2. Narrative Summary.

DOWNGRADED AT 3 YEAR INTERVALS;  
DECLASSIFIED AFTER 12 YEARS  
DOD DIR 5200.10

*[REDACTED]*  
a. General.

Completion and improvement of the MLR was the primary objective of July's operations. As of 21 July the MLR was complete, with defensive positions dug and protective wire laid. As soon as the wire was in, the companies started setting in pyrotechnics and other warning devices, in order to make the protective barrier more effective. At FORT LE MY and IRON BRIDGE RIDGE all primary positions were covered with reinforced sandbag covers, and many alternate positions were also being reinforced and covered. Besides improving and completing positions, new protected positions for such supporting weapons as Ontos, LVT's and mule-mounted 106's, were also prepared at all locations. Within the 2/3 CP, drills were held to improve the mobilization process of the CP security force, and frequent checks were made to insure that each man knew his mission and that specific sections, such as the S-2, S-3 and S-4, can function efficiently even when in a complete defensive status.

*instituted* Patrols and mobile combat outposts assumed increased importance in July. The volume of these small unit actions was stepped up considerably in order to detect, decrease and destroy V.C. infiltration into the eastern and western portions of the 2/3 TAOR adjacent to the MLR. As of 10 July, *the Battalion* mobile combat patrols, Platoon sized units, which would establish several base camps during the day, conduct search and clear patrols, to set up squad-sized ambushes at night, as well as conducting night operations to find infiltrators on the move. (See enclosure (2). As companies changed positions they assumed responsibility for the mobile combat patrol in their portion of the TAOR. Throughout the month, squad-sized patrols and ambushes were sent out daily. Included in this was a daily early morning patrol of the MSR, as far as coordinates 918792, to detect any mines, firing devices or evidence of covert activity. The squad-sized patrols in the area of FOX FORT instituted the policy of spot checks of indigenous personnel, through the use of an interpreter, and have come up with several wanted V.C. and V.C. suspects.

There were fewer large scale operations in July, with the emphasis placed on small unit actions. However, 2 companies combined on a search and clear operation, in order to establish security for the landing of BLT 2/9. There were several company size sweeps of village complexes, in conjunction with security-providing missions (as in the case of Secretary MC NAMARA's visit) and for search and destroy purposes. At the end of this reporting period, there is a company-sized operation in progress to seek routes to DONG DEN and gather any evidence of V.C. activity in the adjacent areas of the 2/3 TAOR.

## b. Narrative.

On 1 July, Company "E" was located at FORT LE MY (897821) Company "F" had the mission of Mountain Defense Company, by placing squads on hills 312, 368, and in the pass at 907777; one platoon established position at 912762; and one platoon and the CP group were located at FOX FORT (901775). Company "G" was in the 2/3 CP area as Battalion Reserve Company "H" all

UNCLASSIFIED

[REDACTED]

was located at IRON BRIDGE RIDGE (896801). Companies "E", "F" and "H" all continued improving their defensive positions and laying protective and tactical wire. As of 1 July 94% of all positions were completed and 75% of all protective wire was in.

On the night of 1 July Company "H" had a Marine wounded in the chest when he crawled in front of the defensive lines and failed to respond to challenges.

On 2 July, General KRULAK, GMC FMFPAC, toured the 2/3 CP and TAOR areas by helicopter.

On 3 July Company "H" had a Marine suffer burns of the lower legs while burning off brush for fields of fire.

On 4 July, Company "E" crossed the CA DE SONG and swept the TRUONG DINH area from 870834 to 894832. One Platoon acted as a layout patrol covering the area northeast of 896837. Company "E" made contact with 6 V.C. (2 armed with automatic weapons) at 881837. Artillery was called but was ineffective. There were no casualties, and the layout platoon returned on 6 July (See enclosure (3)).

On the night of 5 July, Company "H" had one KIA. He was killed by another Marine on sentry duty. This matter is still under investigation.

On the morning of 6 July, Company "G" relieved Company "H" at IRON BRIDGE RIDGE and Company "H" became Battalion Reserve.

On 7 July Company "E" conducted a sweep and search of the HOA Q (935825) and WUAN THIEN (935837) areas, and then established blocking positions at their LOA. Company "H", with 4 mine detector teams from Engineers unit attached, swept RED BEACH 2. Both companies report negative contact, no casualties. The mission of both of these companies was to provide security for the landing of BLT 2/9 at RED BEACH 2 (see enclosure (4)).

On 11 July a civilian woman was wounded by the firing of Company "E" night ambush, and was evacuated for treatment.

On 12 July Company "H" relieved Company "G" at IRON BRIDGE RIDGE. Company "G" then moved to FOX FORT to assume the mission of the Mountain Defense Company. Company "F" returned to the CP as Battalion Reserve.

While registering an M-60 machine gun at Company "H" position, a round ricocheted off a rock at a 90° angle 70 meters to the West and wounded a civilian woman in the left buttock. She was evacuated to BAS forward for treatment.

On the evening of 14 July a 4.2" mortar round landed in the Company "E" CP area (899820), 2 men from Company "E" and 1 Corporal were killed, and 9 others wounded, 6 seriously. A fire mission was being conducted by howtars located at coordinates 894801 to the vicinity of coordinates 900838. The arty FO was adjusting when a round fell short into a group of men gathered

UNCLASSIFIED

around a litter bag in the 2nd platoon CP area. The TAG party at the scene called for helicopter evacuation, which was completed by 1900.

Company "G" relieved Company "E" at LE MY FORT on 17 July and Company "E" became Battalion Reserve. On 18 July Company "G" and elements of Company "E" and Company "H" commenced on operation to provide security for the visit of Secretary of Defense MC NAMARA and his party. Company "G" swept the village at 904818 from West to East and East to West and defended the village to the West, and also swept the village at 901814 from North to South and South to North and defended the village to the North. Elements of Company "G" set up security positions at 8982, 9082, 8981 and 9081. First Platoon of Company "E" provided road security on the LE MY road between the 2/3 BAS forward and the North Bridge (898813), and another platoon swept the village at 898814 from East to West and West to East. Elements of Company "H" swept the wooded area in the vicinity of 895815, and established security positions (see enclosure (5)). Secretary MC NAMARA and party visited the LE MY BAS and village complex on the morning of 18 July.

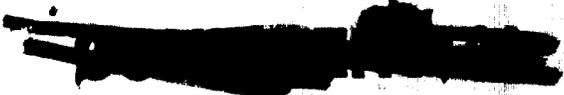

On 20 July Admiral SHARP visited 2/3 at the LE MY BAS and village complex. Company "G" provided security for the Admiral's visit, and continued to clear trees and brush for a new village area at GS 9183.

As of 21 July the 2/3 MLR was complete, with 99.6% of the positions complete and 98% of the protective wire laid.

On 24 July Company "E" replaced Company "F" at FOX FORT. Company "F" and elements of Company "H" conducted a search and destroy operation in the DONG SONG/NGOG SON Valley (860760-852785) to destroy V.C. locations. (See enclosure (6)). This operation was modified on the night of 23-24 July as new intelligence data indicated a V.C. Battalion located at 840796, 860796, 840770, and 860770. First Platoon Company "H" moved to blocking positions in the vicinity of coordinates 854802 during the night of 23-24 July. Company "F" proceeded to sweep northwest as far as 854784. Companies "F" and "H" platoons then set up base camps and conducted platoon sized sweeps and patrols during the day, with ambushes put out at night. On the morning of 26 July Company "F" and elements of Company "H" junctured at 850776 and returned to their CP's. Company "F" apprehended one V.C., who was on the V.C. wanted list. (See enclosure (8)).

On 27 July Company "F" relieved Company "E" at FOX FORT, with Company "E" moving to LE MY FORT. Company "H" maintained their positions at IRON BRIDGE RIDGE, and Company "G" moved from LE MY to the 2/3 CP as Battalion Reserve.

On 29 July, Company "E" commenced an operation to find and recon a route over the western slope of DONG DEN in the vicinity of coordinates 838828 (see enclosure (7)). One Platoon from Company "E" left LE MY FORT to juncture with patrol from Company "H" at 865793. One platoon from Company "H" conducted patrol operation in the vicinity of HOA MY (850795). The "E"

Company platoon then proceeded to recon possible routes over DONG DEN suitable for moving an entire company. Elements of Recon Battalion supported this operation by conducting surveillance missions for all elements, and acting as radio relay station. On 30 July the E1 CP was at 848798, with patrols moving to the West and Southwest to seek routes over DONG DEN. E1 returned to their CP area on the afternoon of 31 July after being unable to find a suitable route, due to heavy overgrowth and lack of trails.

Operation Order 335-65

Ref: (a) Map: TOURANE, 1:50,000, Series L701, Sheet 6659 III

Time Zone: II

1. SITUATION.

a. Enemy forces. Current intelligence reports indicate increased guerrilla infiltration into eastern and western portions of TAOR adjacent to MSR.

b. Friendly forces.

(1) Company "E" at Le My (899821)

(2) Company "H" at IRON BRIDGE RIDGE (897799)

(3) Company "F" at FOXTROT FORT (912763)

(4) Third Marines provides additional supporting arms, as required.

2. MISSION. Second Battalion, Third Marines establishes mobile combat outposts to the East and West of the MSR in designated areas.

3. EXECUTION.a. Concept of operations.

(1) Second Battalion, Third Marines establishes reinforced platoon sized mobile combat outposts both East and West of the MSR to search out and destroy Viet Cong forces attempting to infiltrate into the TAOR.

(2) See Annex A (Operation Overlay).

b. Le My Security Company.

(1) Assume mission of mobile combat outpost in eastern area of operations.

(2) Search out and destroy any Viet Cong forces attempting to infiltrate into the TAOR from the East.

(3) Conduct maximum operations during the hours of darkness.

~~CONFIDENTIAL~~**CONFIDENTIAL**

ENCLOSURE (2)

**CONFIDENTIAL**

If faced with a superior force, conduct a withdrawal to the IIR notifying higher headquarters of the size, disposition, and direction of movement of enemy force.

(5) Conduct additional patrols, as required.

b. Iron Bridge Ridge Company.

(1) Assume mission of mobile combat outpost in western area of operations.

(2) Search out and destroy any Viet Cong forces attempting to infiltrate into the TAOR from the West.

(3) Conduct maximum operations during the hours of darkness.

(4) If faced with a superior force, conduct a withdrawal to the IIR notifying higher headquarters of the size, disposition, and direction of movement of the enemy force.

(5) Conduct additional patrols, as required.

c. Mountain Defense Company.

(1) Be prepared to assume the mission of mobile combat outpost in western area of operations.

(2) Conduct additional patrols, as required.

e. Battalion Reserve Company.

(1) Be prepared to assume the mission of mobile combat outpost in the western area of operations.

(2) Conduct additional patrols, as required.

f. Coordinating instructions.

(1) Areas to be patrolled will be designated by Battalion.

(2) Report location and resupply point using Code system indicated in Annex B (Mobile Combat Outpost Code).

(3) Additional operating areas of 4000 meters square will be designated by giving center of area coordinates.

**CONFIDENTIAL****CONFIDENTIAL**

CONFIDENTIAL**CONFIDENTIAL**

at Battalion Combat base once during daylight, once at dusk, and once during the night.

4. ADMINISTRATION AND LOGISTICS.

- a. Resupply will be daily by helicopter.
- b. Submit resupply coordinates by 1000H on day of resupply.
- c. Submit medical evas requests to TAMP on Battalion Twp Net.

5. COMMAND AND COMMUNICATION/ELECTRONICS.

- a. Submit situation report every three hours.
- b. Use standard pyrotechnic code.
- c. Command Posts.
  - (1) Report Base Camp location after each move.
  - (2) Battalion Command Post as previously reported.

 30 July 65

From: Commanding Officer  
 To: Commanding Officer, 3d Marines (Attn: S-2)  
 Subj: Patrol Report  
 Ref: Map, AMS L701, Sheet #6659 III  
 Encl: (1) Route Overlay

1. Information derived from Squire Hotel-1's patrol is as follows:

Designation of Patrol. Squire Hotel-1 patrol

A. Size and Composition of Patrol. 43 men (Rein platoon)

B. Mission. Conduct deep penetration patrol to seek and destroy any VC forces. Destroy any food stuffs or supplies that could be used by the enemy. Bring back any intelligence.

C. Time of Departure. 231600H July 65.

D. Time of Return. 261500H July 65.

E. Routes out and back. Shown on overlay.

F. Terrain. Terrain was very fugged and thick over most of the patrol route. The only trails found by the patrol were around the HOA MX area (850795). The rest of the time the patrol had to cut it's own way.  
 (see overlay) (1) From starting point to the red indicator (1) it was relatively easy going (low hills and fields).

(2) From point (1) to point (2) it took the patrol 3.5 hours to move. This terrain was very steep and covered with high elephant grass. Also the hills were wooded and they were 15 to 20 foot drop offs.

(3) This area was also covered with elephant grass, but was fairly easy going around HOA MX. There is a clear running stream that is drinkable. As the patrol continued up this stream, there was a branch off that was followed. This water was now potable. The terrain became

ENCLOSURE (8)

very thick again and the patrol climbed a hill at 845793 to get bearings.

(4) From point 3 to 4 it took the patrol 4 hours of traveling with only about 20 minutes break. There were numerous hills in this area that were steep and thick. The hills offered no visibility from their tops because of the thickness of the canopy. The hill at 841788 offered the best vantage point. The patrol could see a great distance in every direction.

(5) The patrol linked up with Foxtrot Co. at 843777.

(6) The patrol returned with Foxtrot Co. to their fort and then down the road to H Co. position. The patrol saw no evidence of anyone having been in the area from the time they left Friday until their rendezvous with Foxtrot Co. no one seen. The only trails were around HOA NY and these were grown over in some places

G. Enemy. None encountered.

H. Map Corrections. N/A

I. Miscellaneous Information. The patrol found some papers near the bottom of hill 841788 (turned in to Regimental S-2; 29 July 65).

J. Results of Encounters with the Enemy. N/A

K. Condition of Patrol. The patrol left with 3 canteens and 5 meals. The first 24 hrs. the patrol got no extra water. From 1000 Sunday (25th) until the patrol linked with Foxtrot Monday the patrol had no water except for rain water collected. The patrol encountered leeches along the entire patrol route, especially from point 2 to point 4. Some men had as many as 6 leeches on them at one time.

L. Conclusions and Recommendations.

(1) The original overlay was not followed because of the time element.

(2) Movement at night is very hazardous in most areas.

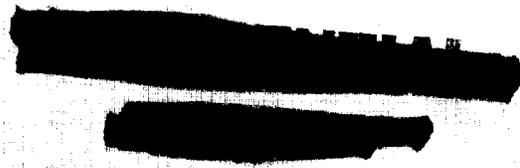

(3) It is recommended that jungle slings be used on rifles. This is a benefit because of the need to use hands to climb and clear paths.

(4) Due to water shortage and need for secrecy (no resupply) it is recommended that these type patrols carry 3 or 4 canteens.

DECLASSIFIED

- 
- (5) Jungle boots are recommended for these operations. The patrol had a number of blisters from constantly wet feet. Also fungus infections developed.
- (6) Some type of leech repellent should be utilized, they become very bothersome. Insect repellent worked against them but it washed off fast from perspiration and water.
- (7) Grenade pouches should be used. Even though grenades were taped they got wet and the tape came off. The fuze also loosened and started to unscrew.
- (8) Each patrol should have well sharpened machetes. The curved bamboo knives used by the Vietnamese are better than the issued machete.
- (9) Jungle utilities are very good. Men who wore regular utilities sweat more and were more uncomfortable than those who wore jungle utilities.
- (10) Extra ammo for the AR carried in cloth bandolers, around the Marines body deteriorated from sweat and rounds are easily lost. There should be some better ways to carry this ammo.
- (11) Radio contact was good. We carried an extra PRC-10 and 2 PRC-6's for inter patrol communications.

Subj: Patrol Report

Ref: Map, AMS L701, Sheet #6659 III

Encl: (1) Route Overlay

1. Information derived from Squire Foxtrot Recon/Combat Patrol.

Designation of Patrol. Squire Foxtrot Recon/Combat patrol.

A. Size and Composition of Patrol. 45 man patrol. (1 plt., 1 sqd rockets, (1 gun), 1 sqd Machine Guns. 2 Corpsman, 1 artillery scout.)

B. Mission. Recon and patrol from coord. 861762 to coord. 832771 checking area for VC activity, camp sites, possible helicopter LZ, checking streams, trails, and vegetation, engaging enemy if sighted.

C. Time of Departure. 242000 July 65.

D. Time of Return. 260800 July 65.

E. Routes out and back. Shown on overlay.

F. Terrain. Followed trail shown on aerial photos, and noted on overlay. The patrol traveled for 6 straight hours at night with only one 20 minute break. The trail was used by vehicles probably 6 months or more ago. Trail was easy to follow. However, thick overhanging brush covered most of the last half of the trail. By aerial photos trail was to take the patrol up the left side of the valley at coord. 8377. However, the patrol ended up in the valley floor and unintentionally deviated from proposed route. The patrol stopped at coord. 836768 and slept (with security) until daybreak. A few (60-80) yds. down the trail the marshes started and the trail ended. The patrol noted a small hill to the direct front and tried to go around the left side heading toward high ground, to find trail shown on aerial photos. However, due to the terrain (thick heavy brush,

ENCLOSURE (8)

DECLASSIFIED

[REDACTED]

marshes, vines), the patrol could make little headway but did note jungle type terrain on sides of high ground with 80 to 100 ft. trees, thick vegetation. It was too dark to note anything within this area. The patrol returned on marshy area toward first small hill and climbed up the front slope making it's own trail (hill was thick elephant grass, vines, small trees), to the top of the hill. The top of the hill had a small area that was less vegetated. However, the patrol still had an overhead canopy of trees. At this point the patrol sent out 2 squads on the rear slope and right side of hill (facing hill from east to west). Patrol to the rear noted a small area that had or could be used for platoon size resting area, coord. 831765. Other squad reported a stream and continuation of the trail. The patrol followed trail a short way to rear then returned due to the time element. When both squads returned it was time to try and locate trail out as the patrol could not possibly return cross country traveling at night so the patrol returned along it's same route part way then set up an ambush along the trail and at first light returned the rest of the way along the trail to observe and take note of map corrections. Also to be able to return within time limit. On return route the patrol noted thick vegetation on both sides of trail and set up ambush at coord. 851764. At day-break returned along trail back to DONG SON. Then to assembly area by 0800.

#### Sequence of Events.

- 242000 July - Left Company CP at coord. 861762.
  - 242300 July - Lost radio contact with "F" Co, contacted "H" Co and relayed traffic.
  - 250230 July - Stopped to rest at coord. 836768.
  - 250330 July - Noted truck or trucks traveling to patrol's rear with lights on. Could not get bearings on location of vehicles.
  - 250230 July - Heard dog bark around 1240 could not establish direction or location.
  - 250530 July - Started moving again and lost trail 60-80 yds ahead. Followed valley floor to left side of small hill to direct front. At resting area ran across numerous leeches and bees or hornets.
  - 250630 July - Relayed messages to Fox trot through "E" Co.
  - 250740 July - Ate chow in marshy area under cover - uncomfortable due to hornets, leeches, and [REDACTED] grass
- [REDACTED]

**CONFIDENTIAL**

- 250800 July - Sited cow dung and various resting areas for small units (squad size or less). However no particular pattern and coord. unavailable.
- 250900 July - Returned back towards small hill as vegetation was too thick and realized the patrol could not make the trail on left side of valley by night fall. Also wanted to get bearings and exact location.
- 250940 July - Started climbing small hill noted earlier.
- 251015 July - Reached top of hill sent 1 squad to reverse slope one other squad to right side of hill. 1st squad reported area pushed over with enough room to bed down a company. However, sign of activity were old. 2nd squad located continuation of trail and large stream with stream bed 20 ft. across, fresh water.
- 251500 July - All squads returned- took azimuth to (believed) hill 312, patrol's location at 831765 could not see any other prominent feature to shoot azimuth. Trees too small and too far between to climb. Visibility zero.
- 251550 July - Started on recently found trail and filled canteens with stream water.
- 251630 July - Located continuation of trail, started on return route.
- 251800 July - Noted trail was littered with 6 rations, PRC 10 battery, and 1 inc auxiliary grenade canister. Believe recon left trail littered.
- 251810 July - Noted road cutting across trail shot azimuth of 210° to hill 200 at coord. 842740. Road ended 20 yds. on other side.
- 251820 July - About 100 yds. further down trail another road went to the left (going west to east) went down 60 yds then went into V shaped both roads ended 150 yrd. down and large enough for 6 Bys. LZ noted at the V so coord. would be approx 842740. LZ was also noted W marshy area at coord. 833766.
- 251830 July - Thought being followed so set in 2 ft. size ambush along trail, after 30 minutes no contact returned on route.

~~CONFIDENTIAL~~~~CONFIDENTIAL~~

251900 July - Noted many open fields on right side of road going (West to East). Good areas for LZ's.

252030 July - Set in ambush at coord. 851763.

260600 July - Returned along trail towards company assembly.

260800 July - Arrived at company assembly area. No houses, people, or animals noted along route.

G. Enemy. None encountered.

H. Map Corrections. Noted on overlay.

I. Miscellaneous Information. VC activity was in area but 3 months or more ago.

J. Results of Encounter with the Enemy. No contact made.

K. Condition of Patrol. Tired, morale was good considering no sleep (except 6 hours) for 3 days and nights. Plus patrolling and continual movement. Leeches slowed our movement.

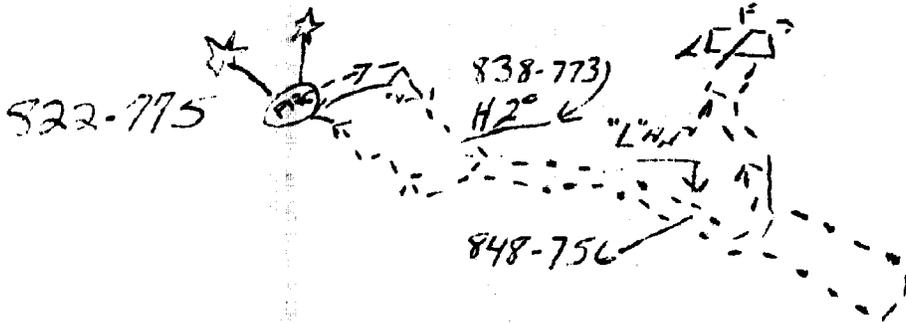

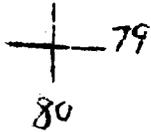

L. Conclusions and Recommendations. Water is easily available, would recommend using rice, bullion cubes, and haver-sack full of chow; poncho and weapons for future units. Also extra PRC 16, and insect repellent for leeches and insects. Knives used by Vietnamese peasants could be used to cut brush. Trails must be used. Coord. hard to establish due to thick terrain. Would also recommend taking climbing ropes.

Subj: Patrol Report

Ref: Map, AMS L701, Sheet # 6659 III

Encl: (1) Route Overlay

1. Information derived from Squire Foxtrot patrol is as follows:

Designation of Patrol. Squire Foxtrot patrol (-) (Rein)

A. Size and Composition of Patrol. 2 platoons (-), artillery FO team, TACP, one interpreter, and detachment of Popular forces.

B. Mission. To act as reaction force for F-3 and H-1 operating in high ground to west. Recon valley area between EW grid line 75 and EW grid line 80 to determine VC activity if any. Also to determine if areas of DONG SON, THANH AN, and NGOC SON were inhabited. Also to determine if gasoline or diesel oil could be used to burn rice paddies.

C. Time of Departure. 240600H July 65.

D. Time of Return. 261400H July 65.

E. Routes out and back. (Shown on overlay)

F. Terrain. Patrol moved along road from 890769 to junction of main road and trail at 871762. To this point road was good and generally clear on both sides with small ridges (50-100 ft) along each side. From junction patrol split and one platoon swept DONG SON while other platoon swept hamlet at 868763. Then F Co (-) followed trail to 858765. Along entire distance tall (6-10) grass grow right down on trail. Trail was very solid, but grass made entire route easy to ambush. At 858-765 patrol attempted to put unit on line but found small finger completely overgrown and difficult to move through. Small fingers shown on map are almost impenetrable with elephant grass, vines and tall trees. In areas show as rice

~~CONFIDENTIAL~~

paddies, grass has grown into a tangled mess. A platoon could be lost before it covered 100 yds. in some of the areas. As a result the patrol was forced to follow the main trail and investigate every side trail or pathway. The patrol went into thick, heavily overgrown areas which looked like possible hiding places, but had negative results. The patrol moved through the entire valley area in this manner up to area of HOA MY (850795) with negative results. Patrol returned to 856765 at 241800H and set up CP. Found clear stream at 855766 and filled canteens. Set out two ambushes and remained in place until 250600.

At 250700 sent F Co (-) to area of DONG SON to conduct detail search of area and be in position as a reaction force for F-3. At DONG SON F-2 captured VC by the name of Luc. No other contact was made. Patrol did not turn up any evidence of VC activity in DONG SON area. At 1400 sent unit into THANH AN and NGOC SON area for recon of village and to be in position as reaction force for H-1. Found huts to be deserted with few signs of recent habitation. Found a few suitcases with cloths, a few chickens, and a few fields of corn, peas and peanuts, but no rice paddies. All rice paddies were overgrown with elephant grass. Huts did not contain any pots or pans or evidence of recent cooking fires.

In course of the day sent detachment of PF's back with VC to Mr. Nam's. On way back, PF's reported a VC mine indicator (three stones on road) at 860765, but with negative results. Returned to CP and set out two ambushes until 260600.

Moved entire unit to area THANH AN and NGOC SON at 260900 after linking up with F-3. Effected juncture with H-1 at 261100. While in area attempted to burn corn and pea fields with gasoline and diesel oil with negative results. Fuel proved to be too light. After attempting to burn fields F Co plus H-1 moved back to Foxtrot CP at 902-775 at 261130.

Excellent LZ was found at 859764 and all through village area of THANH AN and NGOC SON. Many rice paddies in area of DONG SON could be used as LZ's. Good water is available at 865760.

G. Enemy. 1 VC picked up.

H. Map Corrections. Shown on overlay.

I. Miscellaneous Information. None

J. Results of Encounter with Enemy. One (1) VC captured in vicinity of DONG SON. Circumstances surrounding capture: F-2 saw suspect herding cattle in area of DONG SON. Went to check and found he had no ID card. Platoon cmdr of PF detachment knew suspect and told F-2 to take man in. PF

~~CONFIDENTIAL~~

**CONFIDENTIAL**

platoon commander based his decision on the fact that his mother had been working tea plants in the vicinity of the bridge that blew killing two Marines and saw suspect in area. PF's mother indicated man was herding his cattle along road when he saw jeep approach, he ran over to side of road and made plunging motion with his hands. At that instant the jeep blew up. Suspect then gathered cattle and headed on down the road. PF urged P-2 to take man in. When they got to Mr. Nam's house they discovered suspect's name was Luc. This name was on 2/3 black list as a man known to plant mines.

One VC document, a small booklet, was found in a hut vicinity 854778. Sgt. Nam (interpreter) indicated booklet contained a list of all persons in the area who had contributed to the VC and the amount each had given.

K. Condition of Patrol. Men were in good shape. No illnesses or injuries in course of patrol.

L. Conclusions and Recommendations. Units can operate in area without resupply as plenty of good water is available. Only limiting factor would be amount of rations that could be carried.

Haversack, poncho and normal arms and equipment are all that is needed for an effective patrol.

Suggest rice, MIC's, candy, and dried fruit would make a good ration for patrol. Villages are inhabited on a very limited basis and in some areas not at all. Crops of corn, peas, and peanuts were growing, so people must be tending them. Huts showed little evidence of occupation. All rice paddies seen had weeds growing in them and were not being used.

As far as burning crops is concerned, suggest thickened Napalm for wetting down and then flamethrower for burning. Gasoline may work on filled rice paddies but it will not work on dry crops.
