1. General V.R. of Sherwood Forrest. Many trails through out the area. Because of the number it is difficult to determine any new trails and because of the small amount of rain & type terrain again difficult to impossible to determine active trails. (GRIDS AT8470, 8570 8670, 8770) Trails run generally E-W into the high ground. Observed one trail from AT844724 west (as shown on map) into rock formation at the AT849721 that looks like a cave entrance and surrounding area appear to have had some lumber cut down.
2. Diverted to assist recon team. Han over Sue had observed 2 en. carrying rifles and packs AT484539. Engaged with OV-10 and SHE. ~~GOOD~~ GNR results
3. Trails in the BT0052 have become cold and do not appear to be used as they had been recently (past 2-3 wks) possibly have move or changed route to areas further east where trails are a little hotter 0552, 0652 however not to the magnitude we had around R.R. bridge
