PART II
NARRATIVE SUMMARY

During the month of July 7th Communication Battalion continued to provide Communications Support to the Chu Lai Installation Coordinator until deactivated on 15 July, and continued Support to Task Force Oregon and the many other units in Chu Lai TAOR by operating the Chu Lai area Communication Center and area Switchboard, and in addition, continued Communication Support to the 1st Marine Division, 3rd Marine Division, III MAF, 2nd Republic of Korea Marine Brigade and the Chu Lai Defense Command. On 21 July, Communication Company, 7th Communication Battalion, was relieved by "C" Company, 37th Signal Battalion of operating the Chu Lai Minor Relay Station.

Communication Support Company (-) remains OPCON 3rd Marine Division and is located in Dong Ha. Detachments of Communication Company continued to support Force Logistic Command, 1st MP Battalion, and other 1st Marine Division Units. Radio operators were provided to 7th Marines for Operation Pecos. Radio Relay and Construction Company continued detachments in support of 1st Marine Division Headquarters and for those operations conducted by the 1st Marines, 5th Marines, and 7th Marines. Radio Relay support is being provided to the 1st MAF by operating two AN/TRC-97 terminals at MAG-36, Chu Lai. In addition, a detachment of Radio Relay and Construction Company was in support of the 3rd Marine Division, operating terminals at Khe Sanh and Phu Bai.

The Construction Platoon of Radio Relay and Construction Company completed the rehabilitation and expansion of the Chu Lai Cable System by installing polyethylene cable, improving existing pole lines, and removing as much WD-1/TT field wire as possible. A crew of the Construction Platoon installed 14,000 feet of 25 pair polyethylene cable and 24, 40 foot poles for the 5th Marines cantonment at Hill 63.

The FM Radio net established by the Battalion to support the CAP Units in the Chu Lai area continued to be beneficial in providing the Units with a rapid means to submit reports or request assistance of any type from the Battalion. For tactical purposes it continued to provide a Common Net for the CAP's.

7th Communication Battalion retained Administrative Control of the 7th CIT and of those CAP Units located in Task Force Oregon TAOR. Administration of the Units ADCON to the Battalion and those services such as medical, postal, supply, and motor transport continued to function smoothly.

One AN/TSC-15 Communication Central, belonging to Communication Support Company was destroyed by enemy artillery fire at Dong Ha. This was the second loss of an AN/TSC-15 Communication Central by the Battalion this year.

Total casualties for 7th Communication Battalion during July were two KIA, three WIA, and fifteen WIANE. During this period the CAP Units had two WIA, and one WIANE. One CAP remains MIA.

In the Civic Action Program twenty-five MedCaps and three DentCaps were held with a total of six-hundred-thirty people receiving treatment. Two children were evacuated to medical facilities at Chu Lai for treatment and then returned to their homes. Base visits and recreational swims for hamlet children were conducted and coaches from 7th Communication Battalion conducted volleyball and softball play sessions. Pen Pal letters between U. S. Girl Scouts and hamlet's girls were exchanged.

a. Class I. No problems encountered.

b. Class II

(1) Fixed plant teletype equipment repair parts (Enclosure 2) continue to be a major problem. Requisitions submitted to FLC should be returned to NSD Chu Lai for filling, as this installation stocks a high percentage of these items. Instead, because the information concerning the availability of these items is not entered into FLC computers, the parts are being put on order to outside sources resulting in excessive delay.

(2) The FM radio capability of this Battalion is seriously affected because of lack of repair parts for several FM equipments. As noted in paragraph 3, eight (8) Hand Sets, H-138 are short. This means that eight (8) FM sets are made inoperable. Four (4) AN/RC-110s are inoperable because of four (4) RT-52As which are needed. (See Enclosure 2). One (1) Radio Set AN/RC-25 is on a normal deadline. (See paragraph 6). Batteries, BA-386 for the AN/RC-25 radio are in very short supply. (See paragraph 3). While taken singly these deadlined equipments do not constitute a major problem when lumped together the FM capability of the Battalion is seriously affected.

4. Significant Problem Areas. None not previously mentioned.

5. Maintenance Situation

a. The deadlined High Pressure Cleaning Unit (Enclosure 2) impairs the Motor Transport Section in that, without it, it is difficult to get vehicles cleaned properly. In this locale rapid deterioration could result.

b. The lack of 400 cycle power provided by the PU-587 (See paragraph 6) and the PU-565 generators (See Enclosure 2) affects both the operational and the maintenance capabilities of the unit. Without the 400 cycle power provided by the PU-587, the Radio Set AN/TSC-15 cannot be operated. The PU-565 provides power for the maintenance shop for testing and repair of equipment.

*** Communication Equipment which is on the supply account of HqBn, 1stMarDiv.

NOTE #1: On 21 July initial repair parts and modules for the AN/TRC-97 were received. While this will greatly assist in the maintenance of this items, these sets are still deadlined for parts.

NOTE #2: Of eight (8) AN/MRC-83s on deadline, seven are downed for radio parts and one is downed for motor transport parts.

NOTE #3: The excessive deadline of SF-86s is due to the failure of line and operator packs. Due to quantity of SF-86s on hand this is not considered a problem area at the present time.

SECRET

ENCLOSURE (1)

SECRET

NOTE #4: The excessive deadline of the Radio Set AN/MRC-63 has been due to the lack of repair parts for the transmitters and receivers.

NOTE #5: The excessive deadline of the PU-587 generator is due to the inability of this equipment to hold up under sustained operations. A serious problem exists in that these generators are the primary power source for the AN/TSC-15 Communication Central.

7. Significant Maintenance Problem Areas

a. The lack of repair parts in range and depth for KW-7 and KW-26 on line crypto equipment continues to be a problem area. See Enclosure (2).

8. Services Situation. No shoe repair services are now available in the Chu Lai Area for Marine Corps personnel.

9. Significant Transportation Problems. None.

10. Other Items of Interest

a. At the present time this battalion is short 4 PU-587 generators. (See Enclosure 2).

b. Three (3) Radio Sets AN/MRC-87s have not been received from the supply source. The ability of the battalion to perform its mission as regards air-ground communications is hampered thereby. (See Enclosure 2).

c. One (1) Generator Set PU-482 has been put on Code X evacuation. A replacement has been ordered (See Enclosure 2), but not yet received. The ability of this unit to provide camp power and power to various deploying sub-units is curtailed.

d. Three (3) Battery Chargers PF-3240A, are on order. While the employment of the HF radio equipment which they support is not currently at a high level, the battalions capability within this area is limited by the lack of these. (See Enclosure 2).

e. This unit is currently short two (2) Radio Relay Sets AN/MRC-62s. See Enclosure 2. The radio relay mission of the battalion would be enhanced by receipt of these sets.
