PART II

NARRATIVE SUMMARY

In May, Marine Composite Reconnaissance Squadron One exceeded all previous records that were set since the squadron first began operations in RVN in April of 1965. Record breaking statistics were compiled in both Photo and Electronic Warfare operations.

The squadron completed 638 targets during the month. The previous record for VMCR-1 Photo operations was set in September of 1968 with 512 targets completed. Of the 638 targets completed, 318 were in-country day photo, 211 out-country day photo and 95 in-country night infrared targets. In addition, four side-looking radar and ten bonus targets were flown. The target completion rate was 79.7 percent and the target per sortie rate was 3.32. Of the 800 targets attempted, 172 were not completed for the following reasons: Weather 25, Camera failure 36, Aircraft malfunction 29, SLR Sensor malfunction 16, IR Sensor malfunction 6, Missed targets and insufficient coverage 30, and for other reasons 30. Infrared coverage amounted to 5,685 nautical miles, SLR coverage was 325 nautical miles.

The greatest problem area during the month was aircraft availability. Of the 252 missions fragged, 199 were flown. Cancellations included 42 for aircraft availability, 13 for weather and seven out-country missions were cancelled by the 7th Air Force.

The Electronic Warfare Section also set an all time record during the month of May by collecting, analyzing and reporting to the world-wide intelligence community 724 communist radar emitter locations. The previous record was established in August of 1969 when the squadron collected, analyzed and reported 609 communist radar sites. Data from previous years revealed highs of 33 emitters in December of 1967, 485 emitters in October of 1968, and 609 emitters in August of 1969. Fifty-seven percent of these intercepts were impacted sites. Of these 724 radars, 207 were members of the Fire Control/Missile Control families of Sino-Soviet emitters.

While this accomplishment is significant in itself, the bulk of this work was done as a secondary mission; the primary mission being Active ECM support of Navy Blue Tree Recce ops, USAF Buffalo Hunter Drone flights, USMC Blue Tree Recce ops, and HZ/Steel Tiger Flare Ship support.

~~SECRET~~PART IIISEQUENTIAL LISTING OF SIGNIFICANT EVENTS (S)

- 9 May On 9 May, Brigadier General R. P. CONLEY received a tour of VMJ-1 facilities.
- 11 May On 11 May, EWO conducted liaison visit to the USS Saint Paul to discuss AECM projects.
- 15 May On 15 May, starboard engine removed from RF-4B BuNo 153111. The forward top engine mount broke loose from the track assembly causing the side engine mount to shear off from the retaining airframe locks causing minor damage to oil tank, afterburner, and two fuel lines. Engine transferred to HAMS-11 for further disposition (Ref: VMJ-1 Msg 160620Z)
- 23 May On 23 May, EWO visited the USS America to coordinate AECM support for NVAR-12.
- 23 May On 23 May, during a photo run in RF-4B BuNo 153101, the Master Caution, Aux Air Doors, Speed Brakes, and Check Hydraulic gauge panel lights came on. Found utility hydraulic pressure had dropped to 500 psi. Gear and Flaps were blown down prior to a hardest landing.
- 27 May On 27 May, after 10 minutes of flight in RF-4B BuNo 153108, the right wing dropped and a buffet was experienced. Pilot thought he had taken a hit. At the time the outboard external transfer had been selected and the fuel gauge and panel lights indicated proper transfer. External transfer lights came on steady and outboard transfer was then secured. Minutes later pilot noted an increased fuel depletion and asked for vectors to the tanker. The tanker informed him that the forward one third of the right drop tank was missing. Post flight inspection revealed that section had departed cleanly. Remaining section of tank was not dented or bent and shows no sign of stress or stripping.
- 28 May On 28 May, A. F. P. JONES, USA, 1st MI Battalion, Saigon was given a tour of this squadron photo lab.
