PART II. SUMMARY OF SIGNIFICANT EVENTS

1. With the cessation of bombing north of the 20th parallel, AECM missions in support of Navy strike operations were substantially reduced since the majority of the strike targets are located out of radar controlled threat environments. The freed ECM assets were used to up date the ROB of North Viet Nam, with special emphasis placed on Route Package One, and to locate suspected radar controlled AA/AW sites in I Corps.

[REDACTED]

2. Three (3) RF-4B aircraft were inducted into PAR/MOD programs during the reporting period. Although present availability is adversely affected, the programmed return of these aircraft should coincide with improved weather conditions and thus increase aircraft utilization during the summer months.

b. General situation briefs with emphasis on the Danang TAOR were given weekly to the officers and enlisted men of the squadron by the S-2 sections of the squadron and MAG-11.

c. Briefings by the Wing SERE Officer at Ringneck Brief on SAR, SERE, and MIG activity were continued for aircrews. The DMZ brief was continued, presented on a map of the DMZ TAOR and up-dated daily.

5. (S) Air Operationsa. (C) Photo

(1) There were eighty-six (86) photo sorties flown, completing forty-six (46) tasks, with fourteen (14) tasks pending (including continuous coverage tasks).

(2) Weather greatly hampered the squadron in completing its assigned tasks. Forty-four (44) sorties were cancelled due to weather. This is exclusive of airborne aborts because of weather.

(3) Laboratory Data:

Number of Prints Delivered	288,520
Number Negatives Printed	152,346
Feet 9" Paper Used	179,048
Feet 5" Paper Used	41,632
Feet 5" Positive Film Used	63,770
Feet 9" Positive Film Used	123

(4) The Ashau Valley Road and enemy enroachment route to Hue continued to be the number one day priority mission. During the reporting period, coverage of the Ashau Valley and/or enroachment road to Hue was obtained twenty-three (23) times, confirming enemy activity and numerous gun positions.

(5) Night infra-red missions also continued to dominate the priority list. Due to unfavorable weather conditions, only eleven (11) infra-red missions were flown during the reporting period. 1380 flight lines of infra-red film was developed, producing 300 suspected enemy positions. This sensor, coupled with the hot rendout capability, enables the gathering within minutes of intelligence data on the enemy when he is most secure in his environment. WMCJ-1's infra-red capability is recognized as one of the best sources of enemy detection at night within the ICTZ.

b. (S) Electronic Warfare

(1) A significant decrease in Navy support missions curtailed AECM missions distinctly. Support was provided on each occasion that it was requested by the Navy.

(2) The DMZ mission continued to be flown as in the past with the following changes of interest:

(a) Better coordination with Marine strike A/C resulted in a significant increase in the number of DMZ orbits modified to support them.

(b) A distinct increase in observed activity was noted in the DMZ/Tally Ho area. As many as five (5) Firecans were noted operating between the DMZ and Vinh during a single DMZ mission period. Also visual sightings of heavy AAA fire have increased.

(c) The coverage period on the DMZ was changed from 1700-0500H to 1745-0600H.

(3) The number of Passive ECM missions increased significantly during April. The quality of the emitter location procedures improved and there was an increase in Elint provided to Pacom Elint Center, Japan..

(4) A new Passive ECM mission was drawn up and flown in support of the 1st Air Cavalry. The priority of electronic search was Fire Control radars in the Ashau Valley.

(5) Through the month the following emitters were jammed in support of Air Force, Navy, and Marine operations in NVN:

FANSONG	0
FIRECAN	70
ROCK/CAKE STONE CAKE	1

not jammed:
