4. Intelligence: The S-2 section was primarily concerned with ensuring that all aircrews were well prepared for any eventuality they might encounter in the course of their combat flying. Survival packets, containing blood chits, pointie - talkies, survival guides, and maps, were issued to all flight crews. The S-2 Officer and his assistant stood daily watches at the MAG-11 briefing center. During these watches they briefed and debriefed aircrews prior to and immediately after all combat missions. Briefs were designed to keep aircrews up to date on the current situation in Vietnam, and in particular, to give them as much information as possible concerning their particular target area. This included the location and potential of the AAA and SAM environment, a complete rundown of all recent fire incidents in the target area, the location of S.A.F.E. areas, and the relative positions of enemy and friendly troops.

5. Air Operations: September was a very rewarding month for VMFA-122. The squadron flew day and night, performing many and varied missions in support of several major operations. 467 missions were flown, for a total of 628 hours. These missions included TPQ, close air support, direct air support, helicopter escort, landing zone preparation, armed reconnaissance, and the bombing of targets in the Tally - Ho and Ashau Valley areas. Also during this period a two plane "hot pad" was constantly manned and ready to go. This "hot pad" was frequently scrambled, and performed many of the types of missions mentioned above. The squadron flew missions in support of the following operations: Neutralize, Ashau Barrier, Fortress Sentry, Samurai II, King Fisher, Neutralize "A", Ardmore, Shelbyville, Rope Yard, and Dragon Fire.
