## PART II

NARRATIVE SUMMARY

1. Personnel and Administration. Casualty reporting, condolence letters and general administration were completed at the 1st Battalion, 5th Marines (Rear) located in Chu Lai, RVN. Some difficulties were encountered due to lack of communications between the Battalion at Que Son and the rear echelon at Chu Lai. Personnel losses due to casualties and normal rotations caused the Battalion to drop below 90% of its manning level on 11 May 1967 and it remained below 90% of the manning level for the rest of the month.

2. Enemy, Weather, and Terrain.

a. During the initial period at the Que Son Combat Base there were almost daily sightings of small groups of enemy varying in size from 1 to 20 enemy, believed to be from the 105th Battalion, NVA which was reported to be operating generally to the northwest and southwest of the combat base.

b. Information volunteered by local Vietnamese villagers who led a patrol to a "hidden" booby trap resulted in the harmless destruction of this device by engineers. On another occasion information from the Que Son District Headquarters enabled the Battalion to kill 4 enemy and capture 2 others along with 4 weapons.

c. During the month of May the weather in the Que Son area was hot and humid with partly cloudy skies and some light showers.

d. Terrain consisted of rice paddys and hedgerows with dense undergrowth on the foothills of the surrounding mountains.

3. Organizations and Operations.

a. On 1 May 1967, 1st Battalion, 5th Marines (-) (Rein) was committed to Operation Union and was involved in that operation against enemy forces until its termination on 17 May 1967.

b. With the termination of Operation Union the Battalion was assigned the task of establishing a new Combat Base at Hill 51 (BT 025343) in the vicinity of Que Son, RVN. The Combat Base was initially subjected to constant and accurate enemy sniper fire and on two occasions received incoming mortar fire. Intensive search and destroy operations, air strikes and artillery missions, including H&I fires and counter mortar fires, were conducted to eliminate these threats. Within one week the Battalion had virtually eliminated the sniper threat and enemy activity had substantially decreased.

Enclosure (1)

c. Tactical fire was laid, fighting positions were established and fields of fire were cleared as the combat base defenses were continually improved.

d. District Popular Forces troops regularly accompanied the Battalion's units on patrols during the period 17-31 May 1967.

e. On 26 May 1967, 1st Battalion, 5th Marines were committed to Operation Union II which carried over into the next month.

4. Training. Newly arrived personnel fired the M-16 rifle for familiarization and classes were conducted on the safety precautions, maintenance, care and cleaning as prescribed in current directives. The indoctrination program for personnel newly arriving in Vietnam continued to be emphasized with a 4 day training period conducted at the Battalion Rear.

#### 5. Logistics, Equipment and Supply.

a. On 1 May 1967 a detachment of H&S Company was established in the Regimental Logistical Support Area at Tam Ky, RVN (BT 296235) to coordinate support for the Battalion. This detachment continued to function after Operation Union terminated and supported the combat base through 31 May 1967. The Battalion had adequate logistical support as 124 tons of equipment and supplies were helicopter lifted into the base during the period 17-31 May.

#### 6. Civil Affairs/Civic Action.

a. The initial liaison established by the Battalion with Que Son District Headquarters and local village chiefs was entirely satisfactory. A Civic Action Survey checklist was completed to determine population, number of schools, teacher-student ratio and other data necessary to establish a Civic Action Program.

b. A MED/DENT CAP program was instituted on 20 May and 225 Vietnamese were treated in the next 11 days. The villagers were contacted and provided laundry and barber services for Battalion personnel during this period.

7. Comptroller Activities. The Battalion Supply Account was reconciled and additional funds were received to support operations through the Fourth Quarter FY 1967.

8. Communications. Upon occupation of the Combat Base at Hill 51 on 17 May, a limited wire system was installed and communications were established with the 5th Marines by radio. A radio relay shot was attempted but equipment failure caused substantial interruptions in its operation. During the rest of the month the wire system was improved and expanded.

6. SUPPORTING FORCES.

A. Air Support. The 1st Marine Air Wing provided air support for the 1st Battalion, 5th Marines during Operation Union.

UNCLASSIFIED

(1) Helicopters. At L Hour D-Day six CH-46 helicopters were utilized to insert the 1st Battalion, 5th Marines into the operational area at LZ CONDOR vicinity coordinates (BT 027225).

The Helicopter Support Team detachment from the 1st Shore Party Battalion coordinated and controlled helicopters for medical evacuations and resupply missions throughout the operation.

(2) Fixed Wing. On D+3 fixed wing aircraft provided CAS to assist in an emergency medical evacuation in vicinity coordinates (AT 964266). On D+10 fixed wing aircraft were used extensively to attack an NVA Battalion and provide covering fire for medical evacuations in the vicinity of Hill 110 at coordinates (BT 036385). All areas where fixed wing aircraft were utilized in direct support of the 1st Battalion, 5th Marines, were searched by ground units. During the latter part of Operation Union, fixed wing aircraft were utilized to strike targets by use of TPQ 10 radar on known VC activities during the night.

(3) TAC/A. Throughout the operation C-1E aircraft were utilized in the role of TAC/A. TAC/A rendered invaluable assistance in their observations of enemy movement and activities, aerial reconnaissance and controlling CAS. Their prompt response to all requests greatly enhanced the successful accomplishment of all assigned missions.

B. Artillery. Artillery support for the 1st Battalion, 5th Marines was initially provided by Battery F, 2nd Battalion, 11th Marines. On D+3 the artillery support functions were assumed by Battery D, 2nd Battalion, 11th Marines reinforced by Battery W, 1st Battalion, 11th Marines and Battery W, 2nd Battalion, 11th Marines.

(1) The first extensive use of artillery by the 1st Battalion, 5th Marines during Operation Union was on D+4 for sniper suppression fires during a medical evacuation. Excellent target coverage was obtained. On D+10, artillery was extensively used in support of Company C, to lay smoke screens and fire high explosive missions as directed. All areas where artillery was used in direct support of the 1st Battalion, 5th Marines were searched by ground units.

(2) Throughout the operation, H&I fires were fired nightly on targets located during the day and on routes of communications to harass and deny the enemy the use of these facilities. Approximately 100 rounds of artillery were fired nightly as H&I fires.

## 7. INTELLIGENCE.

a. Estimate of VC strength, location and Disposition in the Objective area.

(1) Forces anticipated in the immediate area.

UNIT	LOCATION	STRENGTH	TACTICAL DISPOSITION
2nd NVA Div Hqs	BT 0022	500	UNCLASSIFIED

UNCLASSIFIED

3rd NVA Regt	BT 0945	1800	Unknown

RQ-22 NVA Bn	BT 0219	300	Unknown
RQ-24 NVA Bn	BT 0219	150	Unknown

(2) Intelligence was initially provided to this unit by the 5th Marine Regiment and 1st Marine Division FREINTREP 5-67.

b. Enemy Strength and Situation actually determine during the operation.

(1) Estimate of actual strength was determined to have been about 1,250 men, including VC and NVA units.

(2) All cadre and soldiers display a high degree of self sufficiency and appeared ready to put forth a determined defense.

c. VC/NVA Units Identified.

(1) 3rd NVA Regiment

(2) 105th Bn.

d. Significant Intelligence Gained.

(1) It was discovered that the Vietnamese populace were friendly and of a cooperative nature when approached for information but at times were hesitant to volunteer information in apparent fear of VC reprisal.

(2) The suspects captured displayed obvious fear when approached by Marines.

(3) Interrogation of detainees indicated a strong VC infrastructure, consisting of Youth, Farmers, and Women's Association.

(4) The objective of this operation was to fix and destroy VC forces and supplies in the objective area.

e. Terrain.

(1) Critical Terrain Features.

- (a) NUI NONG HAM (Hill 185)
- (b) NUI DA HAM (Hill 218)
- (c) NGHI HA SA (Hill 110)

(2) The terrain in the objective area of HIEP DUC/THANH BINH Valley is composed of paddyland surrounded by densely forested mountains with elevations of 100 to 445 meters. Paddyland was interspersed with thickly brush covered hills.

UNCLASSIFIED

**UNCLASSIFIED**

(3) Obstacles. Many rivers and streams traverse the objective area.

(4) Avenues of Approach. Trails in the operational area were good to excellent for foot troops.

(5) Cross Country Movement. No unusual problems were encountered.

f. Weather. Throughout the operation, weather was characterized by partly cloudy skies and for the most part, unrestricted visibility.

8. Mission. On D-Day at L Hour the 1st, Battalion, 5th Marines landed by helicopter in the operation area at LZ CONDOR vicinity coordinates (BT 027225) and moved to consolidate forces by linking up with Company C (Rein) which had been previously committed under operational control of the 3rd Battalion, 5th Marines. After effecting linkup with Company C (Rein), the 1st Battalion, 5th Marines commenced search and destroy operations in a westerly direction to kill or capture VC, weapons, and supplies.

9. Concept of Operation.

Commencing on D-1, 1st Battalion, 5th Marines (-)(Rein), moved by motor convoy from the Battalion Combat Base vicinity coordinates (BT 397 145) to the LSA at TAM KY vicinity coordinates (BT 297235). 12. Administrative Matters.A. Supply

(1) Initially each individual Marine carried a marching pack, six MCI's, three canteens, individual weapons and a basic allowance of ammunition. Six MCI's proved sufficient for an individual for a period of 3 days. On the 3rd day a routine resupply of rations was effected. Water was plentiful while units operated in the flat lands of the HIEP DUC/THANG BINH VALLEY area. On occasions when units moved to high ground, water was delivered by helicopters from the LSA. Ammunition was delivered to the units by helicopter, either by routine or emergency

resupply. No problems were encountered with ammunition resupply.

(2) Operation UNION, unlike previous operations, posed some unique logistical problems which were precipitated by a series of events igniting the operation. FLSG-B had let some stocks become depleted and had transferred others to the Da Nang area, subsequently, Battalion supply was required to extensively supplement some resupply requests.

(3) On occasions, it was difficult to obtain timely and sufficient helicopter support and there were incidents when resupply requests were left at the loading lane at the LSA for a period of 2 to 3 days. Usually these requests were not of a priority nature.

(4) The organization of the HST detachment consisted of a command team, with the Battalion Command Group and one team attached to each letter company. One radio net was used to connect the command teams. The procedure for requesting resupply/medical evacuations was initiated by the unit commander through the company HST. The company HST relayed requests to HST personnel at the LSA and notified the appropriate unit when helicopters were on the way. The appropriate team then changed frequencies to contact the incoming helicopters and guide them into the LZ. On occasions it became necessary for the company HST to submit requests directly to the LSA. This was necessary only when the company team failed to have communications with the command HST. A minor difficulty incurred by the HST's was the arrival of C&C helicopters in the area that were not on a standard frequency.

(5) Poor communication between the Battalion in the field and the Battalion in the rear greatly hampered Battalion S-4 efforts. Throughout the operation it was necessary to use a relay located at the LSA. Subsequently, problems which could have been readily clarified with direct communication took considerable time.

B. Maintenance.

(1) All personnel carried individual cleaning equipment for maintenance of individual and crew served weapons. Weapons were cleaned daily. It was noted throughout the operation that selector switches on the M-16 rifle would become jammed in one position and the weapon would not fire properly.

C. Treatment of Casualties and Evacuation and Hospitalization.

(1) Medical support for Operation UNION was rendered in the field by corpsmen attached to the letter companies, and by 3 corpsmen and the Battalion surgeon traveling with the Command Group. The company corpsmen would initially treat the casualty and determine the seriousness of the wound received by the individual. The HST would

UNCLASSIFIED

UNCLASSIFIED

requested a helicopter, as directed by the unit commander, to effect a medical evacuation. Casualties were medically evacuated by helicopter to a Collecting and Clearing Company located in the LSA, the casualties were given additional medical assistance and were further routed to field hospital, located in the Da Nang and Chu Lai area or channeled to hospital ships as required. On occasions wounded personnel were evacuated directly to field hospital or hospital ships bypassing the Collecting and Clearing Company, located at the LSA.

D. Transportation.

(1) On D+1 the 7th Motor Transport Battalion provided trucks which moved the Battalion to the LSA, located in Tam Ky. Trucks arrived at the combat base on time and no problems were encountered while the Battalion was enroute to the LSA. 7th Motor Transport Battalion provided the Battalion Rear with transportation when requested to transport items of supply and personnel to the LSA. Vehicular transportation provided this Battalion was punctual throughout the operation.

(2) Helicopters were used initially to insert the Battalion into the operating area. During the operation helicopters were utilized continuously to transport needed supplies and personnel to the Battalion and extract casualties from the operating area.

E. Communications.

(1) A few difficulties were encountered with communications during the operation. The operating range between Battalion and the 5th Marines made it necessary for the 5th Marines to establish a radio relay site at NUI LAC SON. When terrain made the use of the relay site unusable, reconnaissance units in the area acted as a relay to the 5th Marines. No further problems were encountered with communications.

F. Medical Evacuation.

(1) In spite of extremely high temperatures, this Battalion avoided heat casualties by rigid control of salt and water. No cases of heat exhaustion were found among personnel in the Battalion. The omission of upper torso body armor during this operation aided in the reduction of heat casualties.

(2) It was noted by the Battalion Medical Officer that little more was done for casualties at the Collecting and Clearing Company at the LSA, than what could be done by the field corpsmen attached to the letter companies.

13. Special Equipment and Techniques.

(a) CS gas was successfully employed to extract the enemy from caves and tunnels.
