9. <u>MISSION</u>. Commencing D-Day Task Force Delta in coordination with participating ARVN forces fix and destroy organized VC elements in the QUE SON - VIET AN - HIEP DUC Valley complex. The operation was essentially a spoiling attack to prevent the Viet Cong from their announced objective of

capturing QUE SON. The operation was also to have eliminated VC forces that have isolated the ARVN outpost at VIET AN, permitting ARVN to reestablish lines of communications.

10. CONCEPT OF OPERATIONS.

a. General. Task Force Delta consisting of three Marine infantry Battalions, (including BLT 2/1, the infantry element of the Special Landing Force, 7th Fleet (SLF), and other supporting 3d Har Div elements, in coordination with an ARVN Regiment, conducted a three stage search and destroy operation in the QUE SON - VIET AN - HIEP DUC Valley complex. Marine logistic support was staged from a combat established logistic support area in the vicinity of HUONG XUAN.

b. Definition of Stages.

- (1) Stage I. Period D-1 and D-Day, D-1 ARVN forces conducted search and clear mission in the vicinity of THANG BINH. On D-Day ARVN forces crossed LD at 0500 H and proceeded generally southwest along Route 35 to vincinity Phase Line A. Btry M, 4th Bn, 11th Marines, with one rifle platoon from 2/7, moved by motor march from CHU LAI enclave to vicinity of THANG BINH to provide artillery fire support for ARVN forces in vicinity of Phase Line B. 2d Bn, 7th Marines motor marched from CHU LAI to vicinity TAM KY.
- (2) Stage II. Period D+l to D+lO. ARVN forces were to establish and maintain contact with enemy force. 2d Bn, 7th Marines was to be helo-lifted on D+l to vicinity Objective 1, seize objective and then be prepared to move out to seek and destroy the enemy as ordered. On D+l all other elements of task force except the SLF were to move from DA NANG enclave to either the THANG BINH or QUE SON complex. Btry M, 4th Bn, 1lth Marines was to continue to support from position at THANG BINH. 3d Bn, 3d Marines and SLF were to be prepared for immediate commitment to objective area on order. Logistic Support Unit supported this force from D+l to D+lO from LSA vicinity HUONG MIAN. Force Command Group, Prov Arty Bn (-), Recon Co (-) bases at QUE SON on D+l. No major displacement of this element, with the exception of the Reconnaissance Co (-), was contemplated prior to D+lO.
- (3) Stage III. D+11 to D+12. All elements of Task Force Delta withdraw by helo/foot/motor march to their respective enclaves. LSA transfers surplus supplies to FLSG control in enclave. Operation HARVEST MOON was scheduled to terminate on D+12.

11. EXECUTION.

- a. During the first few days of December the G-2 Section, 3d Marine Division developed information that indicated the presence of the 1st Viet Gong Regiment in the QUE SON VIET AN HIEP DUC Valley complex. On 4 December the Commanding General III MAF met with the Commanding General I Corps; both concurred in the intelligence indications and the necessity to launch a sizeable attack in that area to destroy, disrupt, and impede whatever progress had been made by the 1st Viet Cong Regiment in establishing an area of operations.
 - b. The following day Task Force Delta was formed. The major elements

consisted of the 2d Battalion, 7th Marines, the 3d Battalion, 3d Marines who had been alerted and predesignated for such operations by 3d Marine Division contingency plans. A provisional artillary battalion was formed from elements of the 11th Marines and the 12th Marines. Additionally, plans called for the employment of BLT 2/1, Special Landing Force, (SLF) to participate as Task Force Delta's reserve. Logistic support was to be provided by a Logistics Support Unit to be established in the objective area.

c. The Task Force Delta staff was formed on 5 December from personnel within the 3d Marine Division. Planning commenced on 5 December in conjunction with the 2d Division, I Corps, ARVN. On 7 December plans and orders were completed and issued.

d. Operations D-Day, 8 December.

(1) Task Force Delta commenced operation HARVEST MOON when 2d Battalion, 7th Marines departed CHU LAI enclave at 080500H via motor march and closed assembly area vicinity TAM KY BT 3025 at 081530H. The battalion established defensive positions and prepared for helicopter lift into objective area on order. Btry M, 4th Battalion, 11th Marines departed DA NANG enclave as planned and was positioned (BT 1641) for action by 081445H. No contact was established. The 5th ARVN Regiment consisting of the 1st Battalion 5th Regiment and the 11th Ranger Battalian advanced southwest on an axis parallel to and south of the SONG LY LY. At 081330 at vicinity (BT 0934) the 11th Rangers came under heavy fire from an estimated VC Battalion. The Rangers withdrew to vicinity (BT 1235) and were reinforced in the late afternoon by the 1st Battalion, 6th Regiment, ARVN transported by Marine helicopters from TAM KY. At 1600H 11th Rangers had reorganized and were in position with 1st Battalion, 6th Regiment, ARVN.

e. Operations D+1, 9 December.

- (1) On D+1, 9 December, 2d Battalion, 7th Marines helelifted from vicinity TAM KY to BT 016318 to threaten the flank and rear of units that made contact with the 5th ARVN Regiment on D-Day. The lift was completed at 1335H. By 1755H the Battalion C.P. Group, Gompanies E and H had advanced through objective A, BT 030315, and had secured objective B, BT 050315. Companies G and F followed in trace from the landing zone. By darkness D+1 Companies G and F occupied and defended objective A while Companies E and H held objective B.
- (2) The 3d Battalion, 3d Marines commenced their meter march from the DA NANG enclave at 0500. Lead elements arrived in the LSA vicinity HUONG XUAN at 1030H. At 1400H the battalion helolifted to BT 144306 to reinforce the 1st Battalion, 5th Regiment, ARVN some 2,500 meters to the northwest. At 1500H the battalion with Company L and 2 platoons of E advanced toward Hill 43 BT 122321. At 1530H Company L moving northwest made contact. Movement continued. At 1645H the battalion turned to move toward Hill 43. At 1700 the battalion came under heavy fire from an estimated 200 Viet Cong supported by mortars and machine guns. The firefight

lasted until 1830H. Periodic small arms fire continued until 2030H. Night defensive positions were established in the vicinity of BT 122316. Company G and one platoon of E established night defensive positions on Hill 43 BT 122321.

- (3) Initial units of the ISU arrived at HUONG XUAN and commenced operations of logistic support of Task Force Delta.
- (4) Task Force Delta command group "B" helolifted from DA NANG to HUONG XUAN to QUE SON BT 042347. By midmorning contact had been established with the principal elements of the Task Force. The Command Group "C" proceeded to HUONG XUAN by motor march with the 3d Battalion, 3d Marines and joined the command group at QUE SON in midafternoon after being helolifted from HUONG XUAN. BIT 2/1 (SIF) was alerted and permission received to commit two companies and the command group of BIT 2/1 in support of Task Force Delta operations ashore. The two remaining companies were not available but were to be landed upon arrival in the Objective Area.

f. Operations D+2, 10 December.

- (1) At 0945H Company F (-), BIT 2/1 and elements of Command Group "A" were heldlifted to BT 071293 and came under heavy small arms and mortar fire. The remaining elements of Company F and Company G were landed via helicopter from the USS Valley Forge at BT 067304. Company G, BIT 2/1, and Company E, 2d Battalion, 7th Marines covered the withdrawal of Company F (-) from the initial landing zone. By 1900H enemy contact was broken. Companies F and G, BIT 2/1, and Company E, 2d Battalion, 7th Marines had consolidated into a battalion perimeter defense from coordinates BT 076302 to BT 079302 by 110300H.
- (2) The 2d Battalion, 7th Marines continued their advance from objectives A and B to objective C BT 082325. During the advance the battalion met light resistance. At approximately 1515H Co E junctured with Co F, BLT 2/1, and commenced a coordinated attack on Viet Cong elements in the vicinity of BT 078292. At 1610H Company H had secured Objective C. At 1650H the battalion command group and Companies F and G were 600 meters from Objective C and closed shortly thereafter.
- (3) At 0645H 3d Battalion, 3d Marines crossed the LOD in their advance to Hill 43, BT 123321. At 1300 the battalion had secured Hill 43 and had established defensive positions there. At 1400H the battalion was ordered to Objective C to juncture with the 2d Battalion, 7th Marines. By 1535H the battalion was located at BT 095330 proceeding toward Objective C. By 1730H the battalion had closed Objective C and had established night defensive positions in conjunction with elements of 2d Battalion, 7th Marines.
- (4) Company C (-), 3d Reconnaissance Battalion arrived in QUE SON the evening of the 9th. On 10 December the Company patrolled approximately 2,500 meters south of QUE SON and received occasional small arms fire during the patrol.
- (5) The ISU became fully operational and provided logistic support via helicopter for the elements of the Task Force.

6

SECRE

-

(6) Companies E and H, BLT 2/1 conducted an at sea transfer from the USS Montrose to the USS Valley Forge in preparation for helclift into the objective area on 11 December.

g. Operations D+3. Il December.

- (1) BLT 2/1 prepared to receive Companies E and H for a planned advance south. Companies E and H were lifted into vicinity BT 0930 from USS Vallay Forge. BLT 2/1, after arrival of Companies E and H, commenced their advance south by 1800H the units dispositions were; Companies E and G consolidated from BT 085285, to BT 087285, Campany F BT 082287, Company H BT 075296. The BLT had met light to moderate Viet Cong resistance:
- (2) At approximately 063CH 2d Battalion, 7th Marines advanced from Objective C with Companies E, G, and H to the south to link-up with Companies E and G of BLT 2/1. At approximately 1000H the over land juncture was accomplished in the vicinity BT 097301. Company F, and Slmm mortars and 106 recoiless rifles were helolifted from Objective B to Objective C. The Battalion then advanced Company H south in an assault of Hill 407, BT 0727*by 111830H the leading elements were at the top of Hill 407. The company closed shortly thereafter and commelidated for the night. Companies E and G with the Battalion CP were disposed in a perimeter defense for the night at BT 067302 to BT 068302 to BT 064299 to BT 064304. Company F and Slmm mortars and 106 recoilless rifles remained on Objective C in coordinated defense with 3d Battalion, 3d Marines.
- (3) The 3d Battalion, 3d Marines occupied Objective C and patrolled 1800 2000 meters to the west and 1,000 meters to the east. An extensive tunnel and cave system was found in vicinity Objective C, BT 076323 and BT 083325. The system included areas large areas large enough to house 75 people and included cooking and ventilation vents. These caves were searched in detail and destroyed.
- (4) The Task Force CP continued to operate from QUE SON. TPQ air strikes by Marine aircraft were planned and conducted during the night on targets; BT 098275, BT 106275, BT 104270, BT 125280; BT 135280, BT 082227. Targets were suspected assembly and storage areas, and unit locations.

h. Operations D+4. 12 December.

- (1) At 1900H BLT 2/1 commenced advance southwest through grid squares BT 0828 and 0927. A defensive position vicinity BT 113277 to BT 106272 was established that evening.
- (2) Previous plans to helclift the 2d Battalion, 7th Marines were cancelled due to bad weather in the battalions location. At 1335H the mission was modified and the battalion directed to occupy an area vicinity of BT 045292, Hill 106. Company F moved from Objective C and joined the Battalion at 1550H. The battalion advanced overland in tactical column to Hill 106; the leading elements arriving at 1735H. The remaining elements closing at 1830H. Night defensive positions were established for Companies E. F. and G in the

vicinity BT 045291. The battalion CP was located at BT 047294. Company H re-

- (3) At 120730H the first of an eventual series of four B-52 strikes occurred. This strike hit a reported VC base area in the valley SE of Hill 330 (BT 0925-1227-1326-1124). Considered noteworthy in this strike was the timing and coverage. Immediately after the first strike, three additional strikes were planned by G-3 USMACV and CG Task Force Delta based on current intelligence. During this planning, CG TFD was informed that 1000 meters was the deflection safety distance for friendly troops.
- (4) The 3d Battalion, 3d Marines were helolifted from vicinity Objective G commencing approximately 0900H to landing some BT 145285 with the assigned mission of searching and destroying to the south in the valley BT 1328 and BT 1125 and to provide damage surveillance of the B-52 SAC strike conducted between 0705H and 0730H 12December. At 1005H the leading elements had arrived and secured the landing some vicinity BT 145285. The remaining elements were all landed by 1015H. At approximately 1115H Companies L and G advanced on either side of the valley. At 1400H Company L had secured Hill 100 BT 1228. Company G came under heavy small arms and mortar fire at the base of Hill 180 BT 1327. Air and artillery strikes were called in support but Company G could not advance due to an unfordable river. The Company retracted and helolifted to Hill 180 commencing 1650H. The lift was supported by air preparation of the hill and completed at 1725H. During the afternoon the 2d Reconnaissance Company, 529th ARVN, junctured with the Battalion and conducted patrols and established outposts to the south and east. By darkness Companies L and G established defensive positions on Hills 100 and 180 respectively, the remaining units established defensive positions in conjunction with the Battalion CP.

1. Operations D+5. 13 December.

- (1) At approximately 130400H a message was received from 3dMarDiv with information that the B-52 strike requested for that day would occur at BT 0623-0625-0925-0923. The message also directed that no friendly troops be within 3000 meters of the strike zone. This necessitated the withdrawal of all friendly troops to the north of grid line 28 and postponement of a planned helicopter lift of a mortar platoon and troops to the top of hill 407. The withdrawal of troops was completed by approximately 0815H.
- (2) At 130440H, 2/1 was ordered to withdraw to north of grid line 28 because of the scheduled B-52 strike. At 1015H the BIT was ordered to continue their search and destroy mission to the south and to advance commencing 1300H. By 1800H the BIT was disposed from BT 100267 to BT 109273. There had been no enemy contact except that Company H had apprehended eight (8) Viet Cong dressed as women on Hill 330 BT 1127. The BIT had advanced slowly over rough terrain across a 2,000 meter front.
- (3) At 1130H 2d Battalion, 7th Marines conducted a heliborne assault from BT 043291 to secure Hill 185 BT 0228. Company H, early D+5 was moved north of east-west grid line 28 in preparation for B-52 strike. At 1015H Company H commenced movement to Hill 407 Bt 0727 to secure position for one platoon of 4.2 mortars sited for fire support of operations further to south

in the hill mass. At approximately 1420H the battalion was disposed from BT 029288 to BT 031283 with Company F at BT 029288 prepared to advance to Hill 185. Company H, 2d Battalion, 9th Marines now attached to the battalion remained at previous night's battalion CP location, prepared to reinforce. At 1610H the battalion was ordered to advance south to VIET AN BT 0226. At 1940H the lead elements reached VIET AN, the remaining elements closed shortly thereafter and established defensive positions. The Battalion met light resistance during the day.

(4) The 3d Battalion, 3d Marines continued the search of the valley and the entrance to the valley. Many caves were found throughout the valley area. At BT 127277 caves were found containing cots, blankets, and medical supplies. At 1700H the battalion located caves containing sewing machines, large quantities of medical supplies, large quantities of uniform material, flash light batteries, ball point pens, and documents. At darkness the search ended, units established positions for the night. The battalion CP was located at Hill 100 BT 129286.

j. Operations D+6, 14 December.

- (1) BIT 2/1 continued their advance south over Hill 370 BT 0926 toward TRUNG IAM (3) in vicinity BT 0925. The battalion received occasional small arms fire. Extremely rough terrain necessitated cutting through dense jungle growth. It 1830H the BIT established a perimeter defense in vicinity BT 074240. The battalion was directed to provide damage surveillance of the B-52 strike zone in its area of operations, but because of rough terrain, bad weather, and time limitations was able to search only the east quarter of the strike zone during this and the next day.
- (2) The 2d Battalion, 7th Marines executed a heliborne assault to the high ground vicinity BT 0023 in an effort to block along a reported Viet Cong ferry site on the SONG CHANG. At 1125H the battalion reported no fire from the landing zone, however, helicopters were receiving 50 Cal MG fire from vicinity of AT 994222. Air and 81mm mortars were directed at the MG location with excellent results. At 1430H the front line positions were reported from AT 999233 to BT 002223. At 1440H a mortar platoon of 1/12 was laid and ready to fire at BT 999232. The battalion dispatched one unit to secure the ferry crossing at the suspected location AT 993221. The battalion CP with Company F and Company H, 2d Battalion 9th Marines consolidated and defended for the night at BT 000232, Company G established defensive positions at BT 002232.
- (3) The 3d Battalion, 3d Marines continued the advance through the valley to the southwest. Again found many caves, and located an abandoned guerrilla base camp at BT 133274. From BT 131274 to BT 131265 the battalion found surgical uniforms, ID cards and bandages. At BT 129270 found 1300 lbs of rice. Additionally large quantities of salt, gasoline and 3 sewing machines were found. At BT 119265 in the area hit by B-52°s, the battalion found 12 bodies with cartridge belts, grenades and a Russian carbine. At 1554 the battalion had searched to BT 115253.

k. Operations D+7. 15 December.

(1) BLT 2/1 continued search and destroy operations. Platoon patrols searched in the following areas: Company E, BT 0624; Company G, BT 0623; Company E,

BT 0723. The patrols encountered many tunnels and occasional Viet Cong suspects in caves. By evening the BLT had consolidated for the night in the following positions; Company E, from BT 066242 to BT 069243; Company F, from BT 069243 to BT 069238; Company G, from BT 069238 to BT 066237; Company H_p from BT 006237 to BT 066242.

- (2) The 2d Battalion, 7th Marines remained in the ferry site area and conducted patrols in and around that area. Company F patrolled in an area AT 985227 to AT 986230 southwest to grid line 23 and south to the river. Company H, 2d Battalion, 9th Marines patrolled from the river BT 000218 to BT 000227 to BT 024220 and south to the northern edge of the SONG CHANG and northwest along the river. Company H rejoined the battalion at 1330H and remained with the battalion and Company G at BT 024220. At 1630H the ferry site was located at AT 993221 by Company F who disposed to occupy and control the site. By darkness Companies F and H, 2d Battalion, 9th Marines had established defensive positions in conjunction with their CPs located at AT 996219 and BT 003218 respectively. The remaining Companies established night defensive positions in conjunction with the battalien CP at BT 001232.
- (3) The 3d Battalion, 3d Marines continued their search of PHUOC HA Valley area finding several weapons including three TSMG¹s and one BAR and four dead at BT 143280. At 1100H shortly after finding the above weapons and bodies the battalion made contact at BT 144283 with the enemy who employed 60mm and 81mm mortars. Shortly thereafter, 1114H, Company G received small arms fire in the vicinity BT 145279. Artillery fire was directed against the area and a platoon dispatched to search the area. The fire was believed to be diversionary to detract from the search area where weapons were found. At 1330H BT 142289 Company G found one cloth pullower gas mask. At 1500H Company G, 2d Battalion, 4th Marines arrived at the battalion CP and came under OPCON of the 3d Battalion, 3d Marines. Additionally the battalion found large quantities of rice, fish oil, and 5,000 meters of communications wire. By darkness the battalion established defensive positions.

1. Dis. 16 December.

- (1) At 0850H as BLT 2/1 continued their search merth toward 3d Battalion, 3d Marines, they received sporadic small arms fire from coordinates BT 093233. At 1130H the battalion made and maintained contact at BT 110240 with an estimated 40 to 50 Viet Cong. By midafternoon the Viet Cong Company broke contact and withdrew. By evening the battalion established defensive positions as follows: Company E, BT 105239 to BT 108239; Company G, BT 105239 to BT 104236; Company H, BT 107326 to BT 100239; the battalion CP was located at BT 107230.
- (2) At 0730H the 2d Battalion, 7th Marines departed the ferry site to conduct search and clear operations to the east. Swollen streams caused by the continuous heavy rains slowed the tactical column throughout the day. At BT 039210 the battalion found what appeared to be a Viet Cong staging area. One of the buildings at the site contained many blood stains and used bandages, Several caves were found in the area. The battalion established defensive perfector positions in the vicinity BT 068211.
- (3) 3d Battalion, 3d Marines continued their search of the PHUCC HA Valley area. During the morning Company G, 2d Battalion, 4th Marines located ten tons of rice at BT 128294. At 1015H Company E at BT 127277 and Company G, 2d Bat-

-रिकारकार

talion, 4th Marines at BT 117257 were alerted and prepared to move south to block or attack those Viet Cong units in contact with BLT 2/l. The battalien was not employed in a blocking role and continued their search. Additional caves were discovered at BT 133294 which contained small quantities of medical supplies. At 1540H the ARVN reconnaissance Company under OPCON of the battalion discovered a cave at BT 119258 containing 25 Viet Cong bodies wearing dark grey uniforms. At 1700H the battalion established night defensive positions in conjunction with the battalion CP.

m. D+8 through D+12, 17 through 20 December.

- (1) On the evening of 16 December Task Force Delta issued orders to the three participating battalions to commence search and plear operations to the east and northeast toward Highway 1 for eventual retraction afrom the area of operations.
- (2) BLT 2/1 commenced their advance at 170930H. At 171230H the lead elements were located at BT 113252. At 171334H BLT 2/1 reported their front lines at BT 126269 with no significant occurrences. At 175050H the BLT reported that they were closing on Hill 180 BT 1327 and had received occasional small arms fire during the move from BT 125269. At 172000H the BLT defended from the following positions: Company E, BT 133275 to BT 135276; Company G, BT 131276/to BT 134278; Company H, BT 134278 to BT 135279. At 180945H the BLT advanced from their night positions. At 181320H the forward elements of the BLT had reached the river at BT 183304. The river was swellen and impassable requiring a helolift. At 181800 the helo-ferry-lift was completed and unit dispositions for the night were: Company E, BT 187305 to BT 187302; Company G, BT 190304 to BT 187305; Company H, BT 187303 to BT 190304. The BLT CP was located at BT 189308. On the 19th the BLT continued their movement and closed at L and M Battery positions BT 2331 during the afternoon; by dark all BLT units were helolifted to the SLF for deployment and future relief of units at the PHU BAI enclave.
- (3) At 170855H the 2d Battalion, 7th Marines continued to search and clear to the east. At 170959H the battalion reported their leading elements at BT 096213. By 171114H the battalion reported their lead element at BT 110218. The battalion continued their movement east reporting their lead element at BT 130218 at 171217H. At 171250H the battalion received long range small arms fire in the vicinity of BT 133219 to BT 129219. At 171430H the battalion reported its lead elements at BT 144219. At 171810H the battalion lead elements halted for the day and established night positions of Company F and Company H, 2d Battalion, 9th Marines at BT 164222° Company G, upon closing established their defensive positions to the east and in conjunction with Company G and H defensive positions. At 180800H the battalien continued its movement to the east. At 181005H the lead elements were reported at BT 220227. At 181009H the battalion halted their advance to: helo-evac medical casualties and equipement from BT 177219. The advance contipued after the lift and at 181303H the lead elements of the tactical column were located at BT 225228. At 181330H the battalion reported lead elements in contact with an estimated Viet Cong platoon at BT 225223, the platoon was taken under fire, broke contact and withdrew. At 181350E the Viet Cong attacked the center of the battalion at two locations BT 212224 and at BT 219225 in an attempt to cut the tactical column. In addition to small arms fire the Viet Cong employed

mortars, machine guns, and 57mm recoilless rifles; their strength was estimated at more than a reinforced company. The battalion consolidated their positions in KY PHU BT 2122 while Company F flanked the attacking Viet Cong. Company H, 2d Battalion, 9th Marines, supported by artillery, made their way from the rear to reinforce and rejoin the center of the column. The attack lasted approximately three hours after which the remaining Viet Cong elements withdrew. The battalion suffered light casualties while the Viet Cong, after final count the following morning, suffered over 100 KIA. By evening the battalion established defensive positions from BT 215226 to BT 218227 to BT 215224 to BT 218225. On the 19th the battalion conducted a search of the Viet Cong positions finding a trench line and bunker system. Weapons and many bloody bandages found in the bunker system indicated numerous wounded, but not counted, during the previous days battle. After destroying the enemy positions the battalion continued their advance east. At 191445H the battalion reported its location at THON HAI BT 2425 and headed for BT 280225 where they were to entruck to stage at TAM KY for the motor march back to the CHU LAI enclave. However, the highway bridge at BT 291240 was rendered impassable due to damage by the enemy action and the convoy could not make the assigned entrucking area. In order to juncture with the convoy a foot bridge was installed at BT 263253. At 191750H the last element of the battalion crossed the foot bridge on their way to entruck north of the demaged bridge BT 291240. Upon reaching the road Company H, 2d Battalion, 9th Marines entrucked and departed for the ISA where they joined a convoy for the DA NANG enclave closing DA NANG late that evening. The 2d Battalion, 7th Marines entrucked and after receiving and returning small arms fire from the village of PHOUNG HOA (2) BT 2923 departed for the CHU LAI enclave.

- (4) At 170805H the 3d Battalion, 3d Marines commenced their advance northeast. Movement was difficult due to heavy rains and near impassable streams. At 171400H Company E received small arms fire at BT 155293, the battalion returned fire and called armed helicopters killing two (2) Viet Cong. The battalion proceeded to vicinity BT 179313 where the stream was impassable. Helicopters commenced lifting Company G, 2d Battalion, 4th Marines and the 2d ARVN Reconnaissance Company, 529th, from BT 175314 to L Battery positions BT 235316. The lift began at approximately 171700H and halted at 171750H due to bad weather. During the night Companies E and G remained with the battalion CF at BT 175319 while the two lifted companies remained at Battery L's positions. The next morning Companies E and G were helolifted to BT 235316 where they joined Company G, 2d Battalion, 4th Marines entrucked and proceeded to the ISA BT 1544. The battalion was then lifted at approximately 181500H, via helicopter to DA NANG. The lift was completed at 181900H.
- (5) At 191350H the Task Force CP began displacing to the ISA BT 1544 to better control the retraction of all units from the objective area.
 - (6) Artillery and other combat support and logistic units commenced

National Property

phase-out in conjunction with the retraction of infantry units. Sufficient infantry security was provided all supporting units during the retraction. On the 20th the last remaining security and logistic support elements departed the ISA at 1815H via motor march closing the DA NANG enclave at 2030H. At approximately the same time Task Force Delta CP closed the DA NANG enclave.

n. PSYCHOLOGICAL WARFARE. See enclosure (5).

12. RESULTS.

- a. General. Most significant results of Operation HARVEST MOON are the severe losses inflicted on a major Viet Cong Command, destruction of a large enemy supply installation, and the psychological impact on both the Viet Cong forces and the local populace of friendly offensive operations, conducted almost at will, in an area which had been strongly controlled by the Viet Cong.
 - b. Friendly Equipment and Material losses.
 - (1) One H-34 helicopter due to mechanical failure.
 - (2) One UH-1E helicopter due to ground fire.
- (3) One AN/PRC 10 radio with MIA forward observer accompanying ARVN Forces.
 - c. Enemy Equipment and Material losses.
- (1) Supplies: 45 tons of rice, 11 tons of tea, 1,200 gallons of fish oil, 3 tons of salt, large store of peanuts, 500 lbs of sugar, 300 lbs of soup mix, 125 gallons of fuel, 500 flashlight batteries, medical supplies, 3,800 meters plus 40 bolts uniform cloth, 600 complete uniforms, 15,000 buttens, large quantities of paper and rolls of brown plastic material.
- (2) Equipment: 9 bicycles, 31 pick/mattock, 15 entrenching tools, 200 bamboo signal drums, 3 sewing machines, 1 16 inch loud speaker, 1 cloth pullover gas mask, 4 AN/FRC-10 radics, 1 AN/PRC-9 radio, 1 AN/PRC-6 radio and 2,000 meters of communications wire.
 - (3) Weapone: 107 total:
- (a) Crew served: 2 57mm recoilless rifles, 1 81mm mortar, 1 60mm mortar, 1 .50 Cal MG, 2 M1919A2 MG, 1 DPM MG, 1 French MG, 2 CZECH BRNO MG (1 is CHICOM copy), and 2 B-40 rocket launchers.
- (b) Individual: 12 US BAR, 6 TSMG, 14 M-1 rifles, 4 M-1 carbines, 1K-50, 5 MATK-49, 1 AK, 38 K-44, 8 MAJ-36, 3 MAUSERS, 1 ENFIELD, 1 UNK SMG, and 1 UNK rifle.

13

- (c) Miscellaneous: 2 grenade launchers, 1 12.7 mm AA MG tripod and 1 81mm mortar base plate.
- (d) Ammunition: 10,000 small arms rds, 24 57 recoilless rifle rds, 13 81mm mortar rds, 73 60mm mortar rds, 14 cases 50 Cal.
- d. Friendly Losses: KIA 44, WIA 265*, DOW 6, MIA 1, MBD 1.
 * As of 23 December 112 WIA had been returned to duty.

e. Enemy Losses.

(1)	KIA:		CONFIRMED	POSSIBLE
	Ground For	rces:	314	327
	Marine Air	r8	69	284
	SAC:		24	UNK

- (2) WIA: estimated 100
- (3) VCC: 33 (including 4 PAVN)
- (4) VCS: 231
- (5) Ralliers: 3 (including 2 PAVN)
- 13. ADMINISTRATIVE MATTERS. See enclosure (6).

14. COMMANDERS ANALYSIS.

a. Enemy.

- (1) Noteworthy in this operation was the very apparent lack of response/
 reaction by VC units against potentially lucrative targets in the objective area,
 some static for relatively long periods of time. In certain of these cases, such
 as the Task Force Command Post and the Logistic Support Area, the risk was recognized but accepted on a carefully considered basis, with due precaution exercised.
 In other cases the presentation of targets to VC activity was involuntary, often
 dictated by conditions beyond the control of the Task Force. Notable among these
 was bad weather which at times prevented movement of certain heavy support weapons.
 Although active operations detrimental to the VC effort continued to be imitiated
 from these positions, there were no significant enemy efforts directed against
 such targets.
- (2) Similarly, the VC failed to respond to the large-scale use of Route 1 by troop, artillery, and supply convoys proceeding south from DaNang and north from Chu Lai to the objective area, a distance of 22 and 41 miles respectively. Fifty-four convoys were conducted over Route 1 during the period 9-20Dec with

CACDE

only occasional small arms fire and occasional mortar rounds directed at vehicles. One vehicle was damaged by a mine, slightly wounding the driver and assistant driver, and several troop within trucks were hit, none seriously, by small arms fire. There was no serious epposition by the VietCong.

.....

(3) Although ARVN officers familiar with the objective area cautioned about extensive minefields and defensive positions in certain areas deep within the VC homeland which we planned to penetrate, subsequent movement of units through these areas revealed an almost total lack of such defenses.

b. Weather and Terrain.

- (1) Of the eleven days that Task Force Delta was actively engaged in operations against VC forces and installations, good weather (clear and sunny) was experienced on only two days; marginal weather was encountered on three days (ceilings 500 ~ 1200 feet; visibility 1 3 miles; light, intermittent rain); and bad weather was the order of the day during the other six days.
- (2) The terrain was either high and rugged or low, flat, wet ground with very little average between the two. The few existing roads and trails had been systematically destroyed by the VC during a period of better than a year. An engineer estimate indicated a major engineer effort of approximately a month's duration was necessary to place one road, which could have been used as an MSR, into use. Accordingly, trafficability in the area was poor; mobility was vested in two means? foot or helicopter.
- (3) These adverse conditions of weather and terrain dictated a positive requirement for detailed alternate plans, particularly in view of the heavy reliance on helicopters dictated by poor ground trafficability. When helicopters were unable to fly, primary plans had to be cancelled and alternate plans immediately substituted for troop commitments and troop and supporting weapon movement.
- c. General. Most lessons learned in this operation are merely reaffirmation of existing doctrine. Certain recommendations contained in annexes to this report as submitted by various participating units and staff sections, are being evaluated within the 3d Marine Division. Additional items considered significant follows
- (1) Artillery was used extensively in the operation. Two towed batteries of 155mm Howitzers were convoyed to firing positions along Route 1 and covered a large portion of the TAOR. Two batteries of 105mm Howitzers were lifted by helo into position generally in the center of the objective area providing additional coverage. Remaining areas that could not be covered by artillery were covered by 4.2m mortar and howtar platoons helolifted into suitable positions with plans to leap frog them along in trace of the wideranging battalion.
 - (2) The UH-1E helicopter was used extensively as a reconnaissance

and command vehicle, and when gunfigured, for close support of infantry and troop convoys, particularly when weather prevented the use of fixed wing air. In the widely extended and rapidly moving situation experienced in HARVEST MOON, the UH-LE was essential for the overall commander and highly desirable for use by the battalion commanders, to whom it was made available on many occasions.

- (3) Where possible, landing zones for lifts of assaulting units and landing sites for resupply of units moving overland, were selected on high ground. It was found that little, if any, opposition was experienced in the use of such LZ's. The VC seemed to have prepared his defenses solely on the lower slopes of those hill masses he defended.
- (4) Accurate, systematic and timely reporting is mandatory. Reports must have sufficient detail to answer at least who, what, when, where, and when possible, how and why. The reporting requirement demands the meticulous attention of commanders at all echelons.
- (5) The requirement for positive and easy indentification of widely separated friendly unit locations on the ground to aviators and observers airborne was re-emphasized during this operation. The identification problems stemmed primarily from difficult terrain, adverse weather, and unfamiliarity of some pilots with the area. Better solutions to existing air-ground identification procedures are being sought within the 3d Marine Division.
- (6) Several B-52 strikes were employed in support of the ground eperation during HARVEST MOON. The bombs were dropped where they were supposed to be dropped, when they were supposed to be dropped and with excellent area coverage. A need exists to promulgate troop safety limits to field commanders and to develop a means of immediately and directly informing the field commander when the last bomb is dropped.
- (7) During most of the operation, troops of the infantry battalions in particular, were exposed to heavy, frequent rainfall and almost continual wading through flooded paddies, streams, and rivers. Serveral problems were developed because of this constant exposure which kept the individual Marine and all of his weapons and equipment thoroughly soaked.
- (a) Immersion foot became a real problem. Certain antidotes in addition to medical treatment, were used during the operation such as the automatic issue of thousands of pairs of new, dry socks during resupply of the battalions; fires were built where possible to dry feet, socks and boots; and units of company size were rotated out of the operation with fresh companies assigned as reliefs.
- (b) Field boots rotted very rapidly and a high replacement rate was experienced. Issue of needed boots was also effected, on request by battalions, during the daily helo resupply.
- (c) The jungle boot inner sole chafed feet badly after continued immersion in water. An unsatisfactory equipment report is being prepared on this item.
 - (d) A definite need exists for weapons cleaning gear which is an

LINE WILLIAM SOUTH LIGHT

DECLASSIFIED

individual, waterproofed item of issue. Cloth swabs for bore cleaning, for example, are currently packaged in large, un-waterproofed bundles, usually wrapped in only regular department store-type wrapping paper. These large bundles containing thousands of patches arrived at battaliens in resupply runs, already water-seaked even before distribution to companies. A return to the WW II small waterproof packet containing about ten cloth swabs is needed. Lubricating oil is received most often in large, several gallon containers, or larger, which complicates distribution to the individual and often results in much waste through spillage. Smaller containers are essential. A water-proof, spray type lubricant of the WD-40 type appears to be highly desirable for operations in extremely wet climates.

- (8) The attitude of the villagers in the QUE SON District Headquarters is worthy of note. The village had been surrounded by VC for more than a year. The only road into the village from the coast and Route 1, was impassable because of extensive demolition by the VC during that year. Buses and other vehicles were parked within the village, stranded, unable to proceed more than 500 meters along the road in any direction. The village was slowly being constricted and strangled. An air of hopelessness and apathy pervaded the entire area. This changed to cheer, hopefulness and optimism, almost evernight, when sizeable numbers of friendly ferces began to arrive in the vicinity. It was obvious that the villagers were under the impression that these forces were going to stay. They welcomed the Americans whole—heartedly and, on departure of the troops ten days later, sincere regret was evinced not only by the village officials, but also by a large part of the population. (Enclosure (8)).
- (9) Insefar as civic action is concerned, hundreds of villagers were treated in the village dispensary by the small medical staff attached to the Task Force Headquarters. Medical supplies and blankets were made available to the village dispensary through the District Chief, obtained from Civic Action Medical Assistance Program sources. Certain obvious damage to private property, primarily that caused by air resupply drops, was settled on the spot through the District Chief or other local officials, using small amounts of captured funds made available by 3d Marine Division G-2 for this purpose. Otherwise time and geographical remoteness of the village precluded major civic action endeavors.

PROVISIONAL ARTILLERY BATTALION

Chronology

6 December 1965

The wrning order for Operation Harvest Moon was received. Organization of the Provisional Artillery Battalion commenced, with the formation of a reduced strength Headquarters Battery of five officers and fifty enlisted. A task organization was developed, consisting of two 105mm howitzer batteries and, initially, one 155mm howitzer battery.

7 December 1965

All battery commanders, including CO, Battery M, 4th Battalion, llth Marines, from CHU LAI, were briefed, as were forward observer teams for employment with ARVN forces, the liaison officer for ARVN artillery, and the NGF spot team. Assembly and equipping of personnel of the Headquarters Battery was completed, including the formation of a 24-man communication platoon. Plans were made for staging all units to assembly areas and thence to the LSA or fighting positions, as appropriate.

8 December 1965

Battery M, 4/11, departed CHU LAI at 0800H for THANH BINH. Occupying a position initially at BT158444, this battery was subsequently displaced to BT165413 to support the attack of the 1st Battalion, 5th aRVN Regt. and the 11th ARVN Ranger Battalion. FO teams had joined ARVN units, and had a liaison team with the ARVN artillery and a NGF spot team. One Marine FO team with an ARVN unit which was overrun was rescued by helicopter. CO, Battery M, formed a replacement FO team. Two (2) additional ARVN 105mm howitzers were heliclifted to UE SON at 1830H. At the Battalion CP in DA NANG, Operation Order 1-65 and Admin Order 1-65 were received and distributed to all units of the Provistional Artillery Battalion. By 2400 of this date, Battery M had fired 52 rounds on one observed fire mission at BT105330 and 9 unobserved missions.

9 December 1965

At 0600, Battery N, 4/ll, fired at a reinforced VC Battalion at BT103337. Four observed missions were fired, expending 202 rounds. Initial surveillance indicated over 100 VC casualties. During the period, all radio contact was lost with Parine FOs with ARVN units. The rtillery battalion recon party departed DA NANG by helicopter at 0830H for the LSA, arriving at 0900H. The recon party departed the LSA for the SON at 0920H, and arrived at that location at 0930H. A liaison officer

was immediately sent to the ARVN battery located in the town. By 1010H, wire communications had been established with the ARVN battery and it was prepared to support the attack by 2/7 on Objective 1. At 1000H, an 40 reported that FO Mike 1's position had been overrun; at 1345, the team was located on Hill 43 (BT123320). Food and a radio were supplied to the team by helicopter. At 1430H, contact was regained with this team. Battery M, 4/11, fired a total of 280 rounds in 37 missions for FO Mike 1. Surveillance indicated over 200 VC bodies. The first elements of Battery "F" 2/12, arrived at FTO45343 at 1212H. Pre-Paration fires supporting the 2/7 attack on Objective 1 were begun by the RVN battery at 1240H and were completed at 1312H. By 1700H, the artillery Battalion command post has completed displacement from QUE SON to BTO45343. Battery F completed its helo lift and was laid and ready to fire at 1630H. Batteries F and M had completed a registration by nightfall, Battery M fired, in additon, 12 observed missions during the period, for a total of 545 rounds in 52 missions. The battalion FIG had been partially dug in by sundown, and fighting and foxholes for troops had also been prepared. Digging in of anno pits had commenced. Radio consumications at the close of the day consisted of trunk lines to the ARVN battery, the Task Force FSCC, and Battery F. Radio circuits included the battalion command/fire direction net, air spot net, and a helicopter landing zone control net, as well as Battery M conduct of fire net. additional wire lines were a trunk to the Task Force admin board and to Company "D", 1/3, which had moved in to protect the artillery position.

10 December 1965

The LRVN battery at UL SON fired in support of a Recon Company Patrol at BT027339. Battery F fired in support of 2/7 on automatic weapone at BT080248, BT079286 and BT083285. The automatic weapons fire ceased. Directed by an AO, Battery F fired on four .50 caliber MGs and troops at BT019275. The LGs were silenced. Also controlled by an AO, the RVM battery fired on automatic weapons at BTO35275. The weapons were silenced. Battery F fired on a suspected VC position at BT002290, coordinates supplied by the Task Force FSCC. During the period, restrictive fire areas for both ARVN and USAC artillery were delineated. Work continued on improvement of position, with the Battalion FDC being completely dug in. With the protective rifle company in position, the perimeter defenses were improved. Ammunition supply was built up slowly. With the arrival of 2/1 in the objective area, communications were established with the art llery liaison officer. Also, an additional artillery battalion command/fire direction net was activated, with 2/7 liaison officer on this net.

11 December 1965

The first elements of Battery "A", 1/11 arrived at BTO46344 at 0950H. Only a portion of the battery had arrived, however, when, due to weather,

ENCLOSURE (1)

further lifts were suspended at 1025H. Later in the day, lifts were resumed, and by 1550H, the entire battery was in position, laid, and ready to fire. In the morning, Battery F fired preparation fires for the landing of 2/1, and the RVN battery fired on an estimated 100 VC at BT955365. Battery F fired missions at coordinates BT087284, BT068267 for 2/1, and at VC bunkers at BT017351. The ARVN battery fired at 2 VC at BT968358, directed by an AO. With Batteries F and A reinforcing, Batteryh fired on an estimated 400 VC at BT090345. Battery F fired on a VC assembly point at BT095285. Battery L, 4th Battalion, 12th Marines arrived in the objective erea, taking position. at BT230315, being laid and ready to fire at 1910H. Battery A fired on a suspected VC CP at BT061285. By the end of the period communications had been expanded to include Battery L operating on the Battery I conduct of fire net. Contact had been established with Liaison officers with 3/3, 2/7, and 2/1. Wire - co manications had been laid from the battalion FDC to Bastery A. Improvement of position continued with the arrival of sandbags and concord tina. Ammunition supply was being built up toward the goal of a minimum of three days of ammunition on position.

12 December 1965

During the period, Battery A fired preparation fires for 2/1, and at VC at coordinates BT094271 and BT064272. Battery F fired in support of 3/3 on a bunker at BT995352 and in support of a recon patrol at a VC company at BT064272. Battery F was registered, and Battery A fired in a barrage for 2/1. Battery L fired at a suspected mortar position at BT132278, on automatic weapons at BT144276, on 20 VC in to open (in support of 3/3) at Bt160274, and, under the control of an LO, at VC in the open at BT132277. Battery F fired illumination in support of 2/1 at BT099275. During the period a restriction was placed on the firing of unobserved missions by 155mm howitzers because of the necessity of conserving a munition. This restriction continued throught the remainder of the action. A resupply of batteries was obtained on this date and improvement of positions continued with revetment of the howitzers and appear pits using dirt-filled appear boxes and sandbags. Battery FDCs were dug in.

13 December 1965

One platoon (two weapons) from Mortar Battery, 1/11, arrived in the objective area and were laid and ready to fire at Bt077276 by 1430H. Registration of Batteries A, F and L was accomplished during the period. Battery L fired at VC at BT08022754, BT122260 and BT146275. Battery A fired at targets at BT117267 and BT127270. Battery F fired at 10 to 15 VC at BT134281, and at 7 VC in a village at BT025267. Plans were under to displace two 105mm howitzers of Battery L to a position at BT016270 where fires could be delivered im support of 2/7. Work on improvement of all positions continued. The battalion communications systems was expanded to include a mortar bactery conduct of fire net.

UNCLASSIFIED

ENCLOSURE (1)

14 December 1965

One plateon (three weapons) from Nortar Battery, 1/12 arrived in objective area and took position at BT999232, being laid and ready to fire by 1440H. At 1030H, displacement of two 105mm howitzers from Bettery a commenced. This movement was never completed, inasmuch as only one H-37 helicopter was available, and that for only a short time. Also, one 105mm howitzer carriage was set down 300 meters from the desired position; reassembly of that howitzer was thus never possible. Had these two howitzers been landed complete and capable of firing, they could have engaged an estimated 500 VC in grid sounces 9933, 9937, 9922, 9921 and 0320. During the period, Battery F fired on VC in trenches at BT998286 (controlled by nO), and together with Battery A, on VC at BT055390 in suggest of ARVN actions. Battery F also fired illumination for 2/7 at BT019293 and BT023285. Battery A fired on VC at BT127270 in support of 3/3. Battery N displaced from its original position to BT234314, being in position and ready to fire by 2000H. That night the mortar plateon from 1/11 fired illumination for 2/1. Battery M displaced to Battery L position area at 2040H to continue support of operation. Commaunicatios expansion this date included the addition of a conduct of fire net for the mortar platoon from 1/12, and a conduct of fire circuit for the LRVN artillery advisor. General improvement of all positions continued.

15 December 1965

Registration of Batteries M and L was completed this date. The plateon of howitzers from Battery A was returned to its original position. AO-controlled missions were fired by Batteries A and F at coordinates BT053388, BT998341 (13 VC), BT010409 (30 VC carring wounded) and BT011407. In support of ARVN operations, Batteries A and F fired at coordinates BT033392, BT052390 (estimated VC battalion), BT054398, BN022392, BT025393, BT023386, BT057440, BT048404, BT033406, BT028402, BT050390, BT051394, BT044396, BT033391, BT024390, and BT020390. Battery L fired in support of 3/3 on AA weapons at BT114283. Norther plateon, 1/11 fired illumination for 2/1 at BT062242. Improvement of position continued with overheading of some of the ammo pits, and installation of more protective wire.

16 Ducember 1965

Eattery A helilifted to LSA. By 1420H all Battery A had completed lift to the LSA and was in position, ready to fire from that area. Battery L fired in support of 3/3 at BT125260 and for 2/1 at BT112242. Registration of Batteries M and L was accomplished. Battery F fired for 3/3 at a VC platoon at FT115295. Battery L illuminated at BT125260 for 3/3.

ENCLOSURE (1)

17 December 1965

Plans were made to displace the artillery battalion CP to the 18... Control was passed to Bettery M and the CP was struck. Bad weather provided helicopters and the displacement was cancelled. The CP was restablished at the same location and communications was re-installed. Control was resumed. Battery F fired locating rounds to enable a lost patrol from Company D, 1/3 to return to position.

18 December 1965

Displacement of the artillery battalion CP to the LSL commenced at 1120H and was completed at 120CH. By midafternoon, all communications had been installed and control was assumed from Battery M. During the period, the mortar platoon, 1/12, displaced to the LSA, and thence to D. H.NG, in conjunction with 3/3. A part of Battery F (three howitzers) displaced to the LSA. Battery H fired for 2/7 on VC at BT178212, BT210220, BT229219, BT210219 and BT175215. At the LSA, plans for defense were made, incorporating Battery A, the three howitzers from Battery F, and the mortars of Company D, 1/1. That night Battery A fired H&Is. The battalion CP received some SA and automatic weapons fire during the night.

19 December 1965

Bettery H, 4/11 displaced to CHU LLI by road, arriving at 1745H. The norter plateen, 1/11 displaced by helicopter to the aircraft carrier. Bettery F completed displacement to LSA and took up firing positions. At 1230H, Battery F commenced overland displacement to DA NAMG, arriving there at 1430H. With the arrival of Company D, 1/3, in the LSA, plans were made for integration of this companies morters into the defense of the LSA. Bettery A fired extensive H&I fires during the night. Plans were firmed up for convoy protection the following day. Communications were established with a limison officer at DIEN BLN and TAN KY, through whom RVN artillery forces were available on call. In addition as artillery 10 was on station to cover both north and south bound convoys. Battery A was laid to provide fire for north-bound convoys, Battery L was prepared to fire south.

20 December 1965

Battery L and the artillery battalion headquarters come need motor movement to D. F.NG at 0920H, arriving there at 1300H. Battery Λ come need displacement at 1000H and arrived at D. F.NG at 1430H.

ENCLUSURE (1)

DECLASSIFIED

SURVEILLANCES

ARTILLERY

Confirmed

Estimated*

KJA

16

270

*Due to the heavy contact on D day and D plus 1 plus the fact that most of the lucrative targets were fired in support of ARVN in their area of operation, accurate and immediate on the ground body counts were impossible. The majority of the surveillance came from AO's in the air.

INTELL IGENCE

1. Estimate of the Situation Anticipated in Objective Area.

- a. Current intelligence in the area of operations had indicated that the 1st Viet Cong Regiment had returned to its old operating area in the mountains and valley regions of HIEP DUC, VIET AN and QUE SON and thus posed a formidible threat to RVN forces in the area. The Viet Cong had developed a variety of base areas which were scattered throughout the area of impending operations. This was believed to be a well-developed complex containing medical facilities; training camps; food, weapons and ammunition storage areas; and printing facilities. The population was considered to be pro-Viet Cong.
- b. Composition. Units expected to be encountered in the area of operations consisted of:

1st VC Regiment

60th Battalion 80th Battalion 90th Battalion 400th Arty

70th Battalion CHU DUNG Battalion 49th Battalion (?) U/I Battalion D-20 Company D-21 Company

Units considered to be outside the area of operations but within reinforcing distance were:

7th Battalion A-16 Company A-19 Company D-22 Company

- c. Dispositions. See Figure 1.
- d. Combat Effectiveness of Viet Cong Forces in Area of Operations. The combat effectiveness of the 1st Viet Cong Regiment was considered to be good. Although they had suffered heavy losses in Operation STARLITE, there were indications that they had recouped their strength. The recent attack on HIEP DUC indicated that the regiment was again capable of coordinated action. The area of operations was well-known to the regiment and the local populace was expected to support them. No information was available to judge the combat effectiveness of other reported units. Their combat effectiveness was thus considered to be excellent until proven otherwise.

SECRET ENCLOSURE (2)

- e. <u>Probable Courses of Action</u>. Analysis of enemy capabilities resulted in the following being published as the enemy's probable courses of action in Operation HARVEST MOON:
- (1) Withdraw to mountainous areas while using local force and guerrilla units to harass and delay friendly forces.
- (2) Defend if engaged and unable to avoid friendly units, breaking contact and exfiltrating at first opportunity.
- (3) Harass friendly units with small arms, automatic weapons, mortar and recoilless rifle fire.
 - (4) Conduct ambushes of patrols and maneuvering forces.

2. Viet Cong Strength and Situation Actually Encountered in Objective Area.

a. Prior to the commitment of Marine Corps units in Operation HARVEST MOON, the llth ARVN Ranger Battalion was believed to have engaged the 70th Battalion on 8 December. The following day, the 1st Battalion, 5th ARVN Regiment was believed to have engaged both the 60th and 70th Battalions. These actions took place in the southeastern sector of the planned area of operations and generally coincided with the anticipated enemy dispositions. Statements of captives taken during the operation indicate that the Viet Cong in the area were planning an attack on a District Headquarters. This would account for VC unit displacements resulting in new location and subsequent encounters by ARVN units in the initial phases of the operation.

b. Units Identified.

- (1) <u>519th AA Bn</u> (AKA 195th AA Bn) Identified as having been in contact through interrogation of captives, two Ralliers, and translation of captured documents.
- (2) 80th Bn Identified as having been in contact and in the area of operations through the interrogation of one captive, translation of captured documents and markings found on captured pack.
- (3) 90th Bn Identified as having been in the area through the translation of captured documents being processed by the G-2, ICTZ.
- (4) AlO Co Identified as having been in the area of operations by the translation of captured documents and markings found on captured packs.
- (5) T119 Co = Identified as having been in the area of operations by translation of captured documents.

c. Other Significant Intelligence Gained.

(1) Infiltration of PAVN Anit-Aircraft Unit. The 519th/195th AA Brwss identified as having infiltrated into QUANG-TIN-QUANG-NAM Provinces. The infiltration, as reported by 5 captives and 2 Ralliers, began in late June and was completed by late November or early December. The route was not located exactly,

SECRET ENCLOSURE (2)

but reportedly started in VINH LINH, passed through LAOS, and possibly entered RVN in the vicinity of KONTUM. The infiltration was accomplished by the echelonment of three separate companies. They carried their equipment and personal effects with them as well as a small amount of ammunition.

- (2) OOB of 519th/195th AA Bn. See Figure 2.
- ceports had been received through various sources from a variety of agents to the effect that the DONG LINH valley area was a major Viet Cong logistics base. Following a B-52 strike on 12 December, the 3d Battalion, 3d Marines proceeded down the valley in a search and destroy mission. In the course of three days in the valley, this battalion discovered many of the reported caches wherein considerable quantities of materiel were captured and either destroyed or turned over to the local District Chief for further disposition locally. The importance of the DONG LINH Logistics Base can be judged on the basis of the amounts and types of materiel it contained. This involved 45 tons of rice, 11 tons of tea, 3 tons of salt, along with large stores of fish oil, peanuts, sugar and soup mix; weapons and ammunition stores including three light machine guns and 34 new CHICOM 7.62mm Moissin-Nagant Carbines still in preservative grease; a uniform factory with uniforms, a stock of 3800 meters and 40 bolts of material of excellent quality, 3 sewing machines, 15,000 buttons, and bundles of thread.
- (4) Location of Viet Cong Assembly Areas. The interrogation of captives and Ralliers indicate that the 519th AA Bn assembled and regrouped at CAO NGAN (BT 068268) following the fighting with the ARVN on 9 and 10 December. Interrogation of suspects enlarged upon the picture of CAO NGAN being both an assembly area and rallying area not only for the 519th AA Bn, but also another unidentified battalion size unit. Prisoner interrogations further indicate that AN TRANG (1) (AT 990259) was the assembly area for the 519th AA Bn following their participation in the HIEP DUC attack and prior to their deployment to the high round on NUI GIAI (BT 0427) and NUI CHAP CHAI (BT 0727). It was further determined that AN TRANG (1) would also be the rally point for the 519th AA Bn if and/or when exfiltration from the area of operations was to be effected.
- (5) Infiltration of North Vietnamese into QUANG NAM-QUANG TIN, I CTZ. Undeniable evidence of PAVN infiltration into I CTZ by the 519th/195th AA Bn was obtained through the interrogation of prisoners and Ralliers. This infiltration was accomplished by tactical units in complete secrecy. During interrogation two captives stated that they had heard that the PAVN 36th Regiment has been infiltrated into RVN to "replace" the 1st Viet Cong Regiment. The presence of the 36th Regiment is not accepted on the basis of such hearsay. The presence of the 519/195th AA Bn in the area of operation during Operation HARVEST MOON is accepted. It would appear, however, that this battalion suffered considerable losses in personnel and equipment as a result of repeated air attacks.

(6) Miscellaneous Order of Battle.

(a) During the interrogation of captives, several unit designations were mentioned. The 84th Regiment and the 36th Regiment were both mentioned, however,

the captives had no definite information and could only say that they had "heard" that these units were in the QUANG NAM-QUANG TIN area.

- (b) The T202 Co was reported by the Rallier Lai SO. No information is held concerning this unit, however, the designation "T" has generally been connected with training units. This Rallier also stated that the AKA for this unit is "THANH MAI" which is a known AKA for the 80th Bn. An analysis of the VCC's statement indicates the T202 Co, trained in eastern BINH SON District with lst VC Regiment, departing that area on 14 Aug, four days prior to Operation Starlite.
- (c) Captive Nguyen Tung TU claimed to have been from the 3d Co, 4llth Bn, 3l2th Regt. This battalion was reported to have the strength of 200 men. The regiment was reported to consist of two battalions, the 4llth and 4l2th. The captive was considered unreliable; however, it is possible that he had trained with elements of the 3l2th in North Viet Nam. A note of interest is the parallel between known PAVN unit designations. There is a confirmed 3l2th Division with a 14lst Infantry Regiment and a 142d Heavy Weapons Battalion. There seems to be no correlation between these units and those mentioned by the captive except for the similarity in the numerical designations.
- (d) Although still speculative, the presence of the 519th AA Battalion suggests the possibility that a PAVN regiment has infiltrated or is about to infiltrate into this area. This speculation is supported by the overall scale of infiltration, reports of which continue to be received.
- (7) Psychological Vulnerability of 519th AA Bn Personnel. The 519th/195th AA Bn was considered a lurrative psymar target due to the recent and repeated air strikes on their positions. Nguyen Quang DAT and Nguyen Van HUNG indicated that due to these strikes, low food supply, no mail, and sickness, the morale was low. Many others wanted to defect but that they were watched by their officers. Captives were persuaded to wishe letters for leaflet drops and make tage remorded broadcasts to be played over salborne loudspeakers. Other captives indicated that these leaflets were dropped on the target unit and that in one instance the officers gathered them up and refused to let the men read them. In another instance, they were ignored. The short term results of these leaflets cannot be assessed; however, there is every reason to believe that the remnants of the 519th AA Bn continues to be a vulnerable psymar target.

3. <u>Terrain Description</u>.

a. The area of operations was generally located in a flat, cultivated valley bounded on the north, west and south by rugged mountains covered by secondary growth and interspersed with tropical rainforest. The major valley area and the numerous highland valleys in and between the mountains contained terraced paddy and dry crop areas dotted by islands of relatively wooded high ground where are located the houses and living areas of the local populace. There are numerous hedgerows which bound and interweave among the cultivated fields and paddies.

SECRET

- b. Observation and Fields of Fire. Long range observation and fields of fire were afforded the Viet Cong over the approaches into the area of operations from the east by the high ground dominating the valley on three sides and the numerous rises of ground acress the entire valley floor.
- c. Cover and Concealment. There was considerable cover and concealment available in the valley area for relatively large units due to the numerous pine stands, hedgerows, cane stands and built-up living areas on the numerous islands. Long range detection was possible, however, due to the barren paddy and dry crop areas which were subject to excellent observation from the surrounding hill masses.

d. Obstacles.

- (1) Manmade. The two roads leading west from National Route 1 to QUE SON and VIET AN were effectively interdicted by countless cuts and destroyed bridges over the numerous rivers and streams in the valley.
- (2) Natural. The entire valley floor was interlaced with a river and stream complex which at this time of the year was an effective barrier to freedom of cross-country movement. The rain further contributed to the natural obstacles by inundating the great portion of the valley and turning the rice paddies into effective barriers to easy cross-country foot movement. The rugged, overgrown hill masses and mountains bordering the valley were natural obstacles which tended to channelize and restrict movement.

e. Key Terrain Features.

- (1) Hill 280 (BT 0438) and the northern hill mass commanding local route 82 dominated the northeastern ground approach into the area of operations.
- (2) Hill 441 (AT 9828) and 445 (AT 9925) dominated the western extremity of the QUE SON valley and the narrow entrance to the HIEP DUC valley.
- (3) The southern mass of hills running east from VIET AN and including hill 401 (BT 0427), hill 407 (BT 0727), hill 378 (BT 0526), hill 330 (BT 1127), hill 434 (BT 0924) and hill 479 (BT 1324) dominated the southern approach into the area of operations, VIET AN, the DONG LINH valley and the area between the QUE SON valley and the SONG CHANG river valley.

f. Avenues of Approach.

(1) The entire QUE SON valley formed a northeast to southwest approach into the area of operations.

SECRET ENULOSURE (2)

- (2) The pass between HON NUI TAU and NUI CHOM in the vicinity of AT 9637 formed an avenue of approach into the western extremity of the QUE SON valley in the area of operations.
- (3) The valley of the SONG LAU past VIET AN formed an avenue of approach into the southwestern extremity of the QUE SON valley.
- (4) The HIEP DUC valley formed a western avenue of approach into the QUE SON valley.

4. Weather

- a. Weather in the area of operations consisted of intermittent rain and overcast skies with corresponding low ceilings. There was no variation from the average temperatures for this time of the year.
- b. Effects on Enemy Operations. There was no known adverse effect of weather on Viet Cong operations. It is assumed that their cross-country movement was hampered somewhat and hindered the evacuation of their dead and wounded and the resupply of their combat units. To what degree weather affected Viet Cong operations cannot be determined at this time.
- c. Effects on Friendly Operations. In general, the extended periods of rain in the objective area restricted our full employment of helicopters and close support aircraft. Ground operations were hampered due to the reduced visibility in the mountains during periods of heavy overcast and rain. Flooded paddies and swollen streams caused by the constant rain further hampered ground operations and cross-country mobility.

AIR SUPPORT OPERATIONS

CONFIDENTIAL

1. Summary of Air Support Operations

"Harvest Moon" was planned and put into execution in a very short time frame and only personnel with a "need to know" were informed of the operation. In consonance with most counterinsurgency operations in Vietnam, the nature of the terrain and enemy activity in the objective area dictated intensive use of air support from the initial stages of planning for the operation. A Tactical Area of Responsibility (TAOR) (as contained in Annax D to Operation Order 1-65) was designated for the operation and approved by the ARVN Commander I Corps. Initial planning included a heliborne assault on D+1 by 2nd Battalion, 7th Marines on Objective One (LZ-BT 017155), a hill mass southwest of the town of Que Son. Subsequent operations envisioned "fix and destroy" operations against the Viet Cong in the area, as ordered, utilizing any or all elements of Battalions 2/7, 2/1, or 3/3. The First Marine Air Wing was directed to provide air support for the operation. The First Marine Air-craft Wing was later augmented by the helicopter resources of HMM-363 and HMM-261 who have been under OPCON of FIELD FORCES Vietnam, and the Special Landing Force, respectively.

The operation encompassed a period of approximately 12 days. An airborne Direct Air Support Center (DASC), utilizing a KC=130, was employed from L-Hour minus one on D-Day plus one, through D-Day plus two when the Task Force Delta DASC was set up at Que Son, adjacent to the Command Group. For the remainder of the operation the DASC at Que Son (Landshark Bravo) controlled air support operations. Tactical air requests were handled by Landshark Bravo over the TAR net as well as through the Task Force S-3 to the DASC.

The Logistics Support Area (LSA) at (BT 154-450) served also as a helicopter staging area. Aircraft fuel was available on D+2 at the LSA. An element of MAG-16 eperations established a helicopter control team with the necessary communications to control helicopters in and out of the LSA. This control team was also tied in te Landshark Bravo, the DASC at Que Son, by both phone and radio.

After the initial heliterne landings of the three battalions on D+1 and D+2, there were approximately 60 additional helicopter lifts of platoon size or larger, plus the numerous daily Med Evac, recennaissance, liaison and smaller resupply and administration missions. The nature of the eperation dictated minimum time between planning and execution of these missions. The major pertion of these lifts were conducted in marginal weather conditions with cailings of 300 to 1500 feet and visibility from \frac{1}{2} mile to 3 miles. Coupled with the mountainous terrain and enemy fire, these weather conditions were extremely hazardous for air operations. Helicopters and fixed wing aircraft were successfully employed under these conditions, however.

In accordance with First Marine Aircraft Wing doctrine, all assault lifts into unsecure zones were preceded by landing zone prep by A4 and F4 attack aircraft. Helicepter escort and landing zone CAP by A4 attack aircraft plus armed UH-LE fire suppression support were also provided. Weather, as mentioned earlier, influenced the effectiveness of air support to a considerable extent and dictated the ordnance utilized. Napalm, 20MM rockets and 250 lbs M-dl bombs with Snakeye fins and Daisy Cutter fusing were employed for this lew level work. Normally two or four fixed wing aircraft were on station continuously during daylight hours when weather per-

ENCLOSURE (3)
CONFIDENTIAL

mitted and eight sircraft were on 15 minute ground alert at Danang and Chu Lai during darkness and bad weather. A flare plane at Danang and Med Evac helicepters at the LSA were also on 15 minute ground alert throughout the eperation. Air Support Radar Teams at both Danang and Chu Lai controlled TPQ-10 missions in the objective area during the periods of darkness. While the ASRT has the capability of controlling bembing drops within 500 meters of friendly troops, there was no requirement for TPQ-10 drops that close on this exerction. Four targets in the objective area were interdicted by USAF B-52 bembing raids during the "Harvest Moon" operation. This required close coordination to insure the safety of ground troops and aircraft in the vicinity.

CH-37 helicopters proved invaluable in transporting batteries of stripped down 105 hewitzers and carrying communications wans and jeeps into the objective area. One stripped down UH-34 was retrieved by a CH-37. Two Army CH-47's assisted in the operation by picking up several other UH-34's forced down by mechanical trouble. Two helicopters were lost in the "Harvest Moon" operation. One UH-34 forced down by mechanical trouble was destroyed by the VC with grenades before a security force could be brought in to protect it. The crew was safely evacuated. A UH-1E was shot down on a night Med Evac mission, the pilet was killed and three crew members were WIA.

There were a total of 106 incidents in which helicopters reported being fired at. Fifty three aircraft were hit with ever 160 rounds. A number of these were .50 caliber rounds. Total casualties incurred by aviation personnel were 1 KIA and 12 WIA.

Armed UH-lE helicopters played a vital rele in escorting read convoys from Chu Lai and Danang to the LSA and return. Along with Army OlB's, they also provided valuable reconnaissance information. UH-lE pilets provided a valuable source for TAC(A) requirements.

A summary of the operation shows that the A-4 and F-4 aircraft flew a total of 523 sorties and 710 flight hours during "Harvest Moon. The helicepters flew 9,230 sorties and 3,262 flight hours. They lifted 12,177 troops and 638 tons of carge. KC-130 aircraft made three air drops of 105 and 155 ammunition totaling 90,000 pounds and received 10 hits from small arms fire. Ordnance expended included 1058 MK-81/ANM-57 250# bombs, 539 MK-82/ANM-64 500# bombs, 173 napalm 208 5" Zuni rockets, 1529 2.75 FFAR and Lazy Dogs.

2. Problems Encountered

- a. Weather was a critical factor in the operation. Both helicopters and fixed wing aircraft conduct operations in weather that was below safe operating minimums. At these lew altitudes and reduced visibility, aircraft were exposed not only to the hazards of the terrain, but to excessive small arms and automatic fire as well. Low altitude operations also restricted the type ordnance delivered at lew altitudes could be employed.
- b. Heavy Lift Capability was not adequate for the operation. While the CH-37 helicepters utilized did an outstanding job, the operation emphasized the need for a helicepter capable of lifting 105 howitzers and downed UH-34's without having to strip or disassemble them. This is especially true in the case of downed UH-34's where retrieval time must be minimal to avoid destruction of the aircraft by the VC. Demonstration of the value of this capability was provided when Army CH-47 helicopters retrieved several HU-34's after only the rotor blades were removed.

DECLASSIFIED

CONFIDENTIAL

- c. Helicopter availability became a problem as the intensive temps of heliopter operations continued day after day without let up. Helicepter maintenance units were unable to keep pace as all available aircraft were utilized, previding little or no time for necessary preventive maintenance. Availability diminished daily until the end of the aparation.
- d. While put preblem areas, the following support was considered essential and contributed greatly to the success of the operation.
- (1) Airborne DASC was considered essential in an operation such as this. The period of time from the commencement of the operation until the Task Force FSCC/DASC is in operation is a crucial one and the airborne DASC is an excellent means of bridging this gap.
- (2) Utilization of experienced pilets in UH-LE's as TAC(A)'s te coordinate heliborne assault missions and fixed wing support was essential in setting up heliborne assaults on short notice (2-4 hours). Also utilization of these pilets who were familiar with the area, to lead reasupply and Med Evac helicepters into hard-to-locate landing zones in marginal weather proved extremely successful.
- (3) Provision of a Helicepter Support Team (HST) augmented by experienced helicopter sperations personnel with the necessary communications at the Legistics Support Area contributed immeasureably to the success of the operation. This support was especially required since the LSA also served as the main helicepter staging area. A deficiency in this area, however, was the lack of adequate night lighting at the LSA and the absence of navigational aids such as radio beacens or heming equipment.

ENCLOSERE (3)

COMMUNICATION REPORT

1. Communication-Electronics Report

a. General.

- (1) Communications were generally satisfactory throughout the operation with the exception of D+1 when considerable difficulty was encountered in communicating with higher headquarters employing high frequency radios equipment which relies on storage battery, BB-451 as a power source. Means of communication from Task Force to subordinate maneuver elements were limited almost exclusively to voice radio employing Radio Set AN/PRC-25. When units were operating in mountainous terrain it was necessary to establish up to two relay stations in order to maintain continuous contact. When convenient and appropriate, staff officers picked-up and delivered traffic on helicopter flights to smior and subordinate headquarters.
- (2) Communications security was a major problem in issuing orders and receiving reports to and from subordinate units. Establishment of a "covered" teletype circuit met this requirement from Task Force to higher headquarters.

b. Radio.

- (1) Tactical radio nets employing Radio Set AN/FRC-25 were effective and reliable. The Task Force Tactical Net was burdened to capacity handling both tandeal and administrative traffic. Relay stations were established on this no to ensure continuous contact with tactical units operating in mountainous termain.
- (2) Command radio nets were of varying quality and value. The Task Force Command Net was of limited use in communicating with maneuver elements. The major problem encountered in this respect was in the very unsatisfactory power supply, Storage Battery BB-451, for Radio Set AN/PRC 47 which a highly mobile battalion command group is required to employ and which they are totally incapable of recharging. At Task Force Headquarters mobile radio equipment was employed which was lifted in to the command post by helicopter. This equipment provided satisfactory communications with Division and III Marine Amphibious Force Headquarters.
- (3) Additional radio nets are required for organizations of this size and complexity. Recommended are:
- (a) Task Force Intelligence Net Linking all intelligence staffs together and providing on an WAS Required basis a net which special intelligence agencies may enter. Should employ FM portable equipment.
- (b) Task Force Logistics Net Linking logistics staffs and logistics supporting units together. Should employ HF SSB mobile and portable equipment.

c. Wire.

(1) A switching central with local telephones to staff sections within the Tark Porce Headquarters and to units within the immediate vicinity was installed.

CONFIDENTIAL)

- (2) Trunks to Division Headquarters and the Logistic Support Unit employing radio relay were invaluable throughout the operation.
- (3) Hot lines linking the Task Force G-2 with the Division G-2 and the Task Force G-3 with the Division G-3 were installed early and received heavy use, Radio relay was employed to provide these circuits.
- (4) The wire system installed was highly satisfactory and heavily burdened. A portion of the problem of the heavy traffic load was caused by a voice thannel on radio relay being of marginal value although entirely satisfactory for superimposed teletype. The establishment of the recommended additional radio nots would further alleviate this problem.

d. Radio Relay.

- (1) Radio relay was of inestimable value on this operation. A radio relay system was established employing four Radio Sets AN/MRC-62 as follows: terminal at 3d Mar Div Headquarters, terminal at Logistic Support Unit Headquarters, a second terminal at Logistic Support Unit Headquarters and a terminal at Task Force Delta Headquarters. Channel 1 of both links terminated in the Logistic Support Unit switchboard, Channels 2,3, and 4 were "patched" between terminals at Logistic Support Unit and provided the G-2 to G-2, G-3 to G-3 and common user with a superimposed teletype circuit respectively.
- (2) The terminal at Task Force Delta Headquarters was lifted to the Command post site by helicopter. This is both practical and feasible and highly recommended. The H-34 and H-37 helicopter is capable of maringthe list of the necessary shelter and equipment less M-37 truck. Generators and trailer make a second lift.

e. Message Center.

- (1) Message Center employing 60 wpm teletype equipment and KW-7 cryptographic equipment provided the Task Force Headquarters with a secure circuit for the passage of classified traffic to higher headquarters. This proved to be of great value throughout the operation.
- (2) In addition to the above it is highly recommended that teletype reperforating equipment be employed on future operations to provide greater circuit efficiency.

f. Special Problems.

- (1) A general shortage of satisfactory operating frequencies both HF and VHF. The high frequencies were "cluttered" to the point of uselessness at times. Additional frequencies above 12 MC are needed. Very high frequencies employed by FM equipment overlapped in some instances and were employed by both U.S. and Vietnamese units.
- (2) The Storage Battery BB -451 is an impossible power source for highly mobile infantry units operating in difficult terrain and relying on helicopter for logistics support. The life of this battery prior to recharge is consider-

ably less than expected (4-6 hours) and impossible to recharge under the circumstances encountered.

- (3) Radio Set AN/PRC-6 continues to prove virtually useless. Radio Set AN/PRC-10 should replace it at the rifle company level.
- (4) Radio Set AN/PRC-25 proved to be highly reliable and formed the backbone of the communications system to subordinate maneuver elements. This radio set is required within the infantry and artillery battalions and at higher echelons.
- (5) Ground/air indentification of units was a continuous problem. Providing units and organizations down to rifle company level with panels indentifying the company/battalion and parent regiment are recommended. Example of rifle company A 7 and infantry battalion 1 3. Each numeral or letter designator should be in black on a white background visible at 1000 ft and each on a separate panel. It is further recommended that they be of a lighweight material such as a vion that can be folded compactly for ease of carrying, and provided as a standard supply item.
- (6) Vehicular radio equipment must be scheduled for helilift to the CP site early in the operation to ensure continuous, reliable communications with higher headquarters located at a considerable distance from the objective area.

3

PSYCHOLOGICAL WARFARE

- 1. Psychological warfare operations conducted during Operation HARVEST MOON, 080900 Dec to 201700 Dec 1965 consisted of the following:
- a. At 101700, with the consent of the District Chief, a talk was given to a group of people (approximately 200) in the QUE SON District Headquarters area, explaining the reason for the presence of US troops in Vietnam. The talk was well received.
- b. On 11 Dec between 1330 and 1400, 60,000 leaflets 22-65 were dropped in the area BT 0525-0823-0523 in direct support of a Task Force Delta action underway against VC main force units in the area.
- c. On 12 Dec, 30,000 each of two leaflets were dropped which had been made from a North Vietnamese captime's notes. On the same flight the recorded voice of the captive was broadcast, speaking the message.
- d. On 14 Dec, 75000 leaflets 22-65 were disseminated in the area of BT 0625-0925-0923-0623.
- e. At 151300H Dec each of three B-52 strike areas hit on 13 and 14 Dec had 100,000 leaflets SA-1 drapped on them. 100,000 leaflets 22-65 mixed with 50,000 leaflets each of SA-4 and 23-65 were dropped from BT 0227 south to BT 0215, while the recorded speeches of the North Vietnamese captive and a North Vietnamese rallier were broadcast, introduced with the Vietnamese National Anthem.

ENCLOSURE (5)

CONFIDENTIAL

ADDITION AND MATTERS

- 1. Planning. The planning phase for this operation was of extremely short duration. During the period D-3 to D-1, planning was conducted concurrently with execution, in that the needs for the following day had to be predicted and the requirements for these needs tasked to appropriate units. Availability of all staff officers under G-4 cognizance cannot be over-emphasized during this phase. Their specialized knowledge regarding the availability of personnel and equipment and the employment of same is a requisite for good planning.
- 2. Execution. Execution of plans, from a logistic standpoint, was basically carried out as expected. Coordination of the logistics effort was accomplished by splitting the G-4 section. The G-4A traveled with the command group, while the G-4 and two men remained with the ISA, a point wherefrom supervision, changes, expediting and coordinating the movement of supplied and personnel from the TAOR's into the objective area could be more reality accomplished. On D+2 an additional officer was assigned as a G-4A to all in the logistics effort at the CP.
- a. ARVN Re-supply. ARVN infantry and artillery units were included in this operation. Re-supply of rations and water was provided ARVN personnel by the USMC unit to which they were attached. Re-supply of 105 mm howitzer communition was accomplished by aerial delivery paradrops and by USMC heliconters. This re-supply was not processed through Task Force Delta channels and thus, the actual delivery of supplies created problems within the reading zone due to this unexpected influx. It is considered necessary that any activity which conducts logistic missions in the area of operations coordinate such missions with all commands operating in the area.
- b. The requirement for fast moving infantry units precluded bringing any equipment that could not be transported by manpower alone. Infantry weapons included the 60 and 81 mm mortars, 3.5 rocket launchers and M-40 grenade launchers. Fast moving tactics utilized during this operation required frequent re-supply of all units as man-loads in this flexible situation were necessarily limited.
- c. The major logistics efforts by Task Force Delta organizations are reported separately and attached hereto.
- 3. Accomplishments. This operation effectively illustrated that use of existing roads, despite their location in zones not positively controlled by friendly forces, can be accomplished, provided proper security and engineer capability is planned for and available.
- a. They road convoys utilized highway #1 between Danang, the LSA and the Lai with only a few minor incidents occurring.

ENCLOSURE (&)

CONFIDENTIA

CONFIDE AL

- b. Helicopters were used exclusively for re-supply from the LSA to the units in the oblighter area. Though a tenuous method, it was the only means of re-supply analyse. Planning must include alternate means. This also holds true for re-supply from the TAOR's to the LSA. Dependency on one road could have stymied our efforts had bridges been blown in vital areas. Limited use was made of cerial delivery of supplies from Danang to the LSA. however, this method could not effectively provide total support for operation HARVEST MOON.
- 4. Cooperation. A maximum effort had to be provided by all supporting units to ensure any degree of success for HARVEST MOON. Motor transport units, engineer units, FLSG, FLSU #1 and the 3rd MarDiv Staff were immediately responsive to our needs regardless of the hour or the scope of the requirement. Many items which were not planned for, or those which were in critical surely, were requested and received in a matter of hours. The hasty inventery, redistribution of available assets and subsequent delivery to the LSA indicated a maximum effort was made by all agencies.
- 5. Lessons learned. The "lessons learned" during operation HARVEST MOON are reported separately and attached hereto.

TAB A TO ENCLOSURE (5)

LOGISTIC SUPPORT UNIT

1. The original site for Logistic Support Area (ISA) was selected on D-1 in the vicinity of Thang Binh but was changed on D day because of ARVN plans to use that area for a Regimental Headquarters. A reconneissance was made on D-day and the actual site for the ISA was selected. This site was a partially stabilized sand dune and was immediately adjacent to highway 1 in the vicinity of Huong Xuan.

2. Narrative report.

9 December 1965 (D+1)

Personnel from the Danang enclave arrived by motor march at the LSA at approximately 0830. Dump creas were selected and beach matting was placed in a "U" configuration to provide access to dump areas. An infantry platoon was provided for security and the collection and clearing platoon was propered to receive casualties at 1100. By 1700 the radio relay circuit to Danang was in operation. At 1730 the first supplies arrived at the LSA with class J, II, III and V supplies and the LSA was prepared to re-supply upon request. These supplies were originally planned to arrive by 1200, but due to road—blocks, they were late. With this convoy 13 additional men were added to the LSU from the Chu Lai enclave. (Four ration personnel, six ammo personnel and three bulk fuel personnel). By 2400 on D+1 the fuel farm was established and at 0200 on D+2 fuel was available for issue.

10 Decem r 1965 (D+2)

At 1230 the first re-supply of the ISA from Danang was made by motor convoy. It 1400 an aerial delatory of 155 and 105 ammo was effected. The first drop was a mile short and resulted in considerable offort in retrieving and also damaged one civilian house and injured 4 Victnamese children. The second drop of 105 ammo was on target but one chute failed to open. The cargo was sufficiently damaged that it had to be destroyed. At this time an HOD team of 2 personnel was brought to the ISA.

11 Describer 1965 (D+3)

rom 0800 to 1700 first re-supplies of the DN's were effected from the LSA by helicopters.

12 December 1965 (D+4)

Re-supply of the LSA by motor convoy continued. Priority items ordered from FLSG by phone at 0200 were delivered the following morning by convoy. Continued re-supply of front line units by helicopters.

A-1

CONFIDENTIAL

CONFIDENT'L

13 Decement 1965 (D+5)
Continued normal re-supply functions.

14 December 1965 (DH6)
Normal re-supply continued. Received sniper fire in LSA. Commenced patrols.
Patrol returned with 1 VC KIA, Russian carbine and several documents. Commenced H&I firing by 81 mm mortars.

1.5 December 1965 (D+7)
Continued normal supply functions. Inclement weather prevented re-supply of some units. Received small arms fire in the ISA.

16 December 1965 (D+8)

eceived approximately 20 rounds of incoming 61mm and 82 mm mortar rounds
t 0200. Counter mortar fire was directed at 61 mm location. Resupply of
extralions difficult because of inclement weather.

7 December 1965 (D+9) 200 re-supply until 1400 due to weather.

13 December 1965 (D+10)
Hormal re-supply continued. Received some small arms fire. Helo-lifted 3d Battalion, 3d Marines to Danang.

19 December 1965 (D+11)
Artillery convoy left for Danang. TF DELTA displaced CP to ISA. Helolifted Previsional Company to LPH.

20 Decem or 1965 (D+12)
Artillery convoy left for Danang. Completed backload of supplies for Chu
Tai. Helo-lifted Company "D", 1st Battalion, 3d Marines to Danang. Loaded supplies for Danang. Helo-lifted Comapny "D" (-), 1st Battalion, 1st Marines to Danang.

3. Medical evaluation.

a. The collection and clearing platoon as organized in the ISA was accessful and only minor modifications in medical equipment/supply were maded. These changes were made during the operation and are now part of the T/E. Some additional provisions for a sick call should be made at the ISA by providing a doctor and several corpsmen.

CONFIDENTIAL

- b. Collection and clearing platoon at the ISA processed 728 persons during the 12 day period. This included 51 non-U.S. personnel (29 ARVN, 4 VCS and 18 local Nationals).
- c. During the period of operation HARVEST MOON patients were evacuated to the LSA for initial treatment and then to C Med at Danang, B Med at Chu Lai or to LDH Valley Forge for hospitalization.

A-3

CONFIDENTIAL

TAB B TO ENCLOSURE (8)

3D ANTI-TANK BATTALION

- 1. During the period of 12-20 December of operation HARVEST MOON all companies of the battalion became involved in convoy escort duty. The primary duty inclormed by units of this Battalion was convoy escort. The secondary duty of security of the Logistic Support Area was accomplished when convoy escort vehicles were required to remain overnight at the LSA.
- 2. The original concept of the 3d Antitank Battalion's participation in HARVEST MOON called for one platoon of Company "C", 3d Antitank Battalion to be placed in support of the 3d Motor Transport Battalion for convoy escort between Danang and the ISA. Requirements for additional escort vehicles made it necessary to commit portions of all units of the battalion in support of convoys between Danang and ISA, between Chu Lai and the ISA, and between Danang and Chu Lai. The need for the establishment of a liaison/maintenance team to be located at the ISA also became apparent and was instituted on 16 December 1965.
- 3. Of particular note during operation HARVEST MOON was the convoy, escorted by a light section from the 3d platoon, Comapny "C", which made the first through convoy from Danang to Chu Lai on 13 December 1965 and returned from Chu Lai to Danang on 14 December 1965.
- 4. During operation HARVEST MOON the 3d platoon, Company "C" ascorted a total of 2l convoys. Elements of Comapny "A" participated in 8 convoy escort missions. Company "B" escorted two convoys and company "C", lst Antitank Battalion acted as escort for 8 convoys. Elements of Headquarters and Service Company acted as convoy escort on 4 occasions. A total of 4l convoys were escorted by elements of this battalion.
- 5. No major caliber rounds were fired during operation HARVEST MOON. No enemy KIA or WIA were accounted for. No Marine casualties were sustained by 3d Architank Battalion during operation HARVEST MOON.
- 6. During the 41 convoys escorted, the Office caused delay on 4 occasions, in 3 incidents, due to track breakage. In no instance was the convoy delayed more than one and one-half hours.
- 7. During the operation, convoys escorted by the 3d Antitank Battalion units came under sniper fire on numerous occasions but were never halted by enemy fire.

B-1

CONFIDENT

TAB C TO ENCLOSURE (5)

3D MOTOR TRANSPORT BATTALION

- 1. The 3d Motor Transport Battalion was task organized to Task Force Delta for operation HARVEST MOON. All subordinate units of the battalion were employed extensively during the course of operation. Infantry support was rendered by four separate battalions based both at Chu Lai and Danang to prove security personnel for the many different convoys conducted during the operation. Ontos were employed as convoy escorts and were primarily used since the weight factor limited the use of other assets. Air support was used extensively and the armed helicopter was considered a necessity on all convoy movements outside the TAOR. The concept of operation and mission of the 3d Motor Transport Battalion was twofold:
- a. Movement of troops from both Chu Lai and Danang to the area of Tem-Ky and the LSA.
- b. Re-supply of all necessary classes of supply required to suppose all units involved in the operation. All classes of supply were staged and loaded at both Danang and Chu Lai (FISG and FISU #1) and transported by vehicle convoy along highway 1 to the ISA.
- 2. The battalion was also given the added responsibility of organizing and staging convergements for most of the other units and organizations assigned to Task Force Delta. 2nd echelon maintenance was accomplished at the ISA for all motor vehicles, and no serious maintenance difficulties arose.
- 3. Convoy movement for the most part had little or no difficulty, but the conditions of roads, bridges and congestion of civilian traffic limited the use of time and space factors in adhering to strict convoy scheduling. Convoys did not meet any serious opposition from enemy action, but many convoys were fired on by snipers, and accasional mortar rounds were directed at vehicles. One vehicle was damaged by a land mine, slightly wounding both the driver and assistant driver. These were the only casualties suffered by motor transport personnel in the entire operation.
- 4. The movement of troops by convoy included most units involved in the operation less the Special Landing Force. The infantry battalions were transported from their permanent command post locations to the designated assembly and LSA areas. The retrograde movement was similiar to the initial forward novement, however more use was made of helicopters for troop lifts. Cargo movements were made to the LSA during the entire operation utilizing two main supply points; Daning, 22 miles to the north and Chu Lai, 41 miles to the south. Vehicle convoys were therefore hauling from two separate directions meeting the heavy commitments required to support three battalions.
- 5. Fifty-four convoys were required to move approximately 7,400 personnol and 1,400 tons of cargo. Approximately 50,000 miles were driven consuming approximately 10,000 gallons of MOGAS.

C-1

TAB D TO ENCLOSURE (5

9 Deceming 1965 (D+1)

· At JoOO, five EM from Composite Engineer Company (Fwd) departed Danang by truck for the LSA, CO of this unit was helo lifted to the LSA and thence to Que Son where he assisted in recon of the area for defensive purposes. The 5 EM departed the LSA by helicopter for Que Son and arrived at 1630. The remaining hours of daylight were used emplacing the ML and digging foxholes.

10 December 1965 (D+2)

The Engineers installed a double concertina in all avenues of approach and constructed a machine gun bunker at the CP. The Engineers also supervised the construction of emplacements for other units in the Que Son area.

11 December 1965 (D+3)

Improved emplacements and commenced camouflaging of Task Force CP area. Manned two positions on Headquarters perimeter.

12 December 1,65 (D+4)

Continued improving emplacements and camouflage of area. At 0840 received notification of mined areas with pumpkin mines, large tunnels and caves. Demolition team equipped and ready to move if needed. At 1600, G-4, 3d MarDiv and CO, Composite Engineer Company went on an aerial recon of road from Que Son to ISA area. Demolition team destroyed a WP riflo grenade dud (US). Manned CP perimeter positions until dawn.

13 December 1965 (D+5)

Supervised construction of 2 two shole heads. Demolition team destroyed 21 dud 105 HE rounds (US), 12 60 mm rounds (US) and 1 dud M26 hand grenade (US). Continued work on positions and camouflago. Instructed security personnel in the operation and installation of M49Al type flares. Installed triple concertina in some CP areas. Manned positions until dawn. CO, Composite Engineer Company checked platoons attached to infantry battalions.

14 December 1965 (D+6)

Relocated machine gun emplacement. Following items of ordnance destroyed:

- 18 60 mm mortar rounds
- 73 Chinese grenades (MIN)
- 12 Chinese potato masher grenades
 8 Chinese blocks TMT
- 18 Firing devices
 - 1 Smoke grenade (US)

orana orang sa Sa∰ara

CONFIDENTIAL

All of the above was captured Viet Cong ordnance. Co, 3d Engineer Battalion and CO, Composite Engineer Company conducted an aerial recon of the road from Que Son to the LSA and the road from Thang Binh to Viet in and north to Que Son. Manned positions until dawn.

15 December 1965 (D+7)

Moved double concertina from west side of CP position to new location. Reinstalled triple concertina to tie in with existing defense. Participated in a body recovery mission at site of downed helicopter, to check area for mines. None found. Helicopter dropped a captured M16 mine (US) in Que Son LZ. Mine was activated and detonator was struck. Sandbags were placed around the mine and it was detonated.

16 December 1965 (D+8)

Destroyed the following items of captured ordnance:

1 75 mm round

1 3.5 WP round (US)

4 Chinese potato masher grenades

4 60 mm mortar rounds (US)

10 50 caliber cartridges

One EM had slight injury to back side of left hand from falling fragments after blast. Detonated 1 Chinese hand grenade with the following marking "THU FO.". This was a concussion grenade.

17 December 1965 (D+9)

Five enlisted men worked with HST offloading and loading helicopters. Destroyed the following, items of ordnance:

1 M21 frag grenade

l Damaged M26 grenade

1 Chinese potato masher grenade

18 December 1965 (D+10)

Five enlisted men worked with HST offloading and loading helicopters.
Destroyed the following items of ordnance:

1 3.5 WP round

1 Rifle grenade (Smoke)

Thile destroying above items three rounds of small arms fire were received. No injuries. Manned positions until dawn.

19 December 1965 (D+11)

Staged gear for evacuation to LSA at 0945. CO, Composite Engineer Compar. departed on a helicopter recon of highway 1. A bridge was blown at coordinate 292 200241. Engineer team with the convoy from Chu Lai repaired the bridge. CO, Composite Engineer Company (Fwd) relocated to LSA.

20 Decemebr 1965 (D+12)

Staged equipment and vehicles for movement back to Danang. Arrived at 3d Engineer Battalion compound, Danang at 2100.

D-2

CONFIDENTIA

TAB E TO ENCLOSURE (5)

COMPOSITE ENGINEER COMPANY (REAR)

9 December 1965 (D+1)

At ()O this unit departed Depang area via motor convoy and arrived ISA at 0830. Upon arrival, a recon of the area was made to select a water point for the task force. The water point location selected was in vicinity of BT 152452. The water point truck arrived at 0900 and erection of the water point equipment was started. By 1300, 3000 gallons of water had been purified and was ready for issue. The portable water tank was sand-bagged in and four (4) defensive positions were selected and emplaced. Because the water point was located 300 yards morth of the ISA perimeter, defensive assistance was requested of the ISA Commander. A total of 11 men were on hand to defend the water point.

10 December 1965 (D+2) **

No incidents occurred during the night. Improved on positions and an additional water tank was sand-bagged in place. At 1120, the bridge platoon reported to ISA and was assigned positions at water point area. Bridge platoon personnel were included in the perimeter defense, positions assigned and the security was established for the night.

11 December 1965 (D+3)

No incidents occurred during the night. Empty water cans were hauled by ther point personnel from the helicopter landing site to the water point, filled and returned to the helicopter landing site. XO, Composite Engineer Company assumed command of attached bridge platoon by order of CO, Composite Engineer Company. Truck convoy assigned to water point perimeter for the night. Personnel were assigned areas of responsibility.

12 December 1965 (D+4)

No indents occurred during the night. Concertina wire installed along outer permeter. Water can detail continued filling and hauling cans to helicopter site. Information received that Company "D", 1st Battalion, 1st Marines would assume perimeter defense of water point and that Company "H", and Battalion, 9th Marines would defend the ISA perimeter. Security watch set in vicinity of the water point and liaison was made with the two rifle companies.

13 December 1965 (D+5)

No incidents during the night. A request for additional mine detector was received from 3rd Battalion, 3rd Marines. One engineer squad went with convoy to Chu Lai accompanied by one section of bridge platoon with tools and mine-sweep team. Three men with mine detector were sent to LZ Zulu on helicopter rescue mission. Swept the area around helicopter for mines. one located. Helicopter evacuated. Received 2 ANPRS-3 mine detectors from LSG.

4 December 1965 (1)+6)

A request for a mine detector team was redeived to go south on highway 1 to check area around a blown bridge. Results of sweep-negative. Road possable to all traffic. WW working on blown bridge 6 miles south of LSA.

15 December 1965 (D+7)

No incidents during the night. Continued hauling water in 5 gallon cans from water point to helicopted landing site. At 0200, received approximately 20 round of 61 and 82mm mortar rounds in the area. No damage or casualties in engineer area.

16 December 1965 (D+8)

Three man sweep term departed with truck convoy to Chu Lai with truck cond of sand, demolition equipment and mine detector. 3d Engineer Bettalion Commander with 34 personnel and 7 dump trucks placed fill on road in required location between Danang and ISA.

17 December 1965 (D+9)

No incidents during the night. Detachment of 3d Engineer Battalion loaded dump trucks with fill for road areas between ISA and Danang. The three man sweep team that went to Chu Lai returned with no incidents to report.

_3 December 1965 (D+10)

No incidents during the night. OIC, Composite Company (Rear) was summoned to LSA command post concerning a bridge out 8-10 miles north of LSA. Helicopter recon was performed. By-pass bridge under water and old bridge adjacent to the by-pass has two spans missing. At 1530, LSA ordered recon of wridge at 197391. Team of 8 engineers and an infantry platoon for security departed LSA. Arrived at bridge site and found it had not been blown. Civilians were working on the bridge and estimated that it would be back in operation in about one hour. At 1700 the LSA received fire from automatic weapons. No casualties occured.

19 December 1965 (D+11)

ISA Commander ordered road recon of flooded bridge between ISA and Danang. Security the provided by a platoon of ISA provisional rifle company. Vehicles were forcing between 18 and 24 inches of water over the bridge. Local residents stated that the waters would begin to recede by early afternoon and the bridge would be visible. Bridge components were helicopter lifted to the sate. CO, Composite Engineer Company accompanied bridge detail to site. A loot bridge was installed and the crossing of the foot troops commenced at 1335. Recon of flooded bridge north of ISA ordered at 1730. Water had needed and bridge was clear. The approach on northwest side was still add. The bridge could be crossed at night with little difficulty.

⇒ □ecember1965 (D+12)

No incidents during the night. Began dismantling water point equipment. 3000 gallons of potable water to be kept on hand until word is received to campletely shut down operations. Total water issued by day follows:

E-2

TAB F TO ENCLOSURE (6)

LESSONS LEARNED

A. LOGISTICS SUPPORT AREA (LSA)

- l. Selection of site. The entire I CTZ should be studied with the object being the tentative selection of ISA's. Priority of effort should be devoted to those areas where operations are most likely to be conducted in the near future. Intelligence data and proximity to the TAOR may be the main determinants in establishing priorities for site selection.
- a. Two of the most important criteria to be met for a ISA site are the capability of transporting supplies from the main supply areas to the ISA, the availability of suitable real estate to accommodate approximately 30 helicopters at any one time. Other factors, such as space for establishing supply dumps, can be compensated for by a variety of methods, but should the two major criteria not be met, the logistic support of operations would be significantly affected.
- 2. Security. An ISA supporting a regimental size operation is best defended by a company perimeter. This permits the perimeter to be large enough and has enough troops available to conduct extensive patrols and ambushes to disrupt enemy attempts to build up for an attack. One rifle company (rein) was provided for ISA security, and this is considered the minimum security force for such an installation. The following points are considered worthy of note:
- a. An indirect fire capability should be provided for the perimeter security forces. Sl mm morters should be the smallest indirect fire weapons considered.
- b. The perimeter security forces should have enough radios to control their patrols and ambushes, and land line capability sufficient to link all units on the line with at least one command post.
- c. The perimeter security forces should have a forward air control and artillery forward observer capability.
- d. At times, up to ten stations (including forward observers, Ontos and provisional company stations) entered the Delta Company TAG net. This over-crowding could be relieved by assigning a security force frequency in addition to the TAG nets of the security companies.
- 3. Build up of the ISA. Present usage data on Class V requirements for a BIT are out of phase with the helicopter landing operation minus any vehicles for transportation. As a result more ammunition of some types was moved into the ISA than required. A reevaluation of Class V requirements, using as preliminary guidance the issue figures from HARVEST MOON, is in order.
- 4. Representatives. Units should have a representative in the ISA area to assist in processing the needs of their particular unit, both in re-supplying and in collecting equipment which is returned from their units. 3rd Battalion, 3rd Marines used this procedure effectively.

B. COMMUNICATIONS.

- 1. Logistic Support Net. There is a requirement for a common radio net linking the logistics staffs at all levels and the logistical support area Headquarters together. Throughout this operation logistical requirements were passed from infantry battalions to Task Force Headquarters on the tactical radio net. From Task Force Headquarters to the Logistical Support Unit the requirements were passed by telephone or radio. Both the telephone and radio circuits were heavily burdened thereby creating some delay in making requirements known. Although an ISU net was in being, and some requests were received via this net, the battaliens did not fully use this net. It is recommended that all logistic requirements be levied directly from the unit to the ISA on the logistic Support Net, and that this net be a common net linking the logistical staffs.
- 2. Between the CP and the ISA. A separate channel of communications is required between the G-4 at the CP and the ISA. Radio nets, though available, do not lend themselves to immediate requisitioning needs as message writing and transmission procedures are time-consuming. The most adequate, most responsive means available is the wire-radio-relay link between the CP and the ISA. This link is used by many staff sections and time delays of up to \(\frac{1}{2} \) hour were experienced in vaiting for this one channel. It is therefore recommended that a "logistics hot line" be made available for G-4 ISA use.

C. MEDICAL

- 1. Shock and Resuscitation Team. The concept of a shock and resuscitation team to support this type of action, when within close helicopter range of a field hospital, is valid and the operation effective. The team as constituted, (one general surgeon, one orthopedic surgeon, one anesthesiologist and three general medical officers) was overstaffed in the highly trained medical officer complement. One senior clinician and 3 or 4 experienced general medical officers is sufficient for such a team.
- 2. Tentage. GPM tents not suitable as primary treatment shelters Fly tents and tunnel-tents are superior.
- a. During the monsoon season, a definite need exists at the medical facility for a warming tent for walking medical evacuees. During critical periods, helicopters are not readily available to evacuate these persons from the ISA. Consequently, they must spend considerable time in the open. It is recommended that a warming tent be provided for walking evacuees.
- 3. Evacuess. The Shore Party Company provided coffee when available to evacuess. It is recommended that a small field kitchen be set up at the clearing plateon area to provide hot coffee and soup to evacuess. Conversely, during the dry season cold drinks should be available at the ISA if feasible.

D. SUPPLIES.

- 1. <u>Clothing</u>. By their nature, infantry units must travel light, therefore replacement clothing must be available for immediate issue at the ISA. During inclement weather, sufficient stocks of boots, socks, underwear and utilities must be available for issue. The same holds true for items such as ponchos and shelter halves.
 - a. Some force feeding of clothing and PK supplies was made in an effort to meet

the meeds of the individual Marine. However, the battalions are not always in a tactical posture to receive these items with normal re-supply. Battalions should be made ewere that these type items are available and that they am request these items when they are able to receive them.

- 2. Smoke grenades. Availability of green and yellow smoke grenades, hand, was at times critical indicating that there may be a shortage of these items in country. If this shortage is a fact, then thought should be given to changing color codes to take advantage of whatever colors smoke are in adequate supply.
- 3. Cleaning supplies. At one time during the operation, the requirement for rags, cleaning solvents and oil for the 105 mm howitsers became critical. It is recommended that this type unit (semi-permanent in nature) bring sufficient supplies to take care of these normal requirements.
- a. During inclement weather, the requirement for rifle oil, patches and cleaning gear is much higher than normal. Accordingly, the ISA should have larger quantities of these items on hand ready for issue.
- (1) Rifle oil must be in the small cans so that it can be issued to, and carried by, individuals. Issue of rifle oil in larger cans requires on-the-spet usage and is not conducive to being carried by individuals.
- (2) Rifle patches should be packaged for issue in the individual, waterproof envelopes as they were in the past. This type of packaging will insure that the individual has dry patches for use. Patches issued in bulk quantities, because they are loose, are amenable to becoming wet and/or dirty while being carried.

R. RE-SUPPLY.

- 1. <u>Medical</u>. Medical re-supply to be instantly responsive to needs of clearing platoon in the field, must be available at field hospitals where supplies can be loaded on returning med/evac helos.
- 2. Flame throwers. Infantry battalions on the move, as they were in this operation, do not have the equipment or the time to recharge their flame throwers. It is felt that a supply of ready-to-use flame throwers should be available to be issued to units. If this is not feasible, charged tanks and napmim mix should be available for issue. ISA had the capability of recharging tanks.
- 3. <u>Water</u>. Re-supply of water was accomplished by filling empty water cans at the ISA, where a water point was established, then transporting them to units by belicopter. This resulted in many water cans standing empty at unit locations until they could be picked up. In the case of infantry units this type of re-supply must continue, however, in the case of fairly stationary units such as the Task Force Headquarters, Artillery Battalien Headquarters and Artillery Batteries, lister bags should be used to a maximum. The filling of lister bags and an immediate return of the empty cans could make 100-125 additional water cans available for the re-supply of infantry units on an immediate basis and at critical times.

F-3

- a. The feasibility of inexpensive, one time use, plastic containers for water resupply should be investigated. A sufficient supply should be available whereby they could be delivered to tactical units who would return the containers if feasible. Re-supply would then not be dependent upon the return of empty containers to the water point.
- b. A further area which is worthy of investigation is the delivery of water in large quantities, either in 55 gallon drums or other bulk containers.
- c. It must be noted that operation HARVEST MOON was conducted in relativity cool temperatures and frequent rainfall. In the hot dry season requirements for water would be more frequent and in greater quantity.
- 4. Availability of helicopters for logistic lifts. From 0800 to 1600 daily most of the helicopters were involved in tactical lifts. Re-supply of battalions prior to 0800 and after 1600 created a problem in that 50 percent of that time flying into the valleys was difficult due to rain and clouds. As a result the battalions missed their normal re-supply. Re-supply of battalions during the day was hampered by the non-availability of heli-copters.
- a. It is recommended that two helicopters per battalion supported, be provided to the ISA Commander for logistical support to the battalions. The pilots would be familiar with the terrain and could provide for normal and emergency re-supply throughout the day. During adverse weather conditions, armed helicopters should be employed to lead the re-supply helicopters to the landing sone. The added protection and familiarity with the battalien area of operations can ensure delivery of supplies in many instances.
- 6. P. O. L. Initial fill and resupply of Class IIIA (JP4 and 115/145) at the ISA was accomplished by commercial refueler trucks. The major quantities of these two products were delivered from Danang and the remainder from Ghu Lai. In the latter stages of HARVEST MOON, the commercial trucks could not make deliveries from Danang to the ISA due to the condition of the roads. CH-37 helicopters were then used to deliver fuel in external tanks. Limited quantities of 115/145 in 55 gallon drums were delivered by UH-34 helicopters. Class III (MOGAS and Diesel) requirements were low since operating units did not employ tactical vehicles. Organic refueler trucks delivered MOGAS, and diesel was available in 55 gallon drums to support CP and ISA operations.

F. MOTOR CONVOYS.

1. Size of convoys. During eperation HARVEST MOON the immediate requirement for a large volume of cargo and many troops to be delivered within a specific time-frame, called for convoys of a length exceeding the bounds of good control and security protection. Due to the weight limitation on bridges, the read conditions, and the large amount of civilian traffic encountered, the larger convoys had to slow down considerably, and sometimes stop for one way bridge and road traffic, and/or traffic jams. This presents a petential hazard to the security of the convoy and the hazard increases in direct proportion to the number of vehicles in the convoy. It is recommended that the ideal convoy should contain between 10 to 15 cargo trucks.

2. Convoy security.

- a. Troops. Although no major incident occured during operation HARVEST MOON in which the lack of convoy security was a factor it must be noted that the most desirable situation is to have one squad of infantry for every 5 trucks. This affords adequate convoy protection around sharp corners and while waiting for traffic jams and bridges; if some action should occur a substantial force would be readily available. It is also suggested that the presence of this number of troops with the convoy may act as a deterrent to the enemy by nature of its very size.
- b. Ontos. Use of ONTOS as convoy escort. On many occasions the ONTOS has been called upon to provide security for artillery units displacing from one position to another. Further the ONTOS has been used as a convoy escort and subsequently employed in offensive action. The advantage of the ONTOS as an escort vehicle rests in its maneuverability and rapid engagement of targets. Much larger vehicle such as tanks or amphibious tractors are restricted by narrow and limited weight capacity bridges over which the ONTOS is capable of traveling. It is recommended that the ONTOS continue to be employed as security for convoy escorts.
- c. Air. During Operation HARVEST MOON many convoys were employed to haul troops and cargo from Danang and Chu Lai to the ISA. These convoys were well removed from the TAOR of both enclaves and as experience has shown, subject to incidents involving small arms, morters, and mines. The requirement for aerial escort by armed helicopters and/or VMFA/VMA aircraft is paramount for convoy flank security. By means of low passes on either side on the road the pilot can aid in detecting enemy action and furthermore, add to the overall control of the convoy's disposition. Single engine observer aircraft are desirable in long range recon of roads and obstructions, but are not desirable as convoy escorts. Primarily they lack the defensive and offensive capabilities of the UH-IE. VMFA/VMA type aircraft should be on station over the convoy if these assets are not totally committed for direct air support missions for other troop units. In this event, the strip alert aircraft should be available to support the convoy as well as other type missions. It is recommended that all convoys outside the TAOR be provided with two (2) armed UH-1E as convoy escorts.
- 3. Illumination. On several occasions it was necessary to move convoys during the hours of darkness due to the stringent commitments placed of 3d Motor Transport Battalion. The convoys are particularly vulnerable during these hours. On one occasion illumination was dropped by planes and the effect was extremely desirable. On each side of the road for nearly 500 meters the area was well lighted and full visibility was afforded to all drivers. In addition the armed UH-IE escorts were aided in their mission of locating possible enemy positions. Also the illumination could have been partially effective in deterring any enemy movement towards the convoy. It is recommended that any and all movements of convoys during the hours of darkness outside the TAOR be provided with adequate illumination.

G. GENERAL

- 1. Engineer. On Operation HARVEST MOON a footbridge was required to cross a narrow river, the detachment of Bridge Company had a M4T6 fixed span capability readily available. With several modifications this bridge was installed across the fifty-four (54) foot span and a battalion of troops was able to cross. These modifications were as follows: Using rathroad track found at the bridge site the M4T6 bridge was prefabbed and slid across the gap to the other bank. Instead of twenty-two (22) pieces of deck balk only (2) pieces per section were used. A hand rail was constructed with bamboo stakes and 3/4" rope. A steady line of troops was able to cross the footbridge. Total installation time after arrival at site was one hour and fifteen minutes. Dismantling time was about forty-five minutes.
- a. On two other occasions during this operation helicopters were used to ferry troops across narrow rivers.
- b. It is recommended that an aluminum Floating Footbridge be included in all similar operations. Footbridge to be used to cross streams and rivers to cut down on use of helicopters for ferrying troops across.

REPUBLIC OF VIETNAM

17 December 1965

From: People of QUE SON District

To: Commanding General, USMC, Headquarters, Task Force Operation,

at QUE SON

Dear General, all Officers and men of the USMC in OPERATION HARVEST MOON

In the anti-Communist struggle to establish peace in the Republic of Vietnam and safeguard world peace, the USMC has had occasion to station troops in QUE SON District.

Our Vietnamese people are very joyful and admire the heroic actions of the USMC during the operation commanded by you and your staff.

Before you and your men leave here, we would like to express our deep and warm thanks on behalf of all classes of people in QUE SON District.

It is not enough only to thank the USMC for their heroic actions, but we desire to unite the will of the people in consolidating the rear and assisting the Republic of Vietnam Armed Forces and Allied Forces to eliminate the Communists. This will bring peace to Vietnam and contribute to the construction of a strong Free World peace sooner.

Respectfully yours,

In the name of the people, we sign ourselves:

NGUYEN HUE, Representative of all Notables CAO DANG, Representative of Well Known People NGUYEN TRUC, Representative of Old Men LE LUYEN, Representative of Associations VAN PHU CAM, Representative of Political Party NGUYEN HAO, Representative of Cadres LE THI BICH HUONG, Representative of Women DUONG THI BUU, Representative of Women Cadres NGUYEN PHUOC QUANG, Representative of Youth

CERTIFIED A TRUE TRANSLATION:

MAJOR, U. S. MARINE CORPS

SPECIAL SUMMARY OPERATION HAPVEST MOON

I. OPERATION HARVEST MOON WAS A TACTICAL OPERATION INVOLVING THE MANEUVEL OF THREE REINFORCED INFALTRY BATTALIONS UNDER OPCOR OF TABLE FORCE DULTA, AND SUPPORTED BY AIR AND ARTILLERY UNITS, OPERATING THE COUNTERFORM WATER WATER Forces. The operation has completed of true 300 pages makes figure of hills. PAROUND PAROX LAND AND STREAMS AND RIVERS SHOULDER WITH MANDE INTER. HESTOCKTORE SUPPORT WAS EXTENSIVELY USED BY DAY AND TYPING THE ARM WEARPAR TO DELIVER TROOPS. WAS LOGISTICAL SUPPORT AND TO CONDUCT MEDICAL INACCEPTORS. CLOSE ALL SUPPORT ALRORADT FLYING UNDER ADVERSE WEATHER CONDITIONS DELIVERED TOWS OF BONES. NOCESSES. WAPALM AND 20MM STRAFING MISSIONS IN CLOSE SUPPORT OF ATTACKING MARINE CROSES THEIS. ARTILLERY SUPPORTING THE OPERATION FIRST 3,062 RDS OF 105mm, 1802 FOR OF 155MM HOLITZER AND 1,022 RDS OF 107MM AMBUNITION. FOUR B-52 STRIKES DELIVERED INTHE ORIECTIVE AREA CREATED HIDESPREAD SURFACE DAMAGE AND DESTROYED LUMERES AND CAVES. THO OF THESE STRIKES HERE EXPLOITED ON THE GROUND BY MARTHE FORCES. INFANTRY, AIR AND ARTY UNITS WORKING IN CLOSE COOPERATION DESTROYED OR CAPTURE NUMBERIS CAVES AND TURNEL NETWORKS; FORTIFIED BUNKETS, RICE STORAGE CACHES 45 TONS), TEL IT TONS), SALT (3 TONS). AND HUNDREDS OF GALLONS OF FISH ALSO CAPPURED OR DESPROYED WERE COMPLETE UNIFORM MEMURACIDERING FACILITIES. IN CLULTIC 3 SEED BY UNCETTERS, THEUSANDS OF INTERES OF UNLEGAN MATERIAL, 600 COMPLEMAN

DEC 20 1965

COPY 6 OF COPIES

SECRETAD-10

SECRESTORS WERE CASTORED, ALONG WITH TORS OF STATIONARY SURFRE DIVISION
SUPPLIES AND COMMUNICATION SECURENT. MARINE CORPS FORCES IN HARVEST MOON WERE
UMGAGED WITH AT LEAST THE MAJOR ELEMENTS OF MST VC REGIMENT, LOCAL FORCE UNIT
THE CHERTLISAS AND THE 519TH AA BH (PAVN), WHICH WAS RECENTLY INFILTRATED INTO
THE HARVEST MOON AREA. IT IS CONSIDERED THAT THE 519TH AA BH AS RENDERED

LEEPFECTIVE BOTH IN THEIR AIR DEFENSE ROLE AND IN SUPPORT OF VC GROUND OPERATIONS
BY MARCOR AIR AND GROUND ACTIONS IN THE OPJECTIVE AREA. THE OPERATION UNCOVERED
A MAJOR VC LOCISTICS BASE AS CUTLINED BY THE NUMBER OF SUPPLY CACHES, MEDICAL STORES,

UMAFORS CACHES, AND A UNIFORM CLOTHING FACTORY DISCOVERED IN THE AREA.

- A. VC CASUALTY FIGURES, EQUIPMENT/SUPPLIES CAPTURED:
- (1) PERSONNEL CASUALTIES (CUMULATIVE) AS OF 191800H: BY GROUND ACTION:

 KIA 31A BY ACTUAL BODY COUNT, EST KIA 327, EST WIA 98, VCC 33 (INCLUDING 4 PAVN),

 KALLIERS 3 (INCLUDING 2 PAVN), VCS 231. BY AIR OPERATIONS: KBA 93 (INCLUDING 24

 BY SAC B-52°S), EST KBA 284, EST WBA 2.

CODUCTIONALLY, A SUMMATION OF STATEMENTS BY VCC. RALLIERS, VCS. VILLAGERS AND OTHER BONEV. S. MARINE SOURCES INDICATES AND ADDITIONAL 813 VC CASUALTIES.

- B. CUMULATIVE MPES CAPTURED: 2-57MM RR. J.-81MM MORTAR, 1-66MM MORTAR 1-50CAL.

 MG. 2-M1919AM RG., 1-RPG MG., 1-FRENCH LMG., 2-CZECH BRNO MG (ONE OF WHICH WAS A

 CHICON COPY), 12 BAR'S, 5 TSHG, 1 K50, 5 MAT 49, 1 AK, 14 M.1, 4 CARBINE (US)

 39 CHICON CARBINES (K.44), 8 MAS.-36, 3 MAUSER, 1 ENFIELD, 1 SMG, 1 RIFLE, 2 B.40

 ROCKET LAUNCHERS, 2 RIFLE GRENADE, LAUNCHERS, 1-12,7MM MG TRIPOD, 1-81MM MORTAR

 BASE PLATE.
 - C. SIGNIFICANT SUPPLIES AND EQUIPMENT CAPTURED/DESTROYED:
- (1) AMMO: OVER 10,000 RDS SA, 24 57MM RR RDS, 13-81MM MORTAR RDS, 73-60MM MORTAR RDS, 14 CASES .50 CAL, LARGE QUANTITY OF HAND AND RIFLE GREWADES.
- (2) EQUIPMENT: 9 ELCYCLES, 31 PICK/MATTOCK HEADS, 15 ENTRENCHING TOOLS, 4 AN/PROLED, 1 AN/PROLED, 1 AN/PROLED, 200 BAMBOO SIGNAL BRUMS, 3 SEWING MACHINES, AND A LARGE AMOUNT OF FIELD EQUIPMENT.
 - (3) SUPPLIES: 125 GALLONS OF FUEL, 500 FLASHLIGHT BATTERIES, LARGE CREET

SECRETARD MEDICAL SUPPLIES, 3.800 NETERS PLUS 40 BOLISTOMARMENDINISION

600 COMPLETED UNIFORMS, BUNDLES OF THREAD, 15,000 BUTGONS AND A LARGE QUANTITY OF

PAREN.

He FOOD STUFF: A LARGE STORE OF PEANUTS, 3 TONS OF SALT. 500 POUNDS OF SUGAR AND 300 POUNDS OF SCUP MIX, RICE, TEA AND FISH OIL AS NOTED AROME.

105HM ARTY BATTERIES MOVED BY MOTOR TRANSPORT CONVOYS FROM DA NAME AND CHU LAI

105HM ARTY BATTERIES MOVED BY MOTOR BY MOT

THE 155MM HOWITZER BATTERIES MOVED BY MOTOR CONVOY FROM DA NAHG AND CHU LAI TO SEPARATE FIRING POSITIONS INITIALLY. AS THE OPERATION PROGRESSED BOTH BATTERIES WERE QUICKLY DISPLACED INTO A SINGLE FIRING AREA THUS PROVIDING OVERWHELMING FIRE SUPPORT.

THE HOSTAR PLATOON WERE HELL-LIFTED FROM DA MANG AND THE SPECIAL LANDING FORCE AT SEA DIRECTLY INTO FIRE SUPPORT POSITIONS DEEP IN THE OBJECTIVE ARVA THUS TAKING ADVANTAGE OF SURPRISE.

THE TASK FORCE DELTA STAFT WAS INITIALLY HELO LIFTED INTO THE LOGISTICAL SUPPORT AREA THEN QUICKLY RELOCATED BY HELICOPTERS TO AN ARVN OUTPOST DEEP WITHIN THE OBJECTIVE AREA.

RIFLE COMPANIES WITHIN INFANTRY BATTALIONS WERE REPLACED BY RIFLE COMPANIES FROM COMPLETELY DIFFERENT BATTALIONS AND REGIMENTS BELIX HELD LIFTED FROM THE DA NANG AND CHU LAI ENCLAVES THEREBY PROVIDING IMPETUS TO THE ATTACK.

TWO PROVISIONAL RIFLE COMPANIES WERE FORMED FROM MARINE ELEMENTS OF THE SPECIAL
