It Higgins skillfully extracted several internees from two zones, each zone being covered by low clouds. In addition, one zone is almost ~~impossible~~ to land in when the weather is good.

It Higgins was no doubt instrumental in saving the lives of several Marines.

Scarfaced 3913 covered It Higgins as he made the extracts. Several times during the day, Scarface made attempts to find openings into the zones.

The poor weather restricted their visibility and made it necessary for them to fly at slower airspeeds and low alt., thereby exposing themselves to hostile fire.

It Balfour

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution to ensure that the problem is solved.

Higgins

Cattle-call 2 & 3 flew ~~emergency~~ into
Beach near Kilo at BT 0042. The group
was 1FR and ~~4~~ HMM-364 was
moving a troop left in the same area.

A Swift a/c flew ~~emergency~~ close to Cattle-call
3 and cut him out in front.

Lt. M. K. Higgins, while approaching.

12 Baldy ~~and~~ incurred a ~~top~~ main-keg
failure. ~~Swift~~ Prolonged single engine flight
was not possible due to the fact cattle
call - 3 was ~~in the way~~ 22 pax but Lt.
M. Higgins exhibiting fine professional skill
and ability successfully rolled the aircraft
on the runway.

Extremely poor weather in the morning.
Otherwise routine VR's.

*Pilots feel that observers on VR's are often along for ride rather than to accomplish anything useful. One talked to pilot for full 30min. without looking out the window or taking one note!

1. Definition: Ein Polynom ist ein Ausdruck der Form $a_n x^n + a_{n-1} x^{n-1} + \dots + a_1 x + a_0$, wobei $a_0, a_1, \dots, a_n$ reelle Zahlen und x eine Variable sind. Die Grad eines Polynoms ist die höchste Potenz von x , die vorkommt.

2. Beispiel: Das Polynom $3x^2 + 5x - 7$ hat den Grad 2. Die Koeffizienten sind $a_2 = 3$, $a_1 = 5$ und $a_0 = -7$.

3. Operationen: Polynome können addiert, subtrahiert, multipliziert und dividiert werden. Die Addition und Subtraktion erfolgt Term für Term. Die Multiplikation erfolgt nach dem Distributivgesetz. Die Division erfolgt durch Polynomdivision.

4. Nullstellen: Die Nullstellen eines Polynoms sind die Werte von x , für die das Polynom den Wert 0 annimmt. Sie werden durch die Gleichung $P(x) = 0$ bestimmt.

5. Graph: Der Graph eines Polynoms ist eine Kurve, die die Nullstellen und das Verhalten des Polynoms für große positive und negative Werte von x zeigt.

6. Wichtige Sätze: Der Satz von Vieta verbindet die Nullstellen eines Polynoms mit seinen Koeffizienten. Der Satz von Descartes gibt eine Methode an, die Anzahl der positiven und negativen Nullstellen eines Polynoms zu bestimmen.

7. Anwendung: Polynome werden in vielen Bereichen der Mathematik und der Naturwissenschaften verwendet, um Funktionen zu approximieren, Gleichungen zu lösen und die Dynamik von Systemen zu analysieren.

[illegible]

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the root cause of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and putting them into practice. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas for improvement.

SECRET

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific information required.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Emergency Medevac

Lt. Higgins made two medevac extractions from zones 962 395 and 953 385 which were socked in with very bad weather. The zones were tight, with trees and hillsides on all sides.

2 Scarface birds (3 and 13) probed the area several times trying to locate the zones thru heavy cloud cover. We followed at very slow airspeeds in the area confined by a low ceiling and mountains on most sides.

The scarface birds did an outstanding job of getting us into and out of the zones. Lt Higgins flew skillfully throughout the entire mission and most probably saved the lives of the two emergency medevacs.

Charles L. Sizer
