Part II Narrative Summary

(C) From 1 November to 15 November Da Nang ASRT A (system A-9) was ordered to refrain from making bombing runs due to the bad drop they had on 29 October. During this time ASRT A ran computer checks, a Table two check, had a antenna rebuilt and ran 10 Calibration Hops. They were permitted to resume making bombing runs on 15 November. From that date until 30 Nov ASRT A made 95 day and 129 night TPQ-10 bombing runs for a total of 224 runs.

Da Nang ASRT B, system A-15, was down most of the month of November. Besides the MASS-3 technicians working on the system, there were two radar officers, and a civilian technical Representative as well as additional technical assistance from MASS-2 personnel. All this help was to no avail as the set could not be brought up to consistent working status. The main factor for this was the extremely poor condition in which the set arrived in Vietnam during the last week in September. System A-15 is now scheduled to go back to rehab and be replaced by system A-1. Preparations were being made at the end of the month to site system A-1 on hill 200 near ASRT A. This will enable the pooling of technicians and operators, and will simplify the resupply of parts since hill 200 is the site of the radar warehouse.

Chu Lai ASRT A, system A-7, is the most consistent ASRT in MASS-3. Not only the radar, but also the beacon, has been consistently up since mid September. The Chu Lai ASRT is used in support of the Americal Division of the U. S. Army. The ASRT has been getting, on the average, 14 targets each night from the Americal Division. However, the ASRT has been getting only an average of five fragged and about three divert aircraft each night. In addition many of the targets assigned to the ASRT are over 25 miles away, requiring the aircraft to have a working beacon aboard. Unfortunately out of 158 aircraft worked by the Chu Lai ASRT during November only 81 had working beacons aboard. Thus on many nights distant targets go without being hit because no aircraft comes on station with a working beacon. With the small number of aircraft assigned to work with the Chu Lai ASRT, plus the relatively small number of aircraft that come up with a working beacon, the ASRT is not being utilized to its full capacity.

4. (U) Civic Action

During the month of November MASS-3 MEDCAP treated 128 children and 61 adults. 200 bars of soap were distributed throughout Trung Toan Hamlet for hygienic purposes.

On 9 November the MASS-3 Civic Action Officer passed out 12 scholarships to children of Trung Toan and Sam Hai hamlets.

On 10 November the MASS-3 Civic Action Team brought the Trung Toan hamlet officials to attend the Marine Corps birthday ceremony in the MASS-3 area.

On 14 Nov the MASS-3 Civic Action Team installed a hand pump on the main well in Trung Toan hamlet.

On 15 Nov the MASS-3 Civic Action Team, aided by several local farmers from Trung Toan hamlet, started an experimental garden using new farming techniques.

During the month of Nov 118 children were brought to the MASS-3 area to attend movies shown by the MASS-3 Civic Action Team.
