PART II - NARRATIVE SUMMARY

1. Mission Assigned: Direct support to 3d Marines.
2. Exercise Participation: Supported all infantry operations in defense of the airfield perimeter, the hill 327-368 complex west of the airfield, and deep patrolling operations within the assigned tactical areas of responsibility. Supported ARVN forces operations beyond the TAOR with harassing fires in areas of reported Viet Cong activities. During the reporting period, the firing batteries supported the infantry with will-adjust missions against observed or suspected Viet Cong troops or assembly areas, harassing and interdiction fires against likely avenues of approach, assembly areas, and campsites, preparation of landing zones for heliborne patrol operations and missions against Viet Cong movements observed by AN/TPS-21 radar units. Deep infantry patrol operations were supported by displacement of firing batteries to supplementary firing positions north, west and south of hill 327-368 complexes; however, numerous broken bridges, landslides, and primitive road conditions limit mobility in these directions. Survey of 1:3000 accuracy of position areas and survey control points and 1:1000 accuracy of target area survey have been completed to ensure accurate fire. Harassing and interdiction fire constitute approximately 92% of the fire missions during the reporting period. Will-adjust HE missions account for only 5% of missions.
3. Terrain and Weather: Terrain west and north of TAOR limits mobility of vehicles. Numerous poor or partially destroyed bridges and poor road conditions throughout the area of operation has an adverse effect on mobility. Weather has not had an appreciable adverse effect on operations to date; however, limited experience with rainy weather foretells that considerable difficulties can be expected during the rainy season because a large part of the existing road net is not designed for all weather traffic.
4. Training Conducted: The tactical situation to date has provided an outstanding training situation in which all artillery subjects can be practiced without degrading accomplishment of primary mission.
5. Morale and Discipline: Morale has improved 100 per cent due to the innovation of movies, enlisted men clubs, and fishing trips. Discipline continues to be superior to that experienced in garrison.
