## NARRATIVE SUMMARY

A. During August, the logistical support of 2nd Battalion, 5th Marines continued at an intensive pace with ammunition and fuel being the main cargo carried. This Battalion's operations in support of the LSA at Hill #63 continued during the month. The later operations consisted mainly of providing serials to accompany ROUGH RIDER convoys. The Battalion provided vehicle support to the 1st Battalion, 7th Marines for the movement of the Command Post from Hill #55 to Hill #10. Five ROUGH RIDERS were conducted this month in support of the 1st Marine Division operations.

B. The Battalion is continuing to improve the camp area. Living space has been consolidated to provide additional huts and better quarters. Permanent space has been provided for the Career Advisory NCO, Special Services and plans have been completed for additional recreational facilities. In expectation of the monsoon season, drainage has been vastly improved, roofs tied down and checked, and rain and windbreakers have been installed around huts. Elements of the 5th Marines have moved to Hill #63 and living space is now being provided for the Radio Relay and Construction Company of the 7th Communications Battalion. Work on the perimeter defense is proceeding with strengthening of perimeter wire and the improvement and construction of bunkers. Additional fighting holes have been added along with intensive fire plan and contingency plans for defending the perimeter in an emergency. The civic action program continued in Khanh Son, and a more efficient program of checking indigenous personnel coming and going from the camp was implemented.

C. Enemy contact on the road stabilized at about the same level as last month. There were three mine incidents when tracked vehicles providing security for convoys detonated mines. A vehicle was ambushed and destroyed near the 2/7, G Company CP resulting in one WIA from this unit. Another vehicle hit an anti-personnel mine with no damage to the vehicle or personnel. A tractor trailer hit a mine that resulted in two WIA's (NON EVAC). Activity surrounding the Battalion's perimeter defense has picked up. There have been four occasions when confirmed sniper fire was received in the northwestern sector of the Battalion perimeter.

D. This Battalion transported 37,803 troops, carried 18,826 tons, and drove 169,221 miles during August 1967. On 9 August 1967, this Battalion completed 1,000,000 miles of vehicle operation since its supporting role commenced on 18 January 1967.
