and returned to LZ Ross to await a flare ship. The UH1E's proceeded towards LZ Baldy because Wing A/C was loaded with 195600 pots and LZ Ross provides marginal stake off clearance. Enroute to Baldy both UH1E's went IFR at 400', leader climbed to 3000' and contacted G/LA and made successful landing at MMMAF. Wingman was IFR at 1500', lost A/C instrumentation and proceeded IFR to LZ Hawk Hill. Subsequent to these events the Emergency MED-EVAC was downgraded to priority.

Took fire

O.P. Discrepancy:

While involved in msn. 71, the rocket belt reconnaissance, the loach (Blue Chest 10) received fire (one rd., possible RPs) ~~from~~, which ~~to~~ exploded at his tail. The loach became hard to control and deserted it back to mms. My wingman called DASC for permission to fire and was refused. The reason given was that there were too many villages in the area. There are none. Only some leveled foundations and unilluminated rice paddies. Under the rules of engagement (order 000.0), if an aircraft receives fire, fire may be returned immediately.
