12 October 1970PART IINarrative Summary

During the month of September 1970, MAG-16 flew a total of 8,623.6 hours in support of Free World Military Assistance Forces in the I Corps Tactical Zone. Over 65% of the hours (5,905.2), and 75% of the sorties (22,492), were flown in direct support of First Marine Division. The remaining hours were flown in support of the First Marine Aircraft Wing, the Republic of Korea Marines, the Army of the Republic of Viet Nam and the United States Army. A loss of hours can be attributed to the torrential rain which began the last two days of the month.

There were two Change of Commands within MAG-16 during September. LtCol P. C. SCAGLIONE relinquished command of HMM-364 to LtCol H. W. STEADMAN prior to his return to CONUS. Additionally, LtCol C. A. FLOCK relinquished command of HMM-463 to LtCol R. R. LEISY and assumed the duties of MAG-16 S-1 Officer.

September witnessed another demonstration of the flexibility and versatility of the Marine Corps' Vertical Assault Doctrine. MAG-16 assumed the task of inserting a company of Army assigned personnel deep behind enemy lines in a highly classified and denied area. The operation was titled "Tail Wind" and had a two-fold objective; to disrupt enemy supply lines and to create a diversion for friendly forces. Air assets assigned came from various services. The total package included five Marine CH-53D, four Marine AH-1G and five Army AH-1G/UH-1E helicopters as well as two Marine OV-10, one Air Force OV-10 and numerous fixed wing aircraft. Under the superb leadership and control of Marine pilots the mission was highly successful, inserting the recon force in the vicinity of a Regiment size enemy force despite intense anti-aircraft and automatic weapons fire. Later the same air assets, led by Marines, extracted the friendly forces over a two day period while encountering an astronomical amount of enemy resistance. Against seemingly impossible odds, Marines successfully accomplished one of the most difficult missions of the war. Although two helicopters were destroyed without loss of personnel, the price was small in comparison to the results achieved. Over 432 NVA were killed of which 115 were destroyed by Marine Helicopters. Additionally, material destroyed was substantial and a large quantity of documents were captured. Saigon Intelligence expects these documents to yield the best intelligence information of the war. Without doubt, this extremely difficult task was achieved in a large part because of the Marine Corps' expertness, flexibility and creative spirit in Vertical Assault tactics.
