PART II: NARRATIVE SUMMARY

1. During the month of February, flight operations were limited by the seasonal monsoon. There were several days of good flying weather, but low ceilings and poor visibility were the rule for the better part of the month. Operations in the Phu Bai and "Chinook" TAOR'S were supported with six gunships and four slicks located at Phu Bai. Operation "Prarie" II was supported with two slicks located at Dong Ha.

PART III: SIGNIFICANT EVENTS

1. Personnel

a. Promotions. One person was promoted to Gunnery Sergeant.

b. One officer was joined, two enlisted were transferred, and two enlisted were joined.

2. Administration

a. No change of command within the Squadron.

b. No outstanding administrative problem.

3. Awards: One Airmedal, 23 Air Crew Insignia's.

4. Casualties. None

8. Intelligence/Counter-Intelligence

a. During the month of Feb 1967 the squadron's pilots, SNCO's and crewmembers were given briefs on the general intelligence picture in the I Corps Tactical Zone.

b. The Squadron's S-2 section has given the pilots preflight briefing on enemy troop movement, enemy antiaircraft positions and the FMAW's "Hot Flying Spots".

c. New liaison was established with the following units: 3d MarDiv Photo Lab, 280th Aviation Co., Photo Lab, and the 1st Counterintelligence Team.

(1) The Army Aviation Co has offered to help VMO-3 out with photos in case the 3d MarDiv load is heavy enough that there would be a delay in developing the photographs.

(2) The 1st Counterintelligence Team has offered their services taking fingerprints of personnel applying for clearances and to support this command in security matters.

d. All flying personnel have been briefed on the importance of Spot Reporting. There has been an excellent response by both Officers and Enlisted crewmen.

9. Air Operations

a.	Total hours flown:	491.7
b.	Total Gun hours:	197.1
c.	Total Slick hours:	294.6

	(2) 2.75	137 rockets

11. Special Operations. "Prairie II", and "Chinook".

12. Ground Defense. Upon arriving in Phu Bai, VMO-3 immediately became involved in the current ground defense plan. The basic perimeter defense was provided for by a reinforced rifle company and elements of various ground support units. Included in this were an artillery battery, amortar platoon, and various 20mm and quad 50 cal. gun positions. There were also two Army and two Marine tanks for readblock purposes. The entire perimeter consisted of the Phu Bai Airfield and extended across highway #1 to include the Army Radio complex and the 3rd MarDiv C. P. All this was within a 2 mile radius. The squadron itself was not involved with the perimeter defense, except to be used as a reaction force in case of heavy attack. The squadron came under the jurisdiction of Phu Bai Airfield Commander and MABS-16, who provided the internal guard. The guard consisted of three reliefs for nine walking posts within the Camp complex itself. We provided ten men as our contribution to the internal guard on a monthly basis. In the events of a mortar, ground or air attack, all Pilots, Crew Chief's and gunners would muster at the ready room to man the aircraft in the event of a launch. The remaining personnel would muster with the Assistant Ground Defense Officer and the 1stSgt in the squadron area and standby for use by the Base Guard Officer as a reaction force to supplement the guard. Our reaction force is the equivalent of one platoon.

14. NBC Warfare. NBCD teams were designated. A lecture on Chemical agents was given to all Officers. The NBCD NCO ordered a MCI course on Chemical Protection and decontamination which is being used for informal training of NBCD teams within the squadron.

15. Training

a. General Military Subjects Training. The NCO leadership group study is being continued.

b. Technical Tranining . Conducted by the individual departments through on the job training.

c. Pilot Training. Every effort was made to schedule each pilot for a different type flight each day, so that knowledge and experience might be gained in all of the different types of missions which a Marine Observation Squadron performs. A minimum of two "All Pilots Meetings" were held each week. One emergency procedure was discussed at length at each meeting, along with the combat experiences from which the other pilots of the squadron could profit. A brief was given by the Squadron NBC Officer.

d. Crew Chief and Gunner Training. Continuous through the gaining of practical experience. Each crew chief was assigned to a specific aircraft; and when an aircraft went down for maintenance, the crew chief went with his aircraft to the Check Crew where he learned about and performed the required maintenence on his aircraft.

e. Education. 33 personnel were enrolled in correspondence courses. 32 personnel took the GED College Equivalency test and 13 personnel took the GED High School Equivalency test.

17. Supply

a. Project Ø1 (aircraft operating funds) expenditures for the month of February totaled $4,837.13. No unusual purchases were required during this period.

b. The budget request for Project Ø1 for the fourth quarter was submitted for $45,000. This figure is based on projected increases in the number of aircraft for the next quarter.

c. Marine Corps Property has started in-kind clothing issue.

d. During the month of February the 3-M system for repairable aircraft items was implemented. It is anticipated that this system will speed up the time required to fill the requisitions.

18. Motor Transport. 12 vehicles assigned with a total of 3734.0 miles utilized. Two vehicles are awaiting parts, both M-677's.

20. Aircraft Maintenance

a. A total of 12 UH-1E aircraft are assigned. During the month, availability has averaged 67%.

b. During this period, two slicks have been operating from Dong Ha, and are rotated periodically for maintenance.

c. The most significant factor has been, and is, the problem of non-availability of several aircraft parts. There has been much improvement in the receipt of most items required, but some items seem almost non-existent, such as main rotor hubs and master caution panels.

d. One of the continuing problems we are encountering at the present is the sand. Daily cleaning of the aircraft is a must. We are now using a portable washing machine, but are in the process of building a wash-rack that will add to the water capacity, making the cleaning a faster process. Working conditions are better with all personnel improving their working areas. Much improvement has taken place since last report.

21. Avionics.

a. There are 26 personnel assigned: Four men on detail, two men assigned to Dong Ha, one man to Operations for Photo work.

b. Work is increasing as hours on the equipment increase. Problems of a minor nature were caused by climatic conditions such as moisture and sand in control boxes and cannon plugs.

c. A high priority item is the FM (ARC-44) with improved Supply Support from the Rotable pool.

d. The Base radio (FM) is in operation.

e. The ARN-52 (TACAN) is the hard-to-get item at this time.

f. Tools and the cleanliness of them is a continuing problem as rust is an ever present hazard.
