PART II

1. During the reporting period the Battalion provided timely, accurate fire support to the 5th Marines while engaged in Operation Henderson Hill which terminated at 062400HDEC68 (After Action Report attached). The Battalion also provided fire support to the 5th Marines, BLT 2/7 and the 51st ARVN Regiment while engaged in Operation Taylor Common. Three forward observer/liason teams were formed from the assets of the 11th Marine Regiment for employment with the 51st ARVN Regiment. Operation Taylor Common commenced at 070001HDEC68 under control of Task Force Yankee. At 102400HDEC68 the Battalion was Chopped OpCon to the 1st Field Artillery Group with Battery F and Provisional Battery 2/11 further chopped OpCon to 1/12. Battery H-3-11 and Battery D-2-11 were formed into a Battery Group to support a three battalion sweep from Liberty Bridge into the An Hoa Vital Area. Upon the displacement of Battery F, the battery group was disbanded and Battery H-3-11 displaced to the artillery cantonment in An Hoa. Battery W-3-11 occupied firing positions to reinforce the close in fires of 2/11. A composite battery was formed utilizing guns which had been cadred upon formation of Provisional Battery, 2/11 and augmenting the canoneers with miscellaneous maintenance and Headquarters personnel.

All medium and light artillery batteries base pieces were registered during the month and with the capability of the Gun Direction Computer M-18 (FADAC) a muzzle velocity was derived. Utilizing the Met + VE technique this procedure greatly improved the capability of the Battalion to mass fires and to deliver accurate observed and unobserved fires. The FADAC was also employed to produce GFT settings for firing units under 2/11's operational control. The Battalion Metro Section produces visual Met data on a timely basis and coupled with the above technique improved fire support is provided.

b. Intelligence. The intelligence section continued to expand its target acquisition capability by the addition of another observation post (AT896469) allowing the direct control of three observation posts within the An Hoa Vital Area. These posts have been provided with radio communications in addition to the existing wire lines providing a rapid detection agency for any enemy mortar/rocket fires. During the reporting period two crater analysis were performed indicating three new enemy mortar sites which were added to the battalions counter mortar plan.

Under the VIP program a total of 35540 \$VN was paid to local nationals for ordnance surrendered. This ordnance included 80 M79 rounds, 52 M26 grenades, 9 60mm Mortar rounds and 2800 M16 rounds.

c. Organization and Operation. During the reporting period the Battalion participated in Operation Henderson Hill and Taylor Command.

d. Training. The Battalion continues to devote substantial time for training as the operational situation permits. Constant improvement to position defense and utilization of the howitzers as direct fire weapons receive heavy emphasis. A Fire Direction Officer's School was conducted for officers within the Battalion and mobile training teams have been requested from higher headquarters for the next quarter. A weekly Staff and Officers School was initiated to provide these personnel with a wide range of professional knowledge.

e. Logistics. During the reporting period, the battery and battalion areas were under constant improvement. The addition to the cantonment of a platoon of 175 Guns (SP) and a Battery of 155 How (SP) called for establishing and developing these areas. The S-4 coordinated with the 5th Marines in the appropriation of scarce equipment and material necessary for construction of these positions. A number of strongback living spaces were erected and living conditions improved. The Battalion received from the 5th Marines (Engineers) a prefab bunker and 11 ammunition bunkers. These are now under construction. The S-5 has provided for Vietnamese working parties which have been an asset in improving the battalion area. Although the battalion has had a large number of weapons displaced to fire bases resupply has been accomplished with a minimum of difficulties. The reporting function of the S-4 was accomplished with minor discrepancies which have now been resolved. This resulted from a misunderstanding on what unit reports were to be passed to, 1st F&G or 11th Marines. The maintenance problem was greatly decreased during this month and the maintenance personnel at LSU have done an outstanding job on 3d echelon repair. A letter of appreciation has been sent by this unit to LSU.

5750

6 January 1969

f. Civic Action/Civil Affairs. The employment of 40 local nationals in the Battalion area continued through the month. A large percentage of these workers were paid by rice captured by the 5th Marines during recent operations. The Vietnamese laundry in the Battalion area continues to successfully handle the large amounts of washing within the battalion. The S-5 section in conjunction with the Battalion Medical Section Conducted MedCaps during the latter part of the reporting period for a refugee village (My Son I AT897471). Approximately 100 civilians were given medical assistance.

g. Psychological Operations - None

h. Combined Action Company Program. Has been reported separately in accordance with RegtO 3121.1 on 30 December 1968.

i. Mission. Direct Support of 5th Marines.

k. Execution. The battalion was able to provide artillery support to the 5th Marines from the artillery contonement in the An Hoa Vital Area. The added range capability of the 155 Howitzers from the Prov Btry, 2/11 as well as the 155 Gun (SP) and 8" Platoon's increased the battalion's fire support capability. On several occasions the FSCC's of the Infantry Battalions were unable to communicate with the Regimental FSCC necessitating ground clearance and Sav-a-planes to be relayed through artillery channels, resulting in some instances of delaying the timely delivery of fire for critical periods of time. This points to the necessity for all Liaison Officers with the infantry battalion to insure the carrying and use of the mast head and antenna elements of the RC-292.

The intelligence sections of the infantry regiment and the artillery battalion developed numerous targets determined from available intelligence sources which were engaged by heavy volumes of fire.

2nd Battalion units fired a total of 4941 missions expending 73471 rounds accounting for 443 confirmed enemy kills during the operation.

l. Naval Gunfire. Naval Gunfire Support was not utilized during the operation.

m. Administrative Matters.

(1) Supply. The ISA located at An Hoa distributed all classes of supply in a timely manner. Weather conditions permitted almost daily resupply flights into the An Hoa facility.

(2) Maintenance. No major problems were encountered during the operation. The short duration and the firing units remaining in An Hoa were probably a contributing factor.

~~CONFIDENTIAL~~

3480
10 Dec 1968

(3) Transportation. No major problems.

(4) Treatment of Casualties. Medical Support was provided by the 5th Marines. No problems were encountered.

n. Communications: The critical need for all units to have both primary and secondary frequency allocations was heightened by atmospheric disturbances encountered during the operation causing several read backs. Although the mission was accomplished, lack of adequate frequency allocations created severe operational problems. No other problems were encountered and the directional antenna AS-2236/GNC was credited with extending the range of the AN/PRC-25.

o. Special Equipment and Techniques. The use of the Gun Direction Computer (M-18 FADAC) to derive muzzle velocity variations for all batteries coupled with the MET+VE technique contributed strongly to increasing timely accurate fire support, both observed and unobserved.

p. Commanders Analysis. During much of the period covered by this report, the 5th Marines had only one third of the maneuver assets available to secure the TAOR.

The tactic of substitution of fire support for maneuver elements was employed with effectiveness throughout the operation. As necessity required maneuver elements to abandon areas; the gap was filled by fires developed by the combined intelligence efforts of the Infantry/Artillery S-2. The effectiveness of the combined intelligence target effort is born out by the following three significant indicators:

(a) No coordinated attack was mounted in the An Hoa area during this

~~CONFIDENTIAL~~
3480
10 Dec 1968

period although the enemy did have the capability.

(b) The vital MSR (Liberty Road) remained secure with no mining incidents.

(c) Several Chieu Hoi's and POW's disclosed, on interrogation, that artillery fire had repeatedly frustrated their operations, both planned and executed.

The artillery's ability to maneuver fires is felt to have been a significant contribution towards accomplishment of the 5th Marines mission in the An Hoa area.
