3. (U) Important Visitors

On 12 December, Colonel Frank BORMAN USAF, NASA visited the squadron and toured the area.

On 24 December, Representative G. V. MONTGOMERY, Democrat - Mississippi, visited the squadron and received a static display.

On 29-30 December, Group Captain Michael J. R. SWINEY, British Air Attache and Squadron Leader Stuart W. HOLMES, Assistant Air Attache, British Embassy, Saigon, received an operational photo and EW brief along with a static display.

PART II. (S) Narrative Summary of Significant Highlights

VMCJ-1 flew fewer EW missions for the month of December than the previous month. Due to numerous cancellations by the Navy for unfavorable weather conditions, the Navy support missions decreased from 31 missions to 17. Also contributing was the fact that fewer passive missions were scheduled by operations.

SER: 003A670
7 January 1970

The tactics for the Navy and Air Force support missions remained the same. The DMZ was changed on 8 December to include support of USMC strike operations in the Steel Tiger area. Also in support of USMC strike operations nine missions were flown for the period of 19-21 December in the Barrel Roll area.

Three other missions of interest flown during December were two sorties in support of a SAR effort and one in support of Playboy 13, which had General THRASH aboard.

Photo Reconnaissance also suffered for the month of December due to poor I Corps weather. During the month, 259 RF-4B photo sorties were scheduled with 133 being launched. Of those not launched, 88 were cancelled for weather, 33 for aircraft availability, and 7 were cancelled by the 7th Air Force.

With 344 targets being attempted, 199 or 57.9 per cent were completed. Target per sortie rate was up to 1.49. Of the 145 targets lost, 43 were due to weather, 33 for camera malfunction, and 38 for missed targets and insufficient coverage.

Flying 19 IR and 15 SLR missions resulted in 242 nautical miles of IR coverage and 659 nautical miles of SLR coverage. Daily coverage of out-of-country EDA for MAG-11 was continued with 31 missions flown and 70 targets covered.

During the month, the Planning and Briefing section added a new Aircrew briefing table and also began work on new wall mounted target maps with indirect lighting. The color processing van remains in an up status with little called for usage.

On 13 December, VMCF-1 began shooting a second out-of-country mission (in the Steel Tiger and Route Package 1 areas) using the RA-55 High Altitude Panoramic camera. Weather has limited the use of the camera due to the 9,000 ft. shooting altitude.

On 29 December the III MAF Combat Information Bureau photo department began work on a color-sound film of VMCF-1. First shooting was in the ready room and then moved on to Planning & Briefing and the photo repair and processing vans.

1. In accordance with references (a) through (e), the following report is submitted.

SECTION I SUPPLY

1. Overall supply situation. The overall supply situation was considered satisfactory. There was a significant decrease in the total of HCU and MW items during this reporting period.

2. Class I. N/A
3. Class II. N/A
4. Class III. N/A
5. Class IV. N/A
6. Class V. N/A
7. Class VI. N/A
8. Class VII. N/A
9. Class VIII. N/A
10. Class IX. N/A
11. Class X. N/A

SECTION II - MAINTENANCE12. MAINTENANCE SITUATION

a. The Maintenance Situation during this period was satisfactory. The AOCF and AMFE rate increased slightly during this period. Supply assist was requested on six (6) different occasions. During this period the squadron flew 344 sorties for 672.6 hours, this is 3.2% and .1% above the CNO utilization factor for the RA6A and the RF4B. One RF4B was inducted in PAR at Abing. A total of 680.3 Awaiting Maintenance hours were documented during this period. This was due to a lack of personnel and ground support equipment (see para 13d1 Critical Items).

13. AIRCRAFTa. Status

<u>TYPE A/C</u>	<u>AVERAGE % - CR</u>	<u>AVERAGE % - NORS</u>	<u>AVERAGE % - NORM</u>		
RA6A	30.2	17.4	52.4		
RF4B	46.1	18.7	35.2		
<u>TYPE A/C</u>	<u>AVE NO A/C SCHED MAINT</u>	<u>AVE NO A/C UNSCHED MAINT</u>	<u>NO A/C BATTLE DAM</u>	<u>NO A/C ENG CHG</u>	
RA6A	1.2	4.1	0	0	
RF4B	1.0	2.0	0	0	

(1) RA6A

Of the 11 RA6A's on hand during this period a NORS rate of 7.4% above the average set in ref. (a) was obtained this was due to the numerous AOCF's listed in para. 13 b2, excessive fuel quantity problems on two aircraft and air conditioning problem on another. Also a major NORS factor is the lack of qualified personnel that performs poor trouble shooting and unnecessary components replacement. A NORM rate of 42.4% above the average set in ref. (a) was obtained. This was due to the high failure rate of the ALQ 86 test bench out of service (see para. 13c) and the extreme shortage of ECM qualified personnel. Also a causative factor was problems with the air conditioning system, fuel quantity system, and Scheduled Maintenance on two aircraft.

(2) RF4B

Of the 7 RF4B's on hand during this period a NORS rate of 8.7% above the average set in ref. (a) was obtained this was due to no specific problem areas, but to a numerous different system failure and the long outstanding NORS items listed in para. 13 b2. A NORM rate of 25.2% above the average set in ref. (a) was obtained. This was due to Scheduled Maintenance on one aircraft numerous fuel leaks and fuel quantity problems.

b. CRITICAL ITEMS1. Shortages of 115V 400C Electrical Power

The squadron is presently operation 11 RA6A's with an average of three ALQ 86 POD's on each aircraft. To check out these POD's and aircraft it is required that an NCIO with two good 115V 400C cables be available, one cable on the POD and one on the aircraft.

ECLO's with two (2) good 115V 400C cables are practically unavailable in the Group. Our next resource is to use two (2) ECLO's to check out the aircraft and system, by doing this we practically tie up our entire electrically powered power asset. This squadron has a daily average of two (2) ECLO's and one (1) EB-3 for aircraft starting, line maintenance and servicing. Also critical is the lack of two tractor and hydraulic test stands. The aforementioned Critical Items cause over 75% of the awaiting maintenance listed in para 12.

2. Critical Parts

The following is a listing of parts that contributed to the high MCRS rate attained during this period.

8. APQ 102 BECKMAN CENTER	

No other significant problem areas exist.

SECTION III - SERVICES15. Services Situation

The enlisted mess recreation hut has been completed prior to Christmas and is in full use at this time. Our energies expended toward its completion have been rewarded by this expansion of recreational facilities for our Squadron.

16. Significant Problem Areas

An improvement in the enlisted heads is hoped for by this Squadron. It should be remembered that the existing methods of human wastes disposal are primitive and inconvenient. A more permanent sanitary arrangement is suggested, such as those in operation at the Officer's billeting area.

SECTION IV - TRANSPORTATION17. N/A18. N/A19. Significant Problem Areas

No new transportation problems have arisen this month. But we still have the same problems as was stated in previous log book reports - vehicles in very poor condition.

SECTION V - LOGISTICAL PLANS20. N/ASECTION VI - MISCELLANEOUS21. Nothing of significance for the month of December.

- NOTES: 1. SUNRISE: 0707 SUNSET: 1818
 2. NATOPS BRIEF: ABORTED TAKEOFF
 3. DID YOU KNOW?--THAT MAX TIME ON STATION IN THE EA-6A IS ACQUIRED BY USING .60 IN THE CLIMB IF THE IP IS MORE THAN 37 NM FROM DANANG?
 4. DID YOU KNOW?--THAT IN THE RF-4B, BEFORE ELECTRICAL POWER IS APPLIED TO THE AIRCRAFT THE REFERENCE SYSTEM SELECTOR KNOB SHOULD BE SET TO STANDBY AND THE LATITUDE COMPENSATOR SHOULD BE SET TO 16 DEGREES. AFTER THE INS IS ALIGNED, THE REFERENCE SYSTEM SELECTOR KNOB SHOULD BE TURNED TO PRIMARY, AND THE LATITUDE COMPENSATOR SHOULD BE RETURNED TO 0 DEGREES?
 5. ECMO'S AND RSO'S LOG SPECIAL CREW TIME AND NIGHT TIME, BUT NOT INSTRUMENT TIME ON THE TIME SHEETS.
