Hence we requested fixed wing support. After contacting fixed wing (Love Bug 316) Baron "8" stated the enemy had broken contact and that he wanted to run the fixed wing himself. The mission 1074 was then aborted. We proceed out the Cu Viet River to assist the med evac helicopter extract eight med evacs from YD 268722. The mission was successful and went without incident and we were proceeding to QT when Phitsrat passed us an emergency Recon extract of Team Allatross located at coordinates YD 193458. The team had compromised their position and were receiving fire from a tree line directly east of their post and also received fire from a bunker complex a km due west of their post. Located their post and requested a section of CH46's to perform the extract and in the interim attempted to get fixed wing support as well as provide cover for the team. 2 CH 46's arrived on station and the lead a/c elected to perform the extract. As soon as the 46 started to approach the zone we raked the area with rockets and guns to provide protection for the a/c and the team. The mission was successfully completed at 1930.

NVA Defeater on Hill 190 (V0 065573) To recover the body of a recent Lieutenant. Chatterbox 20-142 were also standing by to orient a position platoon or extract the team ~~from~~ ^{from} the hill. At 0800, we received the word that the team was in contact. The reaction proceeded to the target area (Hill 190 - V0 065573) to work with the AO on station, Southern B. One member of the team was killed initially and in the contact and the other three were wounded. One NVA soldier was spotted in the rock outcropping at the top of the hill and numerous firing posts were made utilizing the down gunner. These numerous posts revealed, eventually, in at least one NVA ~~USA~~ ^{USA} One member of the team was able to retreat to relatively secure ground. The transport aircraft picked up the reaction platoon and inserted them very near the top of the hill, on the east ridge. Searingly 4-142 delivered responsive fire in the area while the insertion was in progress with the reaction force. The reaction force proceeded to search for the missing members of the recent team. They were subjected to moderate mortar fire and small arms fire. The team located two of the four men ~~team~~ ^{team} and were forced to withdraw to a secure ~~position~~ ^{position} for extract. They became separated into three groups, two of which could not move and were located within full view of the NVA gunners. Chatterbox 20-1 proceeded to guide the pickup of each group. The first two were accomplished fairly easily, but the third was on the edge of a hill and only the expert opinion of this ~~group~~ ^{group} of the ~~team~~ ^{team} enabled them to be withdrawn as they were without team and

Finally 34's arrived and we departed QT for Recon insert of "Amada I" at XD 899488. The insert was uneventful & went smoothly. After completion of mission, we called the South Base to determine if any assistance is

in the area was needed. They informed
 us that they needed 2 priority + 2 routine
 medevacs from LZ Howls to Delta Med.
 We covered Heloy 8-1 + 8-2 while they
 entered the zone for the pickup.
 Mission completed and departed **2-13d**
 Stud to await the arrival of **2-13d**
 four aircraft that would be escorted
 to K.S. for a troop lift. However,
 a discrepancy was noted on SW 4-21's
 aircraft and attempts to repair **craft**
 were unsuccessful. Hence aircraft was
 returned to Q.T. No other aircraft
 available and mission was aborted.
