of October there have been fifteen cases of FUO (fever of undetermined origin) and two cases of malaria. I suspect several of these FUO's will turn out to be malaria. A number of these were a viral syndrome which lasted from 48 to 72 hours. We have seen and treated nearly a dozen cases of immersion foot. This could be attributed to the flooding in the area after the week of rain. We have stressed the importance of changing into dry foot wear as soon as possible in this kind of weather. There was an incident in Delta Company in which nine men were bitten or had open wounds licked by a dog which was suspected of having rabies. The dog apparently was a mascot and seemed healthy until one day when it demonstrated bizarre behavior and excessive salivation. The dog is currently under observation at the M. P. compound in DaNang. The men involved are undergoing the series of rabies inoculations and have been seen by the Rabies Control Board at N. S. A.

(2) Evacuation. On two occasions there was a delay of longer than one hour in getting helicopters to evacuate wounded. This occurred during the week of rain. We hope this will not continue to be a problem.
