* BASE STATUS CODE:

Enter the one number each day, from the list below, which best describes the flight operations of naval combat aircraft from this base this day:

1. Conducting offensive air operations, or defense against actual or expected heavy attack.
2. Conducting only routine defensive air operations and non-combat flights.
3. Conducting only non-combat flights.
4. No. flight operations - weather
5. " " " - base damaged.
6. " " " - replenishing at sea.
7. " " " - ferry loaded.
8. " " " - cruising, non-duty.
9. " " " - in port.

Fill out each day to indicate maximum number of each model on board and available during the 24-hour period from 0001 to 2400 LZT on the previous calendar day. Carriers include all planes on board except those aboard for transport only. Shore bases include only combat models assigned to squadrons and detachments listed at top of sheet. See full instructions. "Available" means, for combat models, able to perform a normal combat mission and for non-combat models, able to fly; inability of base to launch or land aircraft will not reduce availability, but should be noted below. Include as "On Board" and "Available" any planes in flight.

* BASE STATUS CODE:

Enter the one number each day, from the list below, which best describes the flight operations of naval combat aircraft from this base this day:

1. Conducting offensive air operations, or defense against actual or expected heavy attack.
2. Conducting only routine defensive air operations and non-combat flights.
3. Conducting only non-combat flights.
4. No. flight operations - weather
5. " " " - base damaged.
6. " " " - replenishing at sea.
7. " " " - ferry loaded.
8. " " " - cruising, non-duty.
9. " " " - in port.

Fill out each day to indicate maximum number of each model on board and available during the 24-hour period from 0001 to 2400 LST on the previous calendar day. Carriers include all planes on board except those aboard for transport only. Shore bases include only combat models assigned to squadrons and detachments listed at top of sheet. See full instructions. "Available" means, for combat models, able to perform a normal combat mission and for non-combat models, able to fly; inability of base to launch or land aircraft will not reduce availability, but should be noted below. Include as "On Board" and "Available" any planes in flight.
