COMMUNICATIONS1. Radio

a. The new family of FM radio equipment in its entirety was put into service.

b. The battalion participated as a station on a secure radio net, utilizing KY-8 cyphony equipment. The net was activated three times daily.

c. The battalion continued normal radio operations with five radio nets, four organic and one external.

2. Wire

a. Upon arrival to the new CP, new wire lines were installed and maintained. A total of seven miles of WD-1/TT was expended.

3. Message Center

a. Communication guard was shifted to 3d Marine Regiment as of 13 October 1966.

b. The battalion message center processed 223 unclassified and 276 classified messages for the month for a total of 499.

4. Maintenance and Supply

a. The lack of test equipment, repair parts, and proper maintenance publications is beginning to hamper the proper second echelon maintenance capabilities regarding Radio Set AN/PRC-25.

b. The maintenance section during the month repaired the following items:

- 1 Receiver-transmitter RT-524
- 10 Line packs TA-222/PT
- 2 Operator packs TA-221/PT
- 3 Remotes AN/GRA 39A
- 1 Antenna RC-292

c. The supply of battery BA-30 remains critically short.

4. Training

a. An informal school (OJT) on the installation and operation of cyphony equipment KY-8 was held for eleven (11) people.

b. On the job training was held on newly arrived personnel on the peculiarities of artillery communications.

MEDICAL

Since arriving at this area there have been 13 cases of diarrhea, 9 of which were diagnosed as eubiotic dysentery. These nine men were running elevated temperatures and suffered from stomach cramps and severe diarrhea. They responded well to Tetracycline, Compazine, and Kaolinpectate mixture. The other 4 were treated routinely.

There have been three injuries since arriving, one requiring sutures to close the wound, the other two responded to treatment. The overall health of the camp can be considered good. There have been no battle casualties.

LOGISTICS

The following occurred during the month of October 1966 while the 1st Bn, 12th Marines were engaged with the communist insurgent forces in the Republic of Vietnam. With Mortar Battery 1/12 rotating back to Okinawa in the last days of September, the battalion was faced with the task of dismantling the battery position with the minimum of delay. To accomplish this task some 96 indigenous personnel were employed, their payment was the privilege of picking up pieces of scrap lumber at the end of the work day. This system worked out well for all parties concerned. The position was completely dismantled by October 9th with the following vitally needed material being salvaged: 15 loads of bunk material, 14 strong backs, one messhall, one shower, 25 loads of filled sandbags, 3 loads of empty sandbags, 400 pieces of marston matting, and 2 loads of engineer stakes.

On October 12, Headquarters Battery left DaNang and motor marched to Phu Bai some 90 kilometers arriving at 122000H. Following a two day stopover, the battery motor marched to the "Artillery Plateau" located some 22 kilometers west of Dong Ha. No vehicles were lost or damaged during this move from DaNang to participate in Operation Prairie.

Battalion supplies remained at DaNang to facilitate the movement of material stocked at Battalion rear to the Dong Ha area. Inadequate supply of Class II, Type II items consisting of Battery, BA-30 & 42, peanut bulbs, mimeograph paper, stencils, ball point pens, solvent, bore cleaner, and Class IV items, such as tentage, engineer stakes, and sand bags, have placed some hardships on this command during this period.

There is also a critical shortage of motor transport, and ordnance spare parts.

MOTOR TRANSPORT

This statement covers the month of October 1966.

Motor transport vehicles traveled approximately 29,900 miles, with the daily average of 996 miles.

Due to the loss of Operational control of A-1/12 and B-1/12 and the assumption of Operational control of E-2/12 and I-3/12 our deadline percentage of the month was increased to 15%.

The deadline percentage of each battery at the end of the month or when control was lost was 12% for Headquarters Battery, 0% for B-1/12, 8% for A-1/12, 13% for I-3/12 and 60% for E-2/12.

The critically needed parts for this battalion are as follows:

- C. V. Joints, M-422
- Tires, M-37
- Tie Rod End, M-37
- Torque Rod Ball, M-35
- Flange Steering Knuckle, M-35

The status of personnel in this section consisted of 60% of rated mechanics and 40% of rated drivers.

ORDNANCE

Period covered in this statement is from 10 Oct 66 to 30 Oct 66.

During the above period, 1st Battalion, 12th Marines Headquarter was transferred from the DaNang area to the Dong Ha area. At this time the battalion took operational control of E-2/12 and I-3/12.

After an LTI was held by the Battalion Ordnance Officer and Ordnance Chief, the guns were found to be in fair operational condition.

The lack of cleaning materials, 2d echelon parts, 3d echelon parts, and replacement optical equipment, makes it virtually impossible to keep these weapons in a high state of maintenance.
