in the CUA Valley.

The hamlet was surrounded at three o'clock in the morning by two platoons of Marines and one platoon of the 122nd RF Company. At 0800, a loud speaker was set up by representatives of the 244th PsyOps Company, U. S. Army and the Hamlet Chief instructed all residents of the hamlet to report to hamlet headquarters.

On 6 January the CAM IO District Chief had distributed 20 kilos of rice and 10 meters of cloth per family in preparation for the "Fair".

The hamlet headquarters is located in a large fenced off area which was ideal for assembling the population. The 3d Marine Regimental Surgeon conducted a MedCap operation and treated 238 men, women and children for various illnesses. The MedCap team also conducted a TB survey by administering skin tests to persons complaining of chest problems, to be checked further in about three days. They were hampered in smooth patient flow, due to shortage of personnel for crowd control, and the assistance of only one interpreter.

Initially the people were entertained by recorded Vietnamese music provided by the 244th PsyOps team but later in the morning a VIS team with a guitar player and female vocalist provided live entertainment.

The CAM IO District Chief made several speeches to the people as did members of the VIS team. The U. S. Army Sub-Sector Advisor and representatives of 3d Marine Division G-5 accompanied the District Chief.

While the people were being entertained representatives of the 15th CJT and the Vietnamese National Police conducted a security check and with the aid of a rallier spotted 19 persons on the "black list". These people were to be picked up later by the National Police. One platoon of Marines and an RF platoon conducted a search of the hamlet with negative results.

The fair was brought to a close about 1500 when the VIS distributed clothing (mostly children) as the people returned to their homes.

The modified county fair with a limited objective was moderately successful; however passing out food the day before seems to take something away from the operation. The people should have brought food along with them, but for some reason this was not done, probably due to the lack of communication caused by the language barrier.

During the Fair, the Commanding General, 3d Marine Division (FWD), Commanding Officer, 3d Marines and Commanding Officer, 2d Battalion, 3d Marines arrived, took note of the proceedings and spoke with the District Chief.

ENCLOSURE (/)

DECLASSIFIED

DECLASSIFIED

It is hoped that the corpsmen from 2d Battalion, 3d Marines will be able to hold a daily sick call in the village, and that a doctor from Camp J. J. CARROLL will be able to make a weekly visit for consultation.

3d Battalion, 3d Marines has a negative report to submit for this reporting period.

DECLASSIFIED

DECLASSIFIED

NARRATIVE SUMMARY:

1 January 1967

A meeting was held this week at CAM IO with the District Chief and the Sub-Sector Advisor to discuss the possibility of establishing a home in the CAU Valley for the homeless children there. The units at Camp J.J. CARROLL would like to raise a fund to get this project started. No decisions or plans were made at the meeting for two reasons however;

1. It has not yet been confirmed that there is a definite need for a "home" in the CUA Valley. The number of homeless children is still unknown.

2. If we would assist the people in establishing a home such as this, a means of continuing support has not been found yet. So this possible Civic Action Project is being considered at present but will require more investigation.

Now that the 3d Marines Area of Operations has been expanded, it is expected that the Civic Action program will be enlarged accordingly.

2d and 3d Bns have a negative report for this reporting period.

VCS stated he was a VC and agreed to guide Co K & other VC & to weapons that he had cast within the last ten days. Based on this information K Co Rein- forced with a squad of RF jumped off K Co CP at 310000H: Arrived obj area 310645H. (E) Search of Hamlet at 046444 resulted in the capture of 2 VCC & 2 VCS. VCS were released when it was determined that they were parents. VCC admitted being VC. They are being detained and will be forwarded to Crowd. Weapons were not found and K Co: returned to CP 311130H.	XXXX
