f. Equipment. Ammunition and supplies are adequate. However a series of five operations in jungle canopy has greatly accelerated the deterioration of all type gear. Large scale replacement is in progress and, no shortages are considered critical to the point that the Battalion cannot perform its mission.

g. Forward Relations. Normal.

h. Logistics.

(1) The overall logistical situation is good within the Battalion. The battalion is capable of performing any mission assigned.

(2) Transportation was provided by truck during the month. The road is open to all vehicular traffic.

i. Civil Action. The Civil Action during the month has been one of getting acquainted with the new area and making liaison with the Hien Duc District Officials. This has been done and a friendly working relationship has been developed with the District.

A total of 1705 Vietnamese civilians were treated during the month by the Gar area of the CAP positions. In the field there are five (5) CAPs and medical supplies are furnished to these for the operation of a permanent H.M.A.P. The Battalion surgeons from this Battalion and the 1st Engineer Battalion conduct weekly outposts at two different locations to give assistance to the more seriously ill.

Two body traps were reported to Marines out on patrols during the month. The individuals that reported the body traps were rewarded by a rewards payment and seemed well pleased.

Scrap wood and cardboard is being saved by the Battalion to give to the Hien Duc District to assist them in construction of a Refugee Village in the back.

j. Administration. No significant problems arose during the month.

k. Personnel. Replacements have been adequate to keep the Battalion at C-1 level. The total strength is 35 Marine Officers, 1035 Marine enlisted, 3 Navy Officers and 56 Navy enlisted.

l. Communication.

(1) Radio. Radio remains the primary means of communication. No major problems were encountered.

CONFIDENTIALM. Weather.

- (1) Maximum Temperature: 100° F
- (2) Minimum Temperature: 88° F
- (3) Mean Temperature: 90° F

N. Intelligence.(1) Enemy Situation during the period 1-31 August 1967.

(a) The enemy continued use of mines and booby traps as principal means of warfare. A noticeable increase in the use of rifle grenades as a means of harassment was noted.

(b) There were many low level Agent Reports of Battalion and Regimental size units within the battalion NOR. One main force unit and two local units are presently accepted as operating proximate to this local. Those units are the 402nd (MP) Sapper Battalion (AMA-F-89) and V.25 (LF) and the G-16th (LF) Company.

(c) There is one major infiltration route in or adjacent to the present TAOB and that is through HAPPY VALLEY to the west. This area and the area of the Song Tay Loan river are principal supply routes.

(4) Operations:

(1) Operation YAZUL was started on 26 August 1967 in HAPPY VALLEY. Operation YAZUL is an effort to locate and destroy enemy forces believed to be connected with recent rocket reports. In addition this Operation is designed to locate and develop the trail not used by the enemy for movement.

(2) Significant Trends noted during the subject period.

(1) An increase in terror activity directed toward the local populace has been noted. This is primarily directed toward influencing the elections.

(3) Enemy Weapons, Equipment and Supplies Destroyed/Captured.

(4) Terrain The terrain in the 30th Division's present sector, comprising of one main District (HUEB 000) consists of flat, open paddies interspersed with considerable areas of forest and dense vegetation. The western portion of the 30th is mountainous with heavy secondary vegetation with a high canopy over-growth. Line of sight is generally rated good to poor because of the heavy rainfall and incoming monsoon season. Cross-country movement for tracked vehicles is poor due to the past heavy rains. There are two perennial rivers in and adjacent to the 30th, the Hong Yen on the east and the Song Tay Loan to the north bisecting the 30th. The Song Tay Loan is fordable for personnel at any point at this time, but impassible for Tracked Vehicles due to soft sand. Song Tay Loan will not be passable during the upcoming monsoon season. The principal terrain features are Hill 10, 22 and 41, with many small associated hill-tops in the eastern portion of the 30th and many mountain and valley complexes in the western 30th.

100-443886-1

(3) All the work only to the operating forces was accomplished by Detachment 1, 1st, 2nd and 3rd. The first company of the Detachment was 1st July 1967.

(G) In the morning (21 July 57) half of troops, artillery battery of six 122mm guns, Class 15, & into the operational area went according to plan and without incident.

(3) Recupply requests from the companies were submitted prior to 2000 and 1100 hours. In order to ensure the staging of recupply items for pick-up by recupply helicopters, recupply was limited to Class I and Class V items. The afternoon recupply mission primarily lifted Class II and other recupply items. This system greatly simplified the consolidation of daily recupply requests in the operational area.

(6) The difficulty was present and with some/clear and extensive repair during the operation.

(7) The only difficulties occurred on 2-2 when the company couldn't be contacted because of a combination of circumstances: helicopter availability, poor flying conditions and unsatisfactory 12 to resolve the difficulty. The other incident involving helicopter company occurred on 2-1. (Company 12-12) when a 12-12 pilot refused to land in a prepared 12 which was used by the company for flying. The crew of 12-12 was not at a height of approximately 50 feet above the water.

a. Reliability. There were no significant problems encountered in this operation.

b. Communication

(1) Radio was the primary form of communication. Automatic communication with 12-12 was received by Regiment. It was satisfactory most of the time, but manual communication had to be used when the automatic unit failed.

No serious problems were encountered with communications within the valley. Communication to the company was lost once, the solution being a change of channel.

(2) 12-12 was used with satisfactory results. It was noted that the use of ground planes did not seem to affect the quality of the communications. Several positions were tested, again without much improvement.

(3) 12-12 was used to link up the company. The 12-12 served as a terminal, with 12-12 to the company 12-12. 12-12 and 12-12 and company phones. The company had 12-12 used in the company 12-12 with satisfactory results. Both 12-12 were used to all phones in case of the line being cut.

(4) Batteries were used as required. The only problem was that the company came in for battery reports at the same time, but we never ran out of batteries, as even one was damaged. Spare parts were adequate.

(5) In the future the antenna will carry wire tags for the lines, and plastic covers for the 12-12, which had no a failure due to moisture.

14. Communication

a. Operations were a coordinated operation involving the movement of combat elements to the objective area by helicopter. The operation area was situated outside of normal supporting arms range. Success was completely dependent on helicopter support. The unique aspect of the operation involved insertion of Bay 6, 5th Bn, 11th Airborne into the operational area by using CH-53 helicopter to provide direct support artillery for the operation. Their subsequent extraction was also by CH-53 helicopters.

b. Defensive patrol activity was conducted throughout the operational area. The eastern portion of the valley was found to be primarily a transient area. Further to the east indications were found or longer term more permanent VC habitation. It is considered that the area vicinity of 4G 1067 is the natural choke point for two main VC infiltration routes into the DANANG area.

c. The entire valley floor west of 4G 16465 was found to be trafficable by trucked or wheeled vehicles.

15. Recommendations

a. It is significant that

a. Evacuation in the operational area offers good trafficability for foot movement on trails and offers no significant hindrance to trucked vehicle traffic.

b. That all structures, cultivation and habitation in the eastern portion of the valley indicate it is a transient area. Local Montangard tribesmen cultivate a portion of the land in the valley floor to provide food for themselves. Transient structures are similarly maintained.

c. It is recommended that continual surveillance be maintained by means of reconnaissance inserts and aerial photograph. Further that use of this valley be restricted to frequent but not large size operations in the vicinity of 4G 1067 and west.

a. Artillery

(1) During Operation H-HOOK, 1st Battalion, 11th Marines (Main) remained in direct support of the 7th Marines. Close Artillery support was provided by displacement of Golf Battery, 1st Battalion, 11th Marines into the operational area. This enabled artillery to reach deep into areas where no unit had been able to bring fire.

(2) Artillery support from outside the operational area was slow. This was partially due to the requirement for radio relay to units beyond operational area.

(3) Registration should have been conducted by the artillery groupment outside of the operational area to assure more accurate fire.

aerial observers were available for that purpose.

(4) Searchplanes were readily available on the air and artillery liaison officers worked on a team to facilitate air observations.

b. Air Support

(1) Bomber Squad

(a) The aerial bombing of the Battalion was accomplished by multiple lifts from an area to 25 Volcano by C-47s. Only seven bombs were dropped by one C-47 and this was quickly followed by fire from heavy gun ships.

(b) C-47s were used for heavy logistical support and lifting in of Self Battery, 1st Battalion, 11th Division into 25 Volcano.

(c) C-47s and B-26s were used every day for cover and reconnaissance support with extremely good results.

(2) Night Day Support

(a) A-1s, B-26s and F-4s were used for all LZ drops. These were effective as no helicopter or antiaircraft plane was encountered in the LZ and the incoming bomber ship was over 2000 meters from the LZ.

(b) Air strikes were used with success in the accurate destruction of enemy air stations, supply areas and bridges which were in sight from artillery.

(3) Aerial Observer Elements

(a) OAS and OBS were used extensively to assist elements navigate thru dense jungle canopy limited visibility. Black Cents were used without exception for this type navigation, locating the maneuvering elements position and observation.

(4) Forward Air Control Team. An officer or enlisted FAC team were present with the maneuvering element at all times.

(5) Landing Deck. Landing Zone Volcano initially accommodated two C-47s. It was improved and enlarged to accommodate 8 C-47s.

7. Intelligence

a. VC Strength and Situation. Contact during the course of Operation Paces was negligible, although there were several sightings of small groups of VC moving along the high ground and a number of key stations, rest areas and fighting helipads located and destroyed by sweep elements. Two incidents of significance occurred: a patrol from the 1st Reconnaissance Battalion engaged a force of approximately 40 VC in the vicinity of ZC 070677 resulting in 1 KIA (Conf) and the capture of several weapons, including

OFFICIAL USE ONLY

2KMGs, 2KMGs, rocket launchers and M16-47 assault rifle, as well as 50 machine gunners, and even one a forward crew with documents. An initial report of these elements indicated that the force engaged was a company strength element of the 40th Airborne Division. There were many indications that the force was being used by the VC as an infiltration route and not as a combat force. It is noted that, at the time, it was considered that the captured weapons of a significant number of forces in the Long Valley area would provide the enemy with a means of movement to the point where he would find an opportunity to engage our forces.

b. Security. The terrain throughout the Long Valley tends to restrict movement to established trails. Large enemy movement is difficult and slow, generally requiring a trail to be cut through the thickest jungle and underbrush. There is no road network. Natural communication points along the high ground with good views of the valley floor are few although others could be prepared in a number of locations. The high ground is considered to be the high vantage point in a generally east-west direction on both sides of the valley floor.

c. Psychological Warfare. A detachment from the 40th Airborne Division was attached to the Battalion for Operation H-22. Numerous broadcasts were made by the unit, utilizing both taped recordings and live human voices. Appeals were made to the indigenous population to come to Marine forces for assistance and to the VC to ally; no response was noted.

9. Summary of Operations. See enclosure (1) Annex E (Operation Overly)

a. Establishment. Base continues defense of Hill with two companies.

b. Det 40th Airborne 1st Battalion (-) (Main) to be used by Helicopters. Stage for Operation H-22.

c. 1st Bn. (-) (Main) continues helicopter base training in Long Valley at Hill Vietnam command center. 2-4-67. 1st Bn. conducts patrol activity in area to ensure security of Hill. Helicopter attached reconnaissance personnel and separate reconnaissance patrols and use as additional security. Be prepared on order to coordinate infiltration and establishment of Artillery Bn. with one company during daylight hours and use at night; provide security for artillery battery. In order with one company, employing reconnaissance elements, conduct search and destroy operations to Phase Line Blue. Be prepared to continue attack, link up with reconnaissance element and conduct search and destroy operations from that point.

Continuing to improve defensive positions. Patrol activity to date has revealed numerous enemy trails, none of which have developed into a system. Company A in area hurried by prep discovered battles that indicate trails extensively used.

(6) 215500. Platoon patrol located VC root camp at ZC 156670 while observing enemy trails. Camp consisted of eight thatched structures, three with concrete roofs. Found two tactical communication equipment. Search of cave turned up one 120 mm, one 81 mm mortar (120 mm), one 7.62 cartridge, three pairs of boots, three sets of camouflage clothing, one canteen. Cave and surrounding area had a lot of weapons and furniture indicated transient use.

2. 22 Jul 1967

(1) 220400. Co A, while conducting search and destroy operations toward Hanoi Line Green, located an unidentified 15 meter of enemy, private and other unidentified vegetables at ZC 123370. Enemy trails located; two were dead ends. The third trail led to a group of three thatched huts, two pigs and four chickens in pen. Structures cannot be observed from the air or surrounding terrain. Lack of furniture and utensils indicate only transient occupation. Further search revealed a cave 3'x2'x10' containing one French battle jacket, 1 boot, one USMC tropical shirt, first aid kit, (not U.S.), cartridge belt, VC map kit, one note blank 150, one hundred pounds salt, one hand saw VC party line letter. Another cave 3'x1'x10' was located and searched with negative results.

(2) 221030. At 071570 Recon unit engaged unknown number of VC, VC broke contact. Unwounded company green. Results were 2 VC killed (Confirmed) and 3 WIA (probable).

(3) 221100. Operations progressing as planned. Recon unit engaged estimated company of VC. VC broke contact. Co E and Co D continued search and destroy mission in vicinity of LZ Yellow. Continued to improve defensive positions. Co A continued search and destroy mission to EL Green.

11. Summary

a. No significant contact was made during the conventional type operations due to dense terrain and high temperatures movement was somewhat restricted.

b. Airborne patrolling throughout the operational area showed the eastern portion of Happy Valley to be primarily a transient area for the enemy.

c. Operations FATH established conclusively that Happy Valley is a main infiltration route into the DMZ area.

12. Logistics

a. Logistics. Contingency type planning, numerous preplanning conferences with Brigadier 5-4, Shore Party & Force Logistics Command representatives. A temporary logistic support area for the operation was prepared at Hill #55, the General Post location of 1st Battalion, 7th Marine. The staging of Class I and Class V items began in the LMA on D-2. First Shore Party Battalion provided Helicopter Support Team (LST) and Force Logistic Command personnel staffed the LMA commencing D-1.

b. Supply/Resupply

(1) All supply/resupply to the operating force was accomplished by helicopters (UH-1H, CH-46 and CH-53's). The first resupply of the battalion was on D-1 (21 July 1967).

(2) The D-Day (23 July 67) list of troops, artillery battery of six (6) howitzers, Class IV, V into the operational area went according to plan and without incident.

(3) Resupply requests from the companies were submitted prior to 2000 and 2200 daily. In order to smooth the staging of resupply items for pick-up by resupply helicopters, morning resupply was limited to Class I and Class V items. The afternoon resupply missions primarily lifted Class II and other requested items. This system greatly simplified the consolidation of daily resupply requests in the operational area.

(4) Some confusion was caused by the units in the operating area regarding items that were not received in the initial resupply request. Because of this, an immediate request of Class II items (i.e., punches, small book cases and small utility cases) was requested from PLS. The unit was diagnosed and corrective action taken thereby allowing for more realistic needs to be entered from D-1 for resupply in the LHA.

(5) Precision type items such as instruments, antenna bases and antennas (both type and size for the M-100) were not in the LHA stocks and had to be located elsewhere.

(6) No difficulty was encountered with equipment and ordnance repair during the operation.

(7) Resupply difficulties occurred on D-2 when one company couldn't be resupplied because of a combination of circumstances: helicopter unavailability, poor flying weather and unsatisfactory LZ to receive the resupply. The other incident involving helicopter resupply occurred on D-1 (Operation MICHIGAN) when a G1-34 pilot refused to land in a prepared LZ which was used by an earlier resupply mission, as the crew off-loaded 14 water cans at a height of approximately 30 feet spilling most of the water.

c. Extraction. There were no significant problems encountered in this operation.

d. Communications.

(1) Radio was the primary means of communications. Automatic retransmission back to Hill 99 was provided by Regiment. It was satisfactory most of the time, but manual retransmission had to be used when the automatic unit failed.

No serious problems were encountered with communications within the valley. Communications to the companies was lost once, the solution being a change of antenna.

(2) M-29's were used with satisfactory results. It was noted that the use of ground planes did not seem to affect the quality of the communications. Several positions were tried, again without much improvement.

(3) Wire was used to link up the companies. One M-6 served as a terminal, with T-41's in the company OP's. G1's and Arty had separate phones. The companies had it wired in to the company OP with satisfactory results. Double lines were wired to all phones in case of the lines being cut.

(4) Logistics support was adequate. The only problem was that the companies came in for battery requests at the same time, but we never ran out of batteries, or even came dangerously close. Spare parts were adequate.

(5) In the future the battalion will carry wire tags for the lines, and plastic covers for the T-41's, which had some failure due to moisture.

14. Comments/Analysis

a. Operation FALCON was a counterinsurgency operation involving the movement of combat elements to the Objective area by helicopters. The operation area was situated outside of normal supporting arms range. Resupply was completely dependent on helicopter support. One unique aspect of the operation involved insertion of Btry C, 3rd Bn, 11th Marines into the operational area by using OH-53 helicopter to provide direct support artillery for the operation. Their subsequent extraction was also by OH-53 helicopters.
