11. AVIONICS

a. Com/Nav. In the month of November only 35% of available manhours were expended in direct labor due to labor codes 700-800 which include such tasks as flying, working parties, and guard duty. FM and Tacan (Rt384/ARN-52V) discrepancies have been kept to a minimum due to an adequate supply of rotatable spares and the increased proficiency of Com/Nav. technicians. Three men were assigned to H&MS-16 Avionics Shop for IMA work as the squadron continues to strive for greater versatility of its radio technicians and electricians.

b. Electric Shop. During the month of November the squadron encountered several torque problems. S-4 has two torque calibrating tools on order and H&MS-36 is making weights for the squadron so maintenance can have its own dead weight torque calibrator. The Electric Shop expended 40% of its 500 manhours on MAFs, SAFs, and TDCs. The remaining time was spent in the 700-800 labor codes.
