Enroute to LZ 54 from An Hoa  
 We took fire from 0157 grid. The  
 pilot was at the controls at the time  
 of the incident. Due to a ceiling of  
 200-250' and 1-1/2 mile vis, we  
 were at an altitude of tree top and  
 110 kts, second A/C behind "key slide".  
 We had just completed a morning VR  
 and were enroute to LZ 54 to drop  
 off 23 PAX from AN HOA. Our  
 mission at the time was #20.

The copilot would commend the  
 pilot's superior aviatorship and  
 command of emergency procedures which  
 undoubtedly averted complete loss of A/C  
 PAX and crew. Immediately after receiving  
 fire #2 engine was lost as a result of  
 engine & transmission oil lines being damaged.  
 A single engine run-on water landing  
 was professionally executed by the pilot under  
 the worst possible conditions F.A. G.P.

The weather was horrible, which wouldn't be so bad if they hadn't flat out lied to us and told us we had 2000 ft, if we had 200 ft we were lucky.

We were sitting at LZ 401 with about 200 ft and 1 mile when we were told we had 2000 and 5 mi by Luminous Base who said they got it from a PIREP.

On short final (50') to rice paddy (AT957509), the right door gunner opened fire on the tree line about 20 meters away at our 3 o'clock. The aircraft was immediately flown out of the zone while the right gunner continued suppressing fire. The climb-out was made to the left. Going into the zone several farmers were noticed quickly fleeing the zone but they showed no indication of having weapons. Our wingmen also received and returned fire at 1500'. Neither a/c was hit.
