PART II. SUMMARY OF SIGNIFICANT EVENTS

1. VMCJ-1 continued to provide AECM support to the Navy strike operations south of the 20th parallel. Beginning 21 June 1968, VMCJ-1 provided EA-6A support to CTG 77.0 covering new MIG activity north of Vinh. The EA-6A's were tasked to jam GCI radars and the MIG to GCI net. Our efforts on 26 June were thought to be highly effective by CTG 77.0 due to the lack of evasive tactics used by a MIG which was shot down by Navy fighters.

2. A "well done" was received from CTG 77.6 140126Z for the U.S.S. Ticonderoga's no-loss, no-hit record for line periods 24 Apr through 12 May and 21 May through 14 June.

3. The photographic laboratory set two new records for production output during the month of June. There were 31,173 units of work delivered in one 24 hour period and for the month of June, 494,924 units of work were delivered.

Enclosure (1)

(4) Night infra-red missions also continued to dominate the priority list. Forty-nine (49) infra-red missions were flown during the reporting period. 9,652 flight line miles of infra-red film were developed, producing over 2500 emissions. This sensor coupled with the hot readout capability, enables the gathering within minutes of intelligence data on the enemy when he is most secure in his environment. VMJ-1's infra-red capability is recognized as one of the best sources of enemy detection at night within the ICTZ.
